ELIZABETH P. EVANS, Pasadena, Cal.

The prophet Esaias says, "The people which sat in darkness saw great light; and to them which sat in the region and shadow of death light is sprung up." Christain Science overtook me dwelling in the "shadow of death." When an eminent physician kindly told me of his helplessness in my case, that my only alternative was to endure patiently until death came to my relief, I was not greatly disturbed, for, in the words of Paul, I had a "desire to depart, and to be with Christ." Then, too, I recalled the words of the psalmist: "Wait on the Lord: be of good courage, and he shall strengthen thine heart." I was in this attitude of watching and waiting when lo, swift on its wings of healing, came Divine Science, shedding its halo of light, sounding the bugle-call of Truth: "Awake thou that sleepest, . . . and Christ shall give thee light," and I suddenly awoke to the consciousness that I did not have to "die to live" nor "depart" to be with Christ. Under the searchlight of this Science our Master's words stood out in letters of gold: "I am the resurrection and the life: . . . and whosoever liveth and believeth in me shall never die." In the words of the Revelator, "I took the little book out of the angel's hand, and ate it up; and it was in my mouth sweet as honey." I found "Science and Health with Key to the Scriptures" complete *per se*, and it is and will ever be to me a "lamp unto my feet, and a light unto my path." Paul asks, "What communion hath light with darkness?" Mrs. Eddy tells us that "light and darkness cannot dwell together. Light extinguishes the darkness" (Science and Health, p. 474); while John declares that "God is light, and in him is no darkness at all."

Before this spiritual light penetrated my mental darkness I cried unto the Lord for help. In this attitude of earnest longing what joy was mine when Divine Science revealed to me the one living and true God and His relation to man and the universe. Awakened in Divine Science one stands appalled at the "ghastly farce of material existence" (Science and Health, p. 272). When thoroughly aroused, one is impelled to arise and hasten to put on the "whole armor of God."

When it comes to honoring the Discoverer of this wonderful Science, what shall I say? Suffice it that I say of her, in the words of the apostle, "Whom having not seen" (in the flesh), I love; and "rejoice with joy unspeakable and full of glory."—PEARL REAMES, Little Rock, Ark.

I feel that I must express my gratitude for what Christian Science has done and is doing for me and mine. It is a little over five years since I turned to Christian Science for help, after all material means had failed to cure me. We had traveled from place to place, I had undergone an operation, had tried many doctors, and they had pronounced the disease incurable and said there was no help for me. The last doctor to whom we went said I could live only a few months at the most. It was at this time that I asked for help through Christian Science. The practitioner assured me that God could heal me; but this was hard for me to believe, as I had prayed to Him and had come to think that if there really was a God He would not let me suffer as I did. I had been a member of an orthodox church for several years, but had never known what it was to feel well. As there was nothing else to be tried but Christian Science, I took treatment for several months and read Science and Health. In a little over a year I was perfectly healed, and have been well ever since. A little more than a year ago a baby was born to us and I was in bed only one day. The birth was almost without pain, and the baby is a picture of health and the joy of our home.

We have had many beautiful demonstrations of the healing power of Truth in our home—being a family of five—and we rely absolutely on God as our Physician. My husband has been healed of a supposedly inherited tendency to severe headache, from which he had suffered all his life before coming into Science. The tobacco habit also has been overcome. For these and many other blessings we are truly very grateful for the teachings of Science and Health, and also for learning that there is a God and that He is a God of Love and sends nothing but good to His children. I thank God for giving us such a dear, patient Leader,—one who has brought this freedom to mankind. I thank Mrs. Eddy for giving us "Science and Health with Key to the Scriptures."

MRS. LEAH METCALF, Spokane, Wash.

Twelve years ago I found myself a physical and mental wreck, after over forty years of devotion to what are considered by the majority of Christians the highest forms of spiritual, intellectual, and physical teaching. I had been a singer and teacher of singing, as well as a lover of books and a writer, but I found myself suddenly stripped of energy, strength, eyesight, voice, and well-nigh of hope. Born within touch of the Christian Science movement, my

Digitized by Google

thought was so fixed upon inherited and educated creedal beliefs that even the name had escaped my notice, and of its teaching I was wholly ignorant. In the time of my greatest need, however, I was sent to a practitioner without knowing what she practised, but I thank God that from that first glimpse of the truth I have never for one instant doubted its divinity. My faithful helper aided me in realizing sight and strength, voice and supply,—in short, general harmony,—and I arose "in the strength of Spirit" (Science and Health, p. 393), eager to spread abroad the "good news," and joyful beyond expression, exulting in the unending vista of spiritual power. All Christian Scientists understand the marvelous results we attain while on the mountain-top of newly awakened acceptance of Principle. Error faded into its native nothingness before my unquestioning drafts upon Love, Life, and Truth. Many battles have since been fought in the necessary proving of my faith; there were temptations from every side; but there was also unspeakable happiness and peace and courage as a present reward of faithfulness. Although I have passed that period to which material sense limits the expression of my professional work as a public singer, with fast graying hair and the record of many years in the service, I still have the joy of being and proving myself fresher, stronger, and a thousand times more acceptable, even from the singer's standpoint, than twenty years ago; and from the spiritual standpoint, what was a fast-fading pathway, along which I passed with faltering, anxious step, has become, through Christian Science, a surer, brighter, and sweeter way.

I thank God for the incomparable gift of Christian Science, and the inestimable blessings which have come through our beloved Leader's untiring efforts to this generation and to all succeeding generations. I thank Him, too, for the high spiritual understanding and wisdom which so carefully collects and sifts for the Field the helpful testimonies of those faced Zionward. May each and every worker attain so impersonal and loving a sense of the work given them to do, that all may share in its blessings.

CAROLINE WASHBURN ROCKWOOD, Staunton, Va.

At the age of ten a disease of the bone developed in my left leg. The bone came away in pieces, but after fifteen months I could walk again. Several years later, however, the trouble returned in a more obstinate form. Prominent medical men of the United States pronounced the case incurable, and agreed that an operation, or even amputation, would do no good, as the trouble would break out elsewhere. They told me I would never walk again. Years of suffering followed, other complications being added, such as lung, stomach, and heart trouble. Prolonged yearly visits to celebrated Virginia springs afforded no relief, and six months under a noted osteopath proved fruitless. For nearly five years I was trying to reconcile myself to crutches and an invalid's chair, until death should release me, and then it was that I heard from a friend who had been healed by Christian Science, and I was led to try it. On two crutches and wearing only one shoe, I went about two hundred miles to a practitioner in Richmond, Va., in October, 1904. After the second treatment the swelling in my foot vanished, and I put on a shoe for the first time in four and a half years. In two weeks and a half I discarded my crutches, and have not used them since, now ten months. I am no longer afraid of disease, either of the bone or of the lungs, and have had not even a bad cold during the whole of the past severe winter. After twenty months I am in perfect health, but greater far than the physical healing is the fact that I am learning to know my relation to God and man's inheritance as His child, His image and likeness. I am daily striving to be worthy of the name Christian Scientist.

MRS. OLLIE NACE LESLIE, Nace, Va.

It is seven years since I turned from *materia medica* in the hope of finding something which would give me health and happiness. From childhood I had suffered terribly with pains in my back and head, which became worse as I grew older, and when about twenty-five this with other diseases had become almost unbearable. Doctors, both allopathic and homeopathic, did all they could for me, but I only grew worse. After going through a very painful operation, which left me a nervous wreck, I turned from medicine to what I thought was Christian Science. Sad to say it was not Christian Science, but so-called mental healing. I was treated for three years, on and off, by different practitioners, asking always for Christian Science, but never finding it. In March, 1903, I came to Boston to live; and for the first time in my life attended The Mother Church. I shall never forget the first Sunday, although while there and for many days afterwards I suffered with a terrible headache. I knew that there was something I had not found which made those who attended that service so kind, well, and happy. I decided to find out what it was, and I asked questions of different ones who attended that and smaller Christian Science churches.

After many inquiries a dear, faithful practitioner and friend asked me to show her my books, which I did with great eagerness. To my utter astonishment she said, "These are not Christian Science books." She then promised to lend me a copy of Science and Health until I could get one of my own, which would be several days. I began to read it eagerly, for I was hungering and thirsting "after righteousness." Before I had finished the chapter on "Prayer" I was fully convinced that the writer of that book must be living very close to God, and I was anxious to read not only Science and Health, but all of her writings. I have attended the Christian Science church every Sunday since, when I have been where there was one, and when elsewhere I have had my little service either alone or with any Christian Scientist who might be where I was.

It has been my lot to visit several places in foreign countries where the teachings of Christian Science have been misunderstood, and while I do not feel that I have grown sufficiently in the understanding to tell them as much as I should like, I do try to help them by sending them our literature. I have had some beautiful demonstrations of healing, both of sickness and sin in myself and others, and I do know "in whom I have believed." Since striving to follow the teaching of Christian Science, I am fully convinced that it is the religion of Jesus Christ, and that it is the right way to serve God and man. I am waiting patiently, and earnestly studying the Bible and Science and Health for more light, which will come according to my fitness to receive it.

Thus far the Bible and the writings by our Leader have been my only teacher, and I thank God, and with my whole heart am profoundly grateful to Mrs. Eddy, for the blessings that have come to me and my family through Christian Science.—ANNIE E. MARTIN, Winchester, Mass.

I have received so much benefit from Christian Science that I gladly write to acknowledge my indebtedness to it for what it has done for me. I feel that every one who suffers should know of Christian Science. For nearly sixteen years I suffered with lameness, following childbirth.

Digitized by Google

I had tried many different remedies and been attended by the best doctors, but derived little benefit. I was in a terrible state, and I think few women can have suffered as I did; so acute was the pain that I could hardly get about the house. An old friend of mine urged me to try Christian Science. She was so enthusiastic over its merits that I accepted the treatments, and I thank God that I did. I have ceased to suffer and be lame, and am now as well and strong as any one, for Christian Science has brought back to me all the health and strength of my girlhood. It is a pleasure to me to attend to my duties, as the effort does not distress me; and to think that all my pain has vanished forever. I thank God for this wonderful Science which has healed me.—Mrs. E. B. Finch, Whitewater, Wis.

It is now over a year since Christian Science brought me from the depths of suffering and depair. In August, 1904, I was taken ill one morning with a pain so intense I could hardly move, and after suffering a few hours a physician was called, who diagnosed the case as an ovarian disease. I steadily grew worse, and suffered agonizing pain through my whole body. I received no benefit whatever from medicine, and was kept under the influence of morphine constantly. After five weeks of this suffering I was obliged to break up housekeeping, and was then taken to the home of my parents. Another physician was called, but the results were no better; so a third and a fourth were also called. It seemed that each one differed from the others, and none knew what was the matter, but all agreed that medicine could not cure me, and that I must undergo an operation immediately, so arrangements were being made for me to go to a hospital for the operation. It was now eleven weeks that I had been suffering, not being able to bear my weight on my feet. One physician said I had taken almost enough morphine to kill me.

It was at this time of darkness and trouble that Christian Science was brought to my notice through a kind neighbor who had accepted this truth. She asked me to try it before having an operation, and the next day a Science practitioner was called. The same afternoon, after receiving one treatment, I arose, dressed myself, and walked a block to the home of this neighbor. The next evening I walked a mile, and the following day being Sunday, I attended the Christian Science church and felt but little discomfort after the long walks. I am now keeping house again and doing all my work, walk as much as I please, and do anything I wish to. Through this demonstration all of my parents' family and my husband have become Scientists. The understanding I have gained of Christian Science has also been of great help to me in my daily living. My desire is to serve God in return for this great blessing to me.—Mrs. Anna King, Sandusky, O.

When in 1901 Christian Science was first brought to my notice, I had been a sufferer for about two years. My case had baffled a number of the medical fraternity in Kansas City, Mo. One of these pronounced it a very serious stomach trouble, and he tried to prove to me conclusively, by reading extracts from different medical works, that he was correct in his diagnosis, but he did not attempt to prescribe for me or give me any encouragement other than to recommend that I change my occupation as conductor on a street car. He insisted on this change, saying that a further aggravation would probably result fatally. I believed that he was perfectly honest in what he told me, as well as the other doctors, who signally failed to give me relief. A few days later I appealed to another doctor, also of Kansas City, and he recommended that I try Christian Science. By the advice of different doctors I had been maintaining a rigid diet for many months, and as a result of this was considerably emaciated. I accepted this good doctor's suggestion and the next day called upon a Christian Science practitioner, who told me that I might eat anything I pleased, and after giving me a mental treatment assured me that there was no necessity for changing my occupation on account of my physical condition.

I straightway purchased a copy of Science and Health, and took not more than four treatments. I have ever since been entirely free from any symptoms of my former enemy. This trouble at the time seemed a great mountain to me, but it was never so large as the mountains of sin which have been overcome in my daily life by the perusal of Science and Health and other writings of our beloved Leader, Mrs. Eddy. I had been an inveterate smoker of cigarettes, used intoxicating liquors too freely, and profanity was my constant companion.

I am now in perfect health, and neither drink, chew, nor smoke. My conversation has been so modified that I do not have to take thought for the presence of ladies before speaking, and the Bible and Science and Health are my daily companions.—W. L. Bousfield, Auburn, Neb.

Some months ago I was led to try Christian Science treatment for the healing of severe throat and stomach trouble, with which I had been afflicted for five years, although I had been treated by some of the best physicians. From the time of taking the first treatment through a Christian Science practitioner I was greatly benefited, and at the end of three weeks was entirely healed. I am doing my work in Science as I have been taught, each day becoming stronger in the faith, and I know that it is the religion which heals. I cannot be grateful enough for the understanding I have received and for the physical healing which I have experienced, but I take this method of returning thanks to God, and of expressing my gratitude to Mrs. Eddy, for all the blessings that have come to me since I have been reading Science and Health. I am also very grateful for the *Sentinel* and *Journal*.

G. C. Rutledge, Porter, Wash.

[Written for the *Sentinel*.]

HEAVEN IS WITHIN.

HAROLD SUSMAN.

The weary world has gone to sleep,
Is lulled at last in slumbers deep,
And ever dreams of sin;
It dreams that evil here must stay,
That goodness is far, far away,—
But heaven is within!

It dreams a dreadful nightmare dream,
Where sin and sickness reign supreme,
Mid dire and doleful din.
Oh, when will mortals ope their eyes,
Awake, and rouse, and realize
That heaven is within?

When men and women understand
That harmony is here at hand,
To live they will begin;
To live in God, for God is Life;
Where then is sickness, sin, and strife?
Lo, heaven is within!

FROM OUR EXCHANGES.

[*The British Congregationalist.*]

There is every indication that a period of acute theological controversy lies before the churches of this country. The emergence of the New Theology has only precipitated what has long been in preparation, and to those who have kept their eyes open there is nothing surprising in the present condition of things. Nor is there any great cause for alarm. . . . It is the condition of a living faith that there should be constant change in the forms in which it finds expression. The processes by which this comes about are often both intricate and painful, but their result is a salutary one, and it is the part of those who profess to believe to wait patiently and fearlessly till the result is achieved. . . . There are signs at the present time that all this unrest will only issue in a steadier and more reasonable faith. If it has no other result than to make men think, look round, and ask themselves where they are and whither they are tending, it will at least justify itself.

[*The Christian World.*]

When the Church reaches once more that first temper; when it offers to men what the first believers offered, its great moment will have come again. It has centuries of lost time to make up. It has to retrace long leagues of wandering in order to get back to the track. We need not trouble about the revelation of truth. That is streaming in upon us from all quarters. What we want is to enter again into the gospel's open secret. When the Church has caught afresh its first great rapture of love and set it forth in the works that follow, there will be no infidels in sight.

[Rev. Burt Estes Howard in *The Christian Register.*]

Religion has been too largely confined to energy that runs in vertical lines. It has been regarded as something that has to do with God and the individual. But Jesus took these vertical lines and bent them till they ran horizontally, and made religion something that takes place between the individual and his fellow-men. Jesus did not seem to care much for sacraments, but for service. He was not careful for litanies, but for life.

[*Zion's Herald.*]

If you would be distinguished, cease to be a sinner, and become a saint. In sainthood there are all manner of possibilities of distinction. In the astronomy of grace there is room for any number of radiant stars differing one from another in glory. It is only the black night of sin that is the same and indiscriminate—the galaxies which stud God's heavens have all their peculiar charm, their individual glory.

[*The New York Observer.*]

Men should be made to feel that there is another life, and that, too, not merely a continuation of existence, but an improvement of it, so that good men who die in the Lord, begin again, when this life is over, on a new and loftier plane of experience. This life is but prelude, introduction, portal, preface, vestibule. Now we hear but the tuning up of the orchestra for heavenly symphonies.

[From the *Christian Commonwealth.*]

I wonder whether the theater is not steadily encroaching upon the domain of the pulpit and becoming in a very real and helpful way a moral and religious instructor, and that without the deadly vices of organized Christianity — narrowness, bitterness, uncharitableness, sectarianism. It would be contemptibly mean for "religious" people not to recognize the good work that is being done by certain of our playwrights and actors.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., C.S.D. 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

MR. KIMBALL'S LECTURE. 31 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. 25 pages.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2.25
Twelve or more books to one address, each, prepaid 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . . 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,
Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.60.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration will be found on the wrapper. No other notice will be given.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba; twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

In all other countries, six cents per copy, postpaid to any address; twenty-five copies, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST

National.

The first step to enlist the college students of the Nation, as a body, in the peace cause, was taken two years ago at the Lake Mohonk Conference on International Arbitration. A committee of several prominent educators and college presidents was then appointed to inaugurate and further the work among the colleges and universities of the country. This committee, whose chairman was Dr. Daniel C. Gilman, ex-president of Johns Hopkins, has been instrumental in forming peace societies in several colleges, and through his efforts prizes for essays, courses of lectures on the subject, and peace meetings have been provided in other colleges. As a result of the work of this committee the Intercollegiate Peace Association of the Middle West was organized in 1905. This Association now numbers thirty-two institutions in its membership, and recently held a large and representative convention at the University of Cincinnati, Ohio. In connection with the National Peace Congress in New York, this spring, representatives from the eastern colleges met at Columbia University under the auspices of its Peace Society, and an Intercollegiate Peace Committee was created to further the movement among the colleges of the East. A resolution was also passed by the National Peace Congress, providing for the appointment by that body of a committee on colleges.

The total Government receipts for the fiscal year which ended June 30, were $665,306,134. This amount exceeds by over $70,000,000 the revenues of any other year in the history of the Government. The receipts from customs aggregated $333,230,126, and from internal revenue $270,309,388. The receipts during the year exceeded the expenditures by $86,945,542. The so-called working balance now actually in the Treasury is over $83,000,000 and in addition there is over $171,000,000 on deposit in the national depositary banks at all times subject to call. There is also in the national depositary banks nearly $11,000,000 to the credit of disbursing officers, and $3,723,000 of Government funds in the Philippine treasury, making a total of $268,543,000.

The Board of Police Commissioners of San Francisco has just denied the application of five Japanese for the privilege of renewing their permits to keep intelligence offices in that city, and refused two Japanese applicants who desired to obtain new permits for the same business, on the ground that the applicants are not citizens of the United States and that the policy of the Board had been always to give the preference in these privileges to citizens, against those who are not and cannot become citizens.

The Melrose, Mass., School Board has voted that "secret fraternities are detrimental to the best interests of the school, that no meetings of the fraternities should be held on school premises, no pupil should be initiated into the fraternities, and that any pupil initiated or taking part in any secret fraternity will be denied all privileges in the school, as athletic, literary, or musical, except the actual attendance at school." The rules will go into effect with the fall term.

The American Bankers' Association has complained to the Interstate Commerce Commission that the express companies of the United States, active as common carriers, are usurping the prerogatives of banking associations, and at the same time are employing the capital of the banks of the country in the conduct of their business.

Attorney General Bonaparte has directed that suits numbering in all one hundred and eighty-eight be instituted against some of the leading railroads of the country for violations of the safety-appliance act. The cases will be scattered through the various Federal Courts of the country.

When the registration books were closed on Sunday, July 1, at Manila, only seven thousand three hundred voters, including eight hundred Americans, had registered. The native leaders expected there would be about nineteen thousand.

Sir Chentung Liang-Cheng, the retiring Chinese Minister accredited to the United States, sailed from San Francisco on the ninth instant on the steamer Korea.

An indictment has been returned by the United States Grand Jury at Philadelphia against the so-called Umbrella Frame Trust.

International.

The area devoted to the cultivation of cotton in Egypt along the Nile in 1906 was about 1,506,200 acres, of which the greater part, or 1,260,107 acres, is in lower Egypt. This represents about forty per cent of the total cotton-bearing area. If all the basin lands in the northern half of upper Egypt are brought under perennial irrigation through the expansion of the Assouan Dam, and the uncultivated portions of both upper and lower Egypt can be reclaimed, it is estimated that the cotton-bearing area will eventually extend over some 5,000,000 acres.

Ghent, Belgium, is the first town, past or present, to establish a systematic and regular school for the training of police dogs, to put into practice the use of the animals when once trained, and to introduce into the police establishments of the world a new and valuable element which has received the approval of every municipality that has tried it.

The letters patent and instructions relating to the constitution of the Orange River Colony have been issued, and thus Great Britain is completing the promises solemnly accepted in the treaty of Vereeniging. The model of the new Transvaal constitution of December last is followed very closely.

On July 1 there went into effect in Paris a new law making obligatory the registration in detail of Americans residing there permanently. There are now about eight thousand Americans in the city.

The prospects are that the treaty between the United States of Colombia and the Republic of Panama, now being negotiated, will not be completed until next autumn.

Industrial and Commercial.

Ramie grown in the United States will, it is declared, solve the problem of supplying an abundant and cheap textile fiber. For many centuries this fiber grown in China has been used as a textile, but the process of converting the fiber into yarn has been tedious and costly even there. A New York company, after a series of experiments, by a new process accomplishes within four hours the work usually requiring sixteen hours by the machinery in use in Germany, where the only successful ramie mills are now in operation. The bleaching tanks will take five hundred pounds of fiber and bleach it in four hours. The best that can be done in the German factories, where a French machine is used, is to bleach one hundred and eighty pounds in a twelve-hour day. In China five pounds can be produced by one man's labor in a day. The cost of producing the raw material is three cents per pound, which makes it far cheaper than cotton. From fifteen hundred to eighteen hundred pounds per acre can be grown, as against five hundred pounds, the maximum for cotton. The ramie plant has a strength of one hundred, as compared with thirty-six for hemp, twenty-five for flax, thirteen for silk, and twelve for cotton. The longest fibers run from two and one-half to ten inches in length. Samples of ramie made up to substitute cotton, flax, hemp, and silk fabrics shown by the company, include laces of all kinds, jeans, drills, muslins, sheetings, table linen, sewing and crochet threads, hosiery, and underwear, canvas for sails, belting, etc., and also fine tissue to act as substitutes for silk and to be used for incandescent mantles.

An ordinance has been introduced in the Chicago City Council providing for a subway system covering the entire city from Evanston to the Indiana line and from Austin to the lake front, a tract thirty miles long and fifteen miles wide. In that subway are to be carried any kind of cars now operating inside the city limits, conduits for all purposes, pipes and mains of any description. After thirty years, on six months' notice, the city can take over the property on payment of the actual value. The ordinance provides for a payment, as compensation to the city, of two per cent of the gross receipts of the company. Work is to be begun one year after the passage of the ordinance. Three miles of track are to be completed in five years, and the entire system completed in ten.

Boston gas consumers now get their gas at eighty cents per thousand cubic feet. The Boston Consolidated Gas Company, on July 1, 1905, reduced the price from one dollar to ninety-five cents per thousand feet. On Jan. 1, 1906, the price was further reduced to ninety cents, and six months later, acting under the provisions of the "sliding scale" act, which allows the company to increase its rate of dividend by one per cent with each reduction of five cents per thousand feet, a third reduction was made to eighty-five cents. Under the provisions of the bill the company now has the right to raise its dividend from seven to eight per cent.

President Roosevelt has been asked by commercial organizations in Seattle, Los Angeles, and various other cities and towns on the Pacific slope, to increase the facilities of the Panama Railroad Company in order that the Government may give quicker transcontinental freight service than is now provided by the transcontinental railroads.

A new seventy-two-inch plate mill at the Homestead works of the Carnegie Steel Company has been put in operation. The mill, it is said, will have a capacity of sixty thousand tons annually.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

AN EVERY-DAY RELIGION.

CLARENCE W. CHADWICK.

Real religion ought to pervade every action of our lives; it is not a thing only for Sunday, or for our closet.—QUEEN VICTORIA.

THE distinguishing feature of true religion is its harmonious blending of theory and practice in daily living. Even the most devout profession of faith, if unaccompanied by works, weighs little in the balances of God. If one's daily life does not accord with his highest Christian belief and profession it is void of true religion.

Christian Science is showing mankind how to bring religion into daily practice,—in fact, how to make it constantly available for the solution of human problems. Religion is nothing unless it is practical and complete, and for the comprehensive every-day exemplification of this fact the world owes a debt of gratitude to the Discoverer and Founder of Christian Science for having reestablished the long neglected union of faith and works. The practical side of religion is appealing to countless thousands of earth's sufferers. They had read of the marvelous works performed by the Master and his disciples, but were informed by various leaders of religious thought that these works were not intended to form any part of the daily religious activity of present-day Christians —that "the day of miracles is past." Believing what was thus taught by those who should have known the truth about the gospel teaching, they have turned in their despair to drugs and to a thousand-and-one other human inventions for relief, only to prove the utter futility of such false dependence. With their finite limited sense of omnipotence they have cried aloud to their idea of God to bring them surcease from suffering, only to realize that their prayers were unanswered.

At this point Christian Science has come and is coming to their rescue. They feel the touch of Truth and acknowledge the help from on high, without understanding how the cure has been wrought. Then, through prayerful study of the Bible and the Christian Science text-book, they come face to face with the divine rules of Christian conduct, patient obedience to which brings them in touch with the practical significance of omnipotence, whereby they learn that the Christian religion is a daily panacea for every human woe, whether it be called physical or mental. There are thousands of suffering mortals who through ignorant prejudice, fear, or unbelief, refuse to turn to Christian Science for help, when were it received, it would speedily change their trend of thought sufficiently to restore them to health, or at least to encourage them to renounce all faith in futile human means and to look to God intelligently for complete restoration. We can thank God, however, that each day records numerous cases of healing of those who have had the courage to break away from their traditional beliefs and practices.

Christian Science healing not only restores physical health, but reveals an every-day religion, a religion which demands the present overcoming of evil with good, the forsaking of everything that works for evil in human consciousness, and the awakening to a higher activity of thought. The unceasing exercise of faith in God cannot be limited to one day in the week. There is no divine sanction for right thinking upon any one day more than upon another. It is incumbent upon man to think right and to be and do good at all times. It is just as necessary to take religion into the business world as to worship God on the Sabbath. The Christian Scientist is learning to acknowledge God in all ways: that divine Truth must be allowed to enter and control the details of one's private and public life.

Whenever human thought denies God's presence and control by acknowledging the suppositional power and presence of evil, then some form of discord will be in evidence. Unless the religion of Christ Jesus is allowed to permeate every human activity, the kingdom of heaven will never be realized on earth. The true religionist or disciple of Truth learns to eschew evil in every walk of life; learns to accept good as the complete reality of existence and to conform his own daily life to its divine requirements. It is upon this scientific platform that the art of Christian healing has been reinstated in the consciousness of humanity. Professing Christians have claimed to believe in the omnipotence of God, but they have forthwith invalidated their claim by acting contrary to their profession, thus establishing the fact of their acceptance of the supposed power and reality of evil and of their separation from any intelligent understanding of the omnipotence of good.

The Christian Scientist accepts the omnipotence of God as the starting-point for all practical scientific reasoning, and by holding intelligently to this premise of thought, and living in harmony therewith according to his highest light, he is enabled to prove to himself and to others that God does in very deed dwell with men; that He is a very present help in time of trouble, wiping away all tears, and destroying the mistaken sense of evil, no matter in what form it may manifest itself. This practical proof of the availability and reality of good is not the miraculous intervention of the superhuman power upon special occasions; it is rather the assertion of the natural supremacy of goodness and purity in the affections of mankind. The every-day religion of the Christian Scientist is the unceasing activity of this Christian service exemplified in thought, word, and deed. Because of this continuous and more complete surrender of human thought and will power to the divine, Christian healing is again an established fact in the world of religious devotion.

The Master taught and demonstrated a healing ministry, and it is the province of Christian Science to emulate his Christian example, thereby leading human thought back to the essentials of primitive Christianity. These essentials can never be established in human consciousness except through unceasing devotion to the Principle of right

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

thinking, wherein it can never be said that the remedy is worse than the disease. Roswell D. Hitchcock once said, "Religion is not a dogma, nor an emotion, but a service." What greater service can one render to suffering humanity than to demonstrate for them the Christ healing? Who can claim that it is a religious service to administer material means eschewed by the great Wayshower, who said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest"? How shall humanity ever know that "the kingdom of heaven is at hand" unless it can be proven to them that the power of God is present to heal them without the use of knife or drug, faith in which tends to obscure our sense of the heavenly kingdom.

TESTIMONIES.

WALTER A. GREEN.

DURING my travels I have come in contact with hundreds of Scientists, and some of these have spoken to me of how difficult it is for them to give testimony at the Wednesday evening meetings. Perhaps two of my own experiences may prove helpful to such in carrying out the Master's command, "Freely ye have received, freely give." After my healing, about four years ago, I felt a great sense of joy and gratitude, yet when I desired to express it, it seemed impossible, and becoming discouraged, I gave up the attempt. However, "through the wholesome chastisements of Love" (Science and Health, p. 323), I was led to overcome this error.

I had for years experienced a throat difficulty nearly every spring. At about the usual time this trouble appeared, and in spite of my own Science work and help from a practitioner, I seemed to grow worse. Wednesday evening came, and I went to church, although feeling so miserable that I would have much preferred remaining at my hotel. As the testimonies were being given I was seized with an irresistible impulse to tell what Truth had done for me, and without waiting to think what I would say or how I would say it, I rose to my feet, which act alone is two thirds the battle. I gave my testimony, sat down, and to my surprise found the throat trouble had entirely disappeared—I had been instantly healed through publicly acknowledging what Christian Science had already done for me. My cup had been full to running over, and yet I had hesitated to give from it. This done, however, there was plenty of room to receive more and I received it. This lesson was learned, but still another awaited me.

Shortly afterwards I spoke again, and this time I had such a sense of self-condemnation. It had been my earnest desire to say something helpful, yet I felt that I had not done so, but had simply wasted an opportunity. A year elapsed, and upon my return to this same city, a lady who remembered me came and told me how helpful that very testimony had been to her upon several occasions. Here was another lesson unfolded; viz., that the "word of Truth" shall not return unto us void. If our motive is right, God will bless the words we speak and make them fruitful.

As in Jesus' time, error would prevent the honest recognition and acknowledgment of the healing power of Truth. At our mid-week meetings there are many strangers within our gates, hungering to hear what Christian Science has done for us, and we may well remember the old question, "Were there not ten cleansed? but where are the nine?" If the full "ten" would testify, what glorious meetings we would have! If every moment were fully improved, it is impossible to overestimate the good that would be done. Practical people judge by results. The Wednesday evening meeting is our harvest-time, when we should come "bringing in the sheaves"—the proofs that our religion does heal morally, mentally, physically, that it brings happiness and good cheer. We should by our united efforts pile "precept upon precept; line upon line, . . . here a little, and there a little;" until the evidence of the healing power of Christian Science is so strong, so conclusive, that the investigator shall be convinced beyond the shadow of a doubt that he has at last found the saving, healing Truth!

THE CHRISTIAN SCIENCE READING ROOM.

HOLMES HOGE.

CHRISTIAN SCIENTISTS are not infrequently accused of being opposed to any missionary work in the way of sending the light, as taught by our great Wayshower, to those who are held in the thraldom of error's chains. Quite the reverse is the case, and the fact is that no denomination is doing more than the Christian Scientists in the way of reaching out for the saving of all mankind, not only in teaching them the way of salvation, but in showing them how to protect themselves from sin, disease, and all manner of discord. Jesus spent much of his time, both in the way of precept and of example, in preparing his disciples for their missionary labors, and when the Master gave them his final instructions they were equipped to do intelligently and effectually the work which they were commanded to do. To-day one powerful agency for the spreading of the gospel is the Christian Science Reading Room, and more especially so if those having the affair in charge are alive to the great opportunities that present themselves for the spreading of the glad tidings. The writer knows of one Christian Science church, with a membership roll of less than two hundred, which maintains a Reading Room that is open every day during the week and is under the management of a committee who are alive to its needs and necessities, and who, under the guidance of Principle, are not only meeting the demands made upon them in their immediate neighborhood, but are reaching out to many far distant States in our much beloved country, from ocean to ocean and from the Great Lakes to the Gulf. They have been able to place Science and Health, together with other Christian Science literature, in the libraries of twelve different army posts. The officers in charge of these libraries have, it may be said, accepted in a most courteous manner the proposals to send this literature to them. Truth will open the door and Truth will do its own work. Literature has also been sent to seven different mining camps in Cripple Creek, Col. In a word, this committee dispensed approximately (and this gratuitously), during the year 1906, twenty copies of Science and Health, fourteen hundred *Sentinels*, two hundred *Journals*, three hundred and thirty tracts, and one hundred and thirty-eight pamphlets and hymnals. Truly the fields have been found already white for the harvest, and through this labor of love many have been drawn up into the higher understanding of God, good.

One branch of this Reading Room work that is accomplishing noble and grand results is what is known as the "loan library." In this library are to be found all the works of our well-beloved Leader. A large number of these books are voluntary contributions of the church members. To any one desiring to borrow a book a copy is loaned for two weeks, and if at the end of that period a longer time is requested, an additional term of two weeks is granted; it must then be returned, and no individual can borrow such book again until the expiration of another two weeks. The results of this work have proven most satisfactory, and very many who take advantage of this means of looking into the teachings of our text-book return as purchasers, and thus become owners instead of borrowers. The good seed sown has taken root in good ground and is bringing forth fruit to the glory of God. From fifteen to twenty-two copies of Science and Health are in almost constant circulation, and the number is at present being increased. Thus it will be seen that experience has proven the loan li-

Digitized by Google

brary to be a vital element for good, and it would seem that what is for good in one portion of the field should certainly prove good for all.

THE QUICKENED LIFE.

JENNIE M. STEVENS.

PAUL gives us a sweet but imperative promise when he says, "If the Spirit of him that raised up Jesus from the dead dwell in you, he that raised up Christ from the dead shall also quicken your mortal bodies by his Spirit that dwelleth in you." Quicken. What a strong, reliable word. It means to resuscitate, to revive, to refresh, to reinvigorate, to make alive, to stimulate. What greater blessing could we ask when sick, than to have our bodies quickened, refreshed, stimulated, made alive, by simply dwelling in the consciousness of Spirit, God. Paul knew whereof he spake. He did not refer to material remedies for the sick, but through that simple, clear, concise statement he said, in language pulsing with life and meaning, If you are sick and want to be revived or stimulated, go to God and dwell in His consciousness. Jesus said, "It is the spirit that quickeneth; the flesh profiteth nothing;" and Paul said, "They that are Christ's have crucified the flesh." Here again we perceive the wisdom of Paul in his choice of the word "crucified," which means to subdue completely, destroy the power or ruling influence. If we are Christ's, we shall dwell in the consciousness of God, good, as he did; then we shall subdue the asserted power of our bodies, thus presenting them a living sacrifice.

To me, one of the clearest, most concise statements which our dear Leader has given us, is found on page 269 of our text-book: "Metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." When material sense, which is always false, tells us our bodies are sick, if, instead of looking upon it as matter, inflamed and diseased, we accept the above statement, and at once resolve it into a false concept, then go far enough to know that this falsity cannot abide in the presence of Truth, we shall speedily find ourselves free from the yoke of bondage. "Where the Spirit of the Lord is, there is liberty."

FALSE WITNESS.

CAPTAIN GEOFFREY WILKINSON.

Thou shalt not bear false witness against thy neighbor.—EXODUS, 20: 16.

IT is a common experience of those who are beginning to gain some understanding of Christian Science, that Bible texts, which before seemed to possess only a limited and purely material meaning, are found, in the light of our text-book, to possess a depth of spiritual import which it would have been vain to search for in the old thought, where matter with all its phenomena was looked upon as part of God's creation. The text quoted at the head of this article is one of those to which this description is peculiarly applicable, for we had all been brought up to look on it merely as a command to abstain from bringing an accusation against another, either knowing the accusation to be false or not knowing it to be true. In the light of Christian Science, however, we are unable to rest satisfied with the above definition. For what is our neighbor? Spiritual or material? Christian Science teaches that God being Spirit or Mind, man as the image and likeness of God is spiritual and not material, the eternal expression or idea of divine Mind. To look on our neighbor, therefore, as material is to bear false witness against our neighbor.

Now what difference does this make in a practical way? A great deal. For it means that instead of regarding man as material—as sinful, suffering, or dying, one should know him as spiritual—as reflecting divine goodness, harmony, and life eternal; and this correct apprehension benefits both ourselves and others, since the truth of being, for which one thus provides a channel, tends to destroy the false evidence of the material senses, so called. This fact is brought out very clearly by Mrs. Eddy, who says, "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick" (Science and Health, p. 476).

It is, however, not only in cases of sickness that the habit of bearing "false witness" should be overcome, but in every case where a brother seems to manifest anything unlike God, unlike good. Suppose that a person with whom one has dealings is seemingly malicious and hostile, one has but to see that God's children do not act as channels for anything unlike Him, unlike Love, in order to destroy the erroneous manifestation. It is for this reason, moreover, that it becomes possible for us to love our enemies, for as Mrs. Eddy says in "Miscellaneous Writings" (p. 9), "'Love thine enemies' is identical with, 'Thou hast no enemies.'" Knowing man to be the image and likeness of God, the reflection of infinite Love, we realize that malice is but a false belief, which has to mortal sense associated itself with the person in question, but which has, nevertheless, no real connection with him, no reality in Truth. In proportion as we destroy this erroneous belief for ourselves, we destroy the testimony of material sense—the devil, "which deceiveth the whole world;" and Love is seen to be manifested instead.

It is the constant endeavor to refrain from false witnessing, both as regards one's self and others, which purifies thought and makes one a Christian Scientist, and a deeper significance is given to that saying of the Master, "Judge not, that ye be not judged. . . . and with what measure ye mete, it shall be measured to you again."

THE OLD TRAIL.

J. RAYMOND PROSSER.

THE shepherd who reaches the mountains with his flocks in June or July of each year soon finds the old and familiar trail that he knows will take his sheep to the "green pastures." As he winds his way among the trees and rocks, he suddenly notices new "blazing" upon the trees, and notes that most of the footprints on the old trail have turned to the new. Which shall he follow? He who is wise will take the new, soon to find himself on the old trail again, though not always knowing of the hours of delay and hardships he has escaped by so doing. He who is foolish is sure that the old trail is the right one, and believing it to be the only right way follows it, only to find that during the storms of winter trees have fallen across the pathway. After much labor he gets over or around the obstruction, and presses on. A little farther on, however, he finds that a swollen torrent has washed away the bridge which should convey him toward the desired pastures. He begins to realize that the one who has "blazed" the new trail knew of the obstructions along the old way, and had marked out a new path that those who followed might be saved time and trouble; and that he must either search for the new path or retrace his steps.

Most of us have spent weary days and years in trying to remove the doubt and fear which have fallen across our pathway during the long winter of materialism, or in trying to find a bridge which would carry us safely across the yawning chasm caused by belief in the reality of sin, disease, and death, until Christian Science came to us as the newly "blazed" trail. Should we not, therefore, feel the deepest gratitude to her who has "blazed" a way by which we may escape from the doubts and fears of mortal sense, and go steadily forward into the path long ago marked out by the great Wayshower, Christ Jesus.

GOV. HOKE SMITH TAKES OATH OF OFFICE.

[WE gladly publish the following excerpts from the lengthy notice in *The Atlanta Georgian and News* of the ceremonies which attended the inauguration of the Hon. Hoke Smith, cousin of our revered Leader, as governor of the State of Georgia. The new governor has a record which justly entitles him to the respect and confidence of those who have elected him to this high office.—EDITOR *Sentinel.*]

Hoke Smith is governor of Georgia. Two years to the day from his speech opening one of the most memorable campaigns in the history of the State, he was inaugurated the State's chief executive.

In one grand triumphal march through a solid line of cheering thousands, Hoke Smith journeyed through the streets of Atlanta Saturday to the capitol, where he was formally inducted into office. Never before has a governor-elect of Georgia been given such an ovation, and if there was any doubt whatever as to his popularity, that doubt was fully dissipated by the scenes which marked that triumphal journey to the State capitol. On all sides he was cheered and cheered again. Old men and young men shouted themselves hoarse, and not satisfied with once seeing the man who was made the chief executive by one of the greatest popular landslides in the country, they rushed ahead and cheered him when again he passed. The sidewalks were packed with an enthusiastic multitude. Traffic was blocked and the windows of office buildings were dotted with thousands who waited in expectation for the governor's carriage to pass.

From the time Governor Smith passed the junction of the Peachtrees, escorted by two troops of the First Georgia cavalry, until his carriage halted in front of the capitol, his journey was marked by applause, handkerchief and flag waving, and cheers from thousands of throats. The lawns and verandas of the magnificent residences along Peachtree Street were crowded with those living there and their guests, and when men were not cheering, ladies and children were waving flags and handkerchiefs. When the governor's mansion was reached, there was another ovation waiting for Governor Smith. On the porch of the mansion were a party of women dressed in white, waving Georgia flags, while others in windows applauded heartily. Governor Smith was quick to see the ovation and with his face wreathed in smiles he rose in his carriage and acknowledged it with a profound bow.

The Alpha and Omega of Governor Smith's speech [which occupied an hour and twenty minutes] was, "I take the oath of office with the purpose, God helping and directing me, to perform every duty the office permits in the interest of the masses of the people. . . . May God help us to meet the responsibilities which are upon us."

[Editorial in *The Independent Voter*, Toledo, O.]

SACRED PRECINCTS NOT SAFE.

Even the sacred precincts of the church are not safe from the ravages of the money-grabber. That most remarkably religious and thoroughly intellectual woman, Mrs. Mary Baker G. Eddy, has succeeded by her tact and energy and literary ability in acquiring considerable property. She is advancing in years, and as every one who has heard or read of her knows, she is devoted to the Church that she has been instrumental in propagating. Relatives who have greater love for gain than for the spread of any religious truth, have made an assault upon her intelligence and general ability in order to prevent her from devoting too much of her property to the Church she has built up, which would deprive them of a greater share of the spoils when she came to the limit of her years. No other reason can be offered for their action. What business could it possibly be of theirs what became of her acquirements, except that being related to her they might succeed in "getting something for nothing."

It is hoped that the courts will formally wind the matter up by sustaining Mrs. Eddy in her property rights, as well as her intellectual standing. Such minds are rare as that possessed by Mrs. Mary Baker G. Eddy. She is the Founder of the Christian Science cult. Its value as a science may be and is questioned by many, but there is one view of it at least that should not be overlooked; that is, the people who compose the membership are not those in any community who are inclined to pursue evil practices; on the contrary, they are recognized as good examples of the socially pure. Why, then, cast a stone in the way of this or any other cult that has a tendency to create in man a thirst for higher things?

[From the *Chicago Daily Tribune.*]

Sermons and discourses from the pulpit belong to the passing order—are out of date. Like the crusades, they have had their day in the religious world and now must give way before a new era in the manner of getting people into close association with the Church. The new period in religion is "personal work." This is the belief of the Rev. Johnston Myers, pastor of the Immanuel Baptist Church, expressed before an audience of more than one hundred young divinity students at the University of Chicago yesterday [June 26]. The occasion was Dr. Myers' second lecture of a series on the general topic of "Modern Evangelism." He did not strike a hard blow at the sermon in itself, but he classified it as too antiquated to be of great use in the modern world. He pointed out as proof that it was not the failure of congregations to grow in size, the indifference with which church members attended services, and the competition of sermons with the Sunday paper that caused the new era.

"Mere preaching ceases to hold a large place in the work of the Church nowadays," he declared. "People are tired of it. However, it is given still a more or less prominent place, and the clergy are still trying to preach, with a certain amount of success. Compared with the congregations of a few years ago, and considering the enlarged size of the neighborhoods from which they have to draw, there are few large congregations in the country to-day, as large as those to which Beecher, Talmage, and Spurgeon preached.

"There has been a great change. The preaching is as good, it is true, and the preachers now are as great as they used to be. But this is not the age of the sermon. Ours is the age of personal work. Considering the cheapness of printing and the wide circulation of printed good literature, it is a marvel that people come to hear the preacher now. I believe they only come out from a feeling of a sense of duty. It is not because they are interested, but to please us who do the preaching. The real reason sermons are going out of date is because we fail to get definite results from the sermon.

"It is always an individual who leads a person to religion. This is shown by the small number of converts." In this connection Dr. Myers stated that in his experience he did not know of a single member the church gained through the conversions of "Gypsy" Smith, who held a revival in Chicago last winter. "The soul winner of the twentieth century," continued Mr. Myers, "must be personal work. The preaching method does not bring results. Individual effort is what counts."

Dr. Myers also surprised the divinity students by advising

Digitized by Google

sensationalism in sermons, if they preached them, and in furthering the attempts to heal invalids by prayer. "I like sensationalism in preaching," he declared. "The little fellows in the smaller churches are barking against it, but that is because they do not know how to do it themselves. Sensationalism—wise sensationalism—is a good thing, and accomplishes its work as nothing else will. The Christian Scientists have at last compelled us to discuss the question of healing by prayer. I believe the minister has this element of power if used in a sick-room. The trouble is that we are too timid. We are afraid that our prayers will not be answered."

[H. D. E. in the New York *Sun*.]

TO THE EDITOR OF THE SUN—*Sir:* There was recently published in *The Sun* a letter from Mrs. Jessie Crounse Hitchcock of Omaha, Neb., to the effect that after having suffered for years from a malady, growing constantly worse in spite of the efforts of her physicians, she finally consulted a celebrated specialist in Chicago, only to be told that her complaint was incurable; that as a last resort she applied to a Christian Science practitioner, and was cured in a very short time and at a cost little more than what she had paid the Chicago specialist for an hour's consultation: that her "healer" could not be induced to take more than the prescribed fee—a dollar for each treatment—but that if she were worth a million dollars she would be glad to give it all to the Cause of Christian Science, although she was not a member of a Christian Science church, and at the time evidently did not expect to become a member.

Mrs. Hitchcock's father is himself an ex-Senator of the United States, an ex-Governor of the State of Nebraska, and an ex-Chief Justice of the Supreme Court of that State. Her husband is at present a member of Congress and is owner and editor of the Omaha *World-Herald*. Mrs. Hitchcock herself is a woman of rare culture and accomplishment. I hope that there is no indelicacy in stating these facts, for they give sanction to her testimony, and her letter was published over her full name.

No one compelled Mrs. Hitchcock to resort to Christian Science. When she did so she expected to pay the small amount charged by the practitioner, not for his "prayers to God," but as a fair equivalent for the time actually employed and to enable the practitioner to supply his modest wants and devote his life and faculties to the healing of the sick. If payment was predicated on the prayers themselves, or on the results achieved, money would have afforded no standard of value. But so long as she did not complain of the charge why should Mr. Chandler become exercised about it? Would he compel a Christian Science practitioner to give his time for nothing, or trust to an honorarium for his compensation, as was formerly done in the case of lawyers and physicians? For a practitioner to accept gratuities might indeed enrich the practitioner, but the tendency would be bad for reasons too numerous to catalogue and sufficiently obvious to all who are not blinded by prejudice. It would not do to permit a practitioner to accept gratuities lavished in the first glow of gratitude for restored health. It would tend to corrupt the practitioner and unfit him for his work, and would finally bring him into disrepute. It is enough for Mr. Chandler to know that the whole subject has been thoroughly considered and that the wisdom of a small uniform charge has been thoroughly vindicated. To expect in this age of steam and electricity to adjust relationships to the customs of the year one, strikes me as puerile.

Mr. Chandler denounces the prayers of Christian Science as "blasphemous." The word "blasphemous" is a vague word, and its meaning is somewhat matter of opinion. To me the conception of God as a huge man located somewhere outside of His works, balancing in His mind whether to reward or punish a cringing mortal—swayed in His purpose by the so-called prayers of that mortal—is flat blasphemy. But to conceive of God as All in all, substance of our substance, Mind of our mind, in whom we live and move and have our being, whose laws are immutable and Himself without shadow of turning, is the highest and most reverent conception of the Deity. Hence it is that Christian Science prayers are not petitions to a vacillating personality, but a realization of the truth of Deity and the nothingness of evil; and it is this realization of the truth that produces the beneficent results in Christian Science.

Mr. Chandler is profoundly ignorant of the whole subject of Christian Science, and it is because of his ignorance that a Christian Scientist can find it in his heart to answer his mockery without petulance. But it is not so easy to condone his masquerade and hypocrisy as the "next friend"—that is to say, the closest, most disinterested friend—of Mrs. Eddy in the suit which he is waging against her. How any man outside of Mr. Roosevelt's peculiar categories can denounce Mrs. Eddy as a fraud and humbug, and her religion as blasphemy, and her money as polluted, and at the same time pose in a court of equity as her solicitous friend and chivalrous protector, is a problem in ethics which the court, I hope, will ultimately determine.

Mr. Chandler asks Mr. Farlow to "forget food and clothing for an hour and explain what the workers in diabolism are doing to Mrs. Eddy." I fancy William E. Chandler could answer this question better than Mr. Farlow.

[Editorial in *The Wilmington* (Del.) *Journal*.]

That the progress of Christian Science as a cult is interesting churchmen as well as the doctors, was brought to mind by an address at the dinner of the Church Club of Delaware, on Thursday evening. With rapt attention every word of the speaker was drunk in, showing that interest in the Christian Science movement is widespread.

What will be the attitude of the Church towards this cult, was the perplexing question asked by the speaker, and he left it to his hearers to give the answer. The religionists are at a disadvantage compared with the doctors in dealing with the subject. As the speaker said, the enthusiasm and the vast number of men—intelligent persons, too—at the Christian Science meetings in the larger cities are dominating features. It may be remarked that there is no complaint among the Scientists, so called, that the pleasures of golf, or Sunday sports, or materialism draw the attention of men from their religious duties. The complaint of the Protestant churches is of this lack of interest in church work on the part of men and of the steady growth of materialism. And yet the Scientists gather them in, as even our own community testifies.

Various remedies, with some of which the Church Club speaker did not appear to be familiar, have been suggested in the circles of his own church. For instance, in a diocese of California the clergy propose to bring into more general use the practice of unction for the sick; and those who administer this as a sacrament in that church contend that the good in Christian Science is provided for in the ancient customs of the Church, which have been abandoned by perhaps all the branches of the Christian Church, excepting the Roman Catholic, the eastern, and a small percentage of the Anglican body. The restoration of this custom would make a combination of religious, spiritual, mental, and bodily treatment which seems to be desired.

[Editorial in the *Jackson* (Mich.) *Press*.]

Such an audience as that which listened to Mrs. Sue Harper Mims, the Christian Science lecturer, on Tuesday night, with all its material surroundings, would not have been possible three decades ago. The comparative absence of adverse criticism by the audience, so mixed in its character, and the very marked disposition to speak kindly of opponents of the faith, were highly suggestive to any one who has taken active interest in the matter of religious faith, doctrines, and denominations, for the last quarter of a century.

One is justified in asking whether the spirit shown on such occasions is a proof of religious intolerance having passed away; or, on the other hand, does it arise from the indifference of men to creedal and religio-philosophic subjects. Twenty-five years ago religious thought, or at least its profession, was marked by two very distinct attitudes—that of orthodoxy and heterodoxy. In those days doctrines made men hate each other, while they fought under the very banner of peace and love.

That people now are more tolerant of the other fellow's creed and profession is shown by the absence of the bitter spirit of the former days. In the treatment of Mrs. Eddy's teachings, or discoveries, there has been the most widespread discussion from every view-point. Truly it may be said of her followers, "Ye shall know them by their fruits." In all the abuse and unkindness shown by some writers, there is no question but that the one who was reviled has used a logic new in religious strife—a logic that has exasperated certain minds, but its newness and its force stand proven. This spirit may partly explain the growth of Christian Science. Its non-combative attitude is a new element in religious propaganda. But whether the old-time spirit of one sect waging war against the other is dead, or merely sleeping, is an open question.

["Reader" in the *Brooklyn* (N. Y.) *Eagle*.]

I am certainly surprised that Dr. Hillis, who stands so high in his profession and whom all his colleagues are ambitious to copy, should have so lost his head and his temper as was made evident in his criticism of Christian Science running through the sermon of last Sunday. As one begins to read the sermon it seems very impressive and edifying, but upon reaching the Christian Science criticism one would imagine that the doctor had suddenly come upon a book of Christian Science doctrine, and thoroughly angry at what he read, had, while in that state of mind, prepared his sermon. I cannot otherwise account for his argument that suffering is ordained by God to remain with us as a trainer and a teacher.

Surely the Scientists believe that there is pain in the world, else why is their main mission that of allaying pain and healing the sick? But how long did the people remain sick after the electrifying touch of the Christ had been experienced? There is so much more in life than we have already known that we are always expecting to make new discoveries. A goodly number surmise that the Christian Scientists may have in their possession some of the keys to these, and so when they hear the keys rattling they follow expectantly, and are not every time disappointed.

Of course Dr. Hillis is more of a poet than a philosopher. The digging of the spiritual garden he leaves to others, while his work is to beautify, to pick off the wormy leaves, to tie up the roses, and to inspire praise to God for their beauty. With the many who enjoy weekly his good sermons, I say God bless Dr. Hillis. It seems too bad that he should feel so averse to Christian Scientists, for they also have a friend or two. Emerson leads the way for impartial verdicts of men and their several beliefs.

THE LECTURES.

HAMILTON, O.

The annual public lecture under the direction of First Church of Christ, Scientist, was given at the Jefferson Theater before a large audience yesterday afternoon [May 5], by Judge Septimus J. Hanna of Colorado Springs. Mayor Thomas, whose active interest in Christian Science was recently announced by the *Republican-News*, introduced the speaker, saying in part,—

Christian Science has accomplished so much good by healing the sick and bringing spiritual blessings to those who have sought its help, that it has to-day to a large extent some of the most intellectual people counted among its membership. Through the reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have been greatly benefited. My Bible, which used to occupy a place in the bookcase, is now constantly at hand on the library table—I need it every day since its truths have been more fully revealed; and whereas most of it used to be incomprehensible reading to me, now it fills my thought with spiritual understanding.

Christian Science has been a source of great blessing in my home. I take it for granted you all know of the healing of my son, who was weak and anæmic and unchildlike all his life. Last January we took him to a Christian Science practitioner as a last resort, and in less than one week we could see a decided change for the better, and in a very short time he was perfectly well and now enjoys all the sports and pleasures of other children. My great joy over his recovery is what led me to take up the study of Christian Science, and through it even fear for him has been removed, for "perfect love casteth out fear." In many other ways has the power of God been revealed in our home through Christian Science. If Christian Science as given us by Mrs. Eddy were not true, then would we still be asking the question of Pilate, "What is truth?" But Christian Science expressly teaches what Jesus the Christ taught nineteen hundred years ago. Its whole purpose is the revelation of divine Love—the Comforter which leadeth into all truth.—*The Republican-News*.

SCRANTON, PA.

Judge Septimus J. Hanna lectured to a thousand people in the Family Theater yesterday afternoon [May 12] on Christian Science. The speaker was introduced by Col. L. A. Watrous, a member of the church in this city, who said in part,—

These seem to be transition times—times of sifting and of religious inquiry—times which some erroneously think of as spiritual chaos. But underneath it all, and through the harsh noises of the day, may easily be heard the divine harmony; and that which seems to be discord is after all, to the observer of the psychology of events, but the rearrangement of the keys—a tuning of the orchestra, that the world may have a better and a sweeter concord, which will sweep over the souls of men. Never since the third century has there been such an earnest seeking after truth—such a searching for a demonstrable, practicable, every-day religion. Never since the days of primitive Christianity have the thunderings of Sinai and the Sermon on the Mount had so many and such obedient listeners; never since then has the truth of Holy Writ been so universally accepted, and the efficacy of prayer so generally believed in; and never have there been so many hearts and minds open to the teachings of the humble Nazarene, the Lord and Master of us all. At such a time, therefore, any movement which seeks to lift humanity to a higher level should have a respectful

Digitized by Google

hearing; any teaching which begets the love that casts out fear, rather than the fear that dethrones love, is entitled not only to a respectful hearing but to thoughtful consideration, and any religion whose key-note is harmony, whose guiding star is the Sun of Righteousness, and whose sole and only purpose is the saving of men from sin and from disease, is too practical to be ignored—no matter how unpopular it may be thought by some to be.

The Scranton Republican.

MARYSVILLE, KAN.

In introducing Miss Mary Brookins at the Theater Grand, Tuesday of last week [May 14], Mr. Richard Hawkins said in part,—

I feel it will not be inappropriate if I congratulate the Christian Scientists on the ever-increasing and now world-wide interest which the public is manifesting in the tenets of their order; and this in spite of the fact that the charm of novelty no longer attracts. This continuing interest seems to indicate that the general belief is that there are at least some good foundation-stones under the Christian Science structure. Judged by results, as exemplified by the lives of its votaries,—and I know of no better standard,—Christian Science will compare very favorably with other religious denominations. By their patience and forbearance under the ridicule and abuse to which they have been subjected, and which have not yet entirely ceased, Christian Scientists have secured the admiration of the thoughtful and the observant. I never yet heard one of them retaliate in kind. I used to wonder at it; but I have learned that their Church teaches that thoughts are sacred to their possessor, and that no one has a right violently to interfere with the thoughts and opinions of others. In this respect Christian Scientists have set an example which the rest of us might well imitate. By their sincerity and their independence of thought, which enabled them to remain steadfast in their adopted faith regardless of public clamor and disapproval, they have won the respect of the world. And for the good they have done—for I doubt not that through Christian Science thousands have found satisfaction, comfort, peace, and happiness—so for this good accomplished, as well as for their desire to do good to all mankind, they are entitled to the gratitude and the good will of all.—*The Advocate-Democrat.*

TROY, N. Y.

Music Hall was thronged last evening [May 21], when a lecture under the auspices of First Church of Christ, Scientist, was given by Bicknell Young. Rev. Cecil J. Armstrong of the River Street Church of Christ, who introduced the speaker, said,—

It is sad to see the great mentality of a man, "so godlike in apprehension," cut off from considering the plea of another because of preconceived conclusions or unadulterated bigotry. Whatever is presented to us as the truth, especially when backed by a large, thriving, honest, intelligent, religious people, should challenge our attention, and by us should be placed in the crucible of reason, that, under the fierce heat of enlightened thought, it may be proven the pure gold of truth or the sordid dross of error. But the process should be honestly conducted. The honest man has nothing to fear from error, for, like the venomous snake, in the hour of its danger it will sting itself to death. The honest man will welcome the truth, no matter whence it comes or how much sacrifice it demands. To him truth is an angel of God sent to strike the fetters of error from the human mind, that the soul may be free indeed. That messenger of God must be obeyed, though she beckon from the top of "the world's great altar stairs that lead through darkness up to God."

The distinguished lecturer of the evening represents a Church of great activity, sincerity, and progressiveness. Personally I have many friends, dear to my own heart, who are Christian Scientists. I honor them for their sincerity of purpose, fidelity to conviction, and loyalty to the truth as they see it. To Mr. Young I would say, in the words of one of old, "Now therefore are we all here present before God, to hear all things that are commanded thee of God." Ladies and gentlemen, it gives me pleasure to introduce to you Bicknell Young.—*The Troy Record.*

RUTLAND, VT.

The auditorium of First Church of Christ, Scientist, was far too small to accommodate the crowd which gathered to hear the lecture of Rev. William P. McKenzie last evening [May 28]. Chairs were placed in the aisles and the Reading Room was thrown open, yet many were obliged to stand. The lecturer was introduced by Mrs. Stella Hadden Alexander, First Reader of the local church, who said in part,—

The world may not yet realize that Christian Science is bringing to it the understanding of God as Love, which in the fulness of time will surely deliver it fom all evil,—from sin, sickness, sorrow, pain; but we who have learned even a little of its teachings, and have honestly tried to put them into daily practice, have been helped and healed and delivered from so much that had made us sick or sorrowful, that we are grateful for any opportunity to help others, for Christian Science is a religion of love. Our God is Love, and Jesus' words on our walls, "Ye shall know the truth, and the truth shall make you free," are being fulfilled to-day; and these words of our beloved and revered Leader, Mrs. Eddy, from our text-book, "Science and Health with Key to the Scriptures" [p. 494], "Divine Love always has met and always will meet every human need,"—these words have cheered and healed many a weary heart.—*Rutland Herald.*

[Written for the *Sentinel.*]

WORSHIP.

MARY MC D. SANTLEY.

OUR Father, God, unchanging Love,
We lift our thought to Thee;
All grace Thou art—below, above—
All power and majesty.
Our hearts beat still, for Thou art near;
And reverently we wait,
In sacred hush, Thy voice to hear,
To praise with hearts elate.

Triumphant, strong, the song we bring,
When it reflects but Thee;
When closely to his side we cling
Who mounted Calvary,
And left a path transcendent, bright,
To lead us up to God,—
The way illumed by holy light,
The path his feet have trod.

Assurance comes: Lo! Thine we are,
The "still, small voice" we hear;
No sickness, sorrow, death can mar
When Love and power are near.
As children, Father, glad we come,
Our trust in Thee complete;
Our peace Thou art; our restful home;
Our God; our Paraclete.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. *Beware of counterfeit letters.*

AS SEEN BY AN INQUIRER.

A STAFF-WRITER for the Portland, Oregon, *Spectator*, after combating the assumption that Christian Science congregations are composed of "long-haired men and short-haired women," writes entertainingly of his attendance at a Christian Science service on a recent Sunday, and our readers will be interested in the excerpts from his article which follow:—

On Sunday, the great hall where First Church congregation meets was packed—that is, the seats, which were placed as close together as comfort permitted, were all occupied. Women were in the majority; the greater number of them are known to the art editor, or the writer who contributes notes on what the charitable are doing for the betterment of Portland, or the society editor who writes about the Patton Home or The Travelers' Aid or the Flower Mission; and when you read about the accomplishment of big things in civics or commerce or law or finance, you meet the names of many of the men I saw at this church.

The members of this First Church look prosperous to the point of opulence; contented, to happiness. I asked a man whose manner corroborated his words that he was glad I was investigating: "But are there no poor and needy and sorrowing Christian Scientists?" "No," he said, after a moment's thought; "no; not when they are real Christian Scientists." It sounded good; like a blast from the trumpet of faith; and the fine thing about it is, the speaker believes it. "After a man becomes a Christian Scientist," he continued, "he is a conqueror; he believes in himself; he knows what he can do and what his powers of endurance and achieving are; where he had merely strength before, he has might; where there were obstacles, there are only trifling difficulties. It is something you can take to your office with you, and it helps you."

Now, this man is not long-haired nor hollow-eyed, nor baggy at the knees and frayed at the cuffs; he is a very substantial professional man, to whom the big men of this big State of Oregon listen with much interest and to the great increase of their wisdom and wealth. He knows that Christian Science aids him in his profession, just as surely as he knows that Christian Science made whole in a day a woman who was pronounced incurable of spinal disease. Now I do not know that his belief helps him win cases; but I do know that the woman who was declared incurable of spinal disease was made whole.

This writer seems to have arrived at a conclusion which is correct; viz., that Christian Science is a religion of practical results. From his own knowledge he can and does testify to the healing power of this gospel, and it is because of this healing power that Christian Science has appealed to the class of people whom he saw at the church service which he attended. Nearly every business man who has become a Christian Scientist has recognized as a fact the enlarged capacity which has come to him by reason of his changed thought regarding almost every matter which daily engages his attention, and this is very easily explained by his improved health, his lack of fear, and the sweeter temper which must inevitably come to every one who tries to shape his course by the Golden Rule rather than by hatred, selfishness, and greed.

From time to time we have published in the *Sentinel* testimonials received from business and professional men who have been healed by Christian Science, and in some cases it has been stated that these men were invalids or semi-invalids for years, practically unable to attend to business. Is it to be wondered at that these men are devoted Christian Scientists, that they are regular attendants at the church services, and always ready to speak a good word for the revelation of Christianity which has enabled them to secure or regain a position of usefulness and honor in the community? And would not these men be ingrates did they not overflow with gratitude for the woman who has so closely followed the voice of God as to bring this balm into their lives?

ARCHIBALD MCLELLAN.

A DISTINCTION.

CHRISTIAN SCIENCE teaches us that we are to be alert in distinguishing between that which seemeth to be and that which really is. This distinction clearly seen, we are ready to acquaint ourselves with the things of God. In the Epistle to the Galatians Paul makes a clear distinction between the fruits or ideas of Spirit and the evils which spring from a belief in matter or the carnal mind. The latter he describes as "idolatry," "adultery," "witchcraft," "hatred," "murders, drunkenness, reveling, and such like." After telling of these evils and many others, he lifts thought to the "love, joy, peace" of Spirit, and says that in order to realize these we must "live in the Spirit;" and how to do this is the message of Christian Science to mankind to-day.

Some years ago, one who was looking into mental healing said she objected to Christian Science "because it taught animal magnetism." She was told that she was greatly mistaken in thinking so, and that the very opposite is true,—that Christian Science teaches the great evil and delusion of the belief in animal magnetism in any or all of its phases. It was added, however, that Mrs. Eddy was the first, since the days of Christ Jesus and his apostles, to make clear the distinction between the divine Mind, with its pure and uplifting influence, and the "fleshly mind," with its self-asserted claim to power over mortals and its deadly results.

Prior to Mrs. Eddy's discovery of the Science of Mind there was wide-spread ignorance and indifference concerning mental influence, with occasional attempts to use or teach the application of so-called mental power for sinister purposes. With Christian Science there was revealed not only the power of divine Mind to heal the sick, but also its power to protect every faithful follower of Christ, Truth, from the delusions and encroachments of the "carnal mind," or malicious animal magnetism. Outside of Christian Science no one has ever told us how we may protect ourselves from the sinister influence of mortal mind. On the contrary, works on physiology and philosophy for the most part ignore the divine Mind and would make the human mind the only power; and the result of this ignorance of Truth appears in the vice, crime, and wretchedness with which mortals are unable to cope.

On the human plane of thought there are many counterfeits of law and order, which pass for genuine until the real is known; then they are relegated to the nothingness from which they sprang. Were people aroused to perceive the difference between the false and the true, any attempt to circulate counterfeit coin would be in vain. It is, therefore, of the utmost importance that we "know the truth" and keep awake to its demands, for not otherwise is any one safe from the aggressive pretensions of mortal mind, which, when driven from the plane of unconscious or ignorant error, would consciously assail the Cause of Truth by its false arguments. Jesus warned his followers against this evil miscalled mind, saying, "Watch ye therefore, and pray always;" but he also said, "There shall not an hair of your head perish."

Speaking of the action of Truth upon human thought, our revered Leader says, "It brings with it wonderful foresight, wisdom, and power" (Miscellaneous Writings, p. 204). Nowhere does she teach that we need fear animal magnetism, although St. John says that the "dragon" (otherwise, malicious animal magnetism) "deceiveth the whole world," but he goes on to say that this monstrous and false claim to power is overcome by the only real power—the Christ-power. Christian Science obliterates all

Digitized by Google

forms of superstition, including hypnotism, or animal magnetism, by revealing divine law and order, and Christian Scientists confidently look for the end of all error through the understanding and demonstration of Divine Science. In the divine Mind there is no animal magnetism, but there is the spiritual power which annihilates all evil as light dispels darkness, and in this light "shall we see light."

ANNIE M. KNOTT.

THE NATURAL.

As very generally understood the natural is the customary, that which under given circumstances we are wont to expect. It is also defined as that which is produced by or in keeping with so-called physical law. Furthermore, the recognition of the physical universe as divinely ordered has led to the classification of all that is in harmony therewith as not only natural but legitimate. Thus men have been prone to palliate their offenses on the ground that their conduct was the result of appetites and proclivities with which they were originally endowed,—"their nature,"—and this self-extenuation cannot be disregarded by those who hold that God is responsible for material instincts and impulses.

Although the effort to "master nature" has resulted in what seem to be wonderful gains in the scope and privilege of human life, every thoughful person perceives that it has rendered this life far more complex, multiplied a thousand fold its temptations and distractions, while accomplishing nothing for its moral redemption or improvement. The asserted laws of nature remain no less arbitrary and unjust, their cruelty is no less unpitying, while their clash and contradictions have led a Mæterlinck to say, "The idea of nature reveals itself . . . as circumspect and shiftless, niggard and prodigal, prudent and careless, fickle and stable, agitated and immovable, magnificent and squalid." Nothing has been achieved in the way of philosophic explanation or real command.

All this is fully seen when we consider the question of the world's health, past and present. Whatever may be said in its favor, no intelligent exponent of *materia medica* will venture to deny that it is still upon the plane of experimentation, and that the asserted natural laws of disease and of cure with which it deals give no intimation of either the wisdom or the goodness of an overruling power. On the contrary, it will be generally conceded that the so-called natural, in this realm, is a confusion and a snare. Professor Lankester has recently spoken of true progress as rebellion against natural selection, a defiance of "nature's prehuman dispositions." The control (subjection) of his own nature is, he says, "man's destiny and greatest need." This supports Paul's declaration that the natural man perceiveth not the things of God, and it hints at the revolutionary and redemptive teaching of Christian Science, that the natural is not that which customarily happens in human experience, but that which ought to be, and is, in the realm of Truth. It is not the phenomena of material law, but the logical expression of the eternal activity and unfoldment of Spirit.

This conclusion is reached in Christian Science through adherence to divine Principle. Christian Science, says our Leader, "shows the scientific relation of man to God, disentangles the interlaced ambiguities of being, and sets free the imprisoned thought" (Science and Health, p. 114). The ideality and infinity of God being accepted, there can be no question respecting the unnaturalness of all that is imperfect or unideal, and hence the only logical demand upon men is that they shall be perfect even as their Father in heaven is perfect.

The practical significance of our concept of the natural appears when we remember the relation of this concept to anticipation, and the further relation of anticipation to realization. Both the possibility and the likelihood of that which is natural is instinctively recognized, and hence to identify it with the ideal is to look only for the good. It is to join the Magi, and follow the star that leads to our Bethlehem. The natural is the manifestation of the divine, and that alone.

JOHN B. WILLIS.

THE NEWSPAPERS.

Our Leader, Mrs. Eddy, suggests to the Christian Scientists all over the globe that they subscribe for the leading newspapers which speak justly of Christian Science and its followers at this time. We feel sure that our readers will gladly do this.

THE JUNE MAGAZINES.

Articles on Christian Science appear in the July issue of *Cosmopolitan, Human Life, The Arena* (Trenton, N. J.), *American Queen* (New York city), and *Fine Arts Journal* (Chicago). We commend these magazines to Christian Scientists for circulation among their friends.

AN ANONYMOUS COMMUNICATION.

ON June 29 some person mailed from Rochester, N. Y., several hundred copies of an anonymous communication which sought to array Christian Science against another form of religion. This was not only a breach of brotherly love and kindness, but also a misrepresentation of the teachings of Christian Science and of the attitude of this denomination toward other churches: therefore we now state, in behalf of the Church of Christ, Scientist, that the communication was not authorized, approved, or sent out by this Church.

LETTERS TO OUR LEADER

Concord, N. H., June 20, 1907.

Mrs. Mary B. Eddy.

Dear Madam:—Please accept the hearty thanks of the officers and members of E. Florence Barker Tent [Daughters of Veterans] for the beautiful flowers which you so kindly gave for our use on Memorial Day.

Sincerely yours,

LILLIAN M. HAPPNY, *Secretary.*

Boston, Mass., July 1, 1907.

Beloved Teacher and Leader:—In writing to-day the editorial on Trust, thought turned irresistibly to my visit with you yesterday, and to your wonderful exemplification of trust in the power of God, good, then and always. If I had needed assurance as to the triumph of Truth over error, your strong, loving words would have given it, but assurance grows stronger each day as I read the many testimonies of healing which come to us from all parts of the world. In reading these testimonies I see in thought the mighty angel that John beheld, with the "everlasting gospel" for all nations, and I see more clearly day by day that nothing can resist or escape this healing gospel, Christian Science.

It gave me great joy to see you so well and so bright, to note your steady gain in expressing the vigor which comes from Life and Love. Let me thank you again for your words of counsel and inspiration and good cheer.

Lovingly and gratefully, your student,

ANNIE M. KNOTT.

Buenos Aires, South America, May 16, 1907.

Dear Mrs. Eddy:—We are sending you to-day, under separate cover, four views of the Christian Science Society Rooms of this city, more than eight thousand miles from Pleasant View. The first shows prevalent style of architecture, with barred windows. The building is of rough brick, plastered, giving the appearance of stone. The second view is of inner hall, tiled floor, and decorated, as usual, with plants and flowers, also showing view, in background, of patio—open court. The third is of audience room, which seats about sixty people, and by utilizing the hall and Reading Room we can seat about forty more. These views were taken and donated by Mr. George Chandler, a member of the Society and the husband of our Second Reader. We trust, dear Leader, it will give you pleasure to learn that this branch of the Vine is still growing and bearing fruit.

Allow us to express our gratitude for your patient, self-sacrificing work for us, and our unwavering devotion to your leadership. Yours sincerely,

FRANK R. KINSLEY, *First Reader.*

Winnipeg, Man., June 22, 1907.

Beloved Leader:—I most deeply appreciate the time you spared on Thursday of last week. I shall carefully follow the directions given in the note which you so kindly wrote in your own hand.

Believe me most respectfully and lovingly,

Your student,

BICKNELL YOUNG.

Toledo, O., June 20, 1907.

Dear Mrs. Eddy:—Some time ago I was talking about Christian Science with two business acquaintances, and one of them made the following remark: "I have known a number of business men who were Scientists and have found them calm, clear-headed, and pleasant to deal with, and I feel that if Christian Science straightens out the business men it will have done a great work." Christian Science is straightening out the business men who become interested in it, and more and more are looking into it every day. Those who have taken it up find that their health is better, they recover much more quickly from illness, they are more active both physically and mentally, can deal with business problems with better judgment, they are more just in their dealings with their fellow-men, and more successful. I can truly testify to the benefits of this blessed gospel to the business man, for I find that I can approach people more easily, do more work in the same length of time, and do it better than before.

I want to thank you, for my family and myself, for what you have done for the human race. I well know that none of us realize in any degree the sacrifices you have made and are now making in our behalf. God does bless you, and the "everlasting arms" are around you.

Lovingly yours,

ARTHUR A. HALL.

Long Beach, Cal., June 11, 1907.

My Dear Mrs. Eddy:—The members of First Church of Christ, Scientist, Long Beach, Cal., wish to assure you of their love and loyalty, also to express their heartfelt gratitude to you, our Leader, for the great truth revealed to us through "Science and Health with Key to the Scriptures." We would follow you as you follow Christ. "Surely the wrath of man shall praise thee."

Yours in truth and love.

By order of the Board of Directors,

MISS EMMA F. BURGESS, *Clerk.*

East Orange, N. J., June 19, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

Dear Leader:—In reading over the Communion service just published in our *Sentinel* of June 15, 1907, once again a sweet sense of love and gratitude comes to me for all the blessings of this great truth to myself and family, and I feel I must tell you of it. A little more than a year and a half ago I came to Christian Science, because I seemed simply driven to it for the mental healing. I knew little of it, and I confess that I approached it in a somewhat mocking frame of mind, only to find nothing but Love,—the grand, underlying theme of all your teaching,—and now my only prayer is, that my life may prove the results of this teaching. I began reading your book "Science and Health with Key to the Scriptures" (the most blessed gift to the world to-day, together with the Bible), and all through it, on every page, the truth I had always been seeking came to me through a renewed mind. I love your books, and feel I need no other "teacher," for there I find my all. May God bless you for your noble work in our midst to-day. My prayer is, that I may day by day grow in this blessed truth—simply to "love a little more, to trust a little more," until there shall spring forth the fruits of the Spirit,—in the healing of the sick and the uplifting of all mankind,—the one desire of the Christian Scientist's life.

With dear, dear love, a student of your books,

ALICE FLORENCE WILLS.

Morral, O., June 15, 1907.

Beloved Leader:—Your life-work means so much more to me than words can express that I want the pleasure of telling you so. The only genuine happiness I have known since childhood has come as the result of studying Christian Science. Surely God has been your only guide and He will protect you all the way. In the center of the enclosed card is a picture of our little church home in Marion, O. I am sure it would gladden your heart to hear the testimonies of healing and expressions of gratitude to you that are given in this tiny branch church at our Wednesday evening meetings. Though you may be too busy even to see this letter, I do want to tell you that I love you, and am grateful to God for giving you to this wide world. Sincerely yours,

IDA A. SHOOTS.

Little Rock, Ark., June 15, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Dear Leader:—We, the members of the Association of Mrs. Anna Robinson, C.S.B., in our sixth meeting assembled, send you this heartfelt assurance of our love for and trust in you, and we desire to express thankfulness for the many blessings each member of this Association has received from your teachings and Christian example of charity and brotherly love toward all men under the most severe trials and injustice. We appreciate the opportunity you have given us of having the benefit of right teaching, so necessary to enable us to go forward in the beneficent work you have set before us. We also wish to express gratitude to our beloved teacher for the good she has brought into our lives through her loyalty to Christian Science. We feel moved by recent events to pledge to you and the Cause renewed devotion and trust, for we know that we owe you a debt of gratitude which we can repay only by following humbly and obediently in your footsteps. Thus we shall "dwell in the house of the Lord for ever."

Most sincerely,

MRS. THEODORA DICKSON, MRS. ZILLAH COOPER,
MRS. F. T. VAUGHAN, MRS. MAY SIDES,
MRS. IDA A. R. STEPHENS, H. F. BAILEY,
Committee.

AMONG THE CHURCHES.

BILLINGS, MONT.

First Church of Christ, Scientist, in Billings, has under consideration the erection of a splendid church edifice. Yesterday it purchased four lots on the corner of Burlington and Division Streets as a site for the structure. It is not intended to build immediately, but the lots have been secured as the location for a structure when the church has completed its plans for a home. The location is one of the best on the west side.—*Billings Gazette.*

ASHLAND, ORE.

To Mrs. Foster, Mrs. Whyte, and other members of First Church of Christ, Scientist.

I desire to thank you for the handsome copy of "Science and Health with Key to the Scriptures" given me for our school library. This work is given prominence upon our shelves and we prize the same as representing the principles and teachings of a very large body of thinkers and students in our country and a work without which no library is complete. Very sincerely,

B. F. MULKEY,
President State Normal School.

SACRAMENTO, CAL.

The members of First Church of Christ, Scientist, of this city, are planning for a new church edifice, which will be erected at once. The lot is a corner one and located on West Elm Street, just four blocks west of Sacramento Street. The structure will be of cement and stone and will cost in the neighborhood of three thousand dollars. A Building Committee has been appointed and work will begin as soon as arrangements can be made.

The Evening Bee.

CHICAGC ILL.

[The following is a copy of a notice read at the Sunday services of First Church of Christ, Scientist, Chicago, during the month of June. The unselfish spirit displayed in this matter is no less gratifying than remarkable. —EDITOR.]

At a business meeting of the members of this church, held Thursday evening, May 16, 1907, a motion was unanimously adopted as follows:—

"That the board of trustees of this church proceed to create a building fund, to be known as 'First Church of Christ, Scientist, of Chicago, permanent fund for Church extension,' and be empowered to distribute it as directed by the members of this church at any regular or special meeting."

It is obvious that with the constant growth of the Cause of Christian Science in Chicago, and the continuing unity of thought and purpose among us, there will be at all times an objective for such funds, hence the wisdom of establishing a permanent fund by this church to be disbursed as the members may determine. This direction to the trustees to "make channels for the streams of love" has been carefully considered, in order that the best results may be reached in the best way. Throughout its existence this church has demonstrated its knowledge that giving does not impoverish, and so the trustees are agreed that no individual solicitation, no pledge nor urgent appeal will be needed.

In order that it may be as impersonal as possible, and come from the church as a whole to such church or churches as may be decided upon, the plan has been adopted of setting apart to the "permanent building fund" the proceeds of the morning collection of the second Sunday of each month, as has been done for other purposes: in addition to which white envelopes, plainly marked "Permanent Building Fund," will be found in the corridor and in the directors' and trustees' rooms, in which contributions may be enclosed and deposited in the baskets on any other Sunday. A brief announcement only will be made each month of this fund, which the trustees know will be sufficient.

This beautiful church edifice was built by the love and sacrifice of the Christian Scientists of the whole of Chicago. It is our heritage, but our happy condition should not engender sloth. Each one here has as great cause for gratitude to Christian Science as any who helped build this church. Let us, therefore, manifest that gratitude in the practical way of helping others. Sixth Church, although having a lot bought and nearly paid for, has suspended its building fund until Seventh Church, whose need is greater, has its building completed. Can we do less than follow this beautiful example? 'Tis "true, the heart grows rich in giving."

Respectfully submitted,

BOARD OF TRUSTEES.
By JOHN C. RYAN, *Clerk.*

[Written for the *Sentinel.*]

THE SHEPHERD.

BEN. HAWORTH-BOOTH.

AH, gentle shepherd of the moor and hill,
Though cold the comfort of the wintry wold,
Though frozen be the fountain and the rill,
And wolves await the wanderer from the fold,—
We hear thy mountain horn and fearful hearts grow bold.

Thee, too, the ravening pack of wolves or men
Pursue with poisoned fangs and baneful breath:
"Is he not dead?" they cry. "We knew him when
He plied his father's trade at Nazareth.
Let him be crucified; he said 'there is no death'!"

But shepherd-like he stands upon the starlit steep,
Above the fading mists, the phantom fears:
Perchance to pray, to watch: perchance to weep.
Starlight yet lingers on his lips and tears,
While earth awaits his words, the message of the years.

"Behold," he cries, "all nature telleth it:
The stones attest thy God! The clouds disperse,
And on the gleaming page of heaven is writ,
'Wisdom and Love and One;' the universe
Sings, star to star, 'There is no pain, no death, no curse.'"

O for a flame to wing my song with fire!
Dear shepherd, wherefore heed their hate or scorn?
The dulled iniquity of earth's desire
On every tongue, on every breeze is borne,
Seeking new victims still, unholy and forsworn.

Heed not the ocean foaming out its wrath,
Nor cruel pack that pleads its own disgrace;
The heaven of destiny, that plans thy path,
Gives thee the loves of all mankind; thy face,
Upon their hearts engraved, an angel's hand doth trace.

TESTIMONIES OF HEALING.

With a heart overflowing with love and gratitude I give my testimony of healing through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. Truth and Love had been preparing me for some time, leading me unconsciously to Christian Science. It had been my custom to take many books from our city library, always with the thought of knowing the true meaning of life, and it was there that I secured a copy of Science and Health. At that time I knew nothing of Christian Science, but I had not read in its text-book more than fifteen minutes when I was healed of sorrow. My physical healing followed very closely after. I was healed of catarrhal and rheumatic trouble, also of extreme nervousness. Besides this physical healing, I was healed morally and spiritually. The study of the text-book taught me the purity and uprightness of true living; it gave me in a measure the true understanding of the religion that Christ Jesus taught, lived, and practised,—healing the sick and regenerating the sinner. It is now six years since I began this study, and with one exception Science and Health has been my only practitioner. I have seen all manner of diseases healed through Christian Science, and since my own healing eight relatives have been healed and are now working in this blessed Christ-truth.

My love and gratitude to God is indeed great, and no words can express the depth of gratitude I feel for our beloved Leader, Mrs. Eddy. I am continually striving to live this truth,—striving to be obedient to our Leader's wise and loving counsel; to realize Christ Jesus' words and works,—"By their fruits ye shall know them,"—the example upon which Christian Science is founded.

MRS. MINNIE MARION COLLINS, Springfield, Mass.

Sometimes blessings come to us disguised as misfortunes. My long illness was the blessing in disguise to bring me into Christian Science. I was a business woman for eighteen years, and was at last driven out of my profession by sickness—a perfect wreck of my former self. I did not call upon many different physicians, for I felt that those I had employed were competent and I had great faith in them. They all, about five in number, agreed that I must have an operation or my home would be in an asylum. I believed what they said, but rather than submit to an operation I said I would live on as I was. I never believed that I would have to submit to an operation, or that it would be successful in curing me even if I did allow it, for my physician would offer no guarantee. I suffered from female trouble, with many attending disorders. The doctors thought this condition was brought on at childbirth, the two physicians in charge not attending me properly. During twenty-eight years I suffered, constantly growing worse, until my constitution seemed unable to bear the weight of suffering and disease any longer. During this term of years my husband paid out hundreds of dollars. He was utterly discouraged, and in despair he turned to Christian Science, having learned in his business relations of some persons who had been healed by it. When he mentioned it I exclaimed, "Why, are you demented? What do you know about Christian Science? I don't think that it is anything for you or for me." I said this because neither of us had any interest in Christianity. At last I consented simply because he asked me, not because I believed in it. I would have tried anything else just the same had he asked me.

Imagine my surprise, therefore, when after four days' treatment I was healed of bowel trouble for which I had taken almost every material remedy that was suggested to me during twenty-eight years. Of this relief from a disease which I had never expected could be cured, I did not then speak. At dinner one day I noticed my husband and mother watching me. "Why in the world are you watching me so closely?" I asked. My husband replied, "You are so much like your old self that I cannot keep my eyes off you." My healing was not instantaneous, but rapid. After five weeks' treatment, which cost but twenty-five dollars, I was completely healed of all my ailments. I have often heard it said that Christian Science is good for nervous people. Now my experience is that "nervousness" is of such a nature that material remedies cannot reach it. I feel very kindly toward the physicians I have employed, and know they did all they could; but to be healed in five weeks by Christian Science (what doctors had failed to do during many years) certainly proved to me that Christian Science is something above and beyond material knowledge.

The more I study Christian Science the more beautiful and true it becomes to me. We prove it by living it. I have been so blessed through my healing that the whole world seems new. All I am and all I expect to be I owe to Christian Science. I am no more like my former self than if I were another person, and my friends all remark about it. My likes are all changed,—the things I used to love are now a task instead of a pleasure. I am very grateful to Mrs. Eddy, whose wisdom and love has established Christian healing in this age. It would not be natural or just to withhold gratitude to her. This demonstration is hers, not mine.—CLARA A. ORRILL, Manchester, N. H.

On the third day of September, 1905, I commenced a fortnight's holiday at Melton Constable, in Norfolk, but on arriving at this place I did not feel well. On Sunday I began to get worse, and on Monday I went to Yarmouth, but was compelled to return and call in a doctor, who ordered me to bed at once as the pains were beyond endurance. On examining me he decided that the trouble was a malignant growth on the liver. He then called another medical man in to consult with him, and I saw that he agreed with the diagnosis. After I had been confined to my bed for seven weeks and was gradually getting worse, I decided to have a physician from Norwich. The latter gentleman gave me very little hope of ever again being able to carry out my previous duties as inspector in the locomotive department of the North Eastern Railway. My wife was given to understand that the trouble was very serious, and that there was very little hope of my recovery. After being at Melton Constable for eight weeks I decided to return home to Darlington, regardless of consequences. On hearing this the doctor would not give his consent. I, however, made arrangements to come home, and did so, although I had to be carried on a stretcher from my lodgings to the station, and from one platform to another. Before leaving the above-mentioned place my doctor wrote to another physician in Darlington, asking him to see me upon my arrival, but for some unexplained reason the latter gentleman never came. I therefore went on using the medicine I had brought with me.

On the Tuesday following a Christian Scientist came to take my case, and I began the treatment at once, throwing away all the material dependences which had failed me. I am delighted to say that after acting upon the advice of the practitioner my recovery was rapid and almost marvelous. Since returning home I have never had a doctor in my house. I commenced my duties again on Feb. 5, 1906, and am thankful to say that I have never found the slightest difficulty in attending to the same, nor have I experienced any ill effects from my recent illness. I am exceedingly thankful to God, and also to Mrs. Eddy for bringing this long-lost truth to light. In

Digitized by Google

conclusion I may say it is my firm opinion that had not the truth been administered to me in the manner it has been, I should have passed long ago to join the great majority, and I am certain that what has been done for me can be done for others by the same means.

ENOCH SHIPLEY, Darlington, England.

I may truthfully say that I never was free from some disease until I was led to read Science and Health, in August, 1905. I had been treated by many physicians, of every school, besides trying magnetic treatment, osteopathy, etc., all to no avail. I was feeling hopeless and helpless when a sister in Chicago asked me to come and visit her, and that together we would study "Science and Health with Key to the Scriptures" by Mrs. Eddy. I went, but when I began to read I grew critical and dissatisfied. My sister said, "Be fair, read to understand and not to criticise." I then settled down to reading, but like many another, because I was reading the book I thought I was a Christian Scientist. I had been troubled with a belief that the eating of fruit would bring on intestinal trouble, but thought I, "I am a Christian Scientist, so it won't hurt me," but without having learned how to prevent it from doing so. I ate quite freely of fruit, and this seemed to bring on my old complaint. My sister treated me, but I was so full of fear I could not be reached. She begged me to have a Scientist help me, but I was afraid and called in a physician, who, after trying to locate my trouble, said as all others had, that it was due to a mental condition. I was so ashamed and provoked at my lack of faith in Christian Science that I did not take his medicine, but went to a Christian Science practitioner; and from then until now I have been earnestly seeking "the kingdom of God, and his righteousness." I have been able through the truth, as taught by our dear Leader, Mrs. Eddy, to overcome many ailments both for myself and others.

Last winter I burned my arm severely, but I declared the truth and it was not even sore. Again, recently, I had what seemed to be a boil on my arm. I again declared the truth, and it disappeared, leaving my arm perfectly smooth. A second one did not progress so far, and many who do not understand the truth wondered at it. I am most grateful to our dear Leader, who has made it possible through her book Science and Health to overcome error with the truth that makes us free indeed.

VIRGINIA ROSS, Madison, Wis.

Some six years ago, while spending a ten-days vacation at a watering-place in Texas, I first opened the book "Science and Health with Key to the Scriptures," and began its study. The novelty and force of many of its statements impressed me, though some sentences were puzzling and seemed contradictory. By constant and persistent use of a critical sense, I sought to unravel its hidden wealth of meaning by the ordinary processes of mortal mind,—inquiry into the pros and cons, the whys and wherefores,—but I found out afterwards that the logic of human reason and the constant appeal to the intellectual faculties were alike unprofitable. Afterwards I turned abruptly and with humility (who has not?) to the pathway of spiritual awakening outlined by our dear Leader, who says, "I won my way to absolute conclusions through divine revelation, reason, and demonstration" (Science and Health, p. 109). When I was healed over night of a sprained wrist, after ten days of pain and fruitless medication, full of joy and love I turned to my wife and said, "Why cannot I learn to do these things, and help you with the children?" Thus was established in my consciousness a great and primary truth, a fervent desire to serve others. Christ Jesus once said, "If ye love me, keep my commandments." There is no love without service. There is no service without love. Prayer cannot be made the fruitful vehicle of a capricious or resentful mind.

In a short time after beginning to demonstrate the truths of Christian Science there was revealed such a knowledge of the Scriptures as seemed wonderful,—hundreds of passages whose meaning had been heretofore hidden, blazed with prescience and divine potency. Many demonstrations or proofs of God's love followed. The habit of smoking disappeared, simply from reading Science literature, and a bowel trouble was banished in the same way. My oldest boy had his leg and foot severely injured by the pony falling upon him. In ten days both foot and leg were healed thoroughly, and not a trace of the trouble remained, not even discoloration nor the loss of a nail, though at first the appearance had been most alarming. The realization of the Scriptural statement, "A bone of him shall not be broken," and the scientific sense that there is no injury in Mind nor in its manifestation, set human thought right and destroyed the evil.

I have much to praise God for, more indeed than words can express. To her who has discovered anew the great truth of Christian Science, my heart goes out in daily acknowledgment. May the time soon come when "the earth shall be full of the knowledge of the Lord, as the waters cover the sea."—E. M. LONGCOPE, Houston, Tex.

I became interested in Christian Science in 1905. For several years previous to that time I was suffering from hip and spinal trouble, and had been under the care of several prominent physicians, but grew worse all the time. In July of 1903 I underwent an X-ray examination, and a few days later I was put in a plaster-of-paris cast. When this cast was taken off I was put into a nickel brace, which was very heavy. I wore the brace day and night for two weeks, at the end of which time I had become so very lame that the brace was taken off and my left shoe was built up four inches.

In July, 1905, I began taking Christian Science treatment, and in August I took off my high shoe and wore both shoes alike, but still I limped. One day in November I started to walk, and to my surprise I did not limp a bit. No one knows how happy I am for what Truth has done and is doing for me and for my mother all the time. I am thankful that I know a little of the blessed truth. I have had other demonstrations, one of which was made without any personal help. After having worn glasses for five years, I took them off last June and have had no need of them since. This healing has been a very great comfort to me.

I am indeed grateful to Mrs. Eddy for the wondrous light that she has been the means of giving us. It is now my privilege and hope to bring the same truth to others.—EFFIE B. NICHOLS, Corona, Cal.

About two years ago I had occasion to go to a dentist for some work on my teeth. Before going I tried to realize that I need suffer no pain, for our textbook says that "nerves have no more sensation, apart from what belief bestows upon them, than the fibres of a plant" (Science and Health, p. 488). Several teeth were filled, and at one juncture the dentist looked at me sharply and said, "If I hurt you, you must be sure to tell me." I promised to do so, but it was not necessary, for I felt no pain. A short time ago a friend told me that she was informed by this dentist that he had filled one of my teeth over a live nerve, and that he thought it might have been Christian Science that had spared me the pain. As he said nothing to me at the time, I had been ignorant of this wonderful demonstra-

Digitized by Google

tion for two years. It showed me how many times we prove the power of Truth to others, without being ourselves fully conscious of it, and it made me more than ever grateful to Christ, Truth, that "healeth all thy diseases."—FRANCES G. SMITH, Toledo, O.

Over a year ago I was taken sick with lung trouble, which soon resulted in serious complications. I was under the constant care of a doctor for eight weeks, and for a great portion of this time he called three and four times a day. I was reduced to a mere skeleton and was so weak that my family did not think I would recover. As a last resort we decided to try Christian Science, and telephoned to Dayton, O., for a practitioner, a relative of the family. My husband says he could see a slight change for the better within a few hours. The next day the practitioner came to our home and stayed by my bedside until after midnight. The following day I was able to eat a little solid food, the first I had eaten in several weeks, and I soon gained a good appetite. While under the doctor's care even morphine had failed to give me sleep, but after I had taken a few treatments I could rest better and sleep soundly. In a few weeks they were able to move me down stairs, and in less than five weeks with a little assistance I walked from the sitting room into the dining room and ate dinner with the family, the first since my illness. In about another month I had improved enough so that I could go to Dayton on a visit, and since that time I have steadily gained, until now I can say that I am well and enjoying good health, and able to do my housework.

If those who read this testimony could know from what depths of misery and suffering I have been lifted through Christian Science, they could better appreciate my gratitude and what I owe to this blessed Christ teaching. From the depths of my heart I thank God, and I thank Mrs. Eddy for bringing to mankind this clearer view of the gospel of Jesus Christ, which to-day heals the sick as well as reforms the sinner.

MRS. MAGGIE LONG, West Chester, O.

It behooves me in my new sense of things to express in some way my gratitude to divine Love for the beautiful healing work which has been and is being done in my behalf, though my acknowledgment seems tardy. I can say with St. John, "I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and there was no more sea"—no more sea of pain, of fear, of false things. About six years ago I was so near the brink of things, mentally and physically, that even to-day the memory of it is sometimes vivid to the human sense. There is no gain in enumerating the days of pain and fear; the gain comes in knowing that through conscientious striving, earnest desire, and the prayers of myself and other workers in Science, I can happily acknowledge that Christian Science is healing me. It is likewise fitting me for God's work in the healing of others. My sense of life has been transformed. The one slight bodily ailment, which was seemingly the last to yield, has, I feel certain, made me a more earnest student of Christian Science, as it has made me work for myself, a thing I seemed disinclined to do a few years ago. I am a daily student of the Bible and of Science and Health, and am thankful for the great blessing that Christian Science has brought to me, turning my thoughts from the world and the lusts thereof, and bringing me peace. My deep gratitude goes out to Mrs. Eddy for her wonderful patience in this work.

MAY MCARTHUR PRICE, Chicago, Ill.

After seventeen years of invalidism, suffering all the time from a supposedly incurable disease, I was healed in the spring of 1891, by Christian Science, in less than three weeks. I had suffered from female trouble and extreme nervousness. During that time I had been under the care of four experienced physicians,—one in Boston, two in Chicago, and one in Evanston, Ill., where I was living at the time I was healed. The physicians did what they could for me, but they all said the same thing, viz.; that they could relieve the pain, but could not cure me. Since being healed in Christian Science I have been perfectly well and strong, able to do anything I wish to do; never having to think whether it is hard or not. I wish to express my gratitude to Mrs. Eddy for this wonderful truth, which is doing so much for me all the time, as all I am or ever expect to be I owe to Christian Science, even life itself.

EMILY D. PIERSON, Burlington, Ia.

I cannot tell how grateful I am for what God has done for me through Christian Science. Two years ago last January we went to New York and asked for help from a Christian Science practitioner there. She told me that God is as able and willing to heal now as in Jesus' time, and this thought greatly uplifted me. I had seven weeks' treatment and was healed, and am glad to say that I have not used any material remedy since. I had suffered for sixteen years with severe stomach and bowel trouble, and it seemed as though there was no help for me, but what *materia medica* had failed to do in sixteen years, the truth accomplished in seven weeks. I was also healed of neuralgic trouble of five years' standing, and from throat trouble of two years, and I laid aside glasses which I had worn for six years. I can truthfully say I have found a Saviour who is always near, and is true to his promise, "Lo, I am with you alway." To God first do I render thanks, then to our dear, faithful Leader, Mrs. Eddy, through whose teachings I have been awakened from the dream of error. Only those who have been led from the darkness of materiality to the light of Truth, can understand how grateful I feel.

MRS. EMMA PETERSON, Perth Amboy, N. J.

I write this, hoping it may do good and bring some one to the understanding of Truth. I wish to do something for others, in return for all the blessings I have received, for through Mrs. Eddy's teachings in Science and Health I am to-day a new man. My family are surprised to see me changed from the old thought, as I now look to the spiritual and not to the material. I see now where I have never seen before, for God has opened my eyes through Christian Science and I find that it is health and strength and peace to dwell in God. I have overcome lung and rheumatic trouble, besides some minor complaints; these have all been made to disappear through faith and prayer, as explained in our wonderful text-book.

I am also happy to state that I am now doing a prosperous business, more than I ever did before at this time of the year, and this I feel is through God's help and wonderful love. I trust Him more and more, for it has been proven to me that He answers prayer. I have received blessings in every way, both spiritually and materially. I never could have known this truth except through our dear Leader's book of enlightenment, "Science and Health with Key to the Scriptures." May God bless and preserve her.—EUGENE S. WEAVER, New York, N. Y.

During the severe winter of 1898, while in Boston, Mass., my husband slipped and fell, causing, so the physician said, an injury to the knee. At times there would be so much pain

Digitized by Google

that it was necessary for some one to assist him in dressing. Two physicians prescribed different remedies, but nothing gave permanent relief. In September, 1899, a dear friend who had attained quite a reputation as a surgeon in his own city, visited us. His opinion of the case was that an operation was the only thing which would help, but he would not advise it, as it might leave the patient worse off than ever. Two months later we moved to New York city, and there took up the study of Christian Science. I obtained my husband's consent to work as best I could to overcome this condition. The silk and rubber band was soon discarded, and in a very few months the leg was healed. This was over five years ago, and there has been no return of the trouble. One distressing feature of this case was the pain in damp weather, but since coming to Toledo to live my husband has become an enthusiastic fisherman, wading and standing sometimes for hours in water, without the least inconvenience. I am more grateful than I can express for what Christian Science has done for me and for other members of my family, and I hope to prove my appreciation of our dear Leader by obedience to the Principle of Christian Science and to the rules she has given us.—MRS. BESSIE H. SCHAAF, Toledo, O.

I feel it my duty to express through the *Sentinel* my gratitude to God, and to our beloved Leader, for what Christian Science has done for me and mine. On the 24th of May, 1895, my brother presented me with a copy of Science and Health, and this was the first time I had ever heard of Christian Science. The thought of another religion was distasteful to me, but a few days later, while suffering intensely from rheumatic trouble, which I believed incurable, I began to read the book, with a faint hope that it might help me. The first teaching I grasped was that God did not send sickness, but that He healed it. Then the thought came to me, I can soon prove this,—and in turning to God alone for help the pain left me. I also had lung trouble, of which my mother had died. A throat and lung specialist had told me some years before that I would not live two months without treatment, and even he would not promise to cure me. I was under his treatment for several years and seemed to get somewhat better, but nothing would cure my cough.

While I was reading Science and Health, heart disease, and an internal trouble for which an operation had been advised, besides a bowel trouble of long standing, all disappeared. A stomach trouble for which I had to take morphine, as nothing else would give me relief, was healed instantaneously, the attack lasting only a few minutes, where formerly I would be in bed for several days; a severe nervous trouble also vanished into its native nothingness. In looking through the Bible one day, the third verse of the 148th Psalm caught my eye, and since reading it I have never felt a terrible depression from which I had suffered. My husband was healed of kidney disease in its severest form; one son of lung trouble and abscess in the head; a daughter of fever. Other diseases, too numerous to mention, have also been overcome in our family of six children through the understanding gained by reading Science and Health. Our eldest daughter, at that time a child of eight, had suffered nearly all her life from ear trouble, and medical treatment seemed only to increase her sufferings. She would sit in my lap and we would cry together in hopeless despair. Oh, the joy that comes to a mother's heart when she sees the smile come before the tears caused by the pain are dry. To be able to relieve pain amply repays one for all the struggles, scoffs, and sneers that a pioneer in Science has to endure. I could write much more of the help received, and then the half would not be told.

MRS. E. S. SHOEBOTHAM, Woodstock, Ont.

On Nov. 11, 1906, I met with what seemed a terrible accident, but in Christian Science we learn that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). This was proven true to me and about twenty relatives a few months ago. I had these visitors at my home, and while getting supper for them I was severely scalded with steam caused by the upsetting of a kettle of water into the range. The pain was so severe that it seemed impossible for me to demonstrate the truth for myself, and my relatives were not interested in Christian Science, except the members of my own household, so they all suggested material remedies. By this time the suffering was so great that I was unable to speak, nor could I find a corner where I could be alone. I at length managed to get away unnoticed, and ran to my nearest Christian Science friend, where I knew I could be helped to reach "the secret place of the most High." When I arrived at this friend's home I was unable to speak, but after being there for about half an hour I began to laugh at the appearance of my hands, for I was then entirely free from all pain. I had something to eat, and then went quietly to sleep. In the mean time the Scientist telephoned to my husband. When he came he found me sleeping quietly. I then got up, free from all pain, and walked home. Some of the visitors had remained to see if it was true that Christian Science could free me from the terrible suffering, and I could prove it to them with smiles and joy. The next morning my hands looked very badly, yet there was no return of pain. Some of the relatives could not sleep all night from the sense of shock, and were worried, thinking what a night I would have. They came back the next morning to do my work, but to their surprise they found me up and I had done a good deal for myself and for two little girls without any inconvenience whatever. The right hand healed in two days, and the other was also healed so that in nine days new skin had formed and not a scar was to be seen.

For me to say that I am grateful could never express my gratitude to God, divine Love, that freed me in so short a time from the severest suffering I had ever known. I know that nothing less than the Christ-mind was able to do that. May God bless our dear Leader for showing us this better way to find God so near and dear to us,—an ever-present help in all time and in the darkest hour. Only those who have had similar experiences can know how I feel. The spiritual uplift which I received through this healing could never be told in words. Before coming to Christian Science I had burned my right arm not nearly so bad as this was. I then had medical treatment and carried the arm in a sling for more than six weeks. In Science and Health we read, "The words of divine Science find their immortality in deeds, for their Principle heals the sick and spiritualizes humanity" (p. 354). I find this to be true in my case. We have tried to live Christian Science for more than eight years and it has never failed in any way, when it was rightly applied. If this testimony will help but one to find the road to right thinking I shall be very grateful to send it to such as are seeking the better way.—MRS. LILLIAN A. NIEMANN, Milwaukee, Wis.

THE WINNER.

WHEN the battle waxes fiercest,
When the blows fall thick and fast,
With full courage, reinspired,
We shall gain the height at last.

We shall conquer—if unyielding,
We march forward to the goal,
Never stopping, never heeding,
Knowing naught but might of Soul.

LILLA ELIZABETH KELLEY.

FROM OUR EXCHANGES.

[Benjamin F. Trueblood in the *Christian Work and Evangelist.*]

The minister who is thoroughly convinced that the monstrous crime of war . . . is frightfully out of harmony with the fundamental principles of the gospel . . . that it is doomed to final destruction by the advance of the kingdom of God . . . . will not wait for set days and special invitations to preach on the subject. He will see that he cannot preach the gospel without preaching peace.

[Rev. P. T. Forsyth, D.D., in *The British Congregationalist.*]

We are called at the present day to a reconstruction of the old theology, a restatement of the old gospel. We have to reappropriate and remit the truth of our experienced Christianity. But what a hardship it is that this call should search us at a time when the experimental power of our Christianity has abated, and the evangelical experience is so low and so confused as it often is. It must be the ministers' work to recover and deepen this experience for the churches, in the interest of faith and of the truth in which faith renders an account. For the reformation of belief we must have a restoration of faith.

[Davis Wesgatt Clark, D.D., in *The Christian Advocate.*]

Until of late the accepted theory has been that the minister's function related to the soul, the physician's to the body, but with the increasing knowledge of the subtle interrelation of these spheres such a rigid division is found to be unscientific and impracticable. The physician must cross the boundary and know somewhat of the mental state of his patient, and the minister must understand the physical condition of his parishioner, before either can do his best in any given case. So the healing art and the cure of souls can find common ground to advance human welfare.

[A. L. M. in the *New-Church Messenger.*]

Is it not, possibly, because we are always looking afar off for the kingdom of heaven, that we have so little consciousness of its eternal presence with us? Is it not, possibly, because we fix our eyes so steadfastly on the darkness, sin, and misery of the world, that we fail to see the glory of the sun which no cloud can obscure to our true inward vision? Is it not, possibly, because we insist on dwelling obstinately and perpetually in the low atmosphere of worrying temporal things, that we miss the entrance to the Holy City whose gates are ever open to us who earnestly and faithfully seek?

[*The New York Observer.*]

It may be taken for granted that the law of Christ, as it hastens to apply itself to modern industrial conditions, makes the following demands at least—that the ultimate appeal in all questions of business shall be to what is moral in addition to what is legal, that the rule of brotherhood shall prevail rather than the "brigandage of commerce," that every man, high or low, shall have a "square deal," that employers and employed shall have no differences, or shall arbitrate their differences where they have them, that all due preventive measures shall be taken for the protection of employes, in the way of improved hygiene and sanitation and the adoption of safety devices, that there shall be a fair division of the profits of manufacture, and that each man, having done the best that he may under the conditions surrounding him at any one time, shall be content with his wages and remain at peace with mankind.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science.* These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.
It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

MR. KIMBALL'S LECTURE. 31 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. 25 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By Rev. ARTHUR R. VOSBURGH. 28 pages.

HEALING THROUGH CHRISTIAN SCIENCE. Discourses and Editorials. By JUDGE SEPTIMUS J. HANNA. 36 pages.

HEARINGS ON PROPOSED MEDICAL BILLS IN MASSACHUSETTS AND NEW YORK. 23 pages.

ANSWERS TO QUESTIONS CONCERNING CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. 26 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 63 pages.

THE CHRISTIAN SCIENCE MOVEMENT. Revised by CAROL NORTON. 28 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the *Journal*. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 40 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 38 pages.

A CRITIC ANSWERED. By ALFRED FARLOW. Printed in German only. 31 pages.

Price: One copy, six cents; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER G. EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.
Cloth binding, each, prepaid $3.18
Two to twelve books (cloth only) to one address, each, prepaid 3.00
Twelve or more books to one address, each, prepaid 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid . . 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Levant, divinity circuit, leather-lined, round corners, gilt edges, silk-sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6.00
Twelve or more to one address, each, prepaid . . 5.75
Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price prepaid, single copy $5.00
Twelve or more copies to one address, each . . . 4.50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, p[illegible] 2.25
Twelve or more books [illegible] address, each, prepaid 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . . 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,
Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.60.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration will be found on the wrapper. No other notice will be given.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba; twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

In all other countries, six cents per copy, postpaid to any address; twenty-five copies, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST

National.

The Court of Errors and Appeals of New Jersey has just decided an interesting case in favor of the Vulcan Detinning Company, which was organized for the detinning of tin scrap,—the separation of the metallic tin from the steel. The formula and secret process, which were obtained from Holland, were entrusted to certain directors of the company, one of whom afterwards became interested in the American Can Company and sold his stock in the Vulcan Company for a round figure and then resigned. Rival plants were then built by the latter company and the same process used. As a result of the decision the American Can Company was enjoined from using the process, and will be required to account to the Vulcan Company for all the profits it has made from the time it began to use the secret process. The court held that the employes and the chairman of the executive committee were trustees of the secret process, and held it for the sole benefit of the Vulcan Company; that the American Company, by acquiring it from the delinquent servants and officers, must be held likewise as trustees for the Vulcan Company.

The new plan of the Department of Justice in its program of trust prosecution—to apply for Federal receivers in cases where trusts are convicted of violation of the anti-trust law—will probably act along one or more of the following lines: That receivers be appointed where possible to sell the plants of the combinations found guilty of violating anti-trust law; that an injunction be issued for the dissolution of the illegal combination in restraint of trade; that contracts or agreements in restraint of trade be abrogated; that conspiracies in restraint of trade shall be punished in accordance with the conspiracy statute, as well as the anti-trust law; that criminal sentence be imposed as provided by the anti-trust law. It is expected that one of these lines will be followed in the case of the powder trust and the tobacco trust.

"As chief of the Weather Bureau and president of the Geographical Society," said Willis L. Moore a few days ago, "I have instructed Major Henry E. Hersey, who is with Walter Wellman in his aeronautic attempt to reach the North Pole, and who in that expedition represents both the bureau and the society, that he is expected to make the dash this summer. I have endeavored to make it clear that we do not intend to lend ourselves to any plan that smacks of sensational advertising without real accomplishment."

About four thousand invitations were issued for Ambassador Reid's Fourth of July reception in London. At The Hague the American Minister to the Netherlands gave a dinner to the American and British delegates to the Peace Conference. The American Chamber of Commerce of Paris gave its usual Fourth of July banquet. The American colony at Berlin, to the number of about four hundred, picnicked at Grunau near by. At Rio Janeiro a reception was held aboard the cruiser St. Louis.

The International Bureau of the American Republics, maintained by the joint action and contributions of all the republics of the Western Hemisphere, has for its purpose not only the promotion of commerce and trade, but also the development among them of "better acquaintance, closer relation, and more intimate intercourse along material, educational, intellectual, and social lines." Twenty-one republics are represented and organization was effected in 1890.

The Fiala expedition in search of the North Pole sailed from New London, Conn., July 9 in the fifty-three-ton vessel A. T. Gifford. This vessel is to establish bases of supplies for the main expedition, which will set out later. To continue the exploratory work of the discovery expedition in the Antarctic a party has been organized by Lieutenant Shackleton, who was a member of Captain Scott's crew, and who will shortly start for the Far South.

The Department of Commerce and Labor has ruled that no more gambling boats shall be permitted on any of the Great Lakes. The decision was reached after an investigation of the controversy between Chicago officials and the owners of the "floating poolroom," City of Traverse.

The total cost to the United States Government for its intervention in Cuba and of the work of reorganizing the government of the island and putting it on a stable and permanent basis, as estimated by Secretary Taft, amounted June 30, 1907, to $3,330,569.91.

An indictment charging the Atchison, Topeka, and Santa Fé Railroad with granting rebates amounting to $12,000 to the United States Sugar and Land Company of Garden City, Kan., has been returned by the grand jury at Chicago.

Forty-five Americans and eight Canadians are in the list of Rhodes scholarship appointees for the year. A large number have planned to cross the Atlantic together, leaving Philadelphia Sept. 21 by the American line steamer Merion.

The mayor of San Francisco, who has been on trial for some time for extortion, has been convicted and sentenced to five years in the penitentiary.

The assessment of the public utilities companies of West Virginia shows a total of $244,000,000, an increase of $34,726,000 over the previous year.

International.

The Spanish Minister of Public Works has presented a bill in the Senate under the terms of which foreign life insurance companies must deposit $100,000 in cash or acceptable securities, and fire and accident companies $50,000 in addition to and independent of the reserve fund, which consists of twenty-five per cent of the premiums. There will be established a special department under the Ministry of Public Works to carry out a rigorous inspection of the operations of these foreign companies. The companies must furnish full and complete information regarding their business and publish a yearly report and balance sheet in Spanish.

Reports received from Fez say the Moroccan authorities offer to do everything possible to secure the release of Kaid General Sir Harry MacLean, commander of the Sultan's bodyguard, who, while conducting negotiations, was recently captured by Raisuli, the bandit chief.

It is intimated that the Japanese Government will not consent to the renewal of the present treaty with the United States if the latter Government reserves the right to insert a clause in the compact excluding Japanese coolie labor from continental United States.

The census and statistics department of Canada has figured out the population to be 6,509,900. This was on the first day of April of the present year. At the last census, six years ago, the population was 5,371,315.

Industrial and Commercial.

Another cotton-picking machine is being placed on the market in the Mississippi Valley. It is a pneumatic affair, the capacity claimed being one hundred pounds per hour for each operator, or an aggregate of from four to five thousand pounds per day of average cotton. This is equivalent to the labor of ten fast field hands. The machine picks five rows at a time. The device consists of a platform five by fourteen feet, mounted on wheels, which are fitted on arched axles to enable the machine to be driven astride the cotton rows without injury to the plant. On the platform is a twenty-five horse-power gasoline engine, which drives the machinery and operates a double exhaust or suction fan at a high rate of speed. This is applied to the open cotton by means of four flexible suction hose, two on each side of the machine. Each hose requires one man to operate the nozzle, which is held near the open cotton boll. The suction speedily removes the fibre, drawing it through the hose and into a large screened receptacle at the rear of the machine.

The Railroad Commission of Mississippi has by a unanimous vote flatly refused to grant permission to the Cumberland Telephone and Telegraph Company to advance its night rates to the same basis as its day rates for long distance service. The commission also stated that a sweeping reduction in rates would probably be ordered when it takes up the revision of tariffs charged at the various telephone exchanges in Mississippi.

The Jones and Laughlin Steel Company is preparing to erect a large bridge and structural steel plant at Pittsburg, Pa. About $1,000,000 will be spent on the new plant. Four open-hearth furnaces will also be added.

Judge Landis, in the United States District Court at Chicago, has announced that on Aug. 3 sentence will be passed on the Standard Oil Company of Indiana, which was convicted of using illegal railroad rates. A fine of $29,240,000 may be imposed.

The Massachusetts Highway Commission is conducting an exhaustive hearing on the petition for lower telephone rates from the New England Telephone and Telegraph Company.

The New York Central Railroad Company, recently convicted for failure to file rates on shipments of Standard Oil, has been fined $15,000 by Judge Hazel in the Federal Court.

A transaction involving timber lands in Oregon, Washington, and British Columbia, which will cut five billion, one hundred million feet, has just been completed.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

HEALED BY CHRISTIAN SCIENCE.

Indianapolis, Ind., July 1, 1907.

Mrs. Mary Baker G. Eddy,
Concord, N. H.

My dear Leader and Teacher:—I have not had the pleasure of seeing you face to face, or of knowing you as many have known and do know you. I wish, however, in some way and measure to express my appreciation of your loving service to mankind, which has touched me and mine in a most beneficent manner, healing all our diseases through the Word of Truth and the power of Love divine, as taught by you in Science and Health, which has indeed proven to be a "Key to the Scriptures," for through its reading I have been healed of nasal catarrh of forty years' standing, upon which I had spent hundreds of dollars for medical treatment. Three and a half years ago I was healed of what two prominent physicians called inflammatory rheumatism, which so affected my whole body as to make me entirely helpless. While growing steadily worse, and being told that I could not expect to get back to my office for thirty or sixty days, I dismissed the doctors, called in one of your students, and with her help I was perfectly healed within a week. I have had no occasion to ask for help but once since, which was for a sense of pain coming from a broken rib. This was healed by two absent treatments and without the loss of an hour of time.

It may surprise you to learn that the writer is not a member of a Christian Science church, but is yet a Methodist in name. I assure you, however, that I am, and could not help being, a better Methodist through having read your books and periodicals. The problems which seem to bar the way to our uniting with a Christian Science church are working out beautifully, and evidently will work out for us great good. These are such good things to report, but transcending them by celestial diameters are the spiritual gifts,—the quickened sense of God as Life, Truth, and Love; the keener perception of and discernment of the Word, which "is quick, and powerful, and sharper than any twoedged sword, . . . a discerner of the thoughts and intents of the heart," which truth every true Scientist has demonstrated by your prescribed rules. I thank my God, through Jesus Christ, that this revelation has come to you, and through you to the world. I thank you for your life of unfeigned love, manifested in the fruits you bear, and may the God whom you serve sustain you in every hour of trial, and enable you to demonstrate fully and perfectly the omnipotence of Love; not to put to rout your enemies, but to win them for God's kingdom instead.

In closing let me assure you of my sympathy and prayerful thought, and my purpose and desire to follow you as you follow Christ.

Sincerely your student,
J. H. WIEST.

THE GOOD CHEER OF CHRISTIAN SCIENCE.

W. D. MC CRACKAN, M. A.

CHRISTIAN SCIENCE prepares a bountiful table for those hungering and thirsting after righteousness. It satisfies them with good things and makes provision for every contingency. In the modern world in which it has appeared, it is establishing the divine right of men and women to discard evil and magnify good, to be reformers of themselves and of others, and to be happy, joyous, and well while engaged in this work. It is illustrating to all who are willing to learn, how best to help the poor (those who are receptive) without pauperizing them, without making them dependent or incapacitating them for self-government and self-control. It is proving that to become spiritually minded is to grow healthy in body as well as mind. It enables sin-sick sufferers to become once more as little children; it teaches the prayer of true faith, gives the understanding of man's dominion over the whole earth, and reinstates practical, everyday, operative Christianity, as it was set forth by Jesus and his early followers.

The way of Christian Science is the way of primitive Christianity. Jesus explained it centuries ago, when he said, speaking for the Christ which was his divinity, "I am the way, the truth, and the life," meaning that his understanding or Science of God was the way. His own followers had much difficulty in comprehending the purport and import of his words until they learned to do the works which he commanded them. Later, scholastic theology, forgetting to do the works, shrouded the great Master's words in mysticism, so that their true meaning had to be rediscovered in our day through Christian Science, in order that these very words might have the "signs following."

This Science of Christ points unremittingly to the necessary practice, and not merely to the profession of Christianity. The real story of Christian Science is being told by its fruits,—at the Wednesday evening meetings, in the testimonies to be found in our various periodicals and pamphlets, and, as a more permanent record, it appears in the chapter on "Fruitage" in our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, as well as in the testimonies added to her "Miscellaneous Writings." And what a story it is! How crowded with hope and love, with the evidence of God's unfailing goodness in every hour of trial. Is it any wonder that grateful recipients of its ministrations in all quarters of the globe rejoice at every proper opportunity of commending it to those in need of help. It comes as the gospel of good health as well as good morals; it furnishes a normal and natural impetus to good deeds, and explains the method by which whoever will may do useful work in the world. It is no temporary makeshift for extraordinary occasions, but is being used daily by practical, level-headed people in overcoming the humdrum difficulties of mortal existence as well as in meeting the rarer crises of sin and sickness.

Humanity cries for a Saviour to rescue it from its miseries. It has tried the human mind and all its many inventions,

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

and has found them wanting. Modern psychologists are laying bare the operations of this human mind with pitiless persistence, exposing its inconsistencies, its variableness and idiosyncrasies. This mind, with its uncertain, shifty, and tricky nature, its constantly changing beliefs, subject to fashion, tradition, contagion, and suggestion, cannot possibly be the saviour nor belong to the imperishable and indestructible scheme of the divine creation. The great boon which our well-equipped and well-beloved Leader has brought to suffering humanity consists in the discovery of the Principle by which Jesus and his disciples acted to restore the sick and sinning to health and righteousness. Her writings explain to modern men and women, who demand a reason for everything, why they have a right on logical grounds and not in mere blind belief to know that when they pray aright they will receive.

The question is sometimes asked, how it is that, as a rule, Christian Scientists present the appearance of material well-being. It may be set down first of all that Christian Scientists are taught not to fear poverty, and at the same time not to look upon it as a virtue. They are certainly not called upon to submit to it as inevitable. Jesus long ago laid down the rule, couched in words of advice to his hearers: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." Growth in spirituality involves the surrender of fear, worry, or anxiety about material things, along with any sense of incapacity or disability in the performance of daily duties. This in and of itself ensures enhanced effectiveness or, speaking economically, increased earning power.

Spiritual growth further involves an expanding comprehension of God's power, of the infinite and unlimited nature of His operations. Then the recognition of man as made in the image and likeness of God, according to the Scriptural assurance, gives men and women a sense of dominion over material obstacles. The desire for wealth tends to disappear, but for that very reason the fitness to use it rightly is increased by growth in Christian Science. This Science enforces no material distinctions between men by reason of their material belongings, but unites them all under the one God, defined as Spirit or Mind. Thus Christian Science points hopefully to the elimination of all that separates man from his fellow-men. It proves itself to be the best physician in sickness, the Saviour from sin, the Comforter in sorrow, and the grandest and most efficient charity in poverty. Hence it radiates an atmosphere of good cheer.

"TREATMENT."

OLGA C. FOREMAN.

WHEN one comes with a grain of hope to Christian Science for treatment, after all other means have failed, he sometimes wonders "how they do it." This may be illustrated by the case of one who is fully conversant with the English language but has only a meager supply of—let us say—Spanish at his command. Suppose it were of vital importance to him to communicate with a Spaniard, yet he could only understand a few words here and there of what the other had to say. He might be baffled for a short while, but would not reason whisper to him to find some one who understood both languages, to ask this one to explain his request to the Spaniard? Thus this third party, by understanding both, would bring relief to the one in trouble, because of having helped to make clear to him that which he needed to know. Great questions may have been involved, but because ignorance of the language prevailed, they seemed insolvable; whereas, when the required understanding was brought to bear upon them, all these questions were readily settled.

Let us suppose again that a repeated necessity arose to communicate with this Spaniard, would not the one who had before been helped by another's knowledge of the language, instead of continually calling on this third party to interpret, eventually strive to acquaint himself with the language, so that he could directly avail himself of it, and thus speak for himself? Does not this analogy apply to those who are as babes in the language of Spirit, in their relation to her who closely listened to this new tongue, who has brought to the needy its message of health and joy, and interpreted to us the glad news that we are healed and that we may wipe away the bitter tears? Thus has our beloved Leader listened, and interpreted to us the once unknown but now more familiar language of Spirit; and what is more, she is teaching it to us so that we too may listen and hold converse often, yea at all times, in this new tongue and with all mankind.

All will admit that the learning of a new language is a gradual process, and that is why the young student of Divine Science must "carry the baggage of stern resolve" (Science and Health, p. 514), and patiently take one step at a time, even as children learn to walk and to talk and to work, and so on indefinitely. It is a glorious work, this task of solving the problem of our being, and when intent upon it, we learn not only to help ourselves, but also to help others, and that, as I understand it, is the work of the Christian Science practitioner. Concerning the results gained from faithful study of the truth, Christ Jesus has said, "They shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

TO BEGINNERS; FROM ONE OF THEM.

LOUISE KNIGHT WHEATLEY.

THERE are some beginners in the study of Christian Science whose efforts are marked by a failure to understand at once its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. We believe ourselves to be reasonably well-educated, fairly intellectual, at least not below the average in quickness of perception, and yet we find ourselves suddenly confronted with a book which to many of us seems about as intelligible as if it were written in Sanskrit. To be sure we recognize our own native tongue, we note familiar words and phrases, but so strangely are they employed that they seem to convey no meaning, and what are stated as "*self-evident* propositions" (Science and Health, p. 113) appear to us illogical. We persevere for a while, and then some possibly do as I did, close the book with a superior smile and announce that it is "perfect foolishness," not happening to remember that Paul tells us "the foolishness of God is wiser than men," and that He "hath chosen the foolish things of the world to confound the wise."

Perhaps, however, the beginner has reached what may be called the second stage of progress; he is ready to look again into this new religion, but only that he may overthrow it. I recall with what delight I entered the intellectual arena, sniffing the battle with every sense alert and every wit sharpened. My weapons seemed to me quite sufficient,—preconceived human opinion, prejudice, man-made theology, natural conservatism, and a love of argument for its own sake. The conflict was prolonged (lasting about a year, to be accurate), and at its conclusion I proclaimed myself victor, remarking to a friend that now I knew nothing could ever again interest me in Christian Science, for I had given it a thorough investigation, and had made up my mind about it, once for all. "My mind!" My little human mind! No Scientist will be surprised to learn that even after such a statement as this I turned to it again, six years later, in the midst of a great sorrow. It was hard to lay aside my pride, to fancy the old taunting cry repeated, "Is Saul also among the prophets?" It was hard to feel that in these past years, wherein I thought I had

Digitized by Google

known so much, I had really known so little; to lay aside much of the education of a lifetime and become as a little child, simple, unspoiled, ready to be taught. But I knew that I must do all this, and I did it.

Humbly and reverently I again opened the pages of Science and Health, but this time with no other motive than an honest desire to find the God who is Life and Love, and not the source of death and sorrow. I said, "He is here; others have found Him, and I can find Him, too." As in the case of our dear Leader, "the search was sweet, calm, and buoyant with hope" (Science and Health, p. 109). It is true that the old obstacles often seemed to come up as before, but instead of stopping to argue, I would say, "I do not understand that now, but I know I shall;" and go straight on. This is the one thought which I long to impress upon all discouraged beginners in this study: Take the advice of one who has been over the same road, and go straight on. Do not stop to argue about what seems too deep for your present comprehension, but just know that you can know it, and you will know it after a while. Soon you will come to a place that you do understand, and right there is your opportunity. Read the phrase or sentence or paragraph which brings you light over and over until you feel sure of it; then lay it away, as you would some rare jewel, and some day when you least expect it you will find that its soft radiance has illumined some other thought which you once deemed hopelessly obscure. When you have finished reading the book, you will be astonished to discover what a goodly collection of these pearls you possess, and better still, you will then understand that you have only to continue the search to find more, for there is no limit to their supply in the inexhaustible realm of Mind.

Eagerly, hopefully, you begin the book again, and are overjoyed to see how the crooked places are made straight, and the rough places plain. That which was once a stumbling-block has now become a stepping-stone, bringing you to a loftier height and clearer vision. In the "Pilgrim's Progress," Christian found, upon drawing nearer, that the lions in the way were chained, and so his fear vanished and he passed safely on; but the Christian Scientist, drawing near with faith, finds something more satisfying still—he finds not only that the lions are not there, but that they never have been! Knowing that all seeming obstacles to progress return sooner or later to their native nothingness, let us not be afraid of them. Above all, let us not stand still and argue with them. Let us resolutely, patiently, unflinchingly go straight on, working out our own salvation, and yet remembering that after all it is not our own human wisdom which will win us the kingdom, but God, who worketh in us "both to will and to do of his good pleasure."

PRINCIPLE UNVARYING.

GEORGE M. CLOUGH.

To the one who is just becoming interested in Christian Science the new idea of God therein presented is very interesting. Some people get a much clearer understanding of Him by using the synonyms,—Principle, Mind, Life, Truth, and Love. At first the word Principle seemed to convey to me a broader and deeper meaning. A little experience which I had soon after leaving school has helped me many times. I had been giving considerable attention to the subject of engineering, and as a neighboring farmer who lived on a hill had experienced much trouble in securing water for his stock, I suggested to him that a well be dug on a hill near by, and the water conveyed to his stable through a pipe. At first he did not look upon the project with much favor, believing from his sense testimony that the hill beyond was no higher than the one upon which his house stood. I ran a line of levels and showed him that a well could be dug a certain number of feet deep and the water could be brought to his stable without difficulty. After considerable discussion of the matter he decided to carry out the plan; but when the work was well under way, his good friends and neighbors would assemble daily and discuss the wisdom of what seemed to them so large an expenditure of money. They were staunch, kind-hearted, and intelligent men, whose opinions were of the best regarding a wood-lot, a field of grain, or a pair of horses; but they depended upon the testimony of their physical senses instead of relying on the principle or law of mathematics, and were very positive that I had made a mistake, for they said that any one who had half an eye could see that the hill upon which his stable stood was as high or higher than the one in which the well was being dug. Their arguments were so strong and plausible that they nearly convinced the farmer that he had better discontinue the work and not waste any more money.

I was young and inexperienced, and was influenced somewhat by the opinions of these older men, but I went over the ground again and checked up my work, and found that my figures and calculations were correct. I had some difficulty in convincing my friend that he was perfectly safe in proceeding with the undertaking, but finally succeeded. In due time the work was completed, the water was turned on, and everything was a perfect success. The lesson to me was, that all the human opinions of all the good people in the neighborhood or the world put together could not for a moment outweigh or destroy the principle of mathematics involved in this demonstration.

Our Leader says that in Christian Science "all must have *one* Principle and the same rule; and all *who follow the Principle and rule* have but one opinion of it" (Miscellaneous Writings, p. 265). To me one of the great lessons from Mrs. Eddy's life is that she has always persistently clung to Principle, God, no matter how fierce the storm might be or what human opinion might say. Her platform has been the divine Principle, Love; her rule the Sermon on the Mount; her desire that all might know the Father aright; her cross the sorrow that her life-work is not better understood. To be right she has been willing to stand alone with God. To human sense this requires much sacrifice, but though the road be filled with thorns and ingratitude, victory crowns the effort. As I examine her work and life with care, these lines from her "Miscellaneous Writings" (p. 389) come to me most forcibly:—

Oh! make me glad for every scalding tear,
For hope deferred, ingratitude, disdain!
Wait, and love more for every hate, and fear
No ill,—since God is good, and loss is gain.

THE REASON WHY.

ARTHUR CHAMBERLAIN.

WHATEVER opinion non-Scientists may entertain of Christian Science, one fact stands out and cannot be gainsaid. In a little more than one generation Christian Science has won thousands of followers, and its churches have sprung up both on the continents and in the isles of the sea. This is the admitted fact, and however non-Scientists may undertake to explain it, no explanation suffices save one; that Christian Science has proved itself a practical religion in human experience.

Within the last two decades it has been apparent that even popular theology has not been satisfied with a teaching that postpones better conditions to another state of existence; the cry of the oppressed went up, and the churches sought to meet it. The institutional church was the outgrowth of this movement,—a church that provided day nurseries, mothers' meetings, free legal advice, flower missions, relief committees, entertainments; a church that attempted to take the social system on its own merits and

Digitized by Google

thereby to make men happier and better. The motive was excellent, the results have been meager. People accepted the opportunities offered them, and went their way for the most part; they patronized the church, but evinced little loyalty in its support. The church became to them largely a means of free supply and of social amusement; its special theology became almost a negligible factor with a great proportion of the attendants.

Yet it is highly improbable that any of these churches would have taken the ground that it was along such lines as these that Christianity arose as an overwhelming force in the first century of the Christian era. Technically, all churches that accounted historic Christianity veritable were preaching Christ and the power of his resurrection as the key to eternal life, yet a preaching that had quickened men to holier living in the first century seemed to be practically powerless in the nineteenth.

Let us consider the conditions which the primitive Christians went forth to meet. Skepticism as to eternal life was widespread. Apart from Hebrew belief the world had small hope of immortality and was largely atheistic as well. The Greeks admitted the inadequacy of their Olympian deities in their altar to an unknown god. Rome, in despair of gods, deified her emperors. Egyptian immortality was an immortality of the flesh. Zoroastrianism was a dualism, divided between beliefs in good and evil. Even among the Hebrews an influential sect, the Sadducees, denied immortality. Suddenly there appeared a handful of enthusiastic men, preaching—what? Nothing less than this: that a Nazarene carpenter, who had declared himself to be the Son of God, had reappeared to them after his burial, eating and drinking and talking with them, having a form that they could not only perceive but handle, and had finally disappeared before their eyes!

Is it conceivable that such statements would have met with anything but utter incredulity, unless they were promptly backed up by proof? Would the haughty Roman or the philosophic Greek have cared for the merely verbal statements and arguments of a few Hebrews, whose words, moreover, were generally discredited by their own countrymen? No! The preaching of Christ and the power of his resurrection, accompanied by no demonstration of that power, would never have swept like flame through the social and civil world of that day; neither does it nor will it avail after nineteen hundred years have passed. Now as then, men care very little for unproved doctrines. Doubtless they would be glad of better material conditions, but with all deference to the excellent intentions of popular theology, men find the churches practically helpless in the face of modern industrial conditions, and the cry goes up not for alms nor amusement, but for justice and legitimate opportunity.

Slowly, but no less surely, men are learning that nothing avails but eternal righteousness; and we recognize with gratitude that it is through the steady, persistent, loving work of our Leader, Mrs. Eddy, that we have been taught the demonstrable truth—that rightness of mind is manifested in rightness of body; that holiness means wholeness, health; and that no preaching, however eloquent or learned, avails to give men dominion over the obstacles and impediments of every-day life, inabilities resulting from sickness and from sin, save it is "in demonstration of the Spirit and of power."

LIST OF MEMBERS.

The List of Members of The Mother Church, including those admitted June 4, 1907, is now on sale. Single copy, 50 cents; six copies to one address, $2.50; twelve copies to one address, $4.50. Address all orders to The Christian Science Publishing Society, 250 Huntington Avenue, Boston, Mass.

SELECTED ARTICLES.

[Editorial in *The Patriot*, Concord, N. H.]

TALK THE GOOD THINGS.

There is a good deal of visiting among women done in every community. It was our pleasure or pain a short time since to be present when some of this visiting was done. The ladies who came traveled in a pair. They came in, they could not stay long, but they used every moment of the time at their disposal for discussing their troubles, their neighbors' troubles, their illness, and the illness among their neighbors, and one hundred and one things that it were infinitely better not to discuss, and they left unsaid so many things that might be talked about with profit.

William E. Curtis, a correspondent of the *Record-Herald*, who has entered perhaps more different newspaper offices than any other man alive, who has traveled farther and viewed conditions closer in more different sections of the world than any man alive, whom during many years it has been our pleasure and profit to follow in his wanderings over every section of the globe, has been in Concord for the last few days, and is still in New Hampshire.

He came to Concord to write the city up as an old residence city—a city of beautiful location, pleasant homes, sightly public buildings, a city whose inhabitants pride themselves on its past and pay but little attention to the future. Mr. Curtis also devoted a letter to Christian Science, Mrs. Eddy, and the lawsuit now pending, brought by "next friends" against Mrs. Eddy. He wrote a letter on Manchester, depicting it an ideal mill town. Now he is out over the State, in company with the secretary of agriculture, in an automobile, writing up the abandoned farms of New Hampshire. Mr. Curtis writes a letter every day—a letter that would make about four columns in his paper, and the Chicago *Record-Herald* receives it daily and publishes it in Washington, New York, St. Louis, Cincinnati, Los Angeles, San Francisco, Portland, and in many other of the large cities of America.

Talking about newspapers while in this office, Mr. Curtis said: "I should like to own a newspaper all my own, just for a little while. I have some ideas, the result of close observation and much experience, that I should like to see put into practical effect. I would, in newspaper work, maximize the good and minimize the evil. I would put on the front page of that paper all of the good things, the beneficial things, the things that tend to make the world brighter and better, and I would put them under large heads and in good type; and all the murders and failures and bankruptcies and divorces and scandals, the defalcations, thefts, robberies, arson, elopements, and the like, I would put on the market page or financial page in solid nonpareil, in single paragraphs, without heads of any kind."

Continuing, he said: "Not long ago there was a bank failure in Nebraska City, Nebraska—the cashier had run away with the funds or spent the proceeds of the bank in gambling or otherwise, and the depositors had a promise of getting not more than five per cent of the money that rightly belonged to them. The president of the bank lived three or four hundred miles away. He was a good man, striving to earn an honest living. When he heard of the defalcation, he took a train and went to Nebraska City. The president was a reasonably wealthy man, and in order that the depositors might not suffer, and that no load might lie on his conscience and no bad practices be charged up to his account, he drew a personal check for the amount the bank was owing, and paid every depositor in the bank one hundred cents on the dollar."

Mr. Curtis said the papers of Nebraska City told the story of the defalcation by the cashier, and it took two columns to tell it. The local papers also told of the action of the president of the bank in making good the amount taken.

Digitized by Google

but only seven lines were devoted to a recital of this event. He said, "My idea of a newspaper is to reverse that order of things, and to devote two columns in such a case to him who made good to the depositors of his company, and devote seven lines to the story of the defalcation—one is repeating the bad things of life, the other the good."

The women who call upon their neighbors in a social way, who make short visits, should be able to profit by Mr. Curtis' conception of duty and suggestion of duty in the matter of publication. You can publish a thing by word of mouth just as well as through a newspaper or by means of a letter, and when you sit down with a friend or acquaintance and tear the reputation or character of another to pieces, you are doing in a small way what the newspaper would do in a large way, were it to attempt something of the kind. You are reversing the better order of things. You are minimizing the good. You are maximizing the evil. Mr. Curtis, while on the same subject, said, "It would take a pretty large newspaper to tell all the good things of the world. There are so many good things to tell. If we were to do that we would have little time for the bad."

And the women who visit with one another can sit a long time in every house before exhausting the good things they might say, and before being forced to resort to the bad things, the envious things, the scandalous and libelous things, the character, hope, and soul-destroying things that were infinitely better left unsaid.

[Irene Clark in the *Los Angeles* (Cal.) *Examiner*.]

A strange sight, indeed, to me—one of the workaday people who have come to regard life as a more or less painful staving off of a great last sleep—are these testimonial meetings of Christian Scientists, held every Wednesday evening in Simpson's Auditorium. I have gone there when the stars illumined a quiet sky. I have gone there when the rain came down in sheets. I have gone there when the huge edifice was so cold I shivered in my furs. I have gone, also, when I nearly fainted from the excess of summer heat, when grand opera, with all its enticements, was here, when Olga Nethersole—that very magnet of luring power—was offering her counter-attractions at the Mason Theater. And never have I seen an abatement in the steady pilgrimage to that strange shrine.

Fifteen hundred is the seating capacity of Simpson's Auditorium, I am told. Well, if you want to get a seat there on Wednesday night you must go early. Rather remarkable record for a prayer meeting, is it not? And this without the usual features of music and eloquence. As early as seven o'clock they begin to come. And certainly they are an aggregation of people worthy of notice—well dressed for the most part and bearing signs of culture and refinement. At first I wondered if its class of adherents made Christian Science the rather fine thing it seems to be, or if Christian Science has been instrumental in making its devotees the undeniably first-water people so many of them certainly are.

At any rate some of the faces I have watched smilingly emerge from the outer darkness into the lighted hall are as fine as any I have seen anywhere. Self-mastery seems to be the rubric in the histories written on their countenances. For them, at least, the sphinx that has stood propounding its riddle in the parching heat of the desert sun since the world began, is fully answered. These, however, are the thirty-third degree Christian Scientists, so to speak. Many of them are practitioners, if not professionally, then among their own friends and family. Behind these come from all the walks of life a great many sufferers, seeking aid that human effort cannot afford them. On these faces, too, glimmers a new hope; in how many instances a last hope! It is not merely for alleviation of the aches of the body that people are embracing Christian Science, but as well from heart wounds received in a losing battle with life. They come with tragedies written on their brows to hear the soothing words of the New England woman, that life has no tragedies. Some that come have death staring out of their hollow cheeks and sunken eyes. Some have deformities with which they came into the world and with which they have always expected to go out of it. Some are the vanquished in a struggle against poverty or for success. All these have turned impatiently from a preaching that defers hope until the portals of death are passed, and cry, "Now! Give us a religion of Now!" Christian Science might easily be termed a religion of "Now."

There is a third class of people who are in constant attendance at the Wednesday night meetings, namely, those who have tried the woman apostle's faith and have found it efficient. These are the ones that really make the gatherings as uniquely interesting as they are. Women with voices tremulous with gratitude stand up and tell how they were rescued from the last ravages of consumption. Men in resonant voices relate their own cures of Bright's disease, stomach trouble, and paralysis. Many of these I recognized as well-known lawyers and business men. One old man, who comes regularly, gropes his way as far to the front as he can. He wears smoked glasses upon eyes that were totally blind until he learned to speak in the language of the new faith. The testimonies that appealed to me even more than this restoration of health were those of rehabilitation of character. Men at every meeting tell of a mania for drinking and gambling suddenly deserting them. Women tell of trying, irritating dispositions becoming sweetened. And from various parts of the hall comes testimony of once discordant families now living in perfect love and concord.

In spite of the denial of the existence of personality on the part of Christian Scientists, and a constant effort to subdue any demonstration of it in the church, the spirit of Mrs. Eddy undoubtedly dominates these meetings. One almost expects to look up and see her form bending over the pulpit. The services are opened with a hymn written by her. The Lesson that is read is from the Bible and her "Science and Health with Key to the Scriptures." Her name is repeated in praise by every person that rises to testify.

[Ida Tigner Hodnett in the *Mobile* (Ala.) *Register*.]

If Christian Science, when correctly understood even in a small degree and faithfully applied, will enable us to destroy disease as it has done in thousands of cases; if it gives us a stronger desire to overcome hate, anger, resentment, envy, fear, and all the myriad evils of the human mind; if it lifts us to an improved plane physically, mentally, and spiritually, it is surely worth while, even with the experience of some failures arising from lack of growth. The Christian Science student takes himself just where he is, with all his diseases and errors, begins at the bottom of the ladder, and works up step by step. He knows that he cannot all at once do the mighty works of the Master, thus obeying the divine commands, but by putting into practice the little he does know of God, by right thinking and right living, he knows he will make progress in the ability to destroy, root and branch, both sin and disease.

Christian Scientists have no quarrel with physicians. They acknowledge with gratitude their humane efforts to relieve the suffering of mankind; they recognize the lofty motives of the better class, and are glad when their kindly and honest efforts bring comfort to sufferers.

Digitized by Google

Like Abraham, they are willing meekly and courageously to say, "Let there be no strife, I pray thee, between me and thee." They have, however, for themselves tasted and seen that God is good—they have found through the teachings of Christian Science that true thoughts of God bring healing on their wings, and they can no longer rely for aid on the material theories of medical works. The inherent rights of man give each the liberty of working out his own salvation according to his own best judgment.

[From correspondence in *The North American*, Philadelphia, Pa.]

"How to get well; that is the beginning and the end of medicine," said Dr. Horatio C. Wood, Jr., in his vivid address before the American Medical Association at Philadelphia, June 5. "At present two powerful classes exist in the medical profession. One is the nihilist element, which hides its ignorance of medicine by blatant declarations that all drugs are worthless. These men point to the fact that even half a grain of quinine is poisonous to some systems, and would therefore condemn any use of this drug. They do not recognize that differences in chemical action are to be found where conditions vary. A class that is in direct opposition to the medical nihilists is that which, appealing in vain to the leaders in medical science to throw some light upon treatment which will really cure human maladies, finally turns in despair to the manufacturing chemists, who supply tons and hogsheads of drugs to be administered *ad libitum*. This latter class becomes at once the prey of the nostrum venders, and helps to pour poison into the stomachs of the nation.

"Is it any wonder that mankind, weary of such ignorance and tomfoolery, is turning to Christian Science, osteopathy, and all the other cults that promise to do what incapable physicians have failed to accomplish?"

[Rev. Dr. S. R. Bridenbaugh in the *Reading* (Pa.) *Eagle*.]

A leading feature of Jesus' message is the kingdom of God and its coming. "The kingdom is within you," he taught. And that kingdom is righteousness, joy, peace, brotherly kindness, love. The kingdom of heaven, then, is a state of mind and character. It is not a far-off city, to which after death we journey. The kingdom of heaven is enthroned in man's soul. It is the life of God in man, producing righteousness, love, peace, joy. The Christian who has within him this kingdom of heaven will love what Christ loves and whom Christ loves—the child, the publican, the prodigal, the poor, the broken-hearted. He will love the deeds Christ did, and will try to do them. Such is Christianity as taught by Jesus Christ.

[Arthur E. Jennings in *The Durham County* (England) *Advertiser*.]

In the Archdeacon of London's excellent sermon, preached in Durham Cathedral, and reported in your issue of May 24, he refers to Christian Science, and includes this Science in the same category as some Oriental systems, which he declares have "floated into a brief existence by the neglect of some essential Christian truth." Christian Science teaches that neither the occult nor the mysterious belong to the Christian Church. Jesus did not say his works were mysterious, but he did say, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." Through the discovery of Christian Science (which is set forth clearly in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy) many church people, and many who never belonged to any Christian denomination, are now able to fulfil the commands of the Master, and to put some of the venerable Archdeacon's advice into practice. While it may be true that necromancy, mesmerism, and hypnotism have sprung up because of the neglect of teaching "some essential Christian truth," Christian Science proves that the understanding of the truth will destroy these evils.

Christian Scientists are taught to love the Church and to recognize all the good it has done. They understand that evil—sin—is the same error to-day that it always has been; that it is resident in mortal mind, or the "carnal mind," as Paul called it; and that it will be destroyed by righteousness, right thinking, purity, peace, and joy. Christian Science will aid the Church in this warfare, and at the same time help to spiritualize all the present systems of religion and medicine.

[Burt LeRoy Knowles in the *Worcester* (Mass.) *Telegram*.]

Our reverend critic objects to the Christian Science teaching regarding the unreality of matter, and states that it is not a new philosophy. We are pleased to agree with him here. The teaching that matter is not an eternal reality, is as old as the Scriptures, for we find it repeatedly set forth in them that the things which are real and eternal are spiritual, not material. Mrs. Eddy is thoroughly aware that ideas akin to this phase of Christian Science teaching have been held by some of the greatest thinkers of the ages, and she alludes to and quotes them often in her writings. But until she wrote "Science and Health with Key to the Scriptures," no one had been able to frame these ideas so that they could be demonstrably understood. During the past decade, however, this theory of matter has been widely accepted among the foremost natural scientists.

The gentleman adds, "Will some one tell us what a state of mind that does not exist might perhaps be." This is most easily answered by illustration. The wildly impossible ideas of a sleeper's fancy have no foundation in fact, for they immediately vanish upon his awaking. And what is the state of one's mind but the aggregate of thoughts which one is entertaining? It is one of the tenets of the Christian Science Church to strive to have in one's self the Mind "which was also in Christ Jesus"—that is, to lay hold on the ideas which he taught and demonstrated regarding the healing of sin and disease; to gain an understanding, "a systematized knowledge" of God and man's relation to him, as set forth in 1 John, 3 : 1–3.

Our critic denies us the right to apply the word "science" to our teaching about God, because it does not harmonize with the testimony of physical sense. There is not one of the sciences that does not continually oppose sense-testimony. What an inaccurate idea we would have of the phenomenon of the setting of the sun, if we relied upon what our eyes tell us! The critic seems to convey the idea that Christian Science sweeps out of the universe all materiality, supplying nothing to take its place. In this he is not clear as to the mission of this great truth. As long as we appear in the flesh, we may expect to find other forms of matter here with us also, but Christian Science teaches us how to keep matter in subjection; how not to make a god of it in any form; how to exercise our divinely given dominion over it. We affirm that all that is good and true in science and in nature, and all that tends toward the ultimate salvation of mankind, is of God and will endure forever.

The gentleman admits that cures are wrought by Christian Science, but states that other methods are just as effective. It is not consistent with the Christian Scientist's understanding of Christ's gospel of love and good will to laud his religious belief at the expense of another's. Suffice it to say, however, that the spiritual regeneration which

Digitized by Google

attends the physical healing of Christian Science is ample proof of its divine nature. It is as impossible to understand, not to say explain, the exact way in which these results are obtained, without a demonstrable understanding of the truths of this Science, as it would be to teach successfully the fundamental rules of calculus without ever having solved a problem thereby.

If anybody thinks that Christian Science is pantheistic, or has any other idea of what it is, let him apply his idea to the healing of a case of any of the numberless ills that are being cured daily through Christian Science treatment. If his results are good, then he may be authorized to say that he has a correct understanding of this Science. Again, it is stated that "the most outstanding religious feature of Christian Science is the teaching that God is All." Correctly and logically understood, that is true. Indeed, the writer makes bold to assume that the reverend gentleman himself has often declared for the all-power, all-wisdom, and all-presence of God. Why does he object to the Christian Scientist's doing likewise and trying to live as if he really believed it?

He states that Christian Science fully accepted is fatal, but in the same sentence affirms that it "has been accepted by many to a degree that has brought a sense of divine harmony and heavenly calm." What are we to understand from this reasoning? Are we in danger of being overdosed with divine harmony or surfeited with heavenly calm if we accept fully that teaching, a partial understanding of which has brought the good results our critic admits?

Our brother further states that "Christian Science impresses one as being an attempt to move in opposite directions at one and the same time." It is not strange that any thus impressed are not able to arrive anywhere in investigating it. But there are several hundred thousand intelligent people who have not received this strange impression. Instead, they have experienced in large measure that peace "which passeth all understanding," and in view of the fact that the world needs more of this peace, it is certain that Christian Science will not soon be remanded to the "rubbish heap."

[John A. Webster in *The Telegram*, Youngstown, O.]

Christian Science teaches that pain and suffering, as well as the so-called pleasures of the flesh, are conditions or beliefs of mortal mind, designated by Paul as "carnal mind," which he said was "enmity against God." Christian Science teaches that God is Spirit, and that He is Life, as recorded in the Gospels, and that man was made in the image and likeness of God, as recorded in the first chapter of Genesis; therefore, man reflects or expresses Spirit and Life. Pain, being of the flesh, or carnality, cannot be a part of God or Life, and if no part of God or Life, it (pain) is no part of God's creation. The natural deduction from this view-point of reasoning is that pain is no tangible part of Life; therefore, life is free from pain.

The question arises, "What is it that suffers pain?" If it is the body, then why do not all bodies suffer the same degree of pain when under similar conditions; and why does not a dead body suffer pain? Christian Science teaches that neither the conscious, spiritual, or if you please, God's man, nor the physical body suffer pain, but that pain is a condition or a belief of mortal or carnal mind. Beliefs are of all degrees and all symptoms. Some have a belief of great pain from a small or even an imaginary injury, and *vice versa*. The belief that life leaves the body at dissolution renders the body (then called dead) painless. Christian Science does not teach that the belief in physical pain will be entirely obliterated as long as we are in the flesh. By right living, right reasoning, and right thinking, however, hundreds and thousands of suffering humanity have been greatly relieved of suffering and of sorrow. All who strive to live the life of a Christian Scientist are daily lessening the experiences of pain, poverty, sorrow, sickness, and sin in their own consciousness and in that of others who are seeking relief from the prevalent belief of the carnal mind.

Christian Scientists do not claim that Jesus did not suffer or was not often sorrowful, neither do they claim to be entirely free from the belief of suffering or sorrow at all times, but they take the inspired Word of God as a sufficient remedy for all of life's burdens. Their lives attest that they suffer less, get well more quickly, enjoy better health, are happier and more prosperous than they were when they relied upon mortal laws and medicines instead of relying upon God and His unchangeable law as understood and demonstrated in Christian Science.

[Editorial in the *Toledo* (Ohio) *News-Bee*.]

How to live was discussed recently before a large audience of thoughtful people in the Valentine Theater by Bicknell Young, the Christian Science lecturer. Mr. Young indulges neither fervor of language nor flights of oratory, nor does he appeal to the emotional side of human nature. His lecture is scholarly, logical, clear, and convincing. His arguments were within the grasp of even the simple child, yet he sounded the depths of philosophic and scientific research.

Health and happiness, now and forever, was his theme. He based both on sound morality—the morality of scientific truth proven in daily life. He defined God as the eternal Principle of life and the all-pervading Spirit of good, as well as the very essence of right-mindedness. Christ Jesus came into this world and mingled with men corporeally for the purpose of teaching all mankind how to develop this right-mindedness—and he accomplished his mission, not only by precept but by practice. He promised mankind that all who accepted the Principle and practised the rule would be happy—and he warned them that they could not reach happiness through care and worry over the material things of time. . . . The cure of disease, according to the speaker, consists in the restoration of this harmony between the patient and the source of life—divine Mind. *Materia medica* has no power to restore this harmony. Material things are the servants of mankind, and not the master. Christ came to restore peace—harmony—to the world, and thus restore happiness. There is no happiness without health. He taught his followers, therefore, how to restore health. He assured them that they could do it, and he commanded them to heal the sick as he had taught them. They did it. They are doing it now. They will continue to do it. His promise shall not fail.

The speaker neither criticised nor abused the opponents of Christian Science. He declared that its works, the results obtained, are the proofs of its verity. It should make people better, it does make them better. The restoration of divine harmony cures moral as well as physical diseases. The only comparison Christian Scientists make is the comparison of themselves with their former self, morally as well as physically. That constant prayer, "Thy kingdom come. Thy will be done," will be answered just as sure as we do our part. It can be done. Jesus Christ never commanded anything that cannot be done. It is up to us to do. We shall never do our part so long as we believe that evil must always exist in the world.

The sublime dignity of divine work creates a reverent humility, and throws a man absolutely back upon God for strength. One of the hardest lessons to learn, and yet one of the most necessary, is that of our own insufficiency.

G. CAMPBELL MORGAN, D.D.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. ***Beware of counterfeit letters.***

CHRISTIAN SCIENTISTS AND JURY DUTY.

WE copy the following from an editorial in the Butte, Mont., *Miner*, and as similar editorial comment has been passed by other newspapers throughout the country, it is fitting that the matter should receive some attention in the *Sentinel*. The *Miner* says:—

Owing to the fact that the Christian Science sect has had a very rapid growth in late years, and that adherents to that faith are found in nearly all communities in the United States, it is interesting to note that in Chicago this week a member of this church was excused from jury duty because he said, "The religion I follow forbids me to judge others."

This man desired to read to the court a verse from the second chapter of Romans, which holds that it is inexcusable for one man to judge another.

The judicial officer did not care about having this quotation presented to him, but excused the man from jury service, remarking that "no man should allow his religion to interfere with his duties as a citizen."

The position assumed by this Christian Scientist is certainly rather peculiar, and if all the followers of that belief hold the same views as this Chicago citizen, it would appear that the members of that sect are barred from jury service.

It seems unfortunate that a man's belief should prevent him from doing his duty as a citizen of this country. . . .

As far as the Christian Scientists are concerned, it would seem that their teachings may, upon occasion, prevent them from performing some of the duties of American citizenship.

While our friend in Chicago may have had some conscientious scruples about the propriety of sitting on a jury, and these scruples may have been based upon his interpretation of the Bible, he certainly was mistaken in founding his plea for exemption from an important duty incumbent upon him as an American citizen on the ground of his membership in the Christian Science Church. There is nothing in the teachings of Christian Science which can by any possibility be construed as justification for the neglect or refusal of a member of this church to perform any duty which may devolve upon him as a citizen.

As a matter of fact we know of no man who is so well equipped for jury service as is a conscientious and consistent Christian Scientist, for as such he has subscribed to the tenets of that faith, the last of which reads: "And we solemnly promise to strive, watch, and pray for that Mind to be in us which was also in Christ Jesus; to love one another; and to be meek, merciful, just, and pure" (Science and Health, p. 497). Such a man is honest, fearless, and unprejudiced. The Golden Rule is his motto, the establishment of righteousness and fair dealing his aim, while his constant desire is to be guided and governed by that Mind "which was also in Christ Jesus," a desire which finds expression in justice and intelligent goodness.

Christian Science teaches nothing opposed to good citizenship; on the contrary, it elevates its followers to that plane of civic virtue upon which no duty is shirked and every obligation of the social compact which we call government is scrupulously observed.

ARCHIBALD MCLELLAN.

THE WORK THAT IS "OF GOD."

To understand God is the work of eternity.—*Science and Health*, p. 3.

No one can take up the study of Christian Science without making the speedy discovery that in its use of phrases and words it is giving a new and more spiritual significance to the language. The commonly accepted meaning gives place to a deeper, more metaphysical, more vital import, and this enrichment of the content of terms characterizes every statement of the Word of God.

Unnumbered illustrative instances present themselves, but none are more pertinent than that of the higher thought which in Christian Science attaches to the word "work." Jesus frequently used it as a symbol for energetic effort in righteous and worthy ways, but upon the occasion of his public teaching at Capernaum he used the term in an entirely different sense. He had been rebuking the many for following him with an eye to the loaves and fishes, and in seeking to impart to them a nobler sense of the verities of Life he said, "This is the work of God, that ye believe on him whom he hath sent." The higher doing for God is defined as the realization and maintenance of a mental attitude. It is the "exercise of faith," and it is to this normal prerogative and activity of man that our Leader refers when she says, "He reflects the divine might. He is not made to till the soil. His birthright is dominion" (Science and Health, p. 518).

A little thought enables one to see that in the realm of spiritual achievement work involves no tiresome exertion or sense of self-expenditure, but only self-realization, or the consciousness of Truth. When Jesus healed the sick, cast out devils, fed the multitude, stilled the waves, the work was accomplished with a simple word and with perfect ease, and for the reason that in all this he was specifically illustrating the significance of his wondrous statement, "The Father that dwelleth in me, he doeth the works." Upon the plane of material sense work implies the mastery of friction and is followed by a sensible exhaustion. Upon the plane of spiritual sense it means only the realization and declaration of Truth, a going from "strength to strength," which is attended by exhilaration and gladness. It is that experience which is so beautifully described by the prophet Isaiah when he says, "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk, and not faint." Jesus gave the explanation of the whole matter when he said, "My Father worketh hitherto, and I work." Truth fulfils its own ministry, and the divine doing brings no weariness to the channel through which it is accomplished.

To infer from this that the true Christian Scientist has nothing to do, would be a tremendous mistake. There is no penalty of pain or of weakness to be paid by those who yield themselves to the divine impulse and give expression to divine law, but while spiritual exercise begets no lassitude, our preparation for it, the attainment of spiritual efficiency, involves the most heroic and persistent endeavor, and in the early stages of spiritual advance it is often attended by a sense of dependence and need. It is not, however, the spiritual doing, but rather the lifting and holding of human sense up to the level of spiritual doing which involves effort. This is the working out of our salvation, and it fully tests our energy and our persistence.

Work for others by the Christian Science practitioner means a devotion whose unselfishness and constancy are of the most heroic type. Instead of being an "easy job," as a flippant critic has described it, it is the exercise of man's highest function, his supreme activity. It is a labor that calls for the finest order of self-command, consecration, and altruism. It is of the nature of that

Digitized by Google

work which Jesus wrought upon the mount of temptation and in the garden of Gethsemane; and that men and women are stimulated to assume the responsibility, and strengthened to persevere in the undertaking, is one of the highest tributes to the practical value of Christian Science. Everywhere are those who witness that it has enabled them not only to see their "high calling of God" more clearly than ever before, but that day by day it is giving them the courage and strength to make and maintain faith's supreme sacrifice and venture. To forget self and ignore the world in the ministry of healing is the most glorious enterprise on which men can enter, and this "work of God" the true Christian Scientist is doing to the credit of his faith, to the honor of his Leader, and to the great gain of humanity.

JOHN B. WILLIS.

THE SACRED RECORD.

MANY students of the Bible are greatly perplexed at the seeming contradictions in its statements respecting God, man, and the universe, while the most thoughtful readily admit the impossibility of reconciling these statements with the dogmas of physical science. Because of the seeming difficulty in the way of Scriptural interpretation, many give up the task, or gather but a few crumbs from this rich storehouse of Truth. Mrs. Eddy says, "The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained" (Science and Health, p. 547). St. Paul clearly recognized the difficulties which beset those who held a material sense of the Word. Speaking of his coreligionists, he says, "Their minds were blinded: for until this day remaineth the same vail [material sense] untaken away in the reading of the old testament; which vail is done away in Christ." He goes on to say, "But if our gospel be hid, it is hid to them that are lost: in whom the god of this world [the carnal mind] hath blinded the minds of them which believe not." When the "vail is done away in Christ [Truth]" the spiritual sense of being appears, and the healing of mind and body follows as a natural result.

The greater number of those who accept Christian Science readily find the wonderful truths contained in the Bible, and these they count more precious than the physical healing, which opens the way for so many. There are, however, some who still hold to the old while really desiring the new. One asks how God can be unconscious of evil when the Bible quotes Him as saying, "Thou shalt not kill; thou shalt not steal," etc. It should be remembered that the commandments were given by Moses to a people who were in bondage to material belief with its many accompaniments of evil, and these commandments were probably the highest teaching which many of them were ready to receive; nevertheless they had that higher statement of divine law, "Thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might;" and "Thou shalt love thy neighbor as thyself." It is hardly necessary to ask whether the law first quoted, or this last statement of it, best expresses the nature of God as Spirit and as Love.

An old theologian once said that some parts of the Bible seemed to be God's thought about man, and others men's thought about God. We find that Christ Jesus always directed thought toward the spiritual concept of God and man, and that he healed the sick, reformed the sinful, and raised the dead on this basis. It should not be forgotten that he also rebuked those who sought to substitute their own opinions for the truth. He said to these, "Ye do err, not knowing the Scriptures, nor the power of God." There can be no question that he knew "the power of God"! The scribes and the Pharisees devoted their entire time to the discussion of the law, with a large recognition of evil. Jesus epitomized the whole law in love to God and love to the neighbor, saying, "On these two commandments hang all the law and the prophets."

In Christian Science we aim to avoid the mistake of those who studied the Scriptures but did not know them, and who thus missed knowing the power of God. To know the power of God as revealed in the Bible we must let go of the belief in evil, with its false claim to power, as having any place in the Divine consciousness. We must grasp the truth with both hands and cling to it. If sorely pressed with a sense of evil's reality, we should pray as did the psalmist, "Lead me to the rock that is higher than I." When we are lifted up to know the allness of God, good, we cannot at the same time believe in evil, and as we leave the sense of evil behind us we find the true sense of God and man to be "a strong tower from the enemy." When the vail of material sense is taken away we behold "the glory of the Lord;" then we "are changed into the same image from glory to glory." Is not this spiritual sense of the Word worth striving for?

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Boston, Mass., June 19, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Dearly Beloved Leader:—We, the members of the first class taught in Boston by your loving and loyal student, Mrs. Isabella M. Stewart, are unanimous in sending you an assurance of our love for you. We realize what a golden privilege has been ours. We have assembled here from many parts of the globe, and many of us have had trials and sacrifices to meet that we might come, but we have all been more than repaid by the bountiful feast of good and heavenly things that has been spread before us. We appreciate the blessed privilege of being instructed by one of your loyal first students. Also, we appreciate that we are under the shadow of The Mother Church.

"Strive to enter in at the strait gate" has been the motto of the class, and every lesson has been pregnant with the overcoming power of good, the source of infinite supply. We do not forget that we owe you an endless debt of gratitude for giving to the world this Divine Science as set forth in your blessed book, Science and Health, which is bringing men to the recognition of the fact that they are, like Paul, "free born." When we realize, even faintly, the magnitude of the revelation for which you, our revered Leader, have been the God-appointed messenger, our gratitude goes out to you as never before, because of the deep waters through which you are now passing; but we know that divine Love and Truth, which always have led you, will always lead you, and are all sufficient.

And now, as we go forth in our individual spheres of activity, our humble desire is to be found ever striving, watching, and praying for that mind to be in us which was also in Christ Jesus, that we may understand and obey the true meaning of his words, "Heal the sick, cleanse the lepers, raise the dead, cast out devils."

Lovingly yours in the truth,

MRS. MARINDA MAY, HELENE NASH DUPEE,
HATTIE A. WATSON, TRANGOTT CHR. PFAFF,
MRS. E. E. PERRY, A. E. ADAMS,
WILLIAM GEORGE, *Committee.*

Cambridge, Mass., July 4, 1907.

Dearly Loved Leader:—This morning, as I looked out of my window and saw the flags fluttering against the clear

Digitized by Google

blue sky, in recognition of man's birthright of freedom, I seemed to see an invisible banner floating majestically above them all,—the white ensign of purity and universal love, and on it inscribed your thrilling words: "Citizens of the world, accept the 'glorious liberty of the children of God,' and *be* free!" (Science and Health, p. 227). Tears of profound gratitude filled my eyes to feel that I am privileged to contemplate your unexampled life, to witness the signs of the world's waking, and, though as the very least, to follow you under this standard of God. Through Christian Science the light of the day of universal liberty is surely breaking upon the earth, and its "sun shall no more go down."

My heart is full of unspeakable thankfulness to you, my tenderly-loved Teacher, Leader, and friend, and oh! I do pray to be found faithful. May this hour bring to your heart the most intimate consolations of divine Love.

Prayerfully your student,
DAISETTE D. S. MCKENZIE.

Hartford, Conn., June 10, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—The members of First Church of Christ, Scientist, of Hartford, Conn., in annual meeting assembled, send love and gratitude for your labor of love for all mankind; for teaching us all that we have learned of Christian Science, God's greatest gift to the world through you, the Revelator to this age of the truth taught by Jesus, and for your Christlike example. God has been good to this branch of The Mother Church. We are striving to follow and rejoice alway.

Lovingly yours in Christ,
MYRON G. MARSH, *Clerk.*

New York, N. Y., June 27, 1907.

Mrs. Mary Baker G. Eddy,
Concord, N. H.

Beloved Leader:—Under a separate cover I send you a copy of a little book, "Scriptural Healing." It was said that Plato's book was one that Socrates wrote, and you have inspired and made possible this compilation of Scriptural verses. My Bible was never opened unless I was assigned by some woman's club to write a paper on the prophets, the women, or the music of the Bible, until I read your God-inspired Science and Health, which is truly the "Key to the Scriptures." My first introduction to Christian Science as a healing factor was in the case of a little child who was healed by one thousands of miles away. This seemed so marvelous to me that I began to search the Bible to find if Jesus Christ had ever given what we call absent treatment. I found that the centurion's servant was healed when Jesus spoke the word, though he was far away; and the Canaanitish woman's daughter, possessed of a devil, "was made whole from that very hour" when Jesus said, "O woman, great is thy faith: be it unto thee even as thou wilt." I then kept on studying to see if the healing recorded in Science and Health was corroborated by Biblical authority; and so, step by step, I have found a verse of comfort for every human need, a verse of guidance for every problem that may confront us in our daily life. This little book is sent forth as a messenger that will help to "enrich the affections of all mankind" [Church Manual, p. 57].

Your consecrated life-work is making it possible for us to realize the truth of Emerson's prophecy concerning woman, "That in this grand anthem which we call history, after playing a low and subdued accompaniment, woman finds the time arrived when she may strike in with telling effect, and take a master's part in the music."

Yours in devoted gratitude,
HELEN L. YOUNG.

Nebraska City, Neb., June 30, 1907.

Dear Leader:—I have wanted so much to tell you of the many blessings that I have received since learning of this blessed truth. Two short years ago I was not expected to recover from a serious illness—an illness that had caused almost complete invalidism for twenty years. I did not know God—could not love a God who caused me (as I supposed) such suffering, yet I tried to love Him, tried to understand; now, dearest Leader, I *know*. My kind husband learned of Christian Science, and at once engaged a practitioner, and I was soon restored to perfect health. For this I am grateful, but the spiritual uplift, the knowing of God aright, and being able to help others, is that for which I am most grateful.

In meek humility I am now serving the God of love, as First Reader of our little church here, and many times do I turn to page 426 of Science and Health and read these encouraging words: "The discoverer of Christian Science finds the path less difficult when she has the high goal always before her thoughts, than when she counts her bleeding footsteps in endeavoring to reach it." The beautiful words of our Saviour, "And a little child shall lead them," seem to express my own thought. In gratitude and love, I am sincerely yours,
MRS. JENNIE D. HOHAUS.

New York, N. Y., July 6, 1907.

My dear Mrs. Eddy:—The Christian Science exhibit of church photographs will be a fitting display in front of the grand entrance to the *Exposition Internationale,* at Paris. I have seen the cabinets, almost complete, to-day. These photos embrace the most churchly picturesque, from the sweet, simple, homelike edifice, the little church with ivy, to the temple grand in dignity, art, and architecture. They are a tribute to you, our Leader,—being in the world, but not of it.

Tears give place to smiles where these churches stand: they are built on the healing rock of God, whose blessings they are to you.

In truth, for the Cause at large,
Obediently yours,
CHARLES CHARTERS.

[While we faithfully "followed copy" in the despatch from Chicago published in our issue of June 15, we now find that through a mistake which occurred in transmission the "copy" was incorrect. Below we give the telegram as it was originally written.—EDITOR.]

Chicago, Ill., May 24, 1907.

Rev. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—The growth of Christian Science in Chicago has necessitated the formation of a new church. Accordingly, last evening, at a meeting of members dismissed from First Church to become charter members of the new church, the organization was perfected, with the title of Eighth Church of Christ, Scientist, Chicago, Illinois.

At the close of the meeting the Board of Directors of First Church and the Board of Directors of Eighth Church, jointly, were appointed a committee to indite a message to you, our beloved Leader, to whom we would first convey the good news. Believing that it will rejoice your heart to receive such evidence of the progress of the Cause of Christian Science, and of the fruition of your message and mission to the world, we send this communication.

May this new church deserve your love, and fulfil your idea as expressed in your own words: "Its beginning will be meek, its growth sturdy, and its maturity undecaying" (Science and Health, p. 463).

RUTH B. EWING,
Chairman of the Committee.

THE LECTURES.

WORCESTER, MASS.

More than twelve hundred people attended the semi-annual public address given in Mechanics Hall, yesterday afternoon [May 19], under the direction of First Church of Christ, Scientist, Worcester. The speaker was Judge Septimus J. Hanna, and the meeting was regarded as unique from the fact that the speaker was introduced to the audience by a practising physician of Worcester, Dr. Carl Crisand, who said in part,—

No doubt it may seem paradoxical that a physician should be called upon to introduce a speaker who represents a religio-medical sect which is not only in competition with, but also apparently in opposition to the medical profession. Permit me briefly to explain my position. I am a graduate of the homeopathic school, have been in practice twenty-three years and still believe as firmly as ever in the law of *similia similibus curantur*, as a law of cure. Beyond this, however, I try to be simply a fair-minded, honest seeker after truth, and as in my opinion the finality of thought has not been reached in science, in medicine, in politics, and not even in theology, therefore I welcome the opportunity of sitting at the feet of one who knows more about Christian Science than I do. I hope and expect to learn much from him which will enable me to bring relief to my patients. Co-operation is greater than competition and we should constantly bear in mind one of the great fundamental laws of the universe, the law of interdependence. There is not a thing in this world which is not dependent for its existence upon some other favorable thing or condition. We are all dependent upon each other. We all need each other, and therefore should co-operate with each other. He who loses sight of this great law soon becomes worthless timber in the economy of the world. He is a narrow-minded fanatic and a menace to the very cause which he has espoused. It gives me great pleasure to introduce to you Judge Septimus J. Hanna.

Before beginning his address, Judge Hanna said he wanted to compliment the Worcester church for the progressive spirit that seems to be alive in Worcester, and he called attention to the fact that but twice before in his almost a quarter of a century experience in important positions in the promulgation of the Christian Science faith had he been presented to an audience by a practising physician, and those two cases were where the mayors of the cities happened to be physicians and did the formality of presenting him. He said, "I am specially thankful to see there is a tendency in the direction of greater liberality, at least in some parts of the medical profession, and I consider it an honor to have been presented for the first time by a physician voluntarily."—*Worcester Telegram.*

EAST ST. LOUIS, ILL.

Four hundred persons braved the rain-storm to hear Clarence A. Buskirk's lecture on Christian Science at the City Hall auditorium last Friday evening [May 31]. W. Henry Jones introduced the lecturer, and said in part,—

Having formerly made your city my home for many months, as a citizen and minister to one of your city churches, it gives me great pleasure to address you to-night. Like every minister of the gospel, I had the usual prejudice against Christian Science, and like the vast majority of prejudices, it was formed without careful investigation. I have passed through nearly every phase of belief concerning Christian Science. Through sarcasm, ridicule, indifference, and the "exaggerated ego-divinity circuit." Let me pause to explain this "exaggerated ego." In my particular brand of the affliction, I am grateful to report, it manifested itself in silent contempt, the exalted position of creed-bound theology and Greek-ballasted logic. I never publicly denounced Christian Science. I am very grateful for that. Sometimes this special brand does break out in Olympian thunder, and the theological wonder imagines himself a real Sampson and slays his imaginary thousands. I passed by stages from contempt and ridicule to wonder, investigation, demonstration, and acceptation. I never can express fully my gratitude for the wonderful message of Christian Science.

The ministers of the gospel are the grandest men in the world to-day. As a body they are the most courageous, honest, and the best of the world's product. They stand on the watch-towers of this old material universe, doing a needy, grand, and sacrificing work. I was an honest minister. I believe I had some intelligence and some executive ability, and I know that my ten years' ministry were filled with good work, and yet I say, and I speak reverently, every month I have been serving my God and obeying the commands of Jesus Christ in my present position in this "new-old" truth, has been productive of more good than any year in my ten years' ministry. I love God more. I serve Him more fully and consistently. His omnipotence, omniscience, and omnipresence is a reality to me now, instead of a vague, impractical theory. God is all power, all Life, Truth, Love, over all and All.

I have come in contact with scores of people who have been healed of the so-called incurable diseases. Daily I am permitted to help men out of sin and suffering. This is only my experience. Thousands can bear like testimony. The professions are liberally represented in the ranks of Christian Science—judges, physicians, lawyers, and clergymen, great business men—rich and poor alike are found among this people. Do you wonder that I gratefully tell you of these things, and urge you to investigate for yourselves? Come as you have come to-night to hear what Christian Science is, not what you think it is, or what some prejudiced one has told you it is. Listen to one who knows. Give your undivided attention to one who believes in it.—*East St. Louis Journal.*

PASADENA, CAL.

Judge William G. Ewing lectured on Christian Science at the Christian Science Chapel June 24. He was introduced by Colonel Davidson, who said in part,—

Men are judged by what they do, not by what they say. Professions, or statements, of what one believes, or claims to believe, are not credited as against what they actually do. "By their fruits ye shall know them." Thousands on thousands everywhere have tested and weighed the evidence and know in their own souls what is truth, and they are bearing cheerful testimony to the results, manifested in their lives. Men everywhere are saying, "Show me," not, "Tell me." "By their fruits" men's lives are measured, and "faith" not manifested in "works" is rejected. We are fortunate to-night in having with us one who has had long experience in sifting evidence, in weighing testimony. By his judicial training at the bar, by years of experience on the bench, he can tell us of certain truths that he has tested and demonstrated in his own life and applied to his own "ailments." The witness which he bears is true; he will speak to you to-night of Christian Science.—*Correspondence.*

TESTIMONIES OF HEALING.

Four years ago last October, while in Missoula, Mont., a lady in whose home I was then rooming handed me a copy of Science and Health, asking me if I would like to read it. I looked at the title of the book and replied that I did not care to do so, but as she seemed anxious that I should, and not wishing to be discourteous, I said I would take it to my room and look it over. The first night I read about fifty pages, the next about the same number, and the third evening I had reached the one hundred and fiftieth page. I then asked the lady if she would let me keep the book long enough to read it through. I read it from cover to cover in about two weeks, and can truthfully say that no book I had ever read stirred me as did that one. Old beliefs began to vanish as I read on, and when I had reached the last page I was living in a new world of thought. Before reading Science and Health I had used very profane language, but almost from the first hour that I opened this blessed book I ceased to swear.

I am now coming to the point at which Mrs. Eddy's grand book did for me what all other remedies I had tried had absolutely failed to do. For more than twenty years I had been a periodical drinker, the last ten of which the burden was awful to bear. But the dream is over! I am now free, free as the birds that fly in the air. I shall never forget the fervency with which I prayed to God, before coming into Christian Science, to be delivered from bondage to the awful monster that seemed to hold me in its inexorable coils, but I did not pray aright. I did not know God then as I know Him now. I had not been reading Science and Health more than three months when the desire for strong drink left me. I did not take Christian Science treatment for the habit, either. The reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy, did the work and did it effectually, and I wish to say right here that language does not furnish words to tell how grateful I am to that grandest of women. I have been emancipated from the thraldom of what I consider the greatest evil that ever cursed the civilized race. I refer to the drink habit. The smoking habit was not as readily destroyed as was the drink habit, but in about nine months from the time I began to read Science and Health it also yielded to the power of Truth.

I did not take up the study of Christian Science for physical healing, but in the past four years joyous health has come to me that I never enjoyed before. I used to be troubled with very severe periodical headaches, but now when the symptoms appear I am able, even with my slight understanding of Christian Science, to destroy them in their incipiency. When I had been studying our text-book about three months one of those headaches came on, but with the gleams of the truth that had at that early date come to me, I was able to destroy it. Up to that time I had been a slave to medicine, but from that day to this I have not taken a drop of it.

I am a commercial traveling man, and as such am frequently thrown among strangers, being therefore subjected to greater temptations than the man who is always among acquaintances and friends, and surrounded by home environments; but this truth is my sheet-anchor. Christian Science is especially the true friend of the traveling man. Now, instead of going down town evenings and vainly searching for pleasure in the haunts I used to frequent, I find it between the covers of my Bible and in Science and Health. To be "out with the boys" no longer appeals to me.

To be cured of the drink habit after it had gotten such a hold on me is wonderful, but that is as nothing compared with the spiritual uplift I have experienced since coming into Christian Science. The fights I waged against the drink habit were sometimes really pathetic. And right here is where the grandeur of Christian Science came in, for the habit is scientifically destroyed, absolutely wiped out of my consciousness, and I no longer have to fight it. If this testimony shall be the means of leading even one man away from the saloon, I shall be glad.

I wish to say that I am thankful to God, and also to Mrs. Eddy for pointing out the path which has led me to sobriety, health, harmony, and happiness.

PETER D. PAGANETTI, St. Paul, Minn.

Desiring to do all that I can to help suffering humanity, I send this testimony, told as simply as possible. When I first heard of Christian Science, about eleven years ago, I was preparing to have an operation performed. I had been under the care of physicians for over three years, and had been confined to my bed for three months with what the doctors pronounced ovarian trouble. I was unable to walk any distance, or to do anything that required the slightest exertion, and was extremely nervous. Shortly after hearing of Christian Science I placed myself under treatment, and although the healing was slow, it was sure, for in about two years and a half I could say that I was healed. During that time I was able to earn my livelihood, while under medical treatment I was compelled to give up business for over a year.

I would like to say that a very severe catarrhal trouble, for which I had had medical treatment from childhood, was instantaneously healed. One of the first questions that the doctor asked me, when talking with me after I was healed, was about the catarrhal trouble, and when I told him that I was completely healed he looked at me for a moment, and then said, "Well, I cannot say that there was nothing the matter with you, and I am glad that you are well again." I had several kind talks with this physician, and am sure that if he were on earth to-day he would be willing to testify regarding my case, for he never denied the healing to my mother or me.

During my illness I was attended by three physicians, all practising in Brooklyn, New York, and my healing in Christian Science also occurred in that city. I have enjoyed the best of health since then.

MAY B. JOHN, Wilmington, Del.

Like the psalmist I would say, "Bless the Lord, O my soul, and forget not all his benefits." My heart is attuned to these words as I recount the good things that have come into my life through Christian Science. I have been healed of many ills of the flesh through the daily study of our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and a careful reading of the Lesson-Sermons. This has enabled me to learn of the wonderful help of right thinking, which means putting one's self in at-one-ment with God, good; in overcoming anger, pride, selfishness, and other sins native to mortal mind and its ruling. Those dear to me have been healed of diseases, even of some pronounced incurable by medical science. Though striving to be a Christian Scientist for several years, and being a member of The Mother Church and of a branch church for nearly five years, I became discouraged and longed for the knowledge and power which would bring more fruitage and "a closer walk with God." My desire was answered by divine Principle. I came to Boston, bringing a loved one with me, and great happiness has been given us. The help of a practitioner was sought, for this dear one needed the healing; and stubborn nervous

Digitized by Google

troubles which had not been overcome by previous work, have at last melted away. We have also gained strength and knowledge sufficient to overcome evils of disposition.

Besides all this, a great pleasure has been ours in enjoying the services at The Mother Church; the artistic sense has been pleased by the structure in its graceful outlines, by the music of the chimes, organ, congregational singing, and sacred solos; but above all we are thankful for the blessed truths that have come to us from the reading of the Word in our Lesson-Sermons. That healing is realized in listening to the ministry of this Word, I am assured from our own experience. We can never forget the help gained from the testimony meetings on Wednesday evenings. The picture of many suffering ones, coming to our services to be healed, recalls the account in the Gospels of the multitude coming to the Christ over nineteen centuries ago. It has helped us much to be in Boston during these past few months, to see the overcoming of malicious reports concerning our dearly loved Leader by the simple uncovering of the facts, showing us that invincible Truth—God and His hosts,—is fighting for her! My heart sings praises to our God for giving us such a revelation in this age.

MRS. EVELYN C. PERRY, Mobile, Ala.

When I look back over the past and note the difference between my life and surroundings now and before I learned a little of Christian Science, I feel that I am not truly grateful for all these blessings unless I send forth the good news publicly, that perhaps another may be encouraged by my words at least to try what Christian Science will do. Three years ago I was healed of a double hernia with a few weeks' absent treatment by a faithful Scientist whom at that time I had never met or talked to. My wife was healed of severe headaches, and eye trouble for which she had worn glasses for several years. She at once laid the glasses off and has never felt the need of them since. Our little girl, seven years old, was healed of chronic bowel trouble, which had grown so severe that medicines of all kinds had failed to help. Since taking up the daily study of the Bible and Science and Health many minor complaints have disappeared, such as liver and kidney trouble, etc., also the desire for tobacco and strong drink, and the indulgence of profanity. Beside all this we are learning the true road to success in business. Our financial condition has improved a hundred per cent, and the waves of fear, doubt, and discontent have heard and are obeying the Christ command, "Peace, be still." We are learning to realize that God, divine Love, is supreme, and is a present help in times of need of all kinds.

We should be ungrateful indeed if we did not acknowledge our love for Mrs. Eddy and thank her for the book which has made possible in this age the understanding of God, who heals all our diseases.

EDGAR E. GOODRICH, Marengo, Ill.

Christian Science has changed my entire being; not only have I, but all my dear ones at home have received help at all times when in need of physical healing; nevertheless, greater joys have come to me through the spiritual uplifting, which all may receive who will study the textbook, "Science and Health with Key to the Scriptures" by our beloved Leader, Mrs. Eddy. Greatest of all blessings is the beautiful thought of being ever ready to help poor suffering humanity, when asked to do so. My gratitude is simply inexpressible to the one who has so patiently toiled and given to the world this wondrous truth, which heals all our diseases and casts out error of every description, making better men and women of us all. My daily prayer is that I may so live as to be worthy of the great privilege of receiving more wisdom.

M. A. LUDERS, Jersey City, N. J.

For about thirty years before I heard of Christian Science I suffered from the effects of an internal misplacement, which had become so much worse within the last two years that I lived in constant pain and weariness; every organ in my body seemed affected and life was a burden. My doctor could do nothing to relieve my suffering, and sent me to a specialist, who said, after a thorough examination, that nothing could be done for me, that the conditions were altogether too complicated and of too long standing to be dealt with by surgery, and he held out but little hope of relief. Through all my suffering I retained my faith in God and believed that with Him all things are possible, so that when I heard of Christian Science I was ready to accept it as the truth. I called upon a practitioner for treatment and during our first interview I was healed. From that time every organ in my body acted normally and harmoniously and all that remained of the old trouble was a slight sense of weakness and pain. This also shortly disappeared and to-day I am able to walk up and down stairs and do work with a freedom and ease which I had not known for years. I am deeply grateful for this relief from suffering, and I am also deeply grateful for the more spiritual understanding of the Bible which I have gained through reading Mrs. Eddy's wonderful book, "Science and Health with Key to the Scriptures," and for such a sense of God's love and ever-presence as I had never before realized.

MRS. F. BROWN, Hornsey, England.

For fourteen years I was subject to chronic stomach trouble. I had tried doctors of both schools of medicine, but existence became a drag and as a result business became a drag, and I was not bringing out in the home life what was due my wife and children. I had had three complete break-downs,—one fifteen years ago, one seven years ago, and the last four years ago, when I was about to give up my business and resign myself to fate. I have since learned that many people thought it was a question of being resigned to die, because I looked so badly. Knowing something, however, of the teaching of Christian Science, I decided to try that, and I hunted up the only Christian Scientist that I knew in this city. From him I learned of the address of a Christian Science practitioner and called the same evening. I immediately discontinued medicine and began Christian Science treatment. In three days' time I found myself eating with no bad effects the things that formerly I had to refuse, and in three weeks considered myself well. This occurred over four years ago, and I have been perfectly well ever since and have not had the slightest return of the old trouble. I have interested many in Christian Science and have seen people cured of all manner of diseases.

JOSEPH H. MENDINHALL, Wilmington, Del.

[Translated from the German.]

I wish to express my sincere gratitude for all the blessings that have come to me through Christian Science in a little over two years. Before I heard of this wonderful truth, I had stomach trouble for years; I tried all remedies that were prescribed, but with very little success. My throat troubled me constantly, so that when I took the slightest cold I was unable for days to speak or to swallow. I also wore a truss, which I laid aside after I had studied Science and Health for ten months, and with the help of a good friend who brought me into Christian Science. Of all these troubles, and several others, I am now perfectly healed, and I have also gained a better understanding of God through this saving religion; therefore no one need be surprised that Christian Science is so dear to me. The

Digitized by Google

Bible says that to whom much is forgiven, the same loveth much.

I am very grateful to God, and to Mrs. Eddy, for the truth that has freed me from bondage, and I can best prove my gratitude by living this truth as well as I understand it.

CHARLES HABERLE, Chicago, Ill.

Last August my sons, aged nine and thirteen years, were making a toy engine, and while soldering a tin tube the younger, who was eagerly watching his brother, bent down over the work. The older boy suddenly moved the red-hot iron, and the end of it went into the other's right eye. He was brought to my room suffering intensely. He called for Science help, and my daughter and I began declaring the truth for him as best we could. In two hours the blister had disappeared, but the suffering was still very severe. When he was able to raise the eyelid the appearance was terrible to us. For a few moments I was powerless to move; then, rising in consciousness to the altitude of Truth and Love, my strength was restored. I hastened to the telephone office, and called on a practitioner in Cedar Rapids for help. The child suffered greatly for several hours, when he fell asleep, rousing up occasionally with pain, until about two o'clock, when he slept quietly and peacefully until morning.

When he awoke he exclaimed, "O mamma, it doesn't hurt a bit, and I can see!" We ran, overjoyed, to his sister's room, and not a trace of the scar was to be found on the eyeball. We could scarcely believe what we now saw. With the exception of the eyelashes being partly gone, and some redness of the lid, the eye was apparently restored, but he said that everything looked blurred. The practitioner continued to help him for three days, when the sight was perfectly restored. I wish to add that I owe my life to Christian Science, having been most wonderfully healed after trying every known remedy and suffering untold agony for many years. I know this is the Christ-healing which I had sought earnestly for twenty-seven years in an orthodox church, but could not find it. As wonderful as was my physical healing, it was nothing compared to the spiritual uplift! I have found God, and I now know that in Him I live and move and have my being, and in finding God I have found the peace "which passeth all understanding," and unspeakable joy, which the world did not give, neither can it take away.

For all this, my heart is full of gratitude to God, to our dear Leader, and to all who have helped me to find "the true Light, which lighteth every man that cometh into the world."—MRS. H. F. BEYER, Edgewood, Ia.

Sitting by the bedside of our little girl, I listened to the words of the prayer given us by our revered Leader in "Miscellaneous Writings," p. 400:—

Father, Mother, God,
Loving me,—
Guard me when I sleep;
Guide my little feet
Up to Thee.

I found myself asking, In what way does this prayer help the child? and then I saw that the very first line contains the declaration of the fatherhood and motherhood of God. Then comes the assurance of that sheltering Love, guarding even when the child seems to sleep in material belief, and at last guiding the little understanding up to a greater. What blessings for the children has our beloved Leader given us in Christian Science. How many mothers have, through its teachings, been enabled to help the children to go to Christ instead of hindering them! Standing at the upper window some time ago, looking down on the troop of children passing to the schoolhouse opposite, there came to me a feeling of irritation because of the mischief done on our place the day before by some of them. I, however, turned away from this feeling, mentally asking for love, and the answer was instant. I thought of our Leader's scientific definition of children: "The spiritual thoughts and representatives of Life, Truth, and Love" (Science and Health, p. 582). A great sense of love for them all filled my consciousness, and we have not been troubled by them since.

A beautiful and instantaneous healing of the youngest of our children took place about three years ago. The little one, then about three years of age, became afflicted with a serious bowel trouble. This condition had continued for several months, and I spoke to a practitioner about it. She said, "Search your own thought and see what is weighing it down." The next day the child had an unusually severe attack, and I sought the one Mind for help. In a moment a wrong sense of things was uncovered to me, and the child was instantaneously healed, never having a return of the trouble. Another demonstration has always appealed to me as showing the power of the Word as given to us in Science and Health to bring out Love's action and heal the sick. I had for several years been subject to severe attacks of heart trouble. One day I was suddenly seized with one of these attacks. I took up Science and Health and began to read, but the trouble seemed to increase. I worked for some time, trying to treat myself, but the fear seemed great. I could only cling to the last words I had read in Science and Health (p. 454), "Love is enthroned." Finding I did not improve sitting still, I began to do some work, but I now seemed very sick all over. Our little girl, then about four years of age, commenced to help me dry the dishes, and in a moment I heard a crash and I saw that she had dropped and broken a large dish. I was still silently declaring, "Love is enthroned," yet, obeying the quick impulse that swept over me, I turned to speak a sharp word to the child. Instead, to my own surprise, I took her hands in mine, and said with the utmost love, "Sweetheart, the little hands are not large enough to hold the big dishes yet." The child's frightened face broke into a smile, and as I arose I found myself perfectly healed. It is thus that even a grain of "perfect love casteth out fear."

When I think of the trials in my own life that these little ones will be saved from by Christian Science, I think mothers may well send forth a word of thanksgiving for the noble woman who has borne the cross and marked out the way for us to follow.

MRS. ANNA L. HERDEG, Riverside, Cal.

I wish to testify to the wonderful healing that Christian Science has done for me. I am in my seventy-sixth year, and was for twenty-two years an elder in an orthodox church and helped to build the first Presbyterian church in this great State, hoisted the first American flag in San Juan county, and manufactured medicine for thirty-five years. I am a blacksmith, and love to work at my trade.

One night in January, 1906, I was coming home. It was very dark, and I had to cross a bridge without a railing, within one hundred and fifty yards of my house. I got on the bridge, and was feeling my way. When I came to the center of the bridge, one of the planks was shorter than the others, and my foot went in a hole and I fell on a pile of rocks and lay in the water. I could not speak or move for some time, but my thought was clear. I asked God to take me home to my wife and daughters; then I lifted my hand and caught hold of some bushes, and soon

Digitized by Google

got to my house, but could not open the door or speak. My daughter came and let me in, took off my clothing and found that I was badly hurt. My son went for a doctor. When he came I could speak. He said he would have to give me chloroform before he could set my shoulder, but I refused to take it. I told him to try to put the shoulder in its place, so he gently raised my arm and it went into the socket. The doctor said he had never seen such a thing before. All he had to do was to bandage the broken parts. My daughter wrote to a Christian Science practitioner at once, and I could tell immediately the time the Scientist got the letter. I had no pain and felt such great love for God and my fellow-beings. I was spitting blood for two weeks, but there was no pain, and no sign of a bruise on the flesh. All the broken bones were healed in three weeks, and in six weeks I was in Bellingham visiting the practitioner. Fifteen or twenty friends visited me daily, and I could talk as cheerfully as if nothing had gone wrong. To-day I shoe heavy horses, and love to do so. I have used no medicine for twelve years. God is my Healer through the teachings of Christian Science.

I do not give this testimony for the benefit of Christian Science, but for those that need help. I could give many cases of healing, but space will not permit. I wish to state how I became a Christian Scientist. When I became acquainted with Christian Scientists I found them such cheerful, loving people, with charity even for their enemies, that I concluded they had a spiritual understanding of God which I did not possess. I then got a copy of "Science and Health with Key to the Scriptures" by our dear Leader, Mrs. Eddy. When I commenced to practise the teachings of Christian Science I found I was getting a love for God and man that I never had before. A pure love for God and man and love for our enemies will give us a pure spirit and a healed body.—CHARLES MCKAY, Friday Harbor, Wash.

Having received so many blessings through Christian Science, I feel that an acknowledgment of them in writing is one of the ways in which I can express, though feebly, my great gratitude. I began to investigate Christian Science about four years ago, and through the understanding that has come to me, several physical ailments have been overcome, and my health in general has greatly improved. I am especially grateful for the spiritual blessings Christian Science has brought, together with the true understanding of God gained through the study of Science and Health.

The following experience has shown me very clearly the power of Truth in guiding and leading us on our way. Several weeks ago, wishing for some information in regard to obtaining a position abroad, I addressed a letter to a lady on the continent whose name I found in a *Christian Science Journal*. Shortly afterwards, however, I discovered that in the *Journals* of a more recent date than the one I had referred to, the name and address were no longer there, in fact had been out for some time, so I abandoned any thought of receiving a reply. It was therefore with a feeling of surprise that about three weeks ago a reply came. My letter had eventually reached the Scientist, though she had married and gone to reside in another country. Notwithstanding this long delay, her reply contained the information that has enabled me to obtain a suitable position, and at the right time. During the weeks that elapsed before I heard from this lady, it had not seemed necessary to take any further step, such as advertising or making inquiries through an agency, in order to obtain what I required, both of which, under similar circumstances, I have considered important in former years. It had seemed so clear to me throughout, that the way would be opened to me at the right moment; and it was so. My gratitude and love for Mrs. Eddy increase more and more, as I gain in the understanding of Christian Science.—HENRIETTA GOULD, London, England.

Gratitude for the many benefits received through Christian Science impels me to send my testimony. Over three years ago I was healed in one treatment of what seemed to be developing into a severe ailment. At that time Christian Science seemed to me simply a means of getting quick relief from physical ills, and it did not appeal to me as being of spiritual benefit. A year later there came into my experience great mental distress, filling me with unhappiness and unrest. I then began to read Science and Health, constantly, every spare moment. Before the first reading was finished I was healed; peace and calm had taken the place of unrest, and instead of sorrow there was a joyousness which can only be understood by those who have gone through a like experience. Since then the truth of Christian Science has been proven to me many times in physical healing, and for this I am deeply grateful. But my gratitude is far greater for the spiritual help, and for the light which Science and Health throws upon the Bible. It has indeed proved itself the "Key to the Scriptures," unlocking their treasures and making practical their promises. I am very grateful to God for this revelation of truth, and for the Revelator to this age, our Leader, who has done and is doing so much for mankind. I also wish to express my gratitude for the *Sentinel* and *Journal*. They are very helpful to me.

MISS CHARLOTTE A. HAAFF, Chicago, Ill.

In 1893 I was in a railroad accident, and sustained some very serious injuries. I was kept in plaster of Paris for seven months, and after that was taken off, the doctors put on a jacket made of steel and leather. I wore it for several years and spent a good deal of money in trying to get cured, but I suffered all the time until I took Christian Science treatment. I was then cured in one week, at a very slight cost. One doctor had treated me for a good long time and had done me but little or no good, and he said Christian Science had done more for me than he could do. I am thankful for what this truth has done for me.—W. I. WYATT, Sioux City, Ia.

[Written for the *Sentinel*.]

PROMISE.

ANNIE DINSMORE MC CLURE.

A GUST of March came eddying through my door
From greening fields and orchards, where it tore
This little rosy petal—one alone,
A syllable of spring, unfriendly blown
From parent tree in parallels unknown.

Whence come you thus to me, you tiny thing?
You carry all the baggage of the spring.
In texture fine as fullest summer shows—
A morning's blush your fairy cup o'erflows!
Your message all the ice-bound earth awaits;
That word holds sway o'er mighty potentates.
A note you are in Life's full symphony—
A prophecy of better things to be.

An arc's minutest section hints the whole;
A rain-drop once had part with ocean's roll;
And Principle, our source of life divine,
Gave tint and perfume to this guest of mine;
While Love rounds out the promise "prism and praise,"*
And crowns our springtime hope with summer days.

* Science and Health, p. 558.

FROM OUR EXCHANGES.

[*The Boston Herald.*]

Contrasting the $5,000,000 recent gift to Harvard's Medical School with the $200,000 additional endowment which the Harvard Divinity School needs and is not finding it easy to get, President Eliot at the recent Divinity School alumni dinner ventured to ask why the difference? He also asked why Christianity was exerting less influence in the country, and what is the matter with the churches.

His answer to the last question is that most of them are lingering among ideas which the thinking world has passed by, and they are not meeting the demand of the younger generation for square grappling with the great evils of society. "The youth of the present day," says President Eliot, "is not looking for salvation in the next world by rite or sacred symbol. He wishes to be of service to the men who fall among robbers. He thinks the priest and the Levite pass by the great evils of society." For himself President Eliot believes the church needs "to take hold of evils that afflict society, go to the root of them and root them out." Thus doing, even though it cannot immediately, owing to its innate and structural conservatism, accept considerable reconstruction in its theology and philosophy, it can grip the best youth of its time; and thus better hold its own in a time of general institutional overturning.

[Arthur Chamberlain in *The Christian Register.*]

It is mere fantasy to conceive of God as breaking from time to time that law which is the eternal expression of His own immutability. If the law of sin, decay, and death is indeed God's law, then it is as eternal and changeless as is God Himself. If the opposite law of holiness, imperishableness, and eternal life is not of God, then it is pure fantasy, a pleasing dream that passes into the oblivion of endless sleep. With sin, decay, and death all apparent, with eternal life nowhere in evidence, what a foundation of shifting sand becomes mere human belief in immortality! Men have said that all the evidence which we possess is that of the five material senses. If, however, we accept the signs and wonders wrought by Jesus as veritable, we have that which gives the lie to all sense testimony. Clearly we must abandon as false either the law of sin, decay, and death, or the law of holiness, imperishableness, and eternal life. Both cannot be of God. As the historic account stands, Jesus annulled the supposed material laws, healing in defiance of them, raising the dead, and finally stepping forth from his own tomb only to ascend into that state which cannot be cognized by mortal sense.

[*The Independent.*]

Yet the one end is the absolute abolition of war. It stands behind all other discussions. That it is which is meant when it is proposed that the Conference shall have a permanent home at The Hague, and shall meet automatically and regularly to settle the affairs of nations, and thus to create, in time, an international parliament, a legislature as well as a judicial tribunal for the world. That is the ultimate object in view, not always confessed, but always understood by those prophets and seers who announce what ought to be, and so create the public sentiment which statesmen must in the end obey. War must be destroyed, and what must be shall be.

[Rev. R. J. Campbell, M. A., in *The British Congregationalist.*]

We ought to remember that he who knows the innermost of God, as Jesus did, no longer desires any good for himself which he does not equally desire for all mankind. This may lead straight to the cross, but in such a case the cross immediately becomes the symbol of victory. At the worst and darkest there is in the heart of him whose life is hid with Christ in God, a confidence which nothing can ever disturb, that all things work together for good.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.
It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

MR. KIMBALL'S LECTURE. 31 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. 25 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By Rev. ARTHUR R. VOSBURGH. 28 pages.

HEALING THROUGH CHRISTIAN SCIENCE. Discourses and Editorials. By JUDGE SEPTIMUS J. HANNA. 36 pages.

HEARINGS ON PROPOSED MEDICAL BILLS IN MASSACHUSETTS AND NEW YORK. 23 pages.

ANSWERS TO QUESTIONS CONCERNING CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. 26 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 63 pages.

THE CHRISTIAN SCIENCE MOVEMENT. Revised by CAROL NORTON. 28 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the *Journal*. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 40 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 38 pages.

A CRITIC ANSWERED. By ALFRED FARLOW. Printed in German only. 31 pages.

Price: One copy, six cents; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER G. EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.
Cloth binding, each, prepaid $3.18
Two to twelve books (cloth only) to one address, each, prepaid 3.00
Twelve or more books to one address, each, prepaid 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid . . 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Levant, divinity circuit, leather-lined, round corners, gilt edges, silk-sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6.00
Twelve or more to one address, each, prepaid . . 5.75
Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price prepaid, single copy $5.00
Twelve or more copies to one address, each . . . 4.50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2.25
Twelve or more books to one address, each, prepaid 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . . 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,
Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.60.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration will be found on the wrapper. No other notice will be given.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba; twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

In all other countries, six cents per copy, postpaid to any address; twenty-five copies, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST

National.

In the "most magnificent public building in the United States," as the new Public Library now nearing completion in New York city is called, there will be sixty-three miles of book shelves. It fills the entire frontage of two city blocks from Fortieth to Forty-second Street, facing east. The building is three hundred and ninety-four feet long, two hundred and seventy-four feet deep, and one hundred and thirty feet above ground at its highest point. The stack room at the rear, overlooking Bryant Park, is two hundred and ninety-seven feet long, seventy-eight feet wide, and fifty-three feet high. This is occupied by a structure of steel beams covering almost the entire space. This is the bookcase. Four and a half million pounds of steel were put into it.

The new automobile law just passed by the General Assembly of Connecticut differs radically from the present law, which set arbitrary speed limits of twelve miles an hour in cities and boroughs and twenty miles an hour outside of them. As passed the bill provides that "no person shall operate a motor vehicle on the public highways of the State recklessly or at a rate of speed greater than is reasonable and proper, having regard to the width, traffic, and use of the highway, or so as to endanger property or the life or limb of any person." There is also in the bill the provision that a speed of over twenty-five miles an hour for an eighth of a mile shall be *prima facie* evidence of reckless driving.

An order, effective Aug. 1, 1907, provides that the face side of a postal card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line may be used for writing upon, the portion to the right for the address only. A very thin sheet of paper may be attached, if it completely adheres to the card, and such a paster may bear both writing and printing. Advertisements, illustrations, or writing may appear on the back of the card and on the left third of the front.

The reduction in interstate passenger rates of Western railroads went into effect last week. Generally speaking all rates east of the Missouri River will be on a basis of two cents a mile, while to all points west of there rates will be reduced materially. The reduction of interstate fares by the Western lines is the natural result of the passage of laws by Arkansas, Missouri, Nebraska, Illinois, Iowa, and Minnesota. The Eastern roads propose to make similar reductions in their interstate fares.

Twenty-one members of the Lumber Dealers Credit Association, nine members of the Brick Dealers Association, and two bridge agents, who two months ago pleaded guilty to indictments charging violations of the Valentine anti-trust law, have been sentenced by Judge Morris, in Common Pleas Court at Toledo, O. The lumber men and the bridge men were sentenced to six months in the workhouse, and the brick men were fined $1,000 each.

The Mercantile Corporation of New York, operating at Dayton, O., has succeeded to the contract for furnishing stamped envelopes and newspaper wrappers for the Government. For thirty years this contract has been held by the Hartford Manufacturing Company of Hartford, Conn. The agreement calls for 3,600,000 stamped envelopes every working day. The bid was $5,675,384.

If the demand for timber could be kept stationary, and no timber were to be burned up by forest fires, we should have, twenty years from now, at the present rate of destruction, only what our forests would have grown in the interval, is the statement of the Bureau of Forestry in a bulletin just issued on the timber output of the last year.

Plans are said to be under way for the formation of a $100,000,000 international theater trust. The combination will, it is said, not only control the best theaters in Europe and many in this country, but will also have under contract the highest talent in legitimate and vaudeville lines.

All told, the Bureau of Corporations is engaged in ten trust inquiries. They affect lumber and oil, tobacco, steel, harvesters, coastwise traffic, canals, cotton exchanges, patents, and telegraphs.

The new anti-pass law will cut out about eighty million miles of free transportation per annum over Texas railroads and the law will be worth more than $3,000,000 per annum to the railroads.

The annual summary by the *Chicago Tribune* of the Fourth of July accidents and fatalities showed thirty dead, 1,468 injured, and a fire loss of $95,205.

The first jail sentence ever imposed by a Rhode Island court for overspeeding an automobile was given a chauffeur of Providence last week.

The total number of alien immigrants landed in America during the fiscal year 1907 was 1,285,349, a record number.

International.

The Industrial Bank of Japan will shortly issue a five per cent South Manchurian railway loan of $20,000,000 at ninety-seven in the form of railway bonds, running twenty-five years and fully guaranteed by the Japanese Government. It is represented as a purely industrial, not a national, loan, and will be devoted to converting the gauge of the Manchurian Railway and linking the Korean lines. It is stated that the money will be mostly expended in buying materials in Great Britain.

The vote on the principles of the American proposition regarding the inviolability of private property at sea, was taken at The Hague on the 17th by the committee of the conference dealing with the Geneva convention. Twenty-one delegates voted favorably, eleven were against the measure, and there was one absentee. Great Britain, France, Russia, Japan, Spain, and Portugal were in opposition, while the Triple Alliance, although Germany made a reservation, was among the majority.

Y. L. Heiberg, professor of philology in the University of Copenhagen, made a most interesting historical discovery in the Convent of the Holy Grave at Constantinople a few weeks ago. While studying old manuscripts in the convent he discovered a number of palimpsests which, in addition to prayers and psalms of the twelfth century, contained copies of works of Archimedes, the Greek mathematician, who was born about 28 B.C.

The Council of Ministers of Russia has definitely approved the project for double-tracking the Siberian Railway, and a bill sanctioning this project will be submitted to the next Duma.

As a result of urgent representation by the Korean Ministers the Emperor of Korea has abdicated in favor of the crown prince as the first step towards reform in Korea.

Industrial and Commercial.

The removal of the dollar mark from capital stock will, in the estimation of Edward M. Shepard of New York, who recently addressed the Illinois State Bar Association at Galesburg, Ill., go far toward solving the problem of over-capitalization. "It is the falsity of the present plan of corporate capitalization which should condemn it," he said. "For the very reason that it facilitates deceit, the delusion of investor and insincere dealing with public sentiment and with public officers, it should be ended, if there be a better plan. I think there is. I propose that the share of stock shall have no dollar mark; that its only essential feature shall be the truthful certification that it is one of a given total number of equal shares into which the enterprise is divided. The essential thing, as I conceive it, is that the basis of the dividend or of the credit shall be found in some responsible statement of present actual facts, not in fictitious or nominal or obsolete capitalization."

Nine pedestrians lost their lives and thirty-four were injured as a result of automobile accidents within twenty-six days, according to statistics compiled and made public by the Safe Roads Automobile Association of Massachusetts. During the same period there were forty-nine collisions in the State in which automobiles figured. The investigations conducted by the association show that out of sixteen cases looked into the operator was to blame in thirteen. The Safe Roads Automobile Association was formed by a number of automobile owners, who determined to seek evidence for the purpose of convicting operators guilty of reckless driving and who desire to make the highways of the State safe for persons traveling on foot, as well as for all vehicles.

The Consolidated Tobacco Company, it is said, has earned for the small coterie of "insiders" not less than one hundred per cent on its $40,000,000 of capital in the three years and four months from its formation, in 1901, to the formation of the present American Tobacco Company.

The experiment which was started last autumn by transit lines and other railroads, at the time of extreme freight congestion, to pool their freight cars on a scientific basis, has ended unsuccessfully.

According to the Canadian census the average maple sugar output of Canada approximates 17,804,825 pounds or more than three-sevenths of the world's output of maple sugar and syrup.

In drilling for gas in Monongahela County, West Virginia, an entirely new oil district was found, and several wells are entirely filled with oil.

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

[From the *Concord* (N. H.) *Daily Patriot.*]

FOR CIVIC AND INDUSTRIAL PEACE.

THE following correspondence is self-explanatory:—

San Francisco, Cal., July 9, 1907.

Rev. Mary Baker G. Eddy, Concord, N. H.

Dear Teacher and Leader:—As stated in the enclosed clippings, an invitation has been sent to you by the Civic League of this city, inviting you to attend an Industrial Peace Conference to be held in Christian Science Hall July 23-25; or, if you do not attend, requesting an expression of your views on the subject of industrial peace that may be read at the conference. Of course we do not expect you to be present personally, but would greatly appreciate a word from you that might be read at the meeting.

It may interest you to know the circumstances leading to this conference. The day after the riot in connection with the street-carmen's strike, when the city was in an uproar and it looked as though more strikes would be declared and possibly the troops called out to quell the disturbance, a conciliation committee was formed, composed of delegates from the Labor Council, Civic League, San Francisco Church Federation, and some other prominent citizens, for the purpose of bringing about a settlement of the strikes and restoring industrial peace. Mr. Isidor Jacobs, C.S., who was one of the organizers of the Civic League, and I, (Frank W. Gale, C.S.D.) as vice-president of the Church Federation, were members of this conciliation committee, which succeeded in bringing about a settlement of the iron-workers' and laundry-workers' strikes, but the street carmen's and telephone-operators' strikes have not yet been adjusted. It is significant that the strikes which were settled involved reputable business men, while the two remaining unsettled involved public service corporations whose officials have been indicted and are being tried for bribing the Board of Supervisors and Mayor, the latter having just been sentenced to five years in the penitentiary on a charge of extortion.

When it was found that nothing more could be accomplished by the conciliation committee in the present strikes, Mr. Jacobs proposed an industrial peace conference that would take up the subject in a broad way, with a view to providing a permanent body to deal with any future labor problems that might arise. As several of President Roosevelt's cabinet officers—Oscar S. Straus, Secretary of the Department of Commerce and Labor (a cousin of Mr. Jacobs, C.S.), J. R. Garfield, Secretary of the Interior, and Victor H. Metcalf, Secretary of the Navy—would be in San Francisco in July, it was thought to be a fitting occasion for a conference of this kind, when these gentlemen and others could give us the benefit of their experience and wisdom in dealing with the problems of labor and capital. The labor delegates to the conciliation committee being withdrawn at this time, the matter of the industrial peace conference was referred to the Civic League, which will make all the arrangements. The Directors of our church offered the use of Christian Science Hall in this effort to obtain better civic and industrial conditions.

In recognition of your unceasing labor for that which establishes peace on a sure foundation, and as a member *Fondateur* of the American Branch of the Association for International Conciliation, the invitation to express your views on the occasion of this industrial peace conference was extended, and we hope that you may favor us with such views.

Yours faithfully,

FRANK W. GALE.

Mr. Frank W. Gale, C. S. D., San Francisco, Cal.

Dear Student:—Please accept my thanks for your kind invitation, on behalf of the Civic League of San Francisco, to attend the Industrial Peace Conference, and accept my hearty congratulations.

I cannot spare the time requisite to meet with you; but I rejoice with you in all your wise endeavors for industrial, civic, and national peace. Whatever adorns Christianity crowns the great purposes of life and demonstrates the Science of being. Bloodshed, war, and oppression belong to the darker ages, and shall be relegated to oblivion.

It is a matter for rejoicing that the best, bravest, most cultured men and women of this period unite with us in the grand object embodied in the Association for International Conciliation.

In Rev. 2:26, St. John says: "And he that overcometh, and keepeth my works unto the end, to him will I give power over the nations." In the words of St. Paul, I repeat: "And they neither found me in the temple disputing with any man, neither raising up the people, neither in the synagogues, . . .

"Neither can they prove the things whereof they now accuse me.

"But this I confess unto thee, that after the way which they call heresy, so worship I the God of my fathers, believing all things which are written in the law and in the prophets."

Most sincerely yours,

MARY BAKER G. EDDY.

THE REWARD OF CHARITY.

C. W. JENNINGS.

OVER the desk of a Christian Science practitioner in one of our large cities appears this precept: "Never judge or condemn any one; but watch also that you do not chide others for doing so. Let others do as they please. Show them an example by your own life." It has been demonstrated time and again that the one who is chary in his criticism of his fellows, enjoys to an unusual degree the esteem of his acquaintances, and is generally pointed out as a model. I have a friend who is not a Christian Scientist, but whenever another's conduct is up for discussion, he always has something good to say. No matter how serious may have been the lapse from ethical standards of the person under discussion, this friend always pleads the possibility of extreme provo-

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

cation, or the existence of mental phases the critics know nothing about, as a mitigation of the seeming dereliction, and ends by saying, "Now you know so and so"—narrating something good he knows about the other. This friend is universally beloved and trusted, simply because of his charity, and though it has been his lot to experience considerable misfortune, he has maintained a uniform attitude of hopefulness.

It is a strange perversion of human nature, however, to rest content in mere admiration of the estimable traits another may possess, and, even though admitting that happiness to oneself follows their practice, never attempting to do likewise. This is because it is generally believed that such traits are inherently natural, and not to be attained through voluntary effort, unless one should exercise years of tremendous self-restraint. Accordingly there is apt to be more striving for material possessions than for the moral improvement of oneself, but despite this common opinion to the contrary, the returns from a sincere effort to be charitable in thought and act are sure to be immediate and unexpectedly uplifting. Let any one honestly strive to live up to the teaching of Christian Science with respect to the judging of others, and at once he will perceive a real transformation going on in his nature. Soon after he has suppressed his first impulse to speak ill of another, he will be conscious of a sense of healthy gratification, and if he continues in his endeavor, this will grow till he finds a real joy in seeing the good, rather than the evil, in his fellows.

Anyhow, what right have we, as fair-minded beings, to pass judgment upon the motives that influence the personal opinions and acts of another? How do we know what evil influences are being manifested,—what peculiarities of temperament, what home surroundings and provocative influences? We cannot condemn the sin too strongly, but we cannot be too charitable in our attitude toward one in bondage to it. The worse the deed, the more need has the sinner of our love and help. It may be that the wrongdoer was beset with an uncontrollable impulse, or what is generally considered extreme provocation, at the critical moment, and, temporarily bereft of self-control, committed a deed that will cause him lifelong regret. It may be that he was the victim of the environment in which he lived, and had neither the strength of character nor the understanding of Truth needed to rise above it. All such are in dire need of every charitable thought that can be sent out to them, and it is only the thought of good that can help them. The law may punish, society may frown, but the good Samaritan, with helpful thought and word, will sow the seed that later will ripen into reformation and good citizenship.

It does us no good to condemn others. Besides causing the latter to experience an actual setback, it reacts upon ourselves in thought and condition. Likewise the charitable thought acts upon both. The writer has deliberately experimented with this attitude, until its profitable returns have been demonstrated in his own experience. When we ourselves are ready to respond to the scientific demand for righteous living, we shall be the more ready to look for it everywhere with confident expectation. Reducing this elimination of criticism to a still more practical basis, what man will not respond instantly to a kind word, particularly when he was led to expect nothing but unkindness? A man stood in line at a gas company's office in New York one day, awaiting his turn to pay a bill. The eight or ten ahead of him, when they reached the clerk's window—looking upon the latter as the visible gas company, and therefore as responsible for all their fancied wrongs—were not at all sparing of their denunciations, and when this man's turn came the clerk glared through the window and said, "Well, what do you want?" In response a few words of sympathy were spoken. The clerk's eyes filled with tears, and he said, as he expressed his thanks, "Do you know, that is the first kind word I ever heard through that window. If all people were as reasonable as you there would be less talk about us gas people." Once, when a gas range was out of order, and the superintendents and employes were rushed night and day and were criticised right and left,—it being the busy season of early autumn,—the writer called upon the head of the department, and, with an expression of regret that he was forced to trouble him at such a busy time, courteously explained his needs. With an exclamation against "the kickers," the superintendent said he was glad to help "decent people," and would have the repairs made at once. Although it then was four o'clock in the afternoon, by six in the evening the stove was fixed.

There is no more criticised and browbeaten individual in the United States than the New York street car conductor. He is the personal object of the maledictions of a large portion of the millions who use the cars, and rarely indeed receives a kind thought. But once, last holiday time, when one of these conductors had experienced a particularly harassing day, being blamed for delays in the service, accused of trying to collect fares twice, etc., a kind woman, when leaving the car, handed him a fifty-cent piece with the remark that it might make some amends for the hard time he was having. "Indeed it will, ma'am," said the conductor, as he gratefully took off his cap. "And it means a great deal more than fifty cents to me."

Thus the kind thought and word will not only bring the giver added peace of mind, but it will improve the morals and efficiency of the recipient. There never was a man, no matter how low in the human scale, who would not respond to kindness; and if the great possibilities of the true man were constantly held in thought, the millennium would be brought appreciably nearer. Ordinarily this advice seems nothing more than a mere preachment, beautiful enough in theory, but so difficult to put into practice as to be virtually impracticable. Indeed it is only by absorbing the teachings of Christian Science that we are enabled to bring into our lives the full beauty of such precepts as these, and to experience the satisfaction that comes from doing good for its own sake. It is the perfection of the real man, made in God's image, not the counterfeit, with its sins and condemnations, which strengthens us when we become discouraged and would give up hopelessly, which gives us the motive for seeing man as he really is,—not for personal reasons such as hope of better service, but because of the good that is in him,—our reward coming in the returns from increased desire to understand the truth of being.

IS THE CHRIST-HEALING INSTANTANEOUS?

REV. ARTHUR REEVES VOSBURGH.

THE query arises, If Christian Science heals as Jesus healed, why is not its healing instantaneous? The answer is that the Christ-healing is perfect and immediate just in the degree that there is present the understanding which will correct the belief that has caused the disease. If the divine Principle which heals is perfectly understood, its power will be perfectly demonstrated.

There are, however, conditions which enter in, and which make the problem of healing the sick to-day far different from that of apostolic times. The conditions of consciousness which needed to be changed were far different then than now, because they involved very different beliefs. Prominent among these it is noticeable that the cause of dis-

Digitized by Google

ease seems generally to have been ascribed to some evil influence, the work of a demon, or a judgment, or a curse,—some cause that partook of a mental nature and origin. The diseased one believed, and his friends believed, that if some good power could be found to break the influence of this evil power, the healing work would be done and done immediately. The confident expectation of the patient was that if the work were done at all it would be immediate, and as soon as any sense of relief came, he believed that the work was done, and the result, by a fundamental law of thought so often declared by Jesus, was according to his faith.

Over against this we have the thought of to-day, educated in the belief that disease has a physical explanation and cause, and that healing must come as a physical process. So firmly is the belief fixed in thought that healing is a physical process requiring time, that the patient does not expect to be healed except as a work of time, and the practitioner has to guard specially against his own thought dropping into this same mesmeric belief. It is very evident how these modern theories tend to hinder and restrain, on the part of the patient, a ready yielding to the gentle constraint of Truth, a spontaneous response to the spontaneous activity of divine Love, and this difficulty is often accentuated by the entire intellectual attitude of thought that comes through education. To one who has carefully trained himself to look for the reasonableness of things, and to accept nothing but what accredits itself to his reason, it becomes well-nigh impossible for him to yield entirely to Truth until he knows how and why. And it is because of the prevalence of this type of thought that so many are found who do not realize complete and permanent healing until they have gained an understanding of the Principle and rule of Science. Such an one will find release only as, through intelligent co-operation with the practitioner, he rationally works out his own salvation. Wherever the work of Christian Science has been carried on among primitive conditions of thought,—among those who have not studied and entertained theories of disease, etc.,—the response to treatment has usually been remarkable. It has been found quite easy to bring healing to these, but even when this is done there remains the more difficult task of bringing to them a clearly grounded understanding of Christian Science. Some yield readily to the simple appeal of Love and Truth, and are entirely satisfied to receive the release it brings, without seeking that understanding of Truth which is preventive as well as curative.

We have noted these as prominent among the conditions that make the problem of metaphysical healing to-day different from that of apostolic times. In its essential elements the problem is the same. The origin of sickness is to be found in the belief of life, substance, and intelligence in matter. The operation of sickness and disease is the manifested activity of this belief in the human body. The cure of disease comes by correcting this belief with the spiritual understanding of Life as God. The only time that is required is the time that it takes to replace a false belief by the truth, to "correct material belief by spiritual understanding" (Science and Health, p. 425).

THE DIVINE IMAGE.

EVA A. H. BARNES.

In no one thing perhaps has the interpretation of religious thought by Christian Science brought greater spiritual illumination, as well as corresponding beneficial results, than in its concept of man created in the image of God. Under the old thought of personality God appeared, as one minister put it, "like a big policeman, whose chief office was catching people doing something wrong;" while the definition in the Westminster Confession, "without body, parts, or passions," gave, I fear, more confusion than enlightenment to the average thinker. In many cases the statement that man is the divine image conveyed to thought a humanized concept of Deity,—God made in the image of man.

To Christian Scientists just emerging from the thought of the old theology, this new concept of God and of man in His image seems hard to grasp; yet it is to my mind one of the most important as well as the most practical thoughts in the demonstration of the truth. The inventor who would make a locomotive must first hold the mental concept of a perfect engine in thought. His next step usually is to make a working model to illustrate his thought. This model is not for use on the railroad; it is only a small engine used to illustrate the thought of the inventor, and being always available for this purpose, he is not obliged to hold his concept of an engine in thought to the exclusion of all other images; he may therefore go about his other business, confident that if called upon at any time to use this model, he has it ready and perfect. On page 266 of "Science and Health with Key to the Scriptures," Mrs. Eddy says, "Man is the idea of Spirit;" and on page 492, "For right reasoning there should be but one fact before the thought, namely, spiritual existence." If eternal life is dependent on the demonstration of the truth, we as Christian Scientists ought diligently to seek the most practical means of attaining this end. We should so order our thought with relation to a perfect creator and a perfect creation that in all emergencies or unforeseen manifestations of error we involuntarily and without conscious effort turn for deliverance to our working model, or highest mental concept of a declaration of Truth, as made known to us in Christian Science. It is only by habitually making this divine idea our dominant thought that we find ourselves rich in resources when called upon to preach the gospel and heal the sick.

As we emerge from the shadow of the old thought and bring every problem of life to the standard of Christian Science for solution, we may find it very hard to drop the personal sense of our friend, much more our enemy, and to think instead of man in God's image and likeness; but in no other way can we fulfil the law of Love or obey the oft-repeated command of Jesus, "Love one another; as I have loved you." We must remember that the discordant manifestations and conditions which seem to belong to the individuality of our brother are but transitory beliefs in error, which are bound by spiritual law to disappear before the divine light of Truth. The child that has covered itself with mud seems impure; yet we know that the mud is not the child,—we are aware that this is simply a temporary calamity. Our work, clearly, is to remember constantly that man is free from all that is not in accord with the Divine ideal, remembering always that our responsibility ends when we have, through our scientific mental attitude, opened wide the door through which the healing power of divine Love may enter.

So far as retribution is concerned, it does not matter whether we transgress a moral or spiritual law through ignorance or wilful disobedience; in either case we must come consciously into harmony with divine Love through suffering or through spiritual enlightenment. So long as we ignore the law of mental or spiritual causation we must suffer the penalty of discordant conditions. There is no other way under heaven whereby men can be saved except through the doorway of spiritual understanding, which ever opens into the Father's kingdom. What a blessed privilege, then, to be able to help, in ever so humble a way, to bring into manifestation the true Life,—Spirit,—in which we find the real individuality and identity of man.

SELECTED ARTICLES.

[Alfred Farlow in *The Boston Post.*]

In view of misapprehensions which have recently appeared in the public press, it seems proper that we should devote some space to the consideration of the term "malicious animal magnetism" as used in Christian Science parlance. We are well aware that we have undertaken the discussion of a subject with which the general public is not very familiar, although it is not by any means new. The lesson which analyzes and repudiates the supposed influence called animal magnetism and shows how it may be counteracted and destroyed by a reliance upon divine power, is an advanced one in the Christian Science course, and ordinarily we would leave it for the future, so far as concerns the public press; but since the subject has already been introduced and in large measure misstated, we feel compelled to consider it in the interest of fair representation.

The word magnetism was first applied to a peculiar attraction of iron ore, and in itself has no significance, being called magnetism because it was discovered in the city of Magnesia. Later the term "animal" was joined to it, and it was used with reference to a supposed influence which one person was believed to be able to exert over another by physical contact. The meaning of the term "animal magnetism" has gradually broadened, and now applies to any and all supposed action of the human mind, and is similar if not identical in meaning with the term mesmerism or the more modern term hypnotism. From this description it may be noted that from the very introduction of the term to the present time the word has been applied to that particular power, influence, or force which is supposed to be possessed by the creature in contradistinction to the creator.

Christian Science teaches that there is in reality but one power or force; that is, God, Spirit, Mind, Truth, Love; and that, therefore, the Christian warfare is the struggle of mankind to become subject to the Mind which was in Christ,—to become submissive to the divine Mind and thus silence human will, which the Scriptures denominate the "carnal mind." St. Paul described this warfare in the following words: "For the flesh lusteth against the Spirit, and the Spirit against the flesh: and these are contrary the one to the other." Science always settles the battle on the side of Spirit, because "Spirit is the real and eternal" and "matter [flesh] is the unreal and temporal" (Science and Health, p. 468). Since Science has introduced the proposition that God is the only real Mind, the carnal mind in all its varied manifestations is naturally, in the interest of self-preservation, arrayed against it. Therefore every wilful phase of this supposed human opposition which is aroused by the introduction of Science is malicious. Hence the use of the term "malicious animal magnetism." It is called magnetism because it refers to a supposed power independent of God; and malicious, in keeping with the Scriptural declaration, "The carnal mind is enmity against God."

Mrs. Eddy refers to it as the human antipode of Divine Science. It is a term which is broad enough to include all that is opposed to God. It includes every phase of evil, every phase of the human antagonism to Truth. In combating evil, Christian Science does not regard it as person but as a supposititious force which dominates false sense and which, in view of its false pretense of intelligence, is denominated "mortal mind." St. Paul called it "carnal mind," evidently because all its promptings or inducements are based upon fleshly desires. Mrs. Eddy's definition of malicious animal magnetism is identical with our Lord's description of Satan: "He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it." The Master referred to Satan as "he," but declared that he was never in the truth, that there is no truth in him, and that he is altogether a liar. It is neither person nor intelligence that lies, but a mere mystification or want of intelligence which appears as a false sense of things. The Scripture refers to Satan as a deceiver. Evil like darkness is not a real power, it simply obscures and it disappears with the revelation of truth.

Christian Science discredits the fabled devil, who is supposed to have horns and hoofs and to be endowed with intelligence, and shows that it is not a thing to be afraid of but a pretense to be awake to. The subtle arguments of malicious animal magnetism can have no effect upon those who are aware of its presence and who understand that God is the only real Mind or power. Malicious animal magnetism is an evil mental influence in belief, the opposite of Science,—that which the evil minded through mental malpractice seek to use in opposition to the good influence of the divine Mind. It is known to all students of psychology, and we think we may safely say to all reasonably well informed persons, that one may be mentally dominated by another if he is not awake to this evil and prepared to resist its deception. There are, and have been for many years, schools which advertise their ability to teach a method of subjugating the will of another for the purpose of ruling him.

It is well known that crimes of all sorts have been committed under hypnotic influence. We remember having read some years ago of a hypnotist who on several occasions went into a little confectionery store, bought candy, threw down a copper coin and obtained change for a five-dollar gold piece. He was finally detected by the police, who after considerable trouble made the clerk aware that the man had actually collected change for five dollars. Another hypnotist is said to have gone to the box office in a theater, where he threw down a piece of paper and procured a ticket and change for a bill of considerable size. A detective who had been watching the man arrested him on the spot, and finally made the agent understand that he had given the hypnotist change for a bit of paper.

Christian Science throws light upon this hidden practice because through its understanding of right mental influence it lays bare the diabolism of the supposed evil mental influence. While many are skeptical in regard to the pretensions of mental malpractice, its evil workings and evil effects are so well known to the careful investigator that they cannot be brushed aside. The time has arrived when Christian Science is needed as a protection against the mental bandit; for, as a matter of fact, the understanding of God as the one infinite power is the only sure means of defense against the evil called malicious animal magnetism. Jesus evidently had this in mind when he prayed, "Not as I will, but as thou wilt." This was when he was struggling to defend himself against the almost overwhelming hatred of the rabble, which was incensed against him at that time.

There is no point of similarity between the belief of Christian Science concerning animal magnetism and what has been termed witchcraft. Witches, as we understand, were supposed to be controlled by evil spirits or demons, which rendered them dangerous to the community in which they lived. "Witchcraft" was based wholly upon superstition. In Christian Science animal magnetism is not believed to be a power, or thought to be the expression of intelligence, but of false belief. It is not to be combatted by smiting its victim, but by understanding Truth, by relying upon the one power which neutralizes and destroys the false belief. In the light of Christian Science we recognize that the effects of the black curse and all other means of frightening folks, are the outgrowth of delusion, of suggestion or auto-suggestion, which becomes powerless in the presence of Christian Science, the apprehension of the Truth of being. The manifestations of human will are silenced by an understanding of the omnipotence and omnipresence of divine Mind.

[From an editorial in the *New York Globe*.]

Is the mind, as a matter of fact, in the body anywhere? asks Prof. G. S. Fullerton of Columbia in the *Popular Science Monthly* for May, and it is evident that if the answer depended upon his opinion it would be a negative one. He traces the history of the modern school of mental geography to which he adheres, from the days of Plato down through Aristotle, Plotinus, and Descartes, and then points out the absurd contradictions of other schools. Thought is a secretion of the brain, says one. May we legitimately speak thus? says the professor. "The secretion of a gland is material. It can be collected in a test-tube and analyzed by a chemist. Has any one ever succeeded in filling a test-tube with mental phenomena —in bottling and analyzing in a laboratory pains and pleasures, memories and anticipations?" This seems a knock-down blow for the secretionists, unless they are willing to admit that ideas are a different sort of secretion from saliva or tears—something like light, perhaps, or X-rays.

Then the professor takes up the men who simply declare mind to be a function of the brain, and wants to know what they mean. Do they mean that certain changes in the brain produce certain mental phenomena? Are mental phenomena in the brain? If not, where are they? Material things occupy space. "A leather purse may be lined with silk and it may contain silver; but try to line a leather purse with painful emotions and to fill it with hopes and expectations!" As a matter of fact the most modest of purses lying empty on the sidewalk is surrounded by a veritable halo of "hopes and expectations" the moment any one's eyes fall upon it. Evidently these are not in it, because there is nothing in it, and when it is opened they vanish like magic. It is the same with the mind. You open up the body and look for it in vain. Sometimes, indeed, its absence can be determined without any dissection.

[Charles G. Bliss in the New York *Sun*.]

As the papers seem full of references to Christian Science, both for and against, it may not be amiss for one to make a contribution whose work for twenty-five years has been along statistical lines in connection with life insurance. I was very much interested in reading in the morning papers articles pertaining to the low death rate among Christian Scientists. The Christian Science Publication Committee said recently:—

"There are not less than thirty thousand persons in New York State who rely wholly on Christian Science treatment for sickness. Since Jan. 1, 1907, there have been less than ten deaths in the entire State under Christian Science treatment. The average death rate for the year among the Christian Science population, even including those who were not Christian Scientists and who turned to it only after the doctors had given them up, was only 1.04 a thousand, as against the average death rate of more than eight for the entire State."

These figures are certainly astounding when analyzed by practical men who can take in their import and understand what they mean to mankind. The Christian Science Publication Committee very much understates the actual mortality of the State. In Greater New York, where most of the Christian Scientists reside, the mortality rate is more than double that given, or twenty in the thousand. For thirty thousand persons this rate would mean six hundred deaths for the year, as compared with ten in five months under Christian Science treatment. Life insurance companies take only those persons who pass a careful medical examination, and they are therefore supposed to show a lower mortality than that of the community in general. The death rate of eight in the thousand given in the Christian Science article was doubtless taken from life insurance tables for New York State. It is much higher in the city. It should be borne in mind that the Christian Science churches are receiving one class of people directly the opposite to those selected by the insurance companies; that is to say, "rejected cases." In fact life insurance companies regard Christian Scientists as "extra hazardous risks," and therefore will not usually accept them. Most companies who take them limit them to small amounts of insurance. It is therefore evident that Christian Science has a larger task to perform in lowering its mortality than the life insurance companies have, for people taking Christian Science treatment usually do so as a last resort, because they have been unable to procure help from sources which have generally been supposed to supply the best methods of treatment. If, then, Christian Science treatment showed a mortality as high as that of the hospitals or homes for incurables it should not be censured, but should be considered as desirable as that of the medical fraternity.

The Christian Science death rate of 1.04 would be marvelous if the Christian Scientists selected their risks as the life insurance companies do, but how much more astounding is the record when the class of people taken into their ranks is considered, including risks that none of the life insurance companies would accept. Think of it! A ninety per cent lower mortality record on "rejected cases" than is maintained by life insurance companies on "approved risks"! My personal experience has taught me to rely on the Christian Science method of healing as superior to any other, notwithstanding the fact that I hold the members of the medical fraternity in great respect, believing them to be noble men who have sacrificed much for their calling and have done all they could to alleviate suffering and sickness.

In the light of the foregoing it seems to me unreasonable that Christian Science treatment should be censured in the case of Mrs. Corinne MacBride when hundreds of patients are dying daily under *materia medica* without criticism of the doctors. Christian Scientists do not assert that they have attained a perfect understanding of the Principle which heals all manner of diseases, but they do say, and can prove it, that with their present knowledge of the healing power of God they have been able to restore health and increase longevity in a greater proportion of cases than can be credited to any other system.

["Observer" in *The Republican-News*, Hamilton, O.]

Apropos of the much-discussed Christian Science failure, touching the case of the Kennel lad and the anticipated verdict of the county coroner, I would like to say the whole thing smacks largely of narrowness and persecution. I am not, nor ever expect to be, a Scientist, and yet I like to see even the devil given his due. The doctors who made the examination assume in their testimony that had an operation been performed the lad would have lived. How about the countless failures daily occurring after the best medical and surgical skill has been exhausted? How many live to tell the tale after the so-called highly successful and satisfactory operations—or in many cases explorations—that are chronicled throughout the broad newspaper land? These victims cross the Great Divide by a legalized route and there is the difference. In this age of the world's progress there should be broadening out along all lines—medical and surgical.

[From *The Durham* (N. C.) *Sun*.]

Whatever they want to say about Mrs. Eddy, the worst that any one can say is that she is a good woman.

THE LECTURES.

CHICAGO, ILL.

The large auditorium of Fifth Church of Christ, Scientist, was crowded last evening [June 6] when the Hon. Clarence A. Buskirk of St. Louis lectured on Christian Science. The lecture will be repeated to-night [June 7] for the benefit of those who were unable to gain admission last night. Judge Buskirk was introduced by Dr. A. K. Frain, one of the trustees of Fifth Church, as follows:—

Amidst the turmoil and turbulence of the seemingly ceaseless activity of human thought in its mad search for success, happiness, health, and peace from merely human strivings—whether it be along commercial, mechanical, professional, literary, or religious lines—there comes to every one sooner or later a clouded, bewildered, diseased sense of failure. The acquirement of material riches, honor, influence, and power will not carry man to the goal desired; nor can the plaudits of the world waft him into the harbor of peace. Indeed, these things ofttimes drive him on the rocks which threaten to wreck his health, his happiness, and his life. It makes no difference whether this sense of failure comes from a sick body or a sick pocketbook; from thwarted ambition or defeated hopes; from a diseased conscience, or a perverted, sinful, and dissipated life; from fear that a microbe or tubercle is eating up his body, or that a business competitor is eating up his profits. No matter what the cause may be, he finds himself, at last, reaching with outstretched arms in every direction for surcease from sickness, disappointment, and sin; or, wearied and exhausted by the struggle, he sinks into the depths of pessimism, despondency, despair. At this stage, when the last faint ray of hope seems to have fled, Christian Science—as at any and every stage along the line of human need—stands at his door waiting for him to knock that it may be opened to him; waiting for him to ask that he may receive; waiting for him to seek that he may find.—*Chicago Journal.*

LEAVENWORTH, KAN.

Judge William G. Ewing lectured Sunday, June 9, to the prisoners at the Federal prison at Fort Leavenworth and the Kansas State prison at Lansing. The lectures were given by the Christian Science churches of Kansas, under the auspices of First Church of Christ, Scientist, of Leavenworth, and the most eager attention was given by the men; indeed, every seat was filled and all seemed deeply impressed with the humane and loving manner in which Judge Ewing presented our gospel of love. At the Federal prison the lecturer was introduced by Warden R. W. McClaughry and at the State prison by Warden Haskell. The public was not admitted to these lectures, but they were printed in full in both *The Leavenworth Post* and *The Leavenworth Times.*—*Correspondence.*

WHEELING, W. VA.

First Church of Christ, Scientist, of this city gave its first lecture on Christian Science on the evening of May 28 in the Court Theater before a very attentive audience of nearly six hundred. The lecturer, Mr. Frank H. Leonard, was introduced by Miss Bertha M. Parce, who spoke in part as follows:—

Excepting the life and works of Jesus of Nazareth there has not appeared in all the religious history so great a wonder as the phenomenal growth of Christian Science. And why? Because it meets the great needs of mankind. It gives health for sickness, love for hate, joy for mourning, and beauty for the ashes of decay and blighted hopes. It is entirely different from hypnotism, mesmerism, mental suggestion, and spiritualism, and it is unlike mental science and faith cure. It is the influence of divine Mind, the law of divine Love scientifically applied to human affairs.—*Correspondence.*

ANDERSON, IND.

Hon. W. S. Ellis, in introducing Miss Mary Brookins, who lectured on Christian Science Sunday afternoon [May 26], at the Grand Opera House, said in part,—

Christian Science has been opposed and denounced. It has not run away from the fight, but has thrown wide open the door of investigation. It has grown on these and despite these things. It has been ridiculed and in return it has pointed to its results in the greater peace of mind and greater joy in the lives of its followers; it has been denounced and it has answered with its forbearance; it has been charged with error and has met it with the sabre of God's truth. Against the clamor of its enemies it has whispered, "Peace, be still." It has been persecuted and in reply it has given freely of the love of God on which it is founded, and by pointing to the life and example of the Nazarene himself. It has been crucified and has risen, to live again and stronger in its battle against every form of disease and crime.

The Daily News.

ERIE, PA

Most attentive was the large audience at the Majestic Theater yesterday afternoon [June 9] to listen to the address of Rev. Arthur R. Vosburgh of Rochester, N. Y., who spoke interestingly on "The Idealism of Jesus." Hon. A. B. Osborne introduced the speaker, and said in part,—

Like some others in this audience, I am not a Christian Scientist, but, like all those who are present, I am glad to welcome to Erie the gentleman who is to address our citizens this afternoon. There is always room in the world for everything that takes the gloom out of the day, that lightens humanity's necessary burden, and that turns the thoughts of men from pain and trouble to the joy and the brightness of life; and any message should be welcome that speaks to any one of hope and life and love. Whether this message can reach us all, just as it is received by some, is beside the point, for it is but a duty to our fellows not to throw the shadow of an unbelief upon our neighbor, who might otherwise rejoice in the full light of a strengthening faith.

Erie Dispatch.

SAULT STE. MARIE, MICH.

Bicknell Young lectured on Christian Science June 16 to an interested audience. The speaker was introduced by Judge L. C. Holden, who spoke in part as follows:—

Every new religious sect or denomination is denounced and often persecuted by others, and not infrequently it is most bitterly denounced by members of other religious denominations, without knowledge of what the adherents of the new religion really claim and mean; and, while professing to be themselves Christians, act in this respect unlike the Christ they claim to follow. What I ask of this audience to-day is that you shall study the doctrine that these people teach. You need not fear that you will be converted if you study it. If you study thoroughly without conversion the study will do you no harm, and if you study and are converted it may do you infinite good,

Digitized by Google

because conversion comes from an honest belief in knowledge and knowledge is the most desirable thing human nature can wish for. Knowledge comes from study. An honest belief is a part of each one's religion and every one's religious belief is sacred to himself.

Correspondence.

SPOKANE, WASH.

On Sunday afternoon, May 26, a lecture on Christian Science was delivered by Rev. Arthur R. Vosburgh in the Auditorium Theater, under the auspices of First Church of Christ, Scientist. Mr. John M. Henderson, President of the church, in introducing the lecturer, said in part,—

To the observing mind there are many evidences that Christian Science is one of the leading topics of the hour. Admitting this to be true, it is not inappropriate to ask why it is true, and the answer is found in the personal experiences of the healed, the restored, the uplifted, the reformed, the purified. The many philosophies, the "new things" (as Paul termed them), the thousand and one isms which for centuries have appealed to the inquiring minds of the student classes, judged by the crying needs of the great heart of humanity, have been found wanting. The late Scotch clergyman-author, Ian Maclaren, has said: "As a stranger, unfettered by tradition, will detect in a private gallery some masterpiece generations have overlooked, so an unbiased mind will rescue from neglecting ages some idea of the Master." The Leader of this world-wide movement, Mrs. Eddy, who communed so closely with the Father that the old thought-fetters ceased to bind, has rescued from the neglecting ages the transcendent idea of the Master,—even the Mind which was in Christ Jesus and which enabled him to perform those wondrous works of which we have record in the Gospels. Within the past two decades thousands have been brought into contact with this supreme idea of the Master, and for them every need of yearning humanity has been supplied. This Christ-teaching purifies, ennobles, and enriches with those temporal and spiritual blessings whose fruits are happiness, prosperity, righteousness, peace; in a word, it abundantly satisfies.—*Correspondence.*

SANTA BARBARA, CAL.

A large audience of representative people of Santa Barbara gathered at the Potter Theater yesterday afternoon [June 30] to hear the lecture upon Christian Science delivered by Judge William G. Ewing. It was as intelligent and critical an audience as could have been gathered together, the physicians, lawyers, and ministers of the city being well represented. Judge Ewing was introduced by E. W. Dickey, First Reader of the local Christian Science church, who said in part,—

Christian Science has come to this age as "a great light." It has lightened the pathway of countless thousands and is to-day casting its rays across a world that as yet does not comprehend it. It is because of the incomparable promise of Christian Science and the fulfilment thereof, because through its ministrations the blind do see and the lame walk, that multitudes are saying to the world: "Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee." Christian Science is lifting its students above the contemplation of disease and sin into the glorious light of the risen Christ.

The Independent.

SAN DIEGO, CAL.

At the first M. E. church last night [March 7] the Hon. Clarence A. Buskirk delivered a lecture on Christian Science. William E. Smythe, in presenting the speaker, said in part,—

Speaking not only from wide observation, but from my own experience, and with heartfelt gratitude, I can say of Christian Science as Conkling said of Grant: "Great in the arduous greatness of things done." Mrs. Eddy and her students have demonstrated that man's body is not himself, and that at the heart of the universe there is a heart that is friendly to us. This condition justifies confidence on our part. Such confidence will raise the lowest to something higher. Such confidence will raise the highest higher still.—*The San Diego Union.*

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. ***Beware of counterfeit letters.***

NOTA BENE!

Pleasant View, Concord, N. H., July 8, 1907.

To the Directors of the Central Christian Science Reading Room, 23 West 23d Street, New York, N. Y.

My beloved Christian Scientists:—Because I suggested the name for one central Reading Room, and this name continues to be multiplied, you will permit me to make the *amende honorable*—notwithstanding "incompetence"—and to say, please adopt generally for your name, Christian Science Reading Room. An old axiom says, Too much of one thing spoils the whole. Too many centers may become equivalent to no center.

Here I have the joy of knowing that Christian Scientists will exchange the present name for the one that I suggest, with the sweet alacrity and uniformity that they accepted the first name.

Merely this appellative seals the question of unity, and opens wide on the amplitude of liberty and love a far-reaching motive and success, of which we can say, the more the better.

Yours in Love,
MARY BAKER EDDY.

[Telegram.]

New York, July 13, 1907.

To Rev. Mary Baker G. Eddy,
Pleasant View, Concord, New Hampshire.

Beloved Leader:—Your message dated July eighth, to the Directors of the Central Christian Science Reading Room, has been received, and at a meeting of the Board this afternoon your request, that we shall adopt generally for our name "Christian Science Reading Room," has been promptly and gratefully carried out.

We thank you for your beautiful letter and for this added token of your wise and loving guidance in our work.

Lovingly yours,
For the Board of Directors.
IONE REVENAUGH, *Secretary.*

"UNDER HIS WINGS SHALT THOU TRUST."

IT was a warm day, and the mother turkey had piloted her trailing brood such a long way in search of stray wheat-heads and the delectable grasshoppers that the younglings were piping plaintively enough when she finally martialed them in the back door-yard for the last roll-call before taps. For herself she would have chosen a roost among the lower branches of a near-by oak, but consideration for her weak-winged progeny led her to decide upon the board fence instead, to which she promptly mounted, and settling herself, called them encouragingly to her side. In an instant the most daring made the venture, and landing safely near her, he ducked his head and edged along until he found himself close to the mother-heart and fully covered by her wing. Thus, one after another, they lined up, to right and left, each getting just as near as possible to the coveted first place, and each finding room under the generously extended wings, spread out in keeping with the household demands until all were snuggled down in safety and content, five on one side and six on the other.

This performance was not an unfamiliar one to the bronze-vizaged farmer who had watched it from the kitchen steps, but this evening he found himself peculiarly interested in it. He had been taught for long years to think of God as an austerely righteous being, who is immovable in His decrees and terrible in His doings; but of late he had learned something of Christian Science, and had begun to think of the Father-Mother of all in a different way, and this picture of maternal provision for innocent need distinctly contributed to the transformation and renewal of mind which he was undergoing. As he looked upon it he recalled the familiar words, "under his wings shalt thou trust," and they immediately took on a new and richer meaning. The comforting thought of God as a loving parent who is interested in the welfare and happiness of mankind, outlined itself as never before, and began to assume the significance of an impelling conviction.

He recalled how frequently Jesus referred to this consciousness of the divine Fatherhood, in which he found daily strength and inspiration; how he attributed both his safety and his success to the nearness and omnipotence of Love, and how he encouraged, yea commanded, his followers, that they give place to neither anxiety nor fear, since He who careth for the sparrows was to be their abiding wisdom and strength, their support and stay in every stress and storm of human experience, so that nothing should be able "in any wise" to hurt them. He saw, moreover, that while Love's protecting wings are always available, and large enough for our every need, Love's call must be heeded, and in response thereto each must put forth effort, and mount a bit to his own place. He also saw that, though protected by the mother-wing, each birdling needed to keep a good grip on his perch, and that, like them, it is ours, as coworkers with God, to cling steadfastly to the truth whereunto we have already attained, that we may not be moved either by the unexpected gusts of personal influence or the more constant currents of mortal thought.

It was one of those simple, ever-recurring experiences which, in the case of every alert Christian Scientist, open the door for new and nourishing perceptions of spiritual truth, and when the good man went into the kitchen he said to the busy housewife, "Mary, I've been a-thinkin' that if we had sense enough to believe in God, and do what He's told us,—if we'd trust to His takin' care of us as them gawky turkeys do to their mother,—we'd get on a mighty sight better. Just look out there! How contented they be; and d'ye see, every last one of them is 'beneath the shadow' of her wings."

JOHN B. WILLIS.

MEDICAL EXPERIMENTS.

A NUMBER of newspapers have published reports of medical experiments recently made by Professor Gates at Washington. According to these reports, the professor succeeded in showing by chemical results the influence of mental states upon the human body. One paper says,—

Professor Gates has shown what is called the causative character of thinking in a long series of experiments. He has found that change of the mental state changed the chemical character of the perspiration. When treated with the same chemical reagent the perspiration of an angry man showed one color, that of a man in grief another, and so on through the long list of emotions. Each mental state persistently exhibited its own peculiar result every time the experiment was repeated. Each kind of thinking, by causing changes in glandular or visceral activity, produced different

Digitized by Google

chemical substances, which were being thrown out of the system in the perspiration. . . . The results showed . . . that each kind of thinking produced its own peculiar substance, which the system was trying to expel.

As a result of her search for spiritual realities, and without taking matter into account as a factor in her experiments, Mrs. Eddy discovered many years ago that "erring, mortal, misnamed *mind* produces all the organism and action of the mortal body;" a discovery which, she goes on to say, "set my thoughts to work in new channels, and led up to my demonstration of the proposition that Mind is All and matter is naught as the leading factor in Mind-science" (Science and Health, p. 108). At the time of our Leader's discovery her statements of it were met with incredulity on the part of those who were wedded to time-worn opinions and medical theories respecting mind and body, but with the multiplied proofs of the scientific correctness of her statements a great change has come over the world's thought.

The medical experiments mentioned above are based upon a belief in matter and the power of the human mind to work ill with the body. They therefore represent a hypnotic impulsion, which would deprive men of the beneficent influence of Truth, and which should be resisted to the utmost, since divine Principle governs man and the universe from the least manifestation of Mind to the greatest. While we might expect those who believe that anger can harm the body to abstain from this and the other evil thoughts which produce results harmful to oneself, it does not follow in the majority of cases, for while men see the evils of intoxication, the indulgence of false appetites is not stopped thereby. It requires a mightier influence than the fear of suffering to propel mankind toward practical goodness. Our text-book says that the one who refrains from wrong-doing "only through fear of consequences—is neither a temperate man nor a reliable religionist" (Science and Health, p. 322). It needs an awaking to the pure joys of right thinking and living to furnish the incentive to overcome the evil tendencies of long centuries of wrong thinking and living, but a single ray of light dispels a great deal of darkness, and a touch of the divine Life brings at least a measure of healing, which foretells complete deliverance from both sin and disease, from everything that does not express God.

A dear woman who was healed in Christian Science after years of futile medical experiments, with imprisonment in a sick-room, stepped out into what seemed to her a new world. On every side she saw the children of her new-found Father-Mother, God, and she said to one who was with her, "How glad every one is to see me walking!" It is indeed glorious to have even a glimpse of man's true being. When followed this leads to abiding health and happiness and enables one to say, "I delight to do thy will, O my God: yea, thy law is within my heart."

ANNIE M. KNOTT.

THE MOTHER CHURCH AND READING ROOM.

As many Christian Scientists will doubtless visit Boston during Old Home Week (July 28-Aug. 3), we would call attention to the change in the location of the Reading Room. It is now in the Berkeley Building, 420 Boylston Street (Suite 306-307), and is open daily, excepting Sundays and Wednesdays, from 9 A. M. to 9 P. M., and on Wednesdays from 9 A. M. to 5 P. M. The edifice of The Mother Church, on Falmouth, Norway, and St. Paul Streets, is open to visitors on Wednesdays, from 10 A. M. to 5 P. M.

CORRECTION.

The reference to plans for a new church edifice in Sacramento, Cal., which appeared in our issue of July 13, should have read, Lodi, Cal., instead of Sacramento.

LETTERS TO OUR LEADER.

Boston, Mass., June 6, 1907.

Rev. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—Many are thinking of Christian Science these days as the occasion of a tremendous stir in the world, and mortal mind certainly is writhing; later on they will come to see that in condemning all strife between personalities, and in enlisting the intelligent effort of humanity in resistance to the claims of impersonal evil, you have not only precipitated the greatest struggle of history, but you have inaugurated the greatest peace movement of history. I was impressed with this thought recently while attending the annual meeting of the American Peace Society, of which I am a member. I was also led to think that if a larger number of Christian Scientists were to become members of this Society and attend its annual gathering they might thereby honor your earnest endorsement of this movement and contribute more directly to the success of its undertakings. The organization is not large here, but it includes some of the most cultivated and distinguished people of Boston, men and women of large mould and fine spirit.

The society is carrying on an educational propaganda through the public schools, the colleges, and the press, as well as by the publication and distribution of a large amount of pamphlet literature upon the subject. The teaching of history in a way that will disclose the inutility and the horror of war, instead of inflaming a spirit of militarism, is receiving special attention, and not only the movement, but the men and the measures in hand, as I have come to know them, are altogether worthy of your highly significant commendation.

Expressions of appreciation of your interest in the peace movement and of your work as the Leader of the Christian Science movement are not infrequent, and if a larger number of our people were to become members of the society I am sure it would greatly encourage the active workers in it. I am glad to note that very kindly reference has been made to you in the organ of the Peace Society for this month.

Pardon this intrusion upon your crowded time, and let me tell you that every day brings increase of my thankfulness for all you have brought to me and mine, and of my love for you and for this great Cause.

Christian Science is not only the greatest thing in the world, it is the one thing, for it compasses all good, and the one aspiration of my heart is that I may make every day and hour tell for the advance of the inspiring truth you have brought to all mankind in Christian Science.

Your loving student,

JOHN B. WILLIS.

MRS. EDDY'S REPLY.

Mr. Willis, C.S.B.

Beloved Student:—It is my desire that every member of my large church shall advocate national peace and conciliation; and that you obtain a large number of Christian Scientists to become members of the American Peace Society.

MARY BAKER G. EDDY.

Concord, N. H., July 12, 1907.

Mrs. Mary Baker G. Eddy.

Dear Leader:—Perhaps you may take a moment's time to look over the work of your Concord church in the distribution of free literature.

There have been three thousand pieces of free literature distributed during the first six months of 1907: *Journals*, 147; *Sentinels*, 372; *Quarterlies*, 24; reprints from *Journal*, 1,648; newspapers containing lectures and articles on

Digitized by Google

Christian Science, 394; editorial compilations by Mr. Farlow, 100. Magazine work, 322 pieces: *The Independent* containing your article "Harvest," 51; *Human Life*, 117; *Cosmopolitan* and "Cosmopolitan Charles Klein Booklet" 87, and several copies of the *Arena*.

All classes of people come for the literature. I recall one of the representatives, who came to the tables with several others, and as he was picking up some pieces he said, "My wife's aunt lives with us and she is a great hand to read up all new things. I want to carry home something of this to her." I noticed him at the Wednesday evening meetings afterward. Then a young man, who had with him two other young men, came direct to the tables and said, "I want a Christian Science book." I learned that he was to be in the city a few weeks. He was given a *Journal* and offered other pieces, and told how he could find a book. I saw him there several times. A traveling man came out from the morning service, came to the tables, and eagerly picked up a piece from each pile. He said that he knew nothing of Christian Science, but was going to know something of it. He was going to take all those pieces over to the Eagle Hotel and put in an afternoon with them; then when he had got what he could, he was going to send them to Illinois to a friend who was just inquiring about Christian Science.

One of New Hampshire's Congregational clergymen came to the tables, helped himself to those pieces he wanted, put them in his pockets, and asked, "Who is your organist?" He was told; then he said, "I never heard such inspiring, helpful organ music," and remarked on the impressive manner in which the hymns were rendered. He expressed a wish to be introduced to the organist. I found some one who went with him for that purpose. He came back and thanked me, and said, "I would like to meet your First Reader," and that was brought about. He has been looking into Christian Science for some years.

One Saturday afternoon a dear woman, a member of one of our Concord churches, came to the Reading Room and we talked with her,—or she did most of the talking. I gave her Judge Ewing's lecture, given at Denver. The next Monday I received a very loving letter from her, in which she expressed gratitude for help received on Saturday, and also of the pleasure she had in reading the lecture. The letter was full of love for Christian Scientists. We find many hungry hearts ready to read the literature, and we know that when the Father draws them they will come with us and be lifted up.

I hope to serve you better as I learn how.

Lovingly,
URIANNIE P. GROVER.

Geneva, N. Y., July 16, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Dear Mrs. Eddy:—Last November I was instantaneously healed of asthma through Christian Science. On Thanksgiving day, the first time I was in the Christian Science Reading Rooms after my healing, I picked up "Pulpit and Press" and was attracted by your description of an old and new year. Your inspired words so impressed me that I could not help trying to illustrate the text. So I send you the effort, not for the sake of the picture, but for a heart filled with gratitude for the proof that Truth can indeed overcome error, which was the motive of its doing.

Very sincerely,
FRANCES S. COOK.

Atlanta, Ga., July 14, 1907.

Beloved Leader:—I enclose a clipping that will interest you. Our Publication Committee sent you the larger notice of Governor Smith's inaugural. There has been nothing like it in our State history, and Mr. Smith looms up more and more as a national figure. The *Georgian* is a fine paper,—ethical, intellectual. The editors are personal friends of mine, and are very kind and favorable about Christian Science, as are also the clergy and the newspapers in general, and the thought is vastly improved in every direction. The kingdom of omnipotent good is near and here—no matter what the seeming. God is with you every moment, and nothing shall by any means hurt you.

I am just establishing myself in an elegant little home, more retired than the old one, but better suited to my needs.

Your devoted student,
SUE MIMS.

Camden, N. J., July 10, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—The members of First Church of Christ, Scientist, Camden, New Jersey, send you greetings of gratitude, joy, and gladness. We are most grateful for your labor of love. Science and Health is the key that has opened the door of heaven (harmony), the door that has been so long closed by sin, sorrow, and suffering. We rejoice that mankind may have that which reveals the Light that grows brighter and brighter unto the perfect day. We are glad of the privilege to be your followers, as you have proved your nearness to God in following our Wayshower, who, when persecuted and reviled, reviled not again. We are also glad of the progress made the past year in our field; it far exceeds that of any previous year.

Lovingly and loyally,
First Church of Christ, Scientist, Camden, N. J.
FLORENCE H. SCHELLINGER, *Clerk.*

Lakewood, Ohio, July 12, 1907.

Dear Mrs. Eddy:—I have just received some little verses which make me think of you, who are so great, strong, and unselfish. I can never tell you in words how grateful I am for all your precious books. I had read a great many of the old philosophers, and they all left me in a whirlpool of thought, as it were, but in reading Science and Health I found "the peace of God, which passeth all understanding." I have had many beautiful demonstrations of the healing power of Truth, and I am daily striving to be worthy of the name Christian Scientist. With a heart full of gratitude, I remain,

Sincerely,
JULIA HAYES GLIDDEN.

Manchester, N. H., July 10, 1907.

Dear Mrs. Eddy:—We, the members of First Church of Christ, Scientist, assembled at our regular July meeting, wish to assure you of our love and loyalty, and to extend to you our gratitude for what you have done for us and for all mankind. We are striving to follow in the way you have marked out, knowing that the grand redemption which Christian Science has brought to so many people is the result of your years of toil and constant faith in God. We know, dear Leader, that you are safe, and in this hour of trial are far beyond the attacks of persecutors; for, as you have said, "Good thoughts are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort" (*Sentinel*, Oct. 6, 1906).

SARAH V. GREEN, *Clerk.*

[Telegram.]

New York, N. Y., July 16, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

God blesses and protects you. The shafts of error fall powerless at your feet. Love conquers all! The love expressed so beautifully by you for all mankind has helped me and is causing me to help others intelligently. My deepest love and loyalty to you on this your blessed birthday.

A BUSINESS MAN.

AMONG THE CHURCHES.

ENID, OKLA.

First Church of Christ, Scientist, finding their present quarters too small, have been compelled to seek a larger and more comfortable place. They have rented the old opera house on East Broadway and will hold the first service at that place next Sunday. This step was made necessary by the largely increased attendance and membership, and will give the Scientists very comfortable and roomy quarters.—*Enid Wave.*

MILFORD, UTAH.

The Christian Scientists of Milford are going to erect a Reading Room which when complete and furnished will cost two thousand dollars. The Rooms are situated only one half block from the main street, and will also be used temporarily for church services. This church has a membership of sixteen, but we have had many beautiful demonstrations of the power of divine Love to meet every need, and we feel very grateful that the way is being prepared for us to erect this beautiful little structure.

MRS. GRACE E. EMISON, *Clerk.*

WINNIPEG, MAN.

Knowing that nothing gives our Leader more pleasure than news of unity and harmony of the work in the Field, we are glad to report that First and Second Churches of Christ, Scientist, of this city, have united as one church. We have been prompted to this through the earnest desire to express the strength that comes from unity of action, and we feel that this will greatly help our work not only in this city but also in this Canadian Northwest.

We desire to express our appreciation of the wisdom shown in the By-law relative to rotation in office. This thought has guided us in the election of new Readers. We also desire to express our loyalty to the Leader of the Christian Science movement, and will strive to emulate the meekness and love she has shown in meeting the recent unjust attacks upon her.—*Correspondence.*

NEW YORK, N. Y.

The majority of the residents of Harlem are perhaps not unfamiliar with that quiet and dignified structure on 125th Street, between Fifth and Madison Avenues, which for years was known as the Harlem Presbyterian Church, but is now the property and home of Third Church of Christ, Scientist. Passing its open doors on a summer Sunday morning, the stranger may have stopped, listened to the mellow strains from the grand old Odell organ within, which touch the responsive chord that lies somewhere in every human heart, and has stepped inside the hospitable doors to hear preached the Word of God.

In the newness of his environment he has not thought to take from the little rack in the pew a Hymnal, when he is suddenly confronted by a smiling face from one side or the other, offering him one already opened at the place, or inviting him to share theirs. This little act of love, quite spontaneous as it is, breaks down any strained feeling on the newcomer's part, and the "stranger" has become a "guest."

This guest, who has risen with the congregation for the closing hymn and the benediction, has a different expression upon his face than that with which he entered the church an hour before. Perhaps his thoughts are dwelling upon some loved one who has need of healing—perhaps his own life sorely needs correcting. He glances about him at the intelligent, earnest, truthful faces—surely this must be true.

Third Church of Christ, Scientist, was incorporated in December, 1895, and the membership is now two hundred and sixty-four; there are over eighty scholars and fifteen teachers and officers in the Sunday School. The attendance at the services is about four hundred, and is steadily increasing.

Excerpts from an article in the *Harlem Reporter.*

PROVIDENCE, R. I.

The corner-stone of First Church of Christ, Scientist, at the corner of Prospect and Meeting Streets, was laid yesterday afternoon with a simple but impressive ceremony. Only the charter members and the two Readers of the church were present at the services, which consisted of readings from the Bible (last of Malachi on the "building of the temple") and correlative passages from the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. The Lord's Prayer completed the service proper.

In the box were placed the Bible and Science and Health, "our only preachers," all of Mrs. Eddy's writings, together with the publications of The Christian Science Publishing Society of Boston. The box was then hermetically sealed, covered with copper and iron plate, and soldered into the stone.

The edifice when completed will be an ornament to the city. The foundation is being built of some of the finest white granite ever seen in this city, shipped here from Concord, N. H. The church itself will be of Norman brick with exterior trimmings of light gray terra cotta. A massive dome, probably of copper, will surmount the structure and four noble limestone pillars will adorn the front. Two or three steps on the outside lead up to the foyer, from which a few steps down will take one into the Sunday School room. On the north and south sides of the foyer handsome staircases will extend up to the auditorium and gallery. The seating capacity will be about twelve hundred. The inside will be done in gray plaster. Mahogany pews will give it a base of color. Its most noteworthy feature will be the great organ, which is expected to be unexcelled in New England. It will be built by the Hutchings, Votey Organ Company of Boston at the cost of twelve thousand dollars.

The church will cost one hundred thousand dollars. The architect is F. M. Comstock of New York. It will probably be completed next March or April. A high board fence has been built about the scene of the building operations. Hard coal is also used in the engines, and the Christian Scientists are making every effort to keep the job as clean and inoffensive to the neighbors as possible.—*Providence Tribune.*

[Written for the *Sentinel.*]

"HE IS FAITHFUL THAT PROMISED."

GERTRUDE RING.

"Lo, I am with you alway." Alway, Lord?
I did not see Thee when the night was black;
I did not sense Thee when I felt such lack;
I thought when I besought, Thou didst come back,—
Alway, Lord?

"Lo, I am with you alway." Alway, Lord?
Then would I press so close that there need be
No ghost-filled night, no insufficiency;
But in Thy light rejoicing, feast with Thee
Alway, Lord!

TESTIMONIES OF HEALING.

I wish to acknowledge all the good I have received in Christian Science. In 1896 I was living in Minneapolis, Minn., when I was suddenly taken ill. When I reached home my wife sent for a doctor, and on his arrival he said that I had a serious attack of brain and spinal disease. I then sent for the best doctor and surgeon in the city, and he pronounced my case a serious one, but that he had hopes of pulling me through. An operation was performed, and in three months I was pronounced cured. In January, 1897, I left for a tour in Minnesota and the adjoining States, but kept on doctoring and getting worse until 1900. I was then in very poor health from a complication of diseases. I gave up work entirely and put myself in the hands of a physician, considered the best in Detroit, Mich. He said I had such a complication of diseases that I would have to submit to an operation, which, as I dreaded it, I did not have performed. Later my friends advised me to go East, where I could get the very best of medical treatment. I did so, and in November, 1900, arrived in New York city. I placed myself in the hands of an honorable and skilful physician, who examined me and pronounced me in very bad condition, but thought I could be cured. I had at that time lung, bowel, kidney, and liver trouble, etc. I was better for a while, then grew worse, and in February, 1904, I had to go to bed, new troubles having developed, and at that time I was much reduced in flesh.

About this time a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, was brought to me, and at first I had no faith that a book would cure me or help me. I kept on reading it, then laying it aside for two or three days, until I became so interested that I made up my mind to read it through. I had been an inveterate user of tobacco for over forty years, but in two weeks, before I had read the book through, all desire for tobacco had left me, also the liquor habit which I had formed, thinking it would cure the lung trouble. Finally, on April 11, 1904, my doctor said he would have to give me up, and that I must go to the hospital. I reluctantly consented and the papers were made out, but still I waited a week. At that time my doctor and my friends thought the end had come; I, too, thought I was on the edge of eternity and prayed for death. I then had a letter sent to me telling me to try Christian Science treatment. I went to a Scientist and explained my case. I told him I had no money, but he then and there placed me under the care of a practitioner. From that hour I commenced to improve and in seven months I was nearly well. By February, 1905, I was healed, and it is needless to say that I never went to the hospital. I had no operations performed, have taken no medicine since April 11, 1904, and I am now entirely healed. I am strong and healthy, am working every day, and sometimes walk six to ten miles a day.

I am thankful for the light and help I have received,—thankful to God, thankful to Mrs. Eddy, thankful to all who assisted me, and for the benefits I have received through the declaration of the truth.

J. B. BURCHARD, New York, N. Y.

After thirteen years' study of "Science and Health with Key to the Scriptures," I am moved to write what Christian Science has done for me and how it appears to me as a practical religion. I took up this study very reluctantly in 1893, after my wife had been healed of a long-standing affliction that medical men had called an incurable disease of the kidneys, together with rheumatic trouble. Being poor in material things and having given up hopes of a cure or even relief, we concluded to sell our home and try a change of climate and water; but at this very time a dear friend advised our trying Christian Science. I want to state here that for months before this my wife had not been able to walk more than a block or so, had even to be helped to rise from a sitting or recumbent position, and she suffered constantly. A Christian Science practitioner was called in, and after receiving three or four treatments, all being absent treatments except one, my wife was healed and within a week she walked about three miles in the country with no ill effect. She has been a constant and faithful student ever since.

After seeing all this I was still a doubting Thomas and it was more than six months before I was willing to admit that there was something good and powerful in Christian Science. I have been a student of law for over twenty-six years and ordinarily can master a book as large as Science and Health in one careful reading, to such an extent that a second reading has little interest; but the rules that apply to other writings do not apply to Science and Health, for the oftener I read it the more I am impressed by its tremendous truths. It unfolds the higher spiritual thought all the while. It is the wonder of the age. From my point of view it has no equal, and it stands, like its author, at the head and belongs with the Scriptures, both old and new. It is food for the hungry, medicine for the afflicted, a guide to the lost thought, and a stimulus to the disheartened. It brings harmony out of discord and health in place of disease. It brings us face to face with a loving God, for "God is Love." It locates heaven and gives man the "key," so that he may enter now; not after he is dead, but now, in the fulness of perfect health, so that he can run and not be weary, can walk and not faint. The book and its author are

> As some tall cliff that lifts its awful form,
> Swells from the vale, and midway leaves the storm,—
> Though round its breast the rolling clouds are spread,
> Eternal sunshine settles on its head.

When we fully understand the spiritual thought of the author we see the lion lying down with the lamb, and know that sin cannot enter. In Christian Science we learn that there are not two planes of existence, the material and the spiritual, although to mortal sense the material seems to be the real, the only actual, while the spiritual seems mythical and unreal; but the reverse of this is true. Science and Health says, "The only reality of sin, sickness, or death is the awful fact that unrealities seem real to human belief, until God strips off their disguise" (p. 472). This wonderful book teaches us how to migrate from the material plane of thought to the spiritual. It says, "Think less of material conditions and more of spiritual" (Science and Health, p. 419). The belief in materiality results in sin, suffering, discord, strife, and contentions,—all that is transient, changeable, unreal, and unsatisfying,—while spiritual consciousness is heaven, harmony, concord, health, peace, joy, righteousness. It is the abiding, real, and everlasting.

I. W. HARBAUGH, Eugene, Ore.

In the spring of 1900 I was given a *Christian Science Journal* containing a lecture. I did not read it then, as I was skeptical of religion, and especially of Christian Science, smiling many a time at what I then thought to be queer ideas, and saying what many say before they know anything about it. A short time afterward, however, while at home ill, I picked up the *Journal* and read the lecture through without stopping, and as I read my thoughts recurred to the sayings of Jesus which I had learned in Sunday School fifteen years before. Every line seemed to be in perfect accord with the New Testament teaching, and when I opened the Bible that night, for the first time in years, I turned to the Gospel of Matthew and read every chapter.

Digitized by Google

When I closed the Bible I said to myself, "I feel as if I would be well enough to go to work in the morning." My thought was so uplifted that I felt almost relieved from my aches and pains. I took only one dose of medicine while sick, and after reading the *Journal* and the Bible I did not take any more, nor have I ever touched material remedies from that day to this, although the next morning I was feeling as badly as ever; but by studying the lecture in connection with the Bible I was able to return to the office the following day.

For months before this time I had suffered a great deal from stomach trouble and nervousness and was taking medicine for relief, but without benefit. After gaining some light in Christian Science, I looked in the *Journal* and got the name of a practitioner, and wrote him for treatment. I was healed of these troubles almost instantly, as the day after asking for treatment, while walking with the friend who gave me the *Journal*, I realized my freedom from both stomach trouble and nervousness. The latter has never returned, and while my stomach has seemingly got out of order two or three times since I was healed, I have always been able to meet it promptly myself or by asking for treatment. As far back as I can remember I had trouble with my heart, and when about twelve years old one of the leading physicians of this city, who examined me, told my parents that I had organic heart disease and was liable to die at any moment, and that I must not play base ball or indulge in any kind of sport that would excite or exert me. To me this was like a death sentence, and caused me to mope for years. When I began studying Christian Science, however, the word of God through this Science healed me of this disease, also of acute lung trouble, from which I suffered for hours at a time, so that it was impossible to get a long breath. Just before coming into Christian Science one of the best known surgeons in this section informed me that if I did not keep up his treatment for an organic trouble, in two years I would have to undergo a serious and painful operation. Nearly six years have elapsed since this dictum was pronounced by the surgeon, and three and a half years since the expiration of the limit for the operation, without any need whatever for the same.

Christian Science has not only healed me of physical infirmities, but has been the means of making me a better man morally. It does heal the sick, notwithstanding all that may be said to the contrary by the critics and adversaries of this Science. For further proof, I might add that all the laws of *materia medica*, regarding diet, etc., were put to naught when I was stricken with a fever two years ago, as I ate whatever my appetite called for, including almost half a basket of grapes in one day. It was a very stubborn case of fever, but I was away from work only one week, although I felt badly for three or four weeks. This was during the month of August, and as I was to accept another position on the first of September, I took up my new duties promptly and toiled from twelve to sixteen hours a day, including Sunday, for over a month, getting stronger and better all the time under Christian Science treatment.

I am very grateful for all the benefits received from this Science, and to Mrs. Eddy, who is spending her time with untiring patience in showing humanity the way of Truth, Life, and Love in Divine Science.

EVERETT NEAL, Knoxville, Tenn.

I feel it a duty as well as a pleasure to give my testimony, hoping it may cheer some one in a suffering, helpless condition, as I was. Christian Science has raised me up from a bed of affliction, has restored to me health and happiness, peace and contentment. For five months I was not able to do anything, not even go to the dining-room for my meals. I went on in this way, trying to endure as best I could, thinking it was God's will for me to be sick and suffer; but I often wondered why I should suffer so much when I was trying to live a Christian life. Three weeks previous to my healing I became so ill that I could not stand on my feet and suffered greatly even when lying down. A doctor came and treated me, but I grew worse all the time. Finally, the Great Physician came to me as the healer of all my diseases. My healing has been most wonderful. Two of my friends were Christian Scientists and they visited me regularly. They would always tell me that they had been healed through Christian Science, and I became very much interested. One of my friends told me that man's extremity is God's opportunity, and I found it to be so. My strength was almost gone; I made every effort to get up, with the help of my husband, just a few minutes before I was healed; but I was too weak. I felt that the time was near for me to leave my dear husband and four little children, and in that dark hour of despair my husband urged me to try the medicine a while longer, and then try Christian Science. Just then I thought of the beautiful hymn, "What a friend we have in Jesus," and I turned to God for help and strength. And it came! I rose at once from my bed, praising God for what He had done for me; and I continue to praise Him. I have no words of my own to express it, but I recall the words of the Master, "Ye shall know the truth, and the truth shall make you free." I have had many beautiful demonstrations of the truth with my children, and many ills have been overcome. One very sick child was healed at the same time I was, and I threw out his medicine and mine together.

I thank Mrs. Eddy for "Science and Health with Key to the Scriptures." With the Bible it is my daily study. I take the *Sentinel*, which I dearly love to read. I can say as did Paul, "Thanks be to God for his unspeakable gift."

MRS. FLORENCE MORRIS, Elon, Va.

From childhood I was afflicted by several diseases. My father kept trying to get doctors to cure me, but finally one of them told him he could not do me any good, and that I would waste away and die. I was under one doctor's care for over ten months, but I never felt strong, nor free from pain. During many years I suffered a great deal with my lungs and heart. I traveled, thinking that change of climate and water would help me, but I was brought home to die. Several friends came to see me, and among them was one who had recently been healed through Christian Science. She told me about Christian Science, and finally brought me "Science and Health with Key to the Scriptures" by Mrs. Eddy, saying that it would do me good to read it. Appreciating her kindness, I decided to read the book to please her. I was too weak to hold it, and had it propped up on a pillow. At first I could not understand the meaning of many passages, but gradually I found comfort in its words and began to feel free from pain. I soon gained strength enough to leave my bed, and finding so much help from the reading of this wonderful book I desired to investigate Christian Science more fully. I began to correspond with my friend's practitioner and received a great deal of information, and soon purchased a copy of Science and Health for myself.

About this time my husband was afflicted with heart and stomach disease, also rupture, and I encouraged him to take Christian Science treatment. He took absent treatment for about one week and was healed. After this he wished me to have absent treatment, which I did for two weeks, and was very much benefited thereby. He finally decided to take me to Kansas City, where I could live with Christian Scientists and get a good understanding of the Science. During this visit I had several weeks' treatment

Digitized by Google

and experienced a complete change. Before this time I could not stand damp weather without suffering, but this tendency was soon overcome and I could go to the services on Sunday and Wednesday in any kind of weather. In about three months I was able to return to my home, and commenced housekeeping, something I had not been able to do for several years. Living among the mountains, I soon carried out a long-cherished desire and took several trips on foot, when heretofore my heart seemed to give me much trouble even if I walked only a short distance.

In the beginning of my acquaintance with Christian Science I had been afraid it might take me away from God, but now I feel that in it I have truly found Him, and the help for which I had been looking through many years. I cannot express or explain the peace and harmony that have come to me and mine. My desire to become a member of The Mother Church in Boston was very great, and I was indeed happy when my own and my husband's applications were accepted. I cannot enumerate the demonstrations of Truth's power which we have had since we came into Christian Science, for they are so many. I wish to thank Mrs. Eddy for leading us into the truth by her wonderful book, which has done so much to help me to understand God. I am thankful that my husband came into Christian Science, as we can now work hand in hand for this great Cause.—AMELIA A. SWATY, Mena, Ark.

I wish to add my testimony to the healing power of Christian Science. I was healed of several physical ailments, among which were severe stomach trouble, headaches, and a lame back which I thought I had inherited. At times I suffered terrible pains, so that I could not lift myself up, like the woman mentioned in the Gospels. I also suffered from my feet, and on account of eye trouble I wore two pairs of glasses. A friend told me of a wonderful healing in Christian Science, of which she knew. I then thought that if reading Science and Health had helped her, it would help me. The medicine which I had been taking two or three times a day was all thrown out, my blue glasses were laid away, and I began earnestly to study Science and Health and other Science literature. I kept my thought filled with its teachings, and in less than two months all these troubles had vanished into their native nothingness, showing that God is universal Love and is All in all, as our text-book declares. I have never taken any medicine since, nor have I had any use for my blue glasses. It is nearly seven years since I have had these proofs of the truth of Christian Science, and these all came through reading Science and Health and studying it with the Bible and *Christian Science Quarterly*. For this healing I am very grateful to God, and to our dear Leader, Mrs. Eddy.—ELIZA BROWN, Los Angeles, Cal.

About five years ago I commenced to suffer with a severe complaint, which debilitated me. A physician was consulted, but he could not help me although he worked faithfully to do so. The next physician gave me little medicine and advised me to be out in the open air, go to the theater, and keep my mind off my own condition as much as possible. Another physician was employed, but none of them healed me. I was in a bad condition until August, 1902, when I heard of Christian Science and was taken to a practitioner. I was using a cane at the time, and my limbs were so weak that I could not stand alone, while I was unable to use my right hand and wrote with my left. Gradually I got better under Christian Science treatment, and about a year later I stopped using my cane entirely and have never had any use for it since. I commenced to use my right hand and helped to translate the tract "Healing the Sick" by E. M. Buswell. My improvement was steady, even if slow, and I am very grateful for Christian Science. I realize that it will destroy all the ills in my experience. I love Mrs. Eddy for the precious truth she has given us, and appreciate all the help given me by the Christian Science church of this city, and it gives me pleasure thus to testify that I owe my life and my increasing sense of health and harmony to Christian Science.

MARIA J. PAZ, City of Mexico, Mexico.

From childhood I was afflicted with catarrhal trouble, and when my stomach became affected I was examined and prescribed for by a doctor. I was taking medicine all the time, but received no particular benefit. When I was about thirteen years of age my throat began to trouble me. I caught cold very easily in spite of the great precautions taken to prevent it. After a time the doctor then treating me said that a change of climate would do me more good than anything else, and after a very bad winter I moved to Nebraska. For one year I had no trouble, and was hopeful that I would get well again, but during the second year I was taken with asthmatic trouble and the doctor there told me that he could only relieve me temporarily, as I had worn out the climate and another move was necessary. I was very despondent at times.

Just then I heard of Christian Science, and it was told me that Christian Scientists never got tired. I began to investigate, not for the healing of the diseases mentioned, but for the tired feeling. I was sure the other ailments were incurable, as five physicians had failed to help me. I was instantly healed in Christian Science of the tired feeling; and while I did not realize it at the time, I was also healed of a bronchial affection, and of female trouble which I had contracted at the birth of my first child, twenty-five years before. Severe headaches also vanished and have never returned. This healing occurred in August, 1892, and without any treatment but by reading Christian Science literature. I have never had a return of any of these ailments. The asthmatic trouble was slower to yield, as the belief in heredity was very strong; but thanks to God, and to Mrs. Eddy, I am free. I am well and happy in doing good to others,—in pointing the way to Life, Truth, and Love, as we are taught to do in our text-book, "Science and Health with Key to the Scriptures."

MRS. C. A. PRIDE, Lead, S. D.

When reading the testimonies in the *Sentinel*, the thought has come to me that I have been withholding my mite from those whom it might help, as many which I have read have helped me. We have had many demonstrations of the power of Truth. At the birth of our second child in October, 1905, I had no pain, but instead a complete consciousness of God's love and protection. Both baby and myself have perfect health, and I wish to express my love and gratitude to God, and to Mrs. Eddy, whose consecrated life has made possible all these victories over pain, sin, disease, and death.—MRS. A. M. GARLOCK, Buffalo, N. Y.

As one rescued from hopeless sickness and misery, I wish to tell of my healing through the ministrations of Christian Science. For over fifteen long years I was an invalid, and during most of this time was unable to do even my most necessary housework. During these years I was at great expense for medical treatment, being under the care of four physicians, yet I received but little benefit. Stomach trouble in its worst form, together with many other disorders, held me down so that I could neither eat nor drink without suffering intense pain. My physicians told me that hot water must ever be my only drink. I suffered day and night, with scarcely any sleep. It was

Digitized by Google

thought best by one of my physicians to have me undergo an operation, while another thought it too great a risk. They all advised me to treat myself as I would a child and thus live as long as possible.

In this condition Christian Science found me. I took twenty-three treatments, and received immediate benefit. I can now eat what is set before me, while my sleep is as sweet and refreshing as that of a babe. After all those years of misery I was healed in a short time and at a small expense. I am very grateful for the blessings received through this wonderful truth. I have found that "Science and Health with Key to the Scriptures" by Mrs. Eddy, does indeed unlock the Bible, which had always been a sealed book to me. By our text-book the Master's teaching has been made clear and practical for all our needs.

MRS. MARY E. ALLEN, Sheboygan, Wis.

I was healed through Christian Science in September, 1902, and feel it a pleasure as well as a duty to give this testimony to the benefit I have received, with the hope that it may help some one who is in despair. I had been considered an invalid for several years, and suffered untold misery, physically and mentally. When I appealed to Christian Science I had reached the stage where I thought there was no help for me this side of the grave, and I had no hope for the future as I was very doubtful about there being a God. I even felt that if there was one, I feared to meet Him, but thank God that condition has been changed. I am now trying every day to become better acquainted with Him, since I know that the grave of which I always had a horror is not a stepping-stone to heaven, harmony.

Several prominent doctors had pronounced my trouble a dreaded disease of the bowels, supposed to have been inherited. My mother passed on when I was a very small child, and two sisters and a brother succumbed to the fear of this disease in a few years after her death, while the fear of it was strongly held over me. Here I want to say that I thank and love the doctors who tried to help me in those days of suffering. They were always kind and attentive, did everything they could to restore me to health, and I appreciate their efforts. The years spent in their care taught me a good lesson, namely, that without God man can do nothing. They labored faithfully for about two years, and my husband spent a great deal of money for medical treatment, and spent it freely, in the hope of prolonging my life. I was treated only three weeks by a Christian Science practitioner, and was healed.

Many other discords have been overcome by Christian Science, and I feel that I have great cause to be thankful to God, the giver of all good, also to the one through whom He has revealed this great truth; and I am indeed very grateful.—MRS. EMILIE HARVEY, Griffin, N. C.

In years gone by, while living almost entirely in the material senses, with only occasional glimpses of what God's child should be, I have often wished I could have a large inheritance coming to me from England, where my ancestors lived, and immediately I would plan many things,—always in the material,—all things craved by the physical senses. This dream was never realized; it came to naught as do all other merely mortal dreams; but at last I found in Christian Science that I had been looking in the wrong way for happiness. I was expecting satisfaction through personality and materiality, instead of looking to God and seeking the "spiritual sense of possession," as one of our good writers has said. Through this teaching I learned that a vast inheritance from the only true Father had indeed been waiting for me always; that I had but to claim it in love and obedience, and it would bring me joy unspeakable, and as I realized this truth no words can tell my thankfulness. It was the "inner harmony" I needed, and it can come only through the knowledge that God alone satisfies. He is our only necessity, because He has our treasure and we have "every good and perfect gift" as we abide in Him.

Now I am rich indeed! And each day unfolds greater possibilities. With the true riches all is harmony, peace, and love; while material riches, so called, often bring regret and disappointment. The understanding of the Lord's Prayer which I have gained from Science and Health is in itself a mine of wealth. I used to feel so blind and uncertain, and feared to say, "Thy will be done," thinking that His will might include suffering, to make me good; but now I know the Father only as Love, and I gladly say, "Thy will be done," understanding that it is for my highest good alway.

I realize that I have inherited only love from "our Father," therefore I have only love to give. Mrs. Eddy has my sincere love and gratitude for her teaching, which redeems us from materiality and impels us to walk in the Christ-way that leads to God. As I have had to deal with doubting ones, I can appreciate in a small degree what patience and love she has had in endeavoring to inspire in others this faith in God. I thank those who compile the Lesson-Sermons and all the writers for the *Sentinel* and *Journal*. Each issue brings messages of Truth which meet my need. The Lessons are daily food, "the bread that cometh down from heaven." I rejoice to know that this truth is reaching all over the world, as Jesus promised when he said, "But ye shall receive power, after that the Holy Ghost is come upon you: and ye shall be witnesses unto me . . . unto the uttermost part of the earth."

MARTHA H. FREEMAN, Richmond, Ind.

[Written for the *Sentinel*.]

RECOMPENSE.

Gladness to leave the false landmarks and joy to see them disappear,—this disposition helps to precipitate the ultimate harmony. —*Science and Health*, p. 324.

JNO. M. DEAN.

LET the dead past its haunting vigil keep
O'er earthly hopes long buried in the dust;
Yesterday's ghostly shapes but make us weep
For moth and canker-worm and clinging rust.
The siren song of other years is sung in vain,
And blackened shadows of regret disturb us not,
For God's eternal Now unfolds our gain,
And seeming losses of the past are soon forgot.

Why sigh for yester's songbird and its joyous notes?
Unstop your ears and hear the "still, small voice"
Of Spirit that to-day from heaven floats,
Bidding us claim our birthright and rejoice—
For God is here! And all the waste of weary years
Grows dim and distant in the morning bright;
Vanished are heartaches, tears, and brooding fears,
And Egypt's darkness flees before the light.

Truth asks no offering without repay—
Earth's pleasures sacrificed gain heaven's delight;
And daily dying to our fleshly way
Brings resurrection from the tomb of night.
Thank God for hope! Her fingers sweep the strings,
And every chord vibrates with faith begun;
While understanding mounts on upward wings,
Revealing nothing lost and all things won.

FROM OUR EXCHANGES.

[*The Outlook.*]

It is very difficult to reconcile with honest faith the timidity with which men hold the most fundamental truths. If they held these truths as a matter of conviction and experience rather than as intellectual opinions, they would not be afraid; because truth is in its nature impregnable. No man can really believe in a truth without being sure of its ultimate triumph. It is not strange that men are timid when they do not hold truth in its integrity; for believing in a truth is a much more difficult matter than many people comprehend. It is easy to have an opinion. It is not easy to make that opinion so much a part of one's character and life that it passes over into a deep and unshakable belief. . . .

The adherents of Christian Science can make no more effective appeal than the declaration that their belief casts out fear and delivers those who accept it from the bondage to this ancient foe of the human race. Fear has no place in the life of any man or woman who believes either in God or in humanity. It is a survival of a semi-barbarous age, a specter that lingers, like the superstitions which children still cherish, from the times when men divided the world between God and the devil, with much the larger part to the devil.

[Dr. G. M. Twitchell in *The Universalist Leader.*]

Go to the average stay-at-home and ask if he believes in the church, in Sunday observances, in God, in a future life, and he will promptly answer yes to every query. Ask him why he does not go to church, and his answer will be practically that of a friend the other day when I asked the question. "Honestly," said he, "I ought to go to church, but the fact is I get so indignant as I hear about God, His attributes and how He rules, that it hurts me more than it helps. Should I punish myself in this way? That man knows no more about God than I do, yet he assumes just what I must think and believe. I go to church tired in mind and body, vexed all through with the trials of business, and I want help—I want to be nourished and strengthened for the struggle on Monday. I want bread and they give me a stone in the form of religious theories. Then I stay at home or go into the woods and am helped." How far this answer reflects individual opinion others must decide. This is a deeply religious man and he voiced an honest cry for assistance.

[*The Christian Life*, London.]

The ultimate demand of true religion is the completion and perfection of human character. The living of a life is the supreme thing. Creed and confession must become conduct. The ultimate aim and end of religion is to make men good and enable them to lead good lives. It is perhaps possible for a man to be both intellectually and emotionally "religious," and at the same time, as Carlyle would say, "to break all the commandments in the Decalogue at every blow of his hammer." But when a man thinks and feels, if he would obey all the highest laws of his being, it is imperative that he put that thought and feeling into action.

[*The New York Observer.*]

There is little profit in repining because we have not the "chances" of others, or are not as well equipped as we would like to be for the work and warfare of life. If we are not ready to do our duty cheerfully and faithfully in that which is least, there is no certainty that we could accomplish more on a larger scale, if promoted prematurely to a more conspicuous position.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

MR. KIMBALL'S LECTURE. 31 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. 25 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By Rev. ARTHUR R. VOSBURGH. 28 pages.

HEALING THROUGH CHRISTIAN SCIENCE. Discourses and Editorials. By JUDGE SEPTIMUS J. HANNA. 36 pages.

HEARINGS ON PROPOSED MEDICAL BILLS IN MASSACHUSETTS AND NEW YORK. 23 pages.

ANSWERS TO QUESTIONS CONCERNING CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. 26 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 63 pages.

THE CHRISTIAN SCIENCE MOVEMENT. Revised by CAROL NORTON. 28 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the *Journal*. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 40 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 38 pages.

A CRITIC ANSWERED. By ALFRED FARLOW. Printed in German only. 31 pages.

Price: One copy, six cents; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER G. EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.
Cloth binding, each, prepaid $3.18
Two to twelve books (cloth only) to one address, each, prepaid 3.00
Twelve or more books to one address, each, prepaid 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid . . 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Levant, divinity circuit, leather-lined, round corners, gilt edges, silk-sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6.00
Twelve or more to one address, each, prepaid . . 5.75
Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price prepaid, single copy $5.00
Twelve or more copies to one address, each . . . 4.50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2.25
Twelve or more books to one address, each, prepaid 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . . 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

NAME AND WORK HONORED.

Victoria, B. C., July 7, 1907.

Mrs. Mary Baker Eddy, Concord, N. H.

Dear Mrs. Eddy:—In past years the impulse to write to you has been restrained, first because I have felt that if Christian Scientists, we who are not officially associated with you in forwarding this movement, did not give you the unmolested freedom you desire, we could not expect that others would understand or respect the motive of your sacred seclusion; and next, because of your request in *The Christian Science Journal* of October, 1896, that your students' students would, as a rule, forward their letters direct to the editors thereof in place of sending them to you. I have long realized that your time is too precious for the welfare of our Cause, and through it of all mankind, to be intruded upon lightly or needlessly; and especially when you have so clearly pointed out the way wherein and whereby one may work out his salvation, have warned us of our dangers, answered our questions, and abundantly provided for the student's needs in our beloved text-book, Science and Health, and in your other published works. You have made their duty to God and to each other so plain to Christian Scientists that only wilful wickedness or self-absorbed apathy need err therein.

But although I have hitherto obeyed your request and have sent my "letters" by way of our periodicals, I am constrained for once to depart from this rule and tell you personally how deeply I have been indebted to you, and how I have appreciated your tender patience with those who misunderstand you, your sublime courage under fire, your serene confidence in God, and your unwearied love for humanity. From your higher vision of the infinitude of God, and of the reality of only spiritual things, I fear it must seem strange to you that many of us who claim to believe and follow your teachings are yet so slow in forsaking self and the material world for Christ. Could we but realize the full significance of Christian Science, and mankind's universal need of it, we would surely repent in tears for all that we might have done for the cause of Truth, but did not, and for the higher understanding that we might have gained, but have not. May we speedily awake to the privileges, responsibilities, and demands which belong to the present hour. For almost fifteen years all the help I have received, physically, morally, and spiritually, has come through the understanding of Christian Science as discovered and taught by you. It has done for me what the best material skill and knowledge had failed to do; and I thank you, as do all Christian Scientists, and as all the world yet will, that when the great revelation came you did not falter at God's command, but have faithfully labored through years of self-sacrifice to make the Christ-way known to men. These things come to one with deeper import at such a time as this, when evil is exhausting its last resources of hate against the spiritual idea, and so cruelly persecuting you who have so richly earned the right to gratitude and peace.

In closing, let me express the joy, shared in by all your followers, that every passing day sees your name and your work more honored and exalted, and your character more justly esteemed, the world over; that Christian Scientists have never loved you better nor been more grateful for your wise and loving leadership; that they have never been more united in their desire to fulfil the mission you have entrusted to them. We rejoice in the assurance that God's word abideth forever, and that you are divinely comforted and sustained. These words of our Master come sweetly down the centuries, and rest in special benediction upon this hour: "If the world hate you, ye know that it hated me before it hated you. If ye were of the world, the world would love his own." "Be of good cheer; I have overcome the world."

Mrs. Greenwood joins me in sincerest love.

Gratefully yours,

SAMUEL GREENWOOD.

THE SAVIOUR.

BLANCHE H. HOGUE.

CHRISTENDOM has universally agreed that the Scriptural record of the life and work of Christ Jesus sets forth the words and deeds of one who was without question the Saviour of mankind. Sacred history had prophesied the coming of this Messiah, contemporary thinkers recognized the force of his presence, and the centuries which have followed him have grown to comprehend somewhat the power of his teaching and example,—a power by no means withdrawn with his personal exit from the scene of earth's activities. Prior to the birth of Jesus the Jewish nation had grasped in some measure the idea of salvation, in that the success of righteousness or the desolating failure of evil had been continuously set forth by prophet, priest, and king. Both before and after the Christian era great leaders of many peoples have thought out wiser and better ways than their nations had been pursuing, and every tribe and people and country has had, now and then, its prophet, its poet, its guide, to urge a more ideal mode of thought and life. However, that element in all countries which has felt and acknowledged the influence of Christianity, unites in paying homage to Jesus the Christ as the one recognized Saviour of the world.

Many forms of worship have sprung from the acceptance of Christ Jesus as a universal Saviour. Groups of men in the earlier centuries defined their conclusions concerning the meaning and application of his teaching, and these deductions, without consideration as to whether they sprang from the best or the worst motives, the broadest or the narrowest judgment of their time, were adopted as set forms of Christian belief. In the middle centuries the letter of this dogma took such possession of the Christian Church that any deviation therefrom was branded as heresy, and the spirit of war and persecution stained the fair borders of that which

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

should have been a magnificent peace-loving and peace-promoting organization. Progress, however, eventually caused external religious oppression to cease, and with more individual freedom in the later centuries creed and doctrine have so relaxed their grasp that multiplied forms of theology, from the creedal orthodoxy which looks upon Jesus as God Himself, to the liberalism which regards him as the world's wisest and best human being, hold place among Christian thinkers.

As every system of modern theology builds upon Christ Jesus, and as they all, despite their deviating and diverse opinions, unite in declaring him to be the Saviour of mankind, the thinker very naturally asks, "What is the vital element of salvation introduced by this man, and why have theologians been scattered so far afield in their attempts to promulgate that in which they all profess to unite?" By way of answer it is recognized that man's spiritual nature cannot escape discerning its own in the Christlikeness of this Master-Christian, and that all men are bound together to this ideal; yet the human intellect so twists and perverts, or broadens and upbuilds to its own liking, that its expressed conceptions concerning the methods and objects of salvation are innumerable.

Christian Science has appeared upon the scene of religious activity, and departing in no wise from the acceptance of Christ Jesus as the Saviour, it has declared that a satisfactory sense of redemption has not yet taken possession of the world's thought, because theology has not yet discerned the full Science of Christ's method of salvation. Christian Science maintains that salvation is a mental process, a purely individual experience, and that the mere theoretical acceptance of Christ Jesus as Saviour by no means liberates the individual from all which binds him to evil. Acceptance of the personal Saviour must be followed by a personal application of the saving truth; and conversely, a daily individual effort to realize salvation, as Christian Science unfolds it, will bring one to appreciate that saving Principle which operated in the life of Jesus. In either event, salvation must repeat itself to-day, to accomplish any practical redemption in to-day's experience. Recognizing, in connection with all Christians, that Jesus Christ stands as the supreme Wayshower, the great Exemplar, Christian Science then concerns itself with understanding what the Saviour is and how the Saviour saves.

It must have been by some definite process of thought that Christ Jesus was enabled to subdue to the uttermost all conditions of sin, suffering, and limitation. What this thought-process was, it has been the business of Christendom to find out. Paul called attention to it when he wrote, "Be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God." In this age, another disciple, Mary Baker Eddy, states so clearly the nature of the law of God, and uncovers and analyzes so fearlessly the tangle of the carnal mind which endeavors to obscure the law of God, that Christendom can, if it will, find without further hindrance the Science of God's saving grace, and go about the Father's business with intelligence and growing success. The statements of the Christian Science text-book unfold to the earnest student the character, the law, the power of Christlike thinking, and the availability of this Christlike thinking to deliver the obedient thinker from one and another phase of sin and woe, till all the way of redemption is accomplished. In this book the nature of that which saves, and the process, the saving way, are so clearly defined that the student begins to see how Christ Jesus thought correctly about everything which engaged his attention, and he learns that the only way to follow the Master is to strive to correct his own thoughts relative to everything which he himself thinks about.

The Science of salvation has been so obscured by the warring doctrines and beliefs of the centuries, that resignation to evil has stalked abroad in the name of Christianity, usurping the place in human experience which should have been given to the active conquest of evil. What Christian since the Master-Christian has been able to release his whole life and destiny from the entire entanglement of evil purpose, the whole routine of evil law, even to the undoing of the necessity for sickness and death? Yet this must all be accomplished sometime, somewhere, ere the promises are fulfilled and full salvation achieved. Jesus said, "Ye shall know the truth, and the truth shall make you free." A promise to all, truly, of true thinking, right knowing, with its resultant freedom! And his "Be ye perfect" was not limited to time, place, or person.

Many heaven-hungry hearts have longed to know the truth, and have lived Scriptural teaching in thought and deed, to the destruction of much temptation, fear, and sinful inclination, yet the continued appearance of evil proves that the Science of its full destruction has not been known nor heeded. Paul wrote to the Romans, "And how shall they believe in him of whom they have not heard? and how shall they hear without a preacher? and how shall they preach, except they be sent?" The world has heard through prophet and apostle of the divine Love which found its full representation in the life of Christ Jesus, and so the world believes. And how shall the world hear, to-day, the fuller message which leads thought from belief into understanding, "without a preacher"? And how shall this preacher preach, except through being sent? The student of the Christian Science text-book becomes fully convinced, in the course of his study, that it is a "preacher" divinely sent to testify to the full exemplification of God in the life of Christ Jesus, and that this book takes its place in the line of religious literature,—a continuation of the law and gospel of Christian living which has been urged in greater or less degree by all enlightened followers of the Master.

If Jesus' teaching be true, an age must come wherein deeper and clearer knowledge of the laws of God shall usher in the beginnings of the prophesied millennium, the epoch of world-wide salvation. Certainly it is not "too good to be true" that a wonderful book has been given the thinkers of this age, a book which opens the Scriptures and reveals completely the Science, the law, the governing Principle, by means of which Jesus accomplished his own deliverance from all the supposititious forces of evil; a book which enables the man of to-day who desires righteousness above all else, to find the Science of righteousness and live its law and order in daily experience, to the eventual undoing of every evil work which encroaches upon his thought; a book which pours the sunlight of revealed truth into the dark and mildewed nooks of wrong thinking, transforming them every one into sweet and wholesome resting-places for that right thinking which purifies and redeems.

The saving Christ-mind did not leave earth's scenes with Jesus, but stands eternally waiting and knocking at the door of every human consciousness, urging entrance for the Christlike thinking which despoils the kingdom of wrong thinking,—entrance for the process of thought-adjustment which overturns the ways of self with the ways of Christ. Saul of Tarsus, on the road to Damascus, opened so wide the doors of his thought that the incoming Mind of Christ swept away all the old life of bitterness and persecution, and used him as a messenger of righteousness to his brethren. The experience which came to Paul so few years after Jesus' departure could have been his had he lived centuries later, for if Christ is eternal (see Science and Health, p. 334), the opening of the doors of thought in any age will admit just as much Christlikeness, just as much knowledge of the truth, as the individual will make himself ready to receive.

To-day a disciple has opened her doors and the Christ has entered; and in this age of progress, when universal

Digitized by Google

education and the mechanical devices which have met its need enables a message to be spread before the world in less time than the personal exhortation, or letter, or journey could reach the few, centuries ago, Mrs. Eddy has been able to add to the loved Christianity of all Christendom the Science of that Christianity's application. Cutting deep down into the dim and misty recesses of human thought, applied by each man to his own personal sense of evil, this Science fosters a purer love for the ways of Christianity, and quickens Christian practice. It reveals the eternal, ever-present Mind of Christ as the Saviour; and present, persistent, consistent, Christlike thinking about all the conditions and affairs of man and the universe, as the one and only way in which this Saviour saves.

To all who have presented the way of salvation to the world, from the Master to the humblest disciple, thought turns with gratitude; and let it not be forgotten that Paul quotes of all such messengers, and that we of to-day can say of her who brings us this message of salvation, "How beautiful are the feet of them that preach the gospel of peace, and bring glad tidings of good things!"

THE BAPTISM OF SPIRIT.

CHARLES G. STARKS.

MRS. EDDY says in Science and Health (p. 241), "Take away the spiritual signification of Scripture, and that compilation can do no more for mortals than can moonbeams to melt a river of ice." The third chapter of Matthew has been frequently referred to as an historical account of the baptism of Jesus, and sects have been founded on the belief that he went down into the water and was immersed; or, on the other hand, that the water was poured or sprinkled on him—as though the precise form of baptism was of any importance. The following verse of the chapter in question occurred in a Lesson-Sermon, and one evening, as I was reading it alone in the quiet of my room, the spiritual significance flashed upon me suddenly, like a search-light: "And Jesus, when he was baptized, went up straightway out of the water: and, lo, the heavens were opened unto him, and he saw the Spirit of God descending like a dove, and lighting upon him."

I thought how typical this is of the frequent experience of Christian Scientists. How often do we come up out of the waters of mortal mind, and feel that the Spirit is indeed descending upon us 'like a dove." The true significance of baptism is made very plain by the spiritual sense of this wonderful and beautiful verse, and that it is the true concept we shall find when reference is made to the conditions attending the baptismal event on the banks of the Jordan two thousand years ago. Let us note the circumstances as related. The Pharisees and Sadducees had gathered to be baptized of John. They were ready to accept and have administered to them the form of baptism that John was administering. But what did he say? "O generation of vipers, who hath warned you to flee from the wrath to come? Bring forth therefore fruits meet for repentance: . . . I indeed baptize you with water unto repentance: but he that cometh after me . . . shall baptize you with the Holy Ghost, and with fire." Then Jesus came to John for baptism, but the apostle demurred, saying, "I have need to be baptized of thee, and comest thou to me?" Then Jesus, answering him, said, "Suffer it to be so now: for thus it becometh us to fulfil all righteousness." This shows conclusively that the form was of no value,—neither cleansing the Pharisees nor necessary to Jesus' perfection; but the true baptism, the spiritual, appeared when Jesus came up out of the water and felt the power of the Spirit of God, like a dove of peace, lighting upon him. Although Christian Scientists may never have been "plunged beneath the flood," nor had the waters of Jordan poured or sprinkled upon them, still they may and do experience the true baptism of Spirit, and this is to be gained through the spiritual sense, not the material.

"REASONABLE SERVICE."

S. J. HARE.

WE sometimes hear of Christian Scientists being asked to take poison, or to walk off the roof of a high building, in order to convince a non-believer that Christian Science can do what is claimed for it. We read of similar requests in the Bible. We are told that the devil asked Jesus to cast himself down from the pinnacle of the temple, also to turn stones into bread. For what purpose? Only to satisfy the carnal mind, for no good could have come from so doing. Have we a single instance in which Jesus stepped aside from doing his Father's business,—the healing of the sick and the sinful,—to make a show of his God-given power? He did not even go to John, but said, "Go your way, and tell John what things ye have seen and heard;" while mortal sense would have had him go like a magician to convince John that he was the Messiah.

Jesus said, "Ye shall know them by their fruits." Is there not enough recorded in Holy Writ to prove man's dominion over the asserted laws of matter? The Master also said of every faithful follower, "The works that I do shall he do also." Did he really mean all that this statement implies? Enough has already been accomplished through Christian Science to convince those who will make an honest investigation that his promise is being fulfilled. The power of Truth is not a plaything, to be given to babes who know not how to use it, "such as have need of milk, and not of strong meat." It is enough that this power is sufficient when the right occasion demands its exercise. Jesus did not destroy the sight of people that he might restore it again. He did not walk upon the waters when the boat was near. He did not feed the multitudes with five loaves and a few fishes when food was plenty. He submitted to the cross, and thus taught us that the real man —the Christ—cannot be subject to death. He also taught us how to attain dominion over sin, sickness, and death. He asserted man's dominion as a son of God, and overcame the very climax of the carnal law, death, that we, as "joint-heirs with Christ," might know how to live, not how to die. He said, "I am the way." Through "Science and Health with Key to the Scriptures" Mrs. Eddy is pointing us to the great truth taught by our Master, and by this knowledge, gained in the study of Christian Science, we may prove man's dominion when necessity demands it of us.

THE ALLNESS OF GOOD.

MARY WHEELER.

GOOD is omnipotent,
  Evil but seems;
Love watcheth over all,
  Fears are but dreams.

Error is nothingness,
  Truth the sole life;
Into the peace of God
  Enters no strife.

Life, Truth, and Love are one,
  God, good, is all:
Leaning this staff upon,
  I cannot fall.

SELECTED ARTICLES.

[From the *Concord* (N. H.) *Daily Patriot.*]

Among the pictures at the State House about to be shipped to the Jamestown Exposition in connection with the New Hampshire exhibit, are several frames each containing a number of photographs of public buildings, churches, and other institutions, scenery, etc., taken in this city, together with portraits of Mayor Corning, ex-Governor Rollins, and Mary Baker Eddy, to be hung in the Concord Room in the New Hampshire Building, for the furnishing of which the Concord Commercial Club raised the sum of two hundred dollars, one half being contributed by Mrs. Eddy. A fine piano will also soon go out for use in the room, furnished through the public spirit of the Prescott Piano Company.

[C. A. Newman in *The Baptist*, Sydney, Australia.]

To the Editor of *The Baptist*.

Sir:—May I be permitted to reply to the article by "Optic," which appeared in the Jan. 1st issue of *The Baptist*, entitled "An Exposure of Christian Science."

It is stated that "the distinctive feature of Christian Science is its quiet but resolute opposition to the Christian faith." Such a statement quite misrepresents Christian Science. It is not a philosophy secretly at work undermining the fabric of the Christian faith, such as Mr. Moulton would have his readers imagine. The world is witnessing the phenomenal progress of the teaching known as Christian Science, through which the sick are being healed, the sinner reformed, and the sorrowful comforted. The teaching by which these results are being attained may not be "orthodox," yet sin and disease are being overcome, and if Mr. Moulton stones Christian Science for the works it is doing for suffering humanity, even members of the Christian faith will undoubtedly regret his attitude.

Mr. Moulton is at perfect liberty to elaborate on his conceptions of Mrs. Eddy's book, Science and Health, but by stating that "the cross has no place in the worship of the Christian Scientists," and "the holy communion is unknown to them" proves that he lacks the accurate knowledge he should possess in order to pose as a critic. It may be of interest to many to learn that on Sunday, Jan. 13, over six hundred and eighty Christian Science churches throughout the world celebrated the holy communion, showing conclusively that Mr. Moulton must have been misinformed, or else he has a wrong conception of Mrs. Eddy's work. The chapter on "Atonement and Eucharist," in Science and Health, reveals how important each of these questions is in the teaching of Christian Science.

The statement that "Science and Health is the Bible of Christian Scientists" could not be further from the truth. It in no way takes the place of the Bible. Its value is in interpreting the Scriptures, which unfold with a more spiritual meaning when studied in conjunction with that book. On page 497, line 3, of Science and Health, Mrs. Eddy states, "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life."

It is stated in the article of "Optic" that "the root notion of Christian Science is in two central principles, 'the allness of spirit, and the nothingness of matter.'" Such a "notion" is not in accordance with Mrs. Eddy's teachings, for on page 465, line 18, of Science and Health, we find the question, "Is there more than one God or Principle?" The answer is, 'There is not. Principle and its idea is one, and this one is God, omnipotent, omniscient, and omnipresent." "Optic" also states that the cardinal dogma of Mrs. Eddy's faith is, "Matter is mortal error, and if this dogma be granted as a starting-point, then it will be comparatively easy to follow further; but the dogma is a tremendous hypothesis." Mrs. Eddy states on page 275, line 5, of Science and Health, "The starting-point of divine Science is that God, Spirit, is All-in-all, and that there is no other might nor Mind,—that God is Love, and therefore He is divine Principle."

In the year 1866 Mrs. Eddy discovered Christian Science. Through her own healing, and patient, earnest research of the Scriptures, the revelation came to her that divine Mind is the healer of sin, sickness, and death. Mrs. Eddy stood alone as the only Christian Scientist in the year 1866; now, after forty years of phenomenal progress, its adherents and beneficiaries reach into many hundreds of thousands, and it would be impossible for such a record to be based on "selfishness" and "lack of sympathy."

[Rev. W. W. McArthur, as reported in *The Denver* (Col.) *News*.]

Another source to which thousands have fled for help, and which has called down upon itself the anathema of many leaders, is Christian Science. It came into existence by the imperative call of suffering humanity, and the thousands who have gone there have not been disappointed. They have gotten what fresh air failed to give. They have gotten what the genius of medicine and the science of surgery failed to give. They went and are going hither by droves, not so much from the highways and by-ways as from our Sunday Schools and churches, and why? Because the champions of the gospel failed to show them relief in the gospel of Jesus Christ. The gospel will help your soul, help you to suffer and promise you relief at death; but when the cry went up, "I am tired of suffering, I am weary of sorrow, I must either have relief or die," no one was found who could open this book—the Book of books—containing the good news of all good news. Christian Science comes forward as the response to this call, and gives the desired relief, and to-day thousands are living healthy and happy lives because of its ministrations. . . . Oh, friends, stop and ask why is this condition of affairs after two thousand years of gospel study and teaching. It is because people have found in Science and Health what had not been shown them in the Scriptures before. A few weeks ago I heard two ministers discussing Christian Science, and telling each other its errors, and that they were going to preach a series of sermons against its errors. Better for them if they would go out and do for the world what Christian Science has done and is doing for the world. Dogmatically, theologically, and doctrinally, the churches may have the advantage and be more correct, but practically they are far behind. May I ask the question, Does the gospel, the good news, have anything to say to poor, sick, and suffering humanity besides relief at death? Yes, a thousand times yes.

[Charles K. Skinner in *The Call*, Greenville, Mich.]

Mrs. Eddy states positively that the Bible was her only text-book in the preparation for her chosen work and in writing Science and Health. Theologians of the different schools do not agree with each other on the interpretation of the Scriptures, and why should one criticise Christian Science because its teachings do not correspond with any of their own conflicting opinions? Each denomination has its commentary on the Bible, and each considers that its own is the right one. Christian Science has for its commentary the text-book, Science and Health, and is proving daily its right to its name and its teachings by the works that follow the faithful observance of its rules.

On the other hand the statement of the *Christian Advocate*, that "neither the Old nor the New Testament

Digitized by Google

agrees in any respect with Mrs. Eddy's theories," has only the authority of the editor of the *Advocate* and those other critics who have not studied the text-book of Christian Science nor read it except from the viewpoint of adverse criticism. What would be thought of the individual who in this age would stand and positively deny the possibilities of electricity because he had never been able or perhaps willing to prove any of its claims?

The statement that "the Bible refers to health and disease as being real, with no reference anywhere to the idea that disease is a false claim or illusion," shows that the *Advocate* has overlooked some very marked declarations of the Master along this line. In the case of Jairus' daughter he said, "She is not dead, but sleepeth." Thus he indicated conclusively that he recognized her condition as one of dormant mentality, from which she could be roused by the power of God. Had Jesus believed or admitted death to be a reality or a creation of God, he would not have attempted to destroy that condition. What he did say was, that he came to destroy the works of the devil. Of the woman who was bowed together he did not say that she had real rheumatism, but he spoke of her as one "whom Satan hath bound, lo, these eighteen years." This Satan he designated as a liar, and the father of lies, hence he saw in her condition only a false belief. Christian Science does not teach, however, that sickness and sin are not real to the material senses, but that they are unreal to God and spiritual man, and must be destroyed by this understanding.

It is no argument against the truth of Christian Science to say that because "the cures of Jesus were instantaneous without a single failure," therefore those of Christian Science are sadly lacking. Christian Science teaches progression, and its followers do not claim at this hour to be able to do all the works of the Master, because of a lack of spirituality; but as far as they understand they do. What then shall be said of those critics who not only are not doing any of the works, but are attempting to hinder those who are doing them.

[Alfred Farlow in the *Evansville* (Ind.) *Courier*.]

If *materia medica* is not entitled to public censure in the press for failing to check or destroy disease in a given case in its incipiency, there seems to be no good reason why a Christian Science practitioner should have especial notice in the press for not saving the man in the last stages of his trouble, after he had been treated by seven physicians, the last of whom gave up the case. If it is proper to censure a Christian Scientist because she took the case after the doctors had failed, then it is also proper to censure the doctor because he was called into the case after the Christian Scientist had failed. As a matter of fact, no school of practitioners has proved itself sufficiently successful to point the finger of condemnation at the failures of others.

[John E. G. Sandford in *The Western Press*, Bristol, England.]

SIR,—In your issue of recent date you reported a lecture delivered by Canon Parker, in which he refers at some length to Christian Science, and upon which I therefore beg leave to comment. Before doing so, however, I would like to acknowledge the liberal spirit in which Canon Parker discusses the subject. When expressing his "regret that the Christian Scientist, whilst professing Christianity, has more or less severed his connection with historic Christianity" and the "Christian tradition of the past," it would have been well if our critic had stated more clearly what he meant by "historic Christianity" and "Christian tradition." If he means the "tradition of the elders" which our Master condemned, the "tradition of men" against which Paul warned the Colossians, or what is generally known as ecclesiasticism, as I gather he does from his reference to the "doctrines of the Church" on certain matters, I am afraid the Christian Scientist must plead guilty, and without shame. But if he refers to the Christianity of the New Testament we are entirely at issue with him, for we adhere strictly and literally to the teachings of Jesus and his apostles as we find them there stated. Furthermore, when he adds that it is "hardly wisdom to allow the new to displace the old," he surely forgets that we have the highest authority for not attempting to put new wine into old bottles. Again, to call Christian Science heresy for the reasons he gives, is to place himself in line with the Pharisees, who condemned our Master's teaching because he refused to be bound by their traditions.

["Herald Reader" in the *Dayton* (O.) *Herald*.]

Religious toleration is one of the basic principles of our republic. It is one of the fundamental truths of a free government. In spirit, at least, whosoever practises religious persecution is guilty of treason. In this land of liberty every one is free to believe according to the dictates of his conscience. He may belong to this church, to that church, or to no church. In all this he is acting strictly within his legal rights. He is still a good American citizen, simply because he has not invaded the equal rights of others. But let him begin to persecute, let him begin to slander, let him begin to bear false witness, simply because he desires to injure those who are not of his religious faith; then he ceases to be a true American citizen, he has violated the most precious rights of others, he has violated the spirit of our fundamental law, he is a disgrace to American citizenship.

Where is the instance in history of a religious doctrine that was rooted out by persecution? On the contrary, persecution helps a religious doctrine, and the reason is on the surface. Persecution arouses a spirit of defense on the part of those who do not even pretend to have faith in the doctrine, but who have faith in fair play. Persecution of any religion is contemptible and un-American.

[From the *Commercial Tribune*, Cincinnati, O.]

"Christian Science as a doctrine is likely to be adopted by every Christian church in the course of time," says Dr. Davis W. Clark, the presiding elder of the Cincinnati Methodist Church. "By that I mean that when the clergy and the profession of medicine awaken to the fact that they are not so vastly separated in their care for human beings, they will lap prayers and prescriptions in their efforts to relieve human sufferings. The old idea has always been that the minister should look after the soul and the doctor after the body of the people; that the two could not possibly overlap and must remain irrevocably separated, but a start has already been made to harmonize religion and medicine. While I think Christian Science as a whole and certain statements in Mrs. Eddy's book are too radical and subvert the material too much to the power of the mind, nevertheless we must recognize the truth of much that she says and the wisdom of it."

[From a sermon preached by Rev. Dr. Kirkpatrick, Geneseo, Ill.]

Christian Science teaches that God is good—is eternal Principle—God is Life! God is All in all. He is absolute. A God of eternal goodness cannot know evil. Such teaching means inspiration; it is the gospel of good cheer. Where love abounds the demon of fear ceases to exist; life takes on new shape with the new thought; the over-anxious worry and carking care take wings. Tenny-

Digitized by Google

son's dream was that sometime, somewhere, good should come —

> At last—far off—at last, to all,
> And every winter change to spring.

Now as I understand Christian Science it is this dream in the present tense. We are now in eternity. Death does not fix destiny so but that—not sometime, somewhere, "far off," but right here in this eternal now—God *is*, and we His children may enjoy the privilege of that eternal conscious life.

There is no warfare between our rational gospel and Christian Science—at least the ultimate is the same. We are conscious of minor differences, but the great vital principles are the same. Truth is one, error is many; like the gentle light, Truth will penetrate, vivify, quicken, "until the day break, and the shadows flee away."

Correspondence.

[J. H. Cook in the *Daily Advocate*, Stamford, Conn.]

In a recent issue of the *Advocate* you made editorial mention of a minister's attack on Christian Science while addressing the Gospel Missionary Society of New Britain. I have no doubt that this gentleman is perfectly sincere in doing this sort of thing; that he believes his church is doing the Master's service in the only right way; that the other sixty odd denominations, including the Christian Science denomination, in this country are wrong, and that his address was scholarly and from his standpoint perfectly logical; but is he healing the sick as the great Nazarene commanded? Is he obeying the command to "judge not, that ye be not judged"? Does he know of a single Christian Scientist dissatisfied with his or her present condition of peace, joy, and health, brought about through what they believe to be the power of the redemptive Christ, or the Redeemer, or this spiritual truth which Jesus promised we should know and which should make us free? Has this clergyman objection to our receiving peace, joy, health, gifts of the Spirit or God, where we formerly were ill, and in many cases unhappy, and perhaps skeptical? Or does he object that we gained this freedom, which we claim is every man's birthright, through the teaching of Christian Science? . . . Those of us who have received benefits through Christian Science cannot be persuaded that we are not benefited, though against the prevailing medical and theological opinion. And again, another strange thing, those of us who now are Christian Scientists were in almost every case opposed to it, laughed at it, ridiculed our friends who defended it, before we knew what it was. Like this brother, we thought we knew, and we thought it was wrong, if not worse. So you see we can thoroughly appreciate the good man's position and sympathize with him. If he only knew that God really is "a very present help in trouble," in all kinds of trouble, physical, mental, or moral: that He is the source of "every good and perfect gift," as Christian Science proves, he would resort to no other source for help. But until he "understands" how this can be done he will continue to "preach" reliance on God and "practise" the old way, as we all did formerly. Have faith, but add to your faith, knowledge, or understanding, is the Scriptural command.

[From *The Morning News*, Wilmington, Del.]

Last evening [May 16] the Church Club of Delaware held its annual meeting in the home of the Wilmington Country Club. After the banquet, among other speakers, John Brooks Leavitt of New York spoke for half an hour, holding the close attention of his hearers from the start, never for an instant being interrupted by applause or any sign of uneasiness. He spoke directly and with force. His thought was that the Bible was not studied to-day as it should be and that the study of the Bible seemed to have become a lost art. Then he put to the club members a question that seemed to make a profound impression. It was in respect to the spread of Christian Science. "What are you going to do about it?" he asked. He did not believe that it was a matter to be dismissed offhand. The Christian Scientists based their teachings on the New Testament and there could be no warfare made against them on that line. The Episcopal Church had eight hundred thousand communicants, but the Christian Scientists claim to have one million followers. They were growing in strength and the speaker thought that perhaps the new religion was a revulsion from the wave of skepticism that passed over the country thirty odd years ago. . . . It was not to antagonize, to laugh at, or to sneer at Christian Science. He spoke with deep feeling and earnestness, and while holding that he was not in any sense to be considered a Christian Scientist it was yet a fact that Christian Science could not be ignored. Time alone could demonstrate whether or not it had come to stay.

[Editorial in *Eugene* (Ore.) *Weekly Register*.]

While we do not fully endorse all that Christian Science teaches, let it be said that the doctrine has accomplished and will continue to accomplish an immense amount of good in the world, and should command our respect and admiration for the uplifting influence it exerts. At any rate, world evangelization can never be accomplished through clash of religious sects. The persecuted religion always has the best of it. This world is big enough and broad enough for Christian Science and every other Christian organization to exert its greatest power for good, and any attempted curtailment of that power only tends to stimulate its growth. Rapid spread of the Christian Science cult through the land is full attestation of that fact. There is good in everything to those whose charity is unmixed with prejudice.

[From *The Daily News*, Santa Barbara, Cal.]

The people of this city have had ample chance to learn something of what Christian Science is: something of what its professors believe and something that comes from their belief. We have had for years a band of this sect with us. We know every one of them intimately. We know what kind of people they are; we know how they do business seven days a week; we know what kind of neighbors and friends they are—but perhaps we do not know, all of us, the real essence of their creed. Judge Wm. G. Ewing of Chicago was here yesterday, and in the Potter Theater gave an address that was a marvel of consistency and interest. We are glad to lay before our readers an epitome of what the gentleman said.

[Here followed some extracts from Judge Ewing's lecture.—EDITOR *Sentinel*.]

[From the *Boston Herald*.]

John Kendrick Bangs' calculation that all these attacks on Mrs. Eddy are not going to hurt Christian Science, but rather to help it, is interesting, particularly as he takes pains to say that he doesn't belong to the cult. Apparently Humorist Bangs is likewise something of a philosopher.

CORRECTION.

THE LECTURES.

RIVERSIDE, CAL.

No subject is demanding greater attention to-day than Christian Science. Tongues and pens are treating it on every hand. Throughout the world the discussion has gone and throughout the world it will continue to go. What is Christian Science, what has it done, and what are its future possibilities? This is the interrogation which so many people are asking. It is the question to which orthodox preachers, doctors, and all others are seeking an answer. Under the auspices of Second Church of Christ, Scientist, the Hon. William G. Ewing delivered a lecture at the Loring Theater last night [June 17] upon this subject. The effort was a masterly one and was listened to by a large audience made up of physicians, Scientists, and members of various churches. In these words, the Hon. Lyman Evans introduced the speaker of the evening:—

The marvelous tales of the Arabian Nights fade away before the realities of to-day. In the physical and metaphysical world alike wonders flash all about us. The great Paul made the exhortation, "Prove all things; hold fast that which is good." To-night you will be favored with an address by a gentleman who has made a profound study of human life and its possibilities. I bespeak for the orator that considerate hearing which Riverside ever gives to those who labor for the advancement and happiness of mankind by contributing an affirmative answer to the question of the ages: "If a man die, shall he live again?"—*Riverside Press.*

DETROIT, MICH.

A lecture on Christian Science was delivered in the Detroit Opera House to a magnificent representative audience which crowded this auditorium to the utmost, on Tuesday night, June 4. The lecturer was Mr. Frank H. Leonard of Brooklyn, N. Y. He was introduced by the First Reader of the local church, Mr. Edward Percival Prophet, who said in part,—

Somebody somewhere has said, "A hearty welcome is a glorious feast," but I say that you have just had the welcome and after a brief introductory you will get a glorious feast. There was once a human king who in the midst of material splendor turned to the metaphysical, and catching a glimpse of the truth of being, he said, "With all thy getting, get understanding." The humble Nazarene, the "Prince of Peace," the "Mighty Counselor," said, "Ye shall know the truth, and the truth shall make you free." "Know the truth" about what? About everything; the truth about God, the truth about man, and the truth about the universe. Make you "free" from what? From the multitudinous errors growing out of a misconception about those eternal verities.—*Correspondence.*

MADISON, WIS.

Frank H. Leonard of Brooklyn, N. Y., spoke at the Fuller Opera House last night [June 3]. In introducing the speaker, Col. W. J. Anderson said in part.—

I am not of this faith, but I trust I have loyalty enough to my own faith to keep an open mind for truth in whatever guise it may come. A faith that has a million followers, that seeks to make the world a better place in which to live, and above all, tends to cultivate trustfulness and faith in a higher power, is not only entitled to a hearing,—it would be invidious of me to say that much,—it is entitled to the serious consideration of all.

Wisconsin State Journal.

SAGINAW, MICH.

Mr. Frank H. Leonard lectured here on Christian Science June 16. The introductory remarks by Mr. J. Shirley Symons, who introduced the speaker, were in part as follows:—

I am not a member of the Christian Science Church, but it has been permitted me to know Christian Scientists most intimately, to have received through this truth physical and substantial benefit, and to have come into an understanding and peace of spirit that to me is priceless.

Christian Science as I know it is a practical, every-day religion, with its highest object that of uplifting and upbuilding the human race and of offering encouragement and hope and help to the discouraged, the sick, and the poor. It is as old as the centuries, for it is based upon the beautiful truth that divine Love, God, is now, always has been, and always will be, omnipotent and omnipresent. The practical application of this world-old truth was rediscovered by Mrs. Eddy, the Founder of this new-old knowledge of practical Christian living. When you recall the heartfelt gratitude and love you poured out to the kindly physician who gave back to you the health, or perhaps the life, of your dear one, do you wonder at the love and loyalty this people bear their Leader, who has made possible not only a physical but a spiritual well-being?

In meeting and knowing Christian Scientists there are two things that are worthy of more than passing note. One is that the great body of this people is not made up of the uneducated, the emotional, nor the unsuccessful. They are clean-cut and rational, most often highly educated, and seem possessed of a spirit of peace and happiness that must impress the most casual observer. There is a gentleness and sweet courtesy in their daily life that forces remark. I have seen their faith held up to scorn and ridicule, have myself sneered at them, and have been answered with a love and patience that would shame and completely disarm any true man. And this is the second thought I would call to your attention—that they do live their religion. Day by day they seem to be truly and sincerely trying to live as their Master would have them.—*Correspondence.*

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. *Beware of counterfeit letters.*

FROM A DISINTERESTED STANDPOINT.

[THE interview granted by Mrs. Eddy to Arthur Brisbane, representing the *Cosmopolitan*, has called forth much favorable comment, and we quote from *The Boston American* the following editorial, which appeared under the title, "Mrs. Eddy's Health and Fortune. The Health is Good. The Fortune Should be Left to Her." The writer of this editorial says a great deal in a very few words, and shows that he is thoroughly alive to the situation. We thank him for the manly and creditable stand he has taken in behalf of justice.—EDITOR.]

Mrs. Mary Baker G. Eddy, who discovered Christian Science and who has spread her belief practically all over the earth, is at present the central figure in a lawsuit. This lawsuit seeks to take from her the control of her property and of her person, on the ground that she has not sufficient mind to take care of herself or her fortune.

The *Cosmopolitan* for August, which has just been published, contains an interview with Mrs. Eddy. This interview, while written in rather a dull fashion, gives a simple statement of facts as to Mrs. Eddy's health and appearance, besides quoting what she has to say in regard to her lawsuit and other matters. Mrs. Eddy in her interview complains very justly that nobody seemed at all interested in her or her health when she had no money. This seems to be a fairly good reply to the effort to get her money away from her. This lady of eighty-six years would doubtless be left quite peaceful in her old age, quite free from the delicate attentions of "next friends," if there were no accumulated fortune and no accumulated power to arouse the next friends' interest.

Mrs. Eddy, as a matter of fact, is a woman of extraordinary force of will and mind, considering her great age. Even among women much younger than herself, few possess her energy and mental vigor. She is fortunate, as the leader of a new faith, in being able to point to herself as proof of the value of her teachings. Christian Scientists and others who read the *Cosmopolitan's* interview with Mrs. Eddy will reach the conclusion that it took a great force to do the work that she has done, and that the force still persists, in spite of the eighty-six years and the vigorous attacks by "next friends."

CHILDREN.

OUR Leader's definition of "children," as given in the glossary of our text-book, is very remarkable and lifts thought far above the ordinary human concept. Here they are defined as "the spiritual thoughts and representatives of Life, Truth, and Love" (Science and Health, p. 582). There is, perhaps, nothing on the human plane which calls forth the best in us as does the appeal of true and pure childhood, and it was to this that the great Teacher directed the thought of his students when insisting upon the conditions necessary for entrance into the kingdom of heaven. The right condition in childhood, no less than in maturity, is one of obedience, purity, truthfulness, unselfishness, kindness,—in a word, mental, moral, and physical health, and where the first of these virtues is neglected, the others are apt to be wanting.

A visitor in a Christian Science home once remarked upon the ready obedience and sweet serviceableness of a child of eight or nine years. The mother replied smilingly that they had trained the child carefully from her earliest hours to obedience and unselfishness, knowing that thus she would call forth love and kindness from others. The mother added that they felt it would be cruel in them to allow the child to grow up selfish and disobedient, as people all disliked such children, who were often made to suffer for their parents' neglect of a solemn duty. She also said she believed many of the ailments of children to be due to the collisions in thought which occur in many homes and in schools, and which come from a lack of proper discipline in the home.

An experienced school teacher once said she felt that many parents made the great mistake of "nagging" children,—calling attention to every little fault and seldom securing obedience,—while the better way was to leave the child alone in many cases, but in really important matters to take a stand and have obedience at any cost. A child who is properly trained is spared many of the painful experiences which necessarily come to those who are undisciplined and wilful, and with this in view no parent can afford to neglect his clear duty to the child. A loving father once undertook to discipline his child of seven for disobedience which had been repeated. He took the little one alone, knelt down, and with tears prayed for wisdom and divine guidance. The child was nearly heart-broken, and the punishment which followed was taken almost gladly, as a debt to be paid to justice, but the child never once grieved that father again.

From the standpoint of Christian Science we see the need of attaining to absolute obedience to all the demands of divine Principle, and this not because God needs our obedience, but as Moses said of old, because it is "for our good always." As we recognize and obey these demands our bodies begin to express obedience to Principle and law, and no longer disobey us. Mrs. Eddy says, "Children should be taught the Truth-cure, Christian Science, among their first lessons" (Science and Health, p. 237). The beautiful thing is that children see the reasonableness of this healing truth very readily, since the truth is natural, while error is unnatural. They should therefore be shown the reason for obedience; that it is not arbitrary but merciful, and that no true progress is possible without it.

Not long since the writer met on a journey a Christian Science mother and her two children, the younger about four, and was with them for a whole day. The obedience of the children was such that the mother had no fear in leaving them alone, and yet the younger child especially manifested the most exuberant vitality, was never still a moment, yet was never naughty. Their good manners at the table attracted the love and admiration of all who saw them. When this was remarked upon the mother said the children had been taught that disobedience to right could not be tolerated for a moment, and that their health and happiness depended upon obedience to divine Principle. She also said she had learned to declare quickly for them the truth which protects from every phase of error,—whether manifested as sin or sickness.

In this matter, as in all others, we should remember that "with God all things are possible;" that a neglected duty only calls for greater effort *now*, and that even those who began to work at the eleventh hour had the same reward as those who began early, probably in recognition of their strenuous and faithful efforts. Christian Science is equal to every human need, and its faithful application brings untold and ever-increasing blessings in the home.

ANNIE M. KNOTT.

THE CRY OF THE HUMAN.

"WHAT shall I do?" The voice came from the shadows of a great affliction. A wounded heart had found itself face to face with an overwhelming sense of weakness at the moment when life's hardest chapter was consciously entered upon, a chapter which she wanted more than all else to make nobler and better than were those that now seemed to be drifting far away. It was an hour in which thoughts of past failure and present need seemed to join hands against her, and she could realize only this, that in her heart there was the consciousness of inexpressible loneliness and want, and in her hands simply "the cup of trembling."

"I know full well," she said, "that there is no satisfaction and no rest for me apart from the spiritual life. Everything has been mine that I could covet and that love could supply, and yet, though utterly inexplicable, I have not been happy. My life has seemed to lack aim, definiteness, substance, even as it has lacked peace. Christian Science has appealed to me strongly at times, and I have felt strengthened and uplifted by it, but at other times I have not been able to get hold of it. I have not liked to study it, and I have not done so. I seem driven hither and thither, a prey to impulse, and I cannot trust myself to find the way—" "That is well," broke in her friend, "for you need, and there is available, a safer guide."

The case called for frank counsel as well as tenderness, and he said: "Christian Science comes to you and me just where we are, with the comforting assurance that the true Life is never lost, impaired, or disturbed, even in its least manifestation; that Love, the compassion of the Christ, abides unfailingly; that not only the deeps of God, but of even our own nature, are untouched by the storm, and that it is possible for us to stand in quiet upon the mount, as did Elisha, and see all these things pass by. Afterward comes the gentle healing Word, the recognition of the Christ, the true consciousness, to subdue and reign over surging sense, and give us peace, the peace that dwells alone with wisdom.

"In this presence our mistakes are more clearly discerned, we see the lack, in all these troubled years, of high, fine undertaking, of that unselfish aim which commands thought, awakens ambition, inspires endeavor, and makes the world's inanities appear by contrast for what they are. Here, too, we realize the falsity and the wrong of the dominion of 'feeling',—how unworthily we have pandered to its pranks, until the habit of right willing and right doing has become enfeebled, and our subjection to likes and dislikes so hopeless and entire that our Leader's call, 'Rise in the strength of Spirit to resist all that is unlike God' [Science and Health, p. 393], breaks upon thought and habit like an unheard-of demand, an altogether too startling requisition.

"Impulses, inherited and cultivated as they have been, may not be eliminated at once, but they may be controlled, made to defer to the appeal of the divine idea, the better self. This is what you and I need,—to be true to Christ, regardless of human impulse, and to rejoice greatly, day by day, that we can do it. This, withal, is supremely significant to our education, our growth, our efficiency, our joy, and this is the gain of Christian Science, that in its exaltation of the Christ-man it keeps the ideal ever in view, and through practical demonstration begets the assurance and courage which make it possible for you and me to stand by it."

One thing more was said, namely, that our bondage to ever-shifting feeling is broken the moment we honestly set ourselves to right doing. Continuous right doing may not be immediately achieved, but escape from the strife of impulse may be immediately won. He who is loyal to the truth he knows, and who keeps himself busied in the endeavor of right doing, speedily finds relief from sorrow and vain regrets, and his sky is ever brightening, for "the center of consciousness has become his constant will to work with the will divine," and the cup of spiritual joy is already presented to his lips.

JOHN B. WILLIS.

INTERNATIONAL BOOK AND PAPER EXPOSITION.

The photographs of branch churches which arrived within the time specified in the recent request of The Christian Science Publishing Society, made through the *Sentinel*, will be displayed in connection with the "International Book and Paper Exposition" in Paris, from July to November of this year. This Exposition is authorized by the French Government through the Minister of Public Instruction and Fine Arts, and affords an unusual opportunity for displaying the literature of Christian Science and showing the progress of this movement. The Christian Science Church, in its many phases of helpfulness to humanity, had its inception in Mrs. Eddy's discovery, and because it has progressed and gained its successes under her leadership, this exhibit may be justly considered a tribute to her work and to her ministry to mankind.

LETTERS TO OUR LEADER.

Wilmington, N. C., July 16, 1907.

Beloved Leader:—The members of First Church of Christ, Scientist, of Wilmington, N. C., in annual meeting assembled, wish to convey to you loving greetings, and to assure you of their grateful loyalty in this crucial hour. We esteem it our highest privilege to acknowledge you, the Discoverer and Founder of Christian Science, as our Leader, and we pray daily that we may be worthy followers.

Yours in the bonds of Christ,

F. A. FENNELL, *Clerk.*

[Telegram.]

Portland, Me., July 11, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—We, the members of First Church of Christ, Scientist, Portland, Maine, in semi-annual meeting assembled, desire to express our love and unswerving loyalty to you, and our devotion to the Cause of Truth.

ELLEN K. DOTEN, *Clerk.*

Jacksonville, Ill., July 18, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—To-day as never before my heart goes out to you in dearest love for all that you have done and are doing for mankind. Words can never half express my gratitude for this precious truth you have revealed to us. My daily prayer is that my life may attest my love and gratitude. I know that in this hour of persecution you, dear Leader, are protected and sustained. God is with you, "and underneath are the everlasting arms" of Love.

Lovingly yours in truth,

ANNA M. BRONSON.

New York, N. Y., June 5, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—This day marks the beginning of my second year as a member of The Mother Church—a membership I value as a distinguishing honor. Present per-

secution is driving men into, rather than away from, Christian Science churches. Thoughtful analysis of current magazine aggression has enhanced my appreciation of your sweet, winning forbearance. In these days of injustice and deceit, by your own unselfish life is ideally shown an exemplification of the "Rule for Motives and Acts" of our Church Manual—another Golden Rule which will go down the ages revered of men.

Gratefully yours,
WALLACE N. VREELAND.

Winchester, Ky., July 11, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Dear Leader:—I read with interest the splendid article of Mr. W. D. McCrackan, A. M., entitled "The National Arbitration and Peace Congress" (*Sentinel*, April 27, 1907). As a son of a Confederate soldier who performed his duty well, I pray that every soldier in all lands and countries may work with you in the spreading of the gospel of universal peace and good will to mankind; and look forward to the final adjustment of the world's disputes through Christian Science.

Yours in Christ,
GEORGE D. FOX.

Sydney, Australia, May 27, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Revered and Beloved Leader:—The members of First Church of Christ, Scientist, Sydney, Australia, assembled in annual meeting, send you this brief message of love and gratitude. We thank God that through you, Love's messenger, the shackles of materiality are being broken and the gates of sensuousness removed to prepare the way in Science for the reign of Truth. We know that the unity and love which you have revealed to the world can only be gained through our earnest, unselfish efforts to be obedient and loyal to your teachings, to destroy all belief of sin and sickness in ourselves and others. Humbly we desire to follow your teaching given to us in "Unity of Good" (p. 6), "Rather will they rejoice in the small understanding they have already gained of the wholeness of Deity, and work gradually and gently up toward the perfect thought divine." An ever-increasing number are reading your inspiring book, "Science and Health with Key to the Scriptures." As a result many are emerging from darkness into light and are testifying to sin destroyed and sickness healed. May we assure you of our continued loyalty and unshaken confidence in your wise leadership and know that nothing can harm you in this present time of trial, dwelling as you do under the "shadow of the Almighty."

With sincerest love and honor and gratitude on behalf of the members,

MINNIE D. SYMONDS, *Clerk*.

Grand Rapids, Mich., July 10, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—First Church of Christ, Scientist, Grand Rapids, Mich., at its semi-annual business meeting, held last evening, voted unanimously to send you a letter expressing gratitude, loyalty, and love. We are earnestly praying at this hour for fidelity to the Cause of Christian Science, and we know that faithfulness can be demonstrated only through following the command of Christ, "Feed my sheep." This church recognizes with gratitude your unceasing labor for the salvation of mankind. Your daily life is proof that the prayer of the Master is your petition, "And I will pray the Father, and he shall give you another Comforter, that he may abide with you for ever; even the Spirit of truth." We rejoice that the understanding of God, in Christian Science, enables us to rest in the assurance that you, God's faithful messenger to this age, are safe in His strength, and "that His presence, power, and peace meet all human needs, and reflect all bliss" (Miscellaneous Writings, p. 263). We, as a church, desire more earnestly than ever to consecrate ourselves anew to the work of redeeming mankind. Toward this end we are striving to demonstrate more unity of effort in healing sickness and sin and in rightly interpreting Jesus' words, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

Lovingly,
MRS. ELLA HOFMA, *Clerk*.

Chicago, Ill., June 3, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—For many months I have wished to express to you my love and appreciation for all you have done for me and are doing for all humanity. To me, my wife, and our three children, Christian Science has for ten years been a constant guide and dependence. We owe you endless gratitude. Your complete sacrifice of all for Truth, your ceaseless devotion to the Cause of Christian Science, undisturbed by the jarring elements of mortal mind, is the wonder of the age, an example and inspiration to all your followers.

May I intrude upon your most valuable time to ask if I may send you a few pictures, copies of originals by Heinrich Hoffmann. I obtained these copies in Dresden and each one is signed by this distinguished artist, to-day a dear old gentleman whom I was privileged to meet and talk to. His later years seem to have been devoted entirely to producing works on Scriptural subjects. The six pictures which I send seem to be so appropriate to your "rediscovery," and to you and our beloved Cause, that I feel they may interest you. They are, first: "Holy Night" (Luke, 2:7)—typical of "the new birth" to human consciousness; second: "Jesus with Mary and Martha" (Luke, 10:41, 42)—"Mary hath chosen that good part, which shall not be taken away from her;" third: "Peter and Jesus on the water" (Matthew, 14: 30, 31)—the reaching out of Truth to fearful and doubting human sense; fourth: "Healing the Blind" (Luke, 18:42)—the progress of the healing work of Truth in Christian Science; fifth: "Jesus mocked"—typical of the present-day fruitless attempts of scoffers and maligners; sixth: "Resurrection," shows Truth triumphant over all evil, sin, and death. The artist seems to express so vividly Jesus' tremendous spiritual advancement after his resurrection, as shown in the expression of the eyes and face in the last picture. It may be of interest to you to learn that the Dresden art dealer told me that those who show the most interest in and appreciation for the Hoffmann originals are Americans.

I want also to say that, being a professional singer, I have much opportunity to test the power of Christian Science in my work. In my ten years' experience in Christian Science I have never missed an engagement, although suffering during one period with a serious illness. During that time I filled some of the most important engagements of my career, here and abroad, but with the help of Christian Science I was able, not only to accomplish my work but with more successful results than ever before. Such are the practical results of what you, as God's messenger, have given us. Hence my gratitude. I hope I have not intruded too long, I could say much more.

Most devotedly your student's student,
GEORGE HAMLIN.

AMONG THE CHURCHES.

LONDON, ONT.

After a period of eight years the congregation of First Church of Christ, Scientist, of this city, saw on June 16 the consummation of their most earnest desires—the dedication of their church, free from all debt or encumbrance. A little over eight years ago the Christian Scientists of this city purchased from the St. James' Presbyterian congregation their old place of worship, on the corner of Richmond and Kent Streets. The congregation has used this building as a place of worship, and gradually reduced the mortgage until it has finally been wiped out. At first the struggle was hard, but as time went on the congregation grew, and at last, as the direct outcome of a special effort started about a year ago, all the debt has been paid and the church building dedicated. The dedicatory services yesterday were very simple, but impressive. They opened with devotional exercises, followed by the dedicatory address by the First Reader, Mr. W. H. Huyck, who said in part,—

The dedication of a temple is always an important epoch in the history of a church. It is the consummation that crowns toil with triumph—an event that marks a state of progress, that denotes prosperity, and that points to well-earned peace. To-day, without pomp or display, we are assembled together in unity and love, to dedicate, free from all debt or encumbrance, our temple to the sacred service of the only true and living God. We are come here to consecrate anew this house of worship to the risen Christ—to the truth which resurrects mankind from the grave of material beliefs, to the consciousness of life in Spirit. Surely the present occasion is a white mile-stone, which marks an advanced stage in the progress of Christian Science in the city of London.

In all Scripture there is perhaps no more appropriate text to use in connection with this dedication service, than the words written by the apostle to the Christians scattered throughout Asia, and found in the First Epistle General of Peter, 2: 5, "Ye also, as lively stones, are built up a spiritual house, an holy priesthood, to offer up spiritual sacrifices, acceptable to God by Jesus Christ." The Discoverer and Founder of Christian Science, Rev. Mary Baker G. Eddy, gives in our text-book, "Science and Health with Key to the Scriptures" (p. 595), the spiritual significance of temple as "Body; the idea of Life, substance, and intelligence; the superstructure of Truth, the shrine of Love."

Our true church is therefore the abode of divine ideas, the habitation of spiritual thoughts, the home of immortal longings, in which all desires of self and sinful cravings are offered up on the altar of sacrifice. Our true temple is the consciousness of indwelling good,—"an house not made with hands, eternal in the heavens." In our heart of hearts let us pay the tribute of endless homage to Christ, our risen Saviour, who left to mankind the rich legacy of eternal life. Let our lives, rather than our lips, express the debt of gratitude we owe our beloved Leader, who as an evangelist of Truth has brought to our poor humanity a world of wealth and wisdom, which has endowed the race with spiritual understanding of God and man. She has through Christian Science given us the priceless sense of redeeming Love, which has brought us thus far on our pilgrimage "from sense to Soul."—*The Advertiser.*

SPRINGFIELD, MASS.

The Christian Science faith in Springfield has a history of thirteen years. It was not until 1894 that it had any local supporters, but since that time the growth has been constant, and to-day the city has one of the strongest branch churches for a city of its size in the country. The growth of the faith in this vicinity has extended into all the surrounding towns, and there is scarcely one in Western Massachusetts that does not have some followers of Christian Science. The strength of the creed is not truly indicated by the membership of the church, for there are hundreds of people who believe in Christian Science who have not had their names placed upon the church roll. The Scientists do no proselyting.

The Springfield church had its origin in what is said to have been a marvelous case of healing, which took place in Saratoga, N. Y. In 1894 Miss Amelia Norton of this city, who had been an invalid for about twenty-five years, went to Saratoga to visit her sister. She had been suffering much and could not sleep when she arrived there. She asked for a spoon to take some medicine, given her by a physician, to make her sleep. Her sister told her she did not need medicine, and called her attention to Mrs. Eddy's book, "Science and Health with Key to the Scriptures." The sister had become interested in Christian Science, but Miss Norton had not heard of it and knew nothing of the Science. She read the book and immediately began to get better, she says, and from that day to this she has never taken medicine. She is now strong and well. She also receives many people who are suffering and, it is claimed, sends them away healed.

Miss Norton returned to this city soon after her own cure, and brought with her the new faith. A local friend, who had heard of the Science, called to see her, in order to learn something of the wonderful religion. More people became interested, and within a short time a party of several people began to assemble in Miss Norton's home on Sundays for study. As the little gatherings began to attract more people, a society was formed, and the meetings were held in different places, as the size of the organization demanded. There were about twenty members at the time of the organization in 1899, but there were many others who were interested in the faith. Since that time the work of the Scientists has made great strides. In the fall of 1905 a handsome building was dedicated at the corner of Orleans and State Streets, which the church had erected at a cost of about fifteen thousand dollars, and there largely attended services are held twice on Sundays and on Wednesday evenings.

Few people realize how many are interested in the Science and call upon the practitioners for aid. It is estimated that about five hundred people are now studying the literature, and while the membership of the church is eighty-four, there are about three hundred people who are regular attendants at services. Almost daily marvelous cures are reported. The church has among its members some of the most influential people of the city and surrounding towns. Many professional and business men are interested, and it is claimed that not a few have taken treatment and have been made whole. The copies of Science and Health in the city library are in constant demand.—*The Springfield Republican.*

A POCKET EDITION OF THE HYMNAL

In response to many requests for a hymnal suitable for carrying in the pocket, a new edition of the *Christian Science Hymnal* has been issued. This edition is called the Pocket Edition, and is bound in full morocco, with round corners, gilt edges, and leather lining inside of cover. The size is 4⅝ x 6⅝.

The price for a single copy, prepaid, is $3.00, and for twelve or more copies to one address, prepaid, $2.50 each.

Send orders to THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, 250 Huntington Ave., Boston, Mass., U. S. A.

TESTIMONIES OF HEALING.

The question that Pilate asked comes to each one of us —"What is truth?" All my life I have been a seeker for Truth, and for health. I looked for these in the churches, but was not satisfied. Human philosophy could not answer me and the laws of *materia medica* proved unavailing. Not until I prayerfully and humbly investigated Mrs. Eddy's spiritual interpretation of the Bible, as contained in "Science and Health with Key to the Scriptures," were my questions answered, health restored, and soul satisfied. Mrs. Eddy says, "The best sermon ever preached is Truth practised" (Science and Health, p. 201). The perfecting of our thought and life is proving to the world that we are standing for divine Principle,—perfect God and perfect man. The truth that God is all—the only power—has been verified by physical healings and spiritual upliftings. I had been a delicate child, with a supposedly inherited disease which was manifested in trouble with the eyes and ears. I always had a longing to be of use in the world, so I passed the time in brave endeavor, only to break down, to rest for a while, then try again.

After I married my home was in Savannah, Ga. The change of climate proved disastrous, and for ten long weary years I was under the care of a specialist for women's diseases. I feel grateful to this good man, who encouraged me with hopeful words and tried to turn my thoughts away from myself. I have since learned that to overcome the ills of the flesh one must turn away from the body instead of keeping it always in thought, but I was then a deep student of hygiene and medical laws and thought I could not keep well without my daily physical exercise. All this time I was dieting according to the best known health laws. I learned to control the outward expression of pain, and no one but my husband knew of my sleepless nights and the aching body. We moved to Chattanooga in 1888 and I hoped that in the bracing air of the uplands I would be fully restored to health. For a time the change was very marked, but that did not last long. Again came the pain, and the sleepless nights. Abdominal trouble developed, and for six months or more I was under the care of a specialist. Discouraged and disheartened I carried the burden of ill health. I had lost faith in drugs and exercise and could not see that dieting made any difference in the state of my health.

In June of 1895 I went to northern Michigan, expecting to be benefited by such a decided change of climate, but even that failed. One would think I should then have been ready for the gentle word of Truth, whispered in my ear by a sister I was visiting, who knew and loved this Science. But not so; I resented everything said, for I knew I was sick, I knew I suffered! When I left for home she gave me my first copy of Science and Health, and that winter I began to study it in earnest. I told no one what I was doing and kept my books hidden from the family. Slowly and naturally I regained my health, but I was not willing to give Truth all the credit. I was ashamed to let any one know that I was studying Christian Science, for I had always had a "lively disregard" for such a "narrow religion." But at last the scales have fallen from my eyes, and I am indeed a "new creature." This truth is freeing me from the bondage of asserted material law, and it brings a joy and peace into my life never known before. I know I am a better wife, neighbor, and friend since I have learned to think of all men as the children of God. I am overcoming the irritability, captiousness, and selfishness that so often accompanies invalidism. I do not need card parties and clubs to amuse and divert me. A long, quiet day at home with the Bible and Science and Health brings a joy never felt before. This truth has increased my power to enjoy every true pleasure, and instead of reading for amusement I now read for instruction. For seven years this truth has been my only medicine. I am perfectly well. The lines of pain have passed from my face and I am growing younger every year.

I cannot find words to express what the religion as taught by Jesus and repeated by Mrs. Eddy has meant to me; my doubts and fears are removed and I have the settled conviction that the Bible is true and its teachings are just as practical to-day as they ever were. I can find no greater aim in life than to show others how to get out of the hell of despair and discouragement and to gain the heaven of peace and harmony. My constant prayer is to show my gratitude to God for Mrs. Eddy's teaching in a life transformed by the renewing of the mind.

ABBY BEECHER ABBOTT, Chattanooga, Tenn.

I avail myself of the opportunity to testify to the wonderful healing I received by accepting the truth taught in Christian Science. I therefore express my gratitude to God for the good that has come to me. I praise God for the truth that has made me free "from the law of sin and death." For the benefit of suffering humanity I will say that in 1905 I was afflicted with what doctors termed paralytic trouble, also a serious liver trouble. I suffered terrible pains for over ten months, although I tried every available material remedy; but all these were absolute failures. Every day I was getting worse, was greatly reduced, and had almost abandoned any hope of recovery, but I still prayed to God for final deliverance. I had faith as small as a grain of mustard seed, so I submitted my case to the great Physician, and I thank a kind Providence that I was led to try Christian Science and investigate its teachings. The Lord gave me strength to go to the Reading Room. I described my case to several who were present, and each of them testified to the healing power of Truth. Their testimony did me good. I left the Reading Room feeling much better. I was inspired with hope, so I began to read "Science and Health with Key to the Scriptures." I was relieved from pain by reading the book, and finally went to a Christian Science practitioner in November, 1906. The result was, that after a month's treatment I was made every whit whole. Jesus once said, "All that are in the graves shall hear his voice," "and they that hear shall live." I praise God that I have been resurrected, as it were, out of a dead state or condition, and the true light now shineth,—immortal Truth is my guide. By the grace and power of God I shall ever continue to follow the bright and morning star. I am glad to testify that in my individual case "the stone which the builders rejected is become the head of the corner."

JOHN W. DURNELL, Cleveland, O.

A recent Lesson-Sermon has brought back to me the thoughts which came when as a little boy I learned in Sunday School of the miracles performed by Jesus, and was told that God had sent him to earth and given him this power that the people might believe in God. The query had come then, Why does not God send some one to us now to perform these wonders, that we also might believe? This query grew almost to a complaint, until finally I gave up all efforts to understand the Bible or to know God. As I grew to manhood and went out into the world I forgot the Bible teachings of boyhood days.

After twenty-five years spent in indulging the so-called pleasures of the senses, without a thought of God, there came a time when one near and dear seemed to be drifting into a life of invalidism without hope of recovery. Then Christian Science was mentioned and tried, and when I saw the color returning to the cheeks, and

Digitized by Google

the old-time vigor coming back, I began to wonder if Christian Science could really be the truth. Then the childhood thoughts came back, and I questioned if this could really be the answer to the query of early days, and if God had again sent a messenger to earth to show mankind how to approach Him and to be healed physically and mentally.

Shortly after this experience symptoms of a dread disease made their appearance, and I went from one physician to another, only to be told kindly that my surmises were true. Then it was that I turned to Christian Science with my whole heart and was healed of both sin and disease. Thus it has been proven to me that the words of Christ Jesus in the 14th chapter of John are not idle words, and that he knew what he was saying. In this chapter we are told that if we believe on him, the works which he did we shall do also, and that the Father would send us another Comforter, to abide with us forever,—"even the Spirit of truth,"—and that this Comforter would teach us all things and bring to our remembrance whatsoever he had said.

Is not this plain language? Could Christ Jesus have used plainer or more direct? And did we not need to have brought to our remembrance what he had said? Had we not forgotten his words and his commands to heal the sick? Had we not forgotten his promise that we could do this if we understood his teachings? And is not Truth, as revealed through "Science and Health with Key to the Scriptures" by Mrs. Eddy, doing the works that the Master did, and fulfilling his promises, viz.; teaching us all things and bringing to our remembrance all that he said? It seemed that the age in which he appeared was not ready to hear more. Is this age now ready? We think so, because the great Teacher said that when the "Comforter" did come, he would abide with us forever. Glorious promise!

WINFIELD C. CROSIER, New Rochelle, N. Y.

[Translated from the German.]

Sincere gratitude for all the good that I have received through Christian Science prompts the writing of this testimony. It would be impossible for me to tell all that this truth has done for me, spiritually and physically. A little over three years ago Christian Science found me a wreck, mentally and physically, and without hope. Life seemed too cruel to endure, nor could I gain any satisfaction in it, and I wished for death. In this melancholy condition I spent months, suffering physically and mentally. By the advice of my sister I turned to Christian Science for treatment, with the ardent desire to find out if God really existed. I had always been taught that God is good, but that He sends evil to test us. It seemed cruel to let me suffer as I did, and I finally doubted all I had been taught concerning God.

My main object in going to Christian Science was to know the truth about God, and now I thank Him that He has revealed His truth to our dear Leader, Mrs. Eddy. I feel that I can never be too grateful to her that she has consecrated herself to it, and has made this truth so plain to us in her book, "Science and Health with Key to the Scriptures." After I had one treatment I began to read our text-book that same day, and a wonderful feeling came over me; darkness and melancholy had made room for light and peace. I had a feeling of safety, of security. All pain had vanished, and it has never returned to this day. My thoughts were refreshed with a sweet sense of peace, in which I dwelt and all was joy and gladness. I was perfectly healed physically, and wondrously helped mentally. I could do my work as never before in my life, without feeling tired. After the birth of a child I was well and strong with no other help but Christian Science, and the child also was free from the discord which seemed to beset us in the old way. The child is now three years old and has never taken any medicine, nor had any disease to which children are exposed in the old thought.

My heart overflows with gratitude, yet the real gratitude can only be expressed in proving my obedience to God's commandment, "Thou shalt have no other gods before me." Our dear Leader is teaching us constantly how to obey this command in our daily life. For all this I am inexpressibly grateful.—MINA HAVEMEISTER, Chicago, Ill.

I wish to express my gratitude for our Lesson-Sermons. One which we had recently I found to be so powerful, so uplifting, that I was enabled to overcome a very severe ailment by its study. One morning I went to business as usual, but toward lunch time I began to get terrible pains in the head, which soon after became worse, extending through the entire body. I kept up, however, and no one suspected that I was having a severe struggle. At 5.30 I was just able to get home, and when I arrived there I seemed to have a very high fever. I retired to my room and began to read the Lesson, although it seemed almost impossible to do so. I read on, however, and when I came to page 215 (1st to 3d line), in Science and Health, such a sense of peace came unto me, and as the spiritual meaning of these words dawned on my consciousness I knew that I was healed. I went through the entire Lesson that evening, retired soon after, slept soundly all night, and in the morning I was in my usual good health. I am also grateful for the overcoming of a fear of drafts. Although I have been in Science about seven years, I was only able to overcome this fear a few months ago. I was also healed of chronic stomach and catarrhal trouble of long standing,—the result of wrong thinking toward God and my neighbor. In taking up Christian Science I found that it meant right thinking and right living, and that if we live and think rightly we cannot help but be right. I also found that Christian Science is the teaching of Jesus put into practice, which was given to the world by our revered Leader, Mrs. Eddy. My daily prayer is, that the love of all mankind may reflect toward her whom God has inspired to voice this truth to all peoples.

MISS ANNIE M. WAGNER, New York, N. Y.

It is now over a year since I was healed through Christian Science of what several different physicians called severe nervous trouble. A condition of the eyes for which I had worn glasses over ten years also disappeared at this time. Several minor ailments and an extreme irritability of disposition have been overcome by Christian Science. Since coming into Science I have neither worn glasses, which before seemed indispensable, nor taken medicine, either internally or externally. Before hearing of Christian Science I had used drugs every day and was never healthy. I can now say that I am perfectly well. I write this testimony in the hope that those who are suffering from any disease may find a way out of their inharmonious conditions, and I hope that all who need help, either spiritually or otherwise, will be led to Christian Science and have reason to be as grateful as I am.—ELEANOR LEWIS SCHMIDT, Fillmore, N. Y.

I wish to express my gratitude for what Christian Science has done for me, physically, spiritually, and in every way. In March, 1902, I was confined to my bed for many weeks, suffering intensely night and day, my physician, one of the best in our city, coming to see

Digitized by Google

me almost every day. One night I became so much worse that the doctor was summoned about midnight, and after an examination he said he could do no more for me, that I had only a short time to live. He left some morphine powders to be given every hour, and went away. When my husband brought the powder I refused to take it, saying that I would take no more medicine. I could not sleep, and thought was busy. I had heard of Christian Science through the young daughter of a lady who had been wonderfully healed. She had said to my daughter, "I wish your mamma could be made well, as my mamma was." I had read the *Sentinel* and *Journal* which they had sent me, and now I questioned myself, "If those testimonials of healing are true, and God is no respecter of persons, why cannot I be healed by Christian Science?" I asked my husband if he would go in the morning for a Christian Science practitioner, and this he readily consented to do.

At an early hour he went to see the lady who had sent me the *Journal*, to get the address of a practitioner. This practitioner talked with my husband a few moments, and said she could not come to me till one o'clock. My husband said, "I am afraid she will not live that long." The practitioner then assured him that she would treat me absently, and come as soon as possible, and that all would be well. At one o'clock she came. She sat by my bed, gave me treatment, and talked with me three hours about this glorious truth. It was so different from anything I had ever heard. I look back to that day as the happiest one of my life. When she arose to go I felt like a different person. She said if I could accept God's promises I need not remain in that bed twenty-four hours, then bade me good-bye, promising to call next morning. Shortly after she had gone I asked for something to eat, and ate a hearty meal, a thing I had not done before in many weeks. A little later I remembered her parting words. I arose, dressed myself without help, walked about my room, sat up two hours, then retired and slept well all night. This I had not done for months.

Next morning I began to help a little with household duties. Prior to this I had not been able to do my work, in fact had been confined to my bed most of the time for five years. My illness had extended over a period of eighteen years, during which time I had been treated by twenty-three good physicians, and had tried almost every kind of remedy with only temporary help. My diseases were "legion," and included female weakness, rheumatic and stomach trouble, etc., all of which have yielded to Christian Science. I now do all my housework, sewing, etc. I am grateful not only for the physical healing, but for the spiritual uplifting which I have received. I feel that there is not a day nor an hour but blessings come to me through this wonderful truth.

I cannot be grateful enough for having been shown the way in Christian Science. I am thankful to God, and to dear Mrs. Eddy, who has toiled so faithfully, so lovingly and unselfishly to lead us into this beautiful truth.—MALINDA ROLISON, Des Moines, Ia.

In 1904 I was in a critical condition with a complication of diseases. I tried several doctors, but they did not heal me; so I quit doctors, and turned to God for healing, as the Bible says we should, and with this resolution I became stronger. Soon after I was handed a copy of Science and Health by a dear good woman. At first I was afraid to read it, for fear it would lead me astray, but I kept on reading and asking God to lead me aright. This good woman then asked me to take Christian Science treatment, which I did, and became strong enough to do all my work. I went on reading Science and Health, and later, when I began to have the old trouble, I had a few treatments; but with a careful study of our text-book and the Bible I was enabled to overcome nearly all sense of my ailments, and as I gained the spiritual understanding my health increased. In March, 1906, I gave birth to a fine baby girl, and during my confinement I was under absent Science treatment. The birth was almost painless and I was up the next day. The baby is now nine months old and has never taken medicine of any kind. I have had many beautiful demonstrations of the power of Truth. Words are inadequate to express my thanks to God, and to Mrs. Eddy, for what has been done for me. I can best express my gratitude by living in obedience to God as revealed through her teachings.—MRS. MOLLIE RANDAL, Pride, Tex.

In 1889 I became interested in Christian Science through the healing of my wife after a number of physicians said they could do nothing more for her. We had been married but two short years, were much devoted to one another, and did not wish to be separated, as we then believed we would be, and that in a very short time, if we found nothing better than drugs to depend upon for her life. It was at this time a friend and a neighbor proposed that we try Christian Science. They themselves knew nothing of it, only that they had heard of it, and said there was at that time a Christian Science practitioner in our city on a visit from a distant city. We had never heard of Christian Science before, but were willing and ready to try anything that might help us in our trouble, so we sent word to this practitioner to call at our home. After several hours' debating pro and con as to the Scriptures, of which my wife and I professed to be students, we decided that we would try Christian Science treatment, and surely it was God who helped us to decide. From that day there was a great change in our home,—sickness disappeared, and God, who is Truth and Love, was revealed to us. At this time it appeared as if we were very poor in this world's goods. I was receiving small wages and had been paying a nurse, help, and doctors' bills, which made it very hard; but our thought took a turn and a sense of riches came to us both as soon as we learned to know God, for God is all, and when we left all for God and came to Him in truth, as taught by Mrs. Eddy in Science and Health, we began to receive that heritage which was rightfully ours. My business is that of inspecting other men's work and material. Before coming to know anything of Christian Science I was always looking to find something wrong, and I generally found it, but since coming into Christian Science I have changed my mode of working and now I am looking for all work and material to be perfect, knowing that in Truth there is nothing but good. So doing I find this is appreciated by all with whom I come in contact, and they are many in different parts of the country. By having this truth we have gained heavenly riches and a liberal supply of needful things, all of which has come to us through the teachings of Science and Health.

I am very grateful to God, and to Mrs. Eddy, our dear Leader, who has so wonderfully shown us the way, and we are both trying to know more and more each day of this truth which set us free.—W. H. LAMBERT, Lima, O.

Three years ago last June I was healed of what the doctors called a very serious case of stomach trouble. I had suffered for years; sometimes I was worse than at others, but often I would be so ill that I could not work. I tried the best physicians I could find, but they did me no

Digitized by Google

good. About thirteen years ago I lifted a large stove alone, and as a result I had a very severe illness. I recovered from this attack very slowly, but finally was able to do light work. Three years ago last January I had another attack, without any apparent cause, and the doctor who was called decided to have a consultation with a specialist. After they had made an examination I was told that the only thing which could be done for me was either an operation, or else what they called "rest" treatment. I objected to the operation, so I was put to bed and given practically nothing to eat or drink for eighteen days, in hopes that the "rest" would heal my stomach; but even this treatment did not cure me, for as soon as I began to eat again I felt as bad as ever. In about four months I was just able to walk, and I was sent to Eureka Springs, Ark., in the hope that the water there would help me; but after I had been there about two months I became so much worse that I was almost in despair.

At this time I happened to see a sign in an upstairs window, "Christian Science Reading Room." The thought came to me that I should try Christian Science, and I made up my mind then and there to give it a trial. I found a practitioner and took my first treatment that day, and experienced great relief. I was healed of the stomach trouble in one week, so that I was able to eat anything I wished without any bad results whatever. I went to work in about two weeks afterwards, and have been at work practically all of the time since. Any ailment that has appeared since my healing has always been overcome by Truth in a very short time. I might add that the expense for medical treatment was very great, while all that I paid for Science treatment was fifteen dollars,—quite a difference in favor of Science.

H. C. MANNING, Sioux Falls, S. D.

"Your boy's eyes have been put out by a powder explosion!" was the exclamation of the crowd that had gathered about the house to which I had been called by telephone. On entering the house the dreadfully burned and blackened face of my son said he was blind and disfigured for life, but I turned away from the material evidence, denied mentally the terrible law I had been admitting for my son, and as I realized the truth fear left me. For three days his condition seemed very dreadful, but at the end of eight days, through the understanding of Christian Science, the wounds were healed and the sight perfectly restored. One of the marvels was his entire freedom from pain. Do I believe that Christian Science treatment saved the child from being blind and disfigured for life? I answer, I not only believe, but know, with the positive, intelligent assurance which enables a student of the science of mathematics to say that he knows how a problem has been wrought out,—I know and say with the same assurance that Christian Science, as taught in the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, did heal the wounds, banish the pain, and save our boy's eyesight. I shall be pleased to answer any inquiries as to particulars in this case.

In deepest gratitude I thank God, and our beloved Leader, for the light of Truth which shines through the dusty myths of a dogmatic past.

SILAS E. WIGHTMAN, Watertown, S. D.

From childhood I was considered very delicate. As I grew older I became worse, and was often told that I had inherited many diseases and could not live to be a woman. When I was sixteen my father and mother were very greatly troubled over my condition. The physician who was called said my lungs were affected, but claimed he could help me. I did seem to receive some help, but later grew worse. At this time, in addition to being attacked with severe catarrhal trouble, I suffered from my eyes. My stomach and heart were also seriously affected, and our family physician said nothing could be done for the former as it was an incurable complaint, and to relieve the pain morphine was regularly injected. Being told by the attending physician's wife that I was doomed to chronic invalidism, I became very much discouraged, and prayed earnestly for health; but my prayers were seemingly unanswered. I studied the Bible daily, my desire being to live a true Christian life and do the work which had been given me, but I could not do much because of my weakness and suffering. Finally I went to see a physician who it was believed could bring me relief. He said that an operation was necessary, which might give temporary relief but could not cure. He did not even give me any assurance that I could live through it, so I went home expecting no help until death should come. I had been treated by eight physicians, whose kindness I shall always remember. At times I would become so discouraged with the fruitlessness of their efforts that I would no longer consult them, but instead would resort to medicines of various kinds. I remember taking fifteen bottles of one kind without perceptible effect before I gave it up.

In this condition, over eight years ago, Christian Science found me. I went to a Christian Science practitioner, and was treated for five weeks, during which time, to my great delight, my afflictions disappeared one after another, and left me a free woman for the first time in my life. Since then I have been strong and well and able to accomplish all that it is my duty to do. Is it any wonder, then, that Christian Science is more to me than anything on this earth?—ANNA OLSON, Boulder, Col.

LOVE IMMORTAL.

SECTS, ye have your day and die,
  Eddies in the stream of truth,—
The great current, sweeping by,
  Leaves you swirled in shapes uncouth,
Born to writhe, and glint, and woo—
Broken mirrors of the Blue.

Creeds! O captured heavenly bird,
  Fluttering heart and folded wing!
Shall ye see those pinions stirred?
  Can your caged Creation sing?
Will ye herald as your prize
What was bred to soar the skies?

Yet the East is red with dawn,
  Like a cross where One hath bled!
And upon that splendor drawn—
  Gentle eyes and arms outspread,
See that figure stretched above!
As God lives! its name is Love!

Love that lights the fireless brands,
  Love that cares for world and wren,
Bleeding from the broken hands,
  Crowned with thorns that conquer men;
Only Love's great eyes inspire
Church, sect, creed to glow with fire.

Yet our lips shall have no sneer
  For the spire, the mosque, the ark,
Broken symbols shall be dear
  If they point us through the dark,—
Laws and scripture served our youth
Who have grown the sons of truth!

FREDERICK LAWRENCE KNOWLES.

FROM OUR EXCHANGES.

[Rev. R. J. Campbell, A.M., in *The British Congregationalist.*]

Turn back to that man who has injured you vilely and cruelly, and against whom the hot anger arises in your heart when you think of him. Do you know all that is to be known about that flinty natured wretch? It may be hard to realize it, but it was not the true man who injured you; this poor child of the all-Father does not know himself nor you. Try to look beneath that selfish exterior, and your heart will fill with a great pity: you will not feel angry any more: you will only want to reach forth the hand of love to strike away the fetters and set the prisoner free. Look through the things that are seen to the things that are not seen. Look for the very Christ in every sinner, and you will not fail to find him. Ask to see what Jesus saw when on Calvary he prayed: "Father, forgive them; for they know not what they do." If Jesus could not have prayed that prayer he would not have been a Saviour. Such a vision is power, even though we only have it as in a glass darkly.

[*The Outlook.*]

The Church has absolutely nothing to fear concerning the truth in its keeping; it has everything to gain by holding its doors wide open and inviting the whole world to come in and study and scrutinize and turn on the search-light. Its timidity has cost it many a victory; its cowardice has lost it many a friend. It ought to welcome every honest inquiry and keep its doors open to every form of sincere investigation, but it ought also to show a certain kind of indifference to the possible results of inquiry and investigation; the indifference with which a man, fundamentally sure of the foundations on which he has built, would allow the most skeptical, critical, and cynical to examine those foundations at leisure. The body of truth which the Church holds is not a treasure which can be stolen. On the contrary, the more widely it is diffused, and the farther it is carried, the better, not only for those who take it, but for the Church itself.

[Dr. G. M. Twitchell in *The Universalist Leader.*]

Ask the layman what is his creed and he will say he has none, for his standard has outgrown church definitions; but ask him what the gauge of his life and he will tell you that it is a square deal for every man, full measure and weight for every transaction, a sweet, happy home for every toiler, and a deepening, strengthening belief in eternal verities and the immortal life. The marvelous hold President Roosevelt has to-day on the common people, regardless of party, a hold which has steadily strengthened from the moment he declared for a "square deal" and "the open," but reflects the underlying faith of the people in the cardinal virtues of honesty, integrity, and straightforward, manly dealings, the very essence of Christianity. The curios of belief can never again be forced to the front and galvanized into the semblance of living truths.

[*The Christian World.*]

And allied with this, and still more affirming the religious position, is yet another of our inner compulsions. It is that produced in the soul by the exhibition to it of highest character. There is nothing in the sphere of feeling so distinct, and at the same time so profound, as the response within us to a personified holiness. That is why, in the first age and ever since, Christ's call to men has been so irresistible. For he calls to the something in us which is akin to himself. And it is that which answers him. The divine in the heart responds here to a divine which hails it from without.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science.* These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,
Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.60.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration will be found on the wrapper. No other notice will be given.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba; twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

In all other countries, six cents per copy, postpaid to any address; twenty-five copies, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST

National.

An increase in the salaries of fifteen thousand female teachers in the public schools of Greater New York has been recommended to the Board of Estimate and Apportionment by the Board of Education. The proposed increase calls for an additional outlay of about $3,000,000. About twelve thousand five hundred teachers in the lower grades get their minimum salaries increased from $600 to $720, and the maximum from $1,240 to $1,440, the maximum being attained at the end of sixteen years' service. Teachers in the higher grades and principals and assistant principals also receive an increase, but their pay will still be less than that of the men employed in the same grades. The salary of the superintendent of schools is increased from $8,000 to $10,000 a year.

The Government has filed in the United States Circuit Court for the District of Delaware, at Wilmington, Del., a petition against the "powder trust" involving twenty-six corporations and seventeen individuals. The petition relates that all of the defendants are engaged in "interstate trade and commerce" in gunpowder and other high explosives, and are violating the Sherman anti-trust act. It seeks to prevent and restrain the unlawful existing agreements, contracts, combinations, and conspiracies in restraint of such trade and commerce, to prevent and restrain the attempts on the part of the defendants to monopolize such trade and commerce, and to dissolve the existing monopolies thereon.

The new concrete drydock at the League Island Navy Yard, Philadelphia, one of the largest of its kind in the world, was used for the first time a few days ago when the battleship Kearsarge was placed in it. The docking of the warship is serving to test officially the drydock, which has not yet been accepted by the Government. The basin cost about $1,500,000 and required seven years to build. It is seven hundred and fifty-four feet long inside the coping, one hundred and forty feet wide, and has a depth over the sill at high tide of thirty feet.

One of the most important bills relative to the Post Office Department to be presented to Congress during its next session is with reference to the passage of legislation providing for a three-cent postal note, or other substitute for postage stamps and coins in remittances of small amounts through the United States mails. The demand on the Department to provide such a note has been growing steadily.

Ground has been broken for a new dormitory to be built for Wellesley College at Wellesley. This building, one hundred and sixty-four feet long, with an ell fifty feet long, containing accommodations for nearly one hundred students, will form the third of a group of four dormitories, projected some years ago. The structure will be finished by February.

Judge Landis in the United States District Court at Chicago, on Saturday, Aug. 3, imposed a fine upon the Standard Oil Company of Indiana of $29,240,000, the maximum amount upon each one of the 1,462 counts of the indictment on which that company was recently convicted.

The returns of the election at Manila show that the Nacionalistas, the party demanding immediate independence, as opposed to the Progressistas, the party satisfied with American rule, have won the day.

His Royal Highness Prince Wilhelm of Sweden, Duke of Sodermanland, is to arrive in Boston Monday, Aug. 20, according to official notice.

International.

Rev. R. J. Campbell, whose recent change in theological views caused a sensation and offended a large section of his congregation at the City Temple, London, seems now inclined to enter the field of politics in the Socialist-Labor interests. He has been formally invited by the Labor party to contest the next vacancy in the parliamentary representation at Cardiff. Mr. Campbell declares his conviction that Socialism is the practical expression of Christianity, as he understands it; that the land question is at the bottom of most of the social evils, and that the first need of the people is to get hold of land and to decrease the cost of transportation.

The foundation stone of Andrew Carnegie's Palace of Peace at The Hague was laid July 30 by M. Nelidoff, president of the second Peace Conference, and was marked by considerable ceremony. Practically all the delegates attending the present Peace Conference, a number of high court officials, the members of the States General, and delegations from numerous bodies were present.

The figures for the Cuban budget of 1907-08 do not differ materially from those of last year. The total amount is $23,309,538, divided as follows: Provisional, Government, $105,080; department of state and justice, $680,265; government, $8,973,022; treasury, $3,440,954; education, $4,195,863; public works, $4,445,226; agriculture and commerce, $274,988; judiciary, $1,193,255. The estimated receipts are $25,466,325, of which the customs are $23,046,000 and internal revenue, $831,000.

Great Britain and Germany have practically agreed at the Peace Conference on a proposition regarding the establishment of an international prize court, under the terms of which the tribunal is made permanent and is to have fifteen judges. The United States, Japan, and six of the great European Powers will furnish one judge each, Latin America will supply two, and the remaining five will be sent from other countries represented in the Peace Conference.

A governmental commission has been sent from Berlin to the United States to study the organization of all the systems of electrical railroads throughout America. It is the intention of the government to electricize all the railroads around Berlin, as well as portions of the main line throughout Germany.

It is announced that the negotiations between Great Britain and Russia have resulted in an agreement amicably adjusting all outstanding differences on the Indian frontier and in Persia.

Industrial and Commercial.

Since 1883 the Swedish government has been taking over privately owned telephone lines by the force of competition. The price of government telephones is $13.50 a year for unlimited service within a radius of forty miles. For long distance connections the extra charge varies from four cents for seventy miles to twenty cents for six hundred miles, and twenty-seven cents for any longer distance. The financial result in a given period is a profit, after paying interest, of $2,320,000 out of gross receipts of $5,400,000. In 1883, the year the city of Stockholm began to "take over," the price for the private service there dropped from a schedule ranging from $43 to $75, to a flat rate of $35; and under municipal competition it dropped close to the government rates of $13.50.

"There is a scarcity of labor all over the world. The fact is, widespread prosperity and the unparalleled enterprise of the age have led to the undertaking of more great projects than can possibly be completed within a reasonable time." This is the opinion of a labor expert in the Government service.

The new Public Service Commission of the New York District, which supersedes the old Rapid Transit Commission, has begun an investigation of the Ryan-Belmont traction merger.

The Swiss exports of clocks, watches, and parts to the United States last year was the largest in the past twenty years, their value being $2,469,516, against $2,261,519 in 1905.

General.

Egyptologists claim they have discovered that Rameses II. was a fraud, and that he is not entitled to the appellation of "Great." Professor Naville, one of the official explorers of antiquities in Egypt, says: "The more we discover about Rameses, the more convinced we are that he was a fraud. He was not great in any way, but his vanity was colossal. To satisfy this, he conceived the notion of causing his name to be inscribed on every existing temple, statue, and monument that he imagined would stand the test of time. The plan succeeded only too well for many years. In consequence of it, explorers united in deciding that he must have been a great king. Now we are beginning to find him out."

Professor George B. Leuderback of the University of California recently gave the results of his examination of a new gem of great beauty which was discovered by two prospectors in San Benito County, California. He says: "The new gem is a clear, transparent blue stone, with violet tints in the deeper colored portion. It rivals the sapphire in color and surpasses it in brilliancy, though it is not so hard. It is about as hard as chrysolite and harder than opal or moonstone. It turns bright red under heat, but on cooling resumes its normal color. As it is an entirely new mineral it has been named benito, from the county in which it was found."

A report has been received from the head of the University of Chicago's Egypt Exploration Expedition, of a notable discovery—the Temple of Ikhnaton, greatest of the Pharaohs, all knowledge of which had been lost to the world for centuries. The discovery was made unexpectedly. The ruins of the temple, as well as those of the city around it, had been known to explorers for many years; but they had not been identified with the name of the "heretic" king. By the falling away of some stucco, portions of the original structure were disclosed which showed this king as the builder.

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

REALIZATION.

M. G. KAINS.

PERHAPS no story in American literature so beautifully and clearly reveals the effects of pure and noble thoughts as Nathaniel Hawthorne's tale of the White Hills, entitled "The Great Stone Face." In this story, it will be remembered, a mother tells her little boy a legend current among the mountain folk, prophesying the advent of a son of the valley, a great man whose features would bear a living likeness to the great stone face formed by a group of rocks high up on a neighboring mountain.

Because of the deep impression this tale makes, the boy reflects constantly, soliloquizes, pictures in his mind the nobility, the strength, the calmness, the love,—all the virtues he believes he sees typified in the granite visage. He tries again and again to see resemblances in men, natives of the hills, who having achieved greatness in the busy world come to visit their birthplace, but finds none that seems to him to portray the virtues with which he endows his "Old Man of the Mountain." Their sordid, harsh, selfish thoughts have chiseled upon their faces lines characteristic of such thoughts, and he turns again to his rocky model assured that the man will come as prophesied. His search continues with the faith of one who "hopeth all things, believeth all things;" it never wavers.

Though but a country lad, his constant reflection upon the beauties and character of his ideal distinguish him from his less thoughtful comrades, and little by little his lofty yet simple thoughts command attention far beyond his mountain home; for his neighbors spread his fame beyond the confines of the valley. At length, when the boy has become an old man, the sublimity of his expressed ideas attracts a poet, who visits him and in the golden sunset recognizes in the man himself the incarnation of the ideals he has since early childhood woven about the Great Stone Face. Yet even then, with the nobility and modesty of true greatness, he deprecates the thought and believes that a more worthy than he must be the man foretold.

In this study the well-known fact that thought delineates itself on the features is used to show first, that the world's ideals did not produce upon the warrior's, nor the statesman's, nor the rich man's face, either lines or expression that resembled the fixed character of the lofty model; and second, that conscious reflection upon the ideal, upon qualities thought to be typified in the stone face, had produced the effect, although the man who expressed these qualities had not realized either the great change in himself or his acquired resemblance to the model which inspired him. In this way it is a parallel to the results which follow the application of the laws of Christianity in individual experience.

All Christians have believed that such results are attainable, and many have revealed in greater or less degree the effects of their ofttimes unconscious and imperfect practice of these laws; but too generally they have not had sufficient understanding to practise intelligently. Probably the chief reasons for this are that the aspiring Christian has neither known of a rational, effective method of working definitely toward the goal of his highest hopes, nor had a clear concept of the model whose qualities he desired to manifest. These difficulties do not, however, really exist, because the perfect model—the Christ-ideal—has again been revealed in Christian Science, and the method of acquiring perfection placed within every one's reach.

As a primary requisite the aspirant must be sincere,—honest with himself,—"for he that cometh to God must believe that he is, and that he is a rewarder of them that diligently seek him." Willingness to "prove all things" is the next step. Then, too, he must be willing to be patient with himself in rectifying his shortcomings—in his attempts to obey the Master's injunction to be perfect even as the Father in heaven is perfect. In this attitude of receptivity he will be ready to contemplate the perfect model, man, who is defined in the first chapter of Genesis as the "image" and "likeness" of God. And in order to be sure of what this likeness or image is he must remember that the Bible defines God as "Spirit," "Love," "good," and "I am." From these definitions it is evident that man, the likeness or image of God, must be spiritual, loving, and good; that he cannot exhibit any other qualities. Therefore the model to be kept in mind is not the fleshly creature popularly called and supposed to be man, but its opposite, the spiritual image of God, the perfect man.

By keeping this spiritual model in thought the aspirant will readily learn to detect, renounce, and destroy unlikenesses to it as they present themselves, and to accept and emphasize the true qualities as he recognizes them and grows more and more "unto a perfect man, unto the measure of the stature of the fulness of Christ." This method, he will find, is clearly set forth in Science and Health. For instance, on page 261 he will read: "Look away from the body into Truth and Love, the Principle of all happiness, harmony, and immortality. Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts." In thus holding thought "steadfastly" he will not in any sense be forcing himself to believe something contrary to truth, but will be simply and calmly knowing that in spite of rampant falsity the truth is true, in the same kind of way he knows that, though black clouds are pouring rain, the sun is shining in a sky of cloudless blue above.

WHO SHALL DECIDE?

REV. CHARLES D. REYNOLDS.

IF Christian Science is untrue, as its opponents aver, in favor of what faith or doctrine would they have its followers abandon it? If Christian Scientists are to be allowed any Christian teaching whatsoever, what

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

shall it be, should they renounce Christian Science? Something must take its place, and what? Will the opponents of Christian Science champion pure materialism and offer it in exchange for the pure idealism of Christian Science? That would imply the acceptance of the proposition that the Supreme Cause, the creator of the universe, is an unconscious, self-created, non-intelligent, mechanical energy or force; a self-sustained mechanism, wholly devoid of the power to reflect or know.

Do not those who would offer this proposition in exchange for the teaching of Christian Science that the great First Cause is Mind, Spirit, know that no spirituality or religion of any kind is deducible from that basis? If the dynamic agent of creation is an unconsciously working material energy, a mere self-impelled stream of physical force with no self-knowledge or conscious purpose from start to finish, then man is wholly material, and with all else, death is the fate that ends all. Given this proposition, atheism—the denial of the existence of one infinitely intelligent God or Mind as the creator of the universe, and man's ability to prove his unity or spiritual kinship with this divine power—is an inescapable conclusion. Man cannot intelligently communicate with what is not conscious and intelligent, nor can the so-called laws of matter inspire loving confidence and the desire to lead a pure and upright life.

Perchance the opponents of Christian Science would recommend one of the innumerable dualistic systems in exchange for Christian Science? These are all semi-material. They all take their rise from the proposition that the spiritual and material are correlated and coexistent, if not also coextensive. If this hypothesis be accepted, then it must follow that Deity entered into partnership with matter or at least sustains some kind of relation thereto,—either made it out of nothing and entered it in part or wholly, or found it at hand—already existent—and entered it, or remaining external to it used it in some way as material to further His creative purposes. Or, as another theory supposes, Deity changed species and brought forth His creation by transforming Himself into the physical and material.

All these various theories follow logically from the fundamental proposition of dualism as stated, and these in turn lead into still more diverse and devious conclusions. They lead into variously contradictory and irreconcilable positions. In one direction they ultimate in a phase of theosophy and pantheism, making nature-worship the approach to God. Pursuing yet other lines of reasoning from the underlying premise of dualism, one student is led into agnosticism, while another reaches occultism, deism, or some other shifting form of belief. The dualistic proposition is "a house divided against itself," and furnishes the basis for an argument in favor of combining such opposites as spiritual prayers and material drugs for the sick. It stimulates the effort to band together free will and predestination, heaven and hell, good and evil, materiality and spirituality, into one consistent, harmonious system, and then urges men to be reconciled to the mystery of such a necessity.

The intelligent critics who recommend that Christian Science be abandoned in favor of some other teaching or doctrine must know that there are only three distinct systems of thought,—materialism, semi-materialism or dualism, and Christian idealism as taught in Christian Science; that, fundamentally regarded, there is not a philosophy, theology, opinion, or theory in the world that does not have its underlying basis in one or the other of these three propositions. If thoughtful they must perceive that in recommending Christian Scientists to abandon this divine idealism in favor of some other system, they unwittingly argue either for out-and-out materialism or for one of the innumerable forms of dualism, which Christian Scientists have already tested and abandoned because they found no satisfying peace or profit therein.

If those who deride Christian Science as a folly and delusion will first of all agree among themselves upon a system that is correct, and will prove by their practice that it is more definite and satisfying than Christian Science; that it is the one system by which the mighty works which were done by Christ Jesus can be redone for the world, then our critics will not need to urge us to abandon Christian Science. Such an event would make them missionaries in a good cause and further their contention better than can denunciation or a tirade of criticism. Surely the opponents of Christian Science must perceive that the issue in its final analysis is a question between materialism and spirituality; which is best, which is true and able to demonstrate its underlying proposition? In support of which proposition did the Scripture writers contend?

The only sufficient reason for abandoning Christian Science would be the discovery that it is not true. In view of the manifest failure of its critics to produce convincing evidence to this effect, Christian Scientists have abundant reasons for holding to Christian Science and steadily refusing every substitute which they cannot conscientiously accept. Surely those who seem to be antagonistic to Christian Science cannot reasonably expect us to renounce our loyalty to this Science merely on the basis of their opposition to it, unless they at the same time can point out a substitute that is better. In deciding which system they ought to accept, whose convictions are Christian Scientists expected to follow? Their own or those of their opponents? Who shall decide?

THE WHOLE ARMOR.

JENNIE E. SAWYER.

Wherefore take unto you the whole armor of God, that ye may be able to withstand in the evil day, and having done all, to stand.—ST. PAUL.

IN Paul's epistle to the Ephesians we learn of what the armor of the Christian consists, and how it ought to be used, that it is only through putting on the whole armor and wearing it continuously that we may fulfil the final command,—"and having done all, to stand." The human sense of "having done all" is very self-deceiving, for unconsciously we are apt to exaggerate our sense of effort and of accomplishment. We soon weary of well doing, and allow ourselves a respite as regards abiding in the faith. In turning the search-light of Truth upon our best efforts, we often find them so pitifully weak and small that we stand self-rebuked, and are shocked out of our self-complacency and sense of "having done all." We must know that the armor is a complete shield against all outside influence, condition, or circumstance, for in the unfoldment of those graces of the Spirit which the armor symbolizes, we have felt the necessity of purification, and of the renovation even, in every minor part, that we may not be hindered from wearing the "breastplate of righteousness;" that we may be "girt about with truth;" be able to carry the "shield of faith," and to wear the "helmet of salvation." Thus armed, and wielding "the sword of the Spirit," we needs must cast out every evil thought within sense and self, that would be a hindrance to our feet, which are to be "shod with the preparation of the gospel of peace," thereby making it possible for us to pray always "in the Spirit." It is not enough that we put on the armor; we must be clad in it continuously and stand in the full consciousness of its completeness and power to meet any unforeseen exigency.

It would seem that a clear discernment of the whole

Digitized by Google

process of spiritual warfare is necessary, for otherwise our armor may be displaced and the "fiery darts of the wicked" be able to penetrate, and thereby render us unable to "stand." This Scripture brings to our consciousness the great difference between our first understanding of Christian Science and its present demonstration. At first the demand on students seemed so simple and easy to meet, we merely grasped the idea of praying aright, and the healing came in such a wondrous fashion that we stood astounded at seeing so little faith bring so great a reward. The healing of sickness was our chief aim, but as through the teachings of our beloved Leader we are shown how to overcome sin, we advance in the understanding, become "strong in the Lord, and in the power of his might." We then find the necessity for putting on the whole armor to meet the more subtle forms of error, the "wiles of the devil," and learn that this blessed truth not only heals the flesh of its ills, but undoes wickedness and sin. We soon recognize the necessity of further purification within, and the need of taking firmer hold of Truth, of recognizing more clearly the mighty power and ever-presence of Love, literally hiding ourselves in the "secret place of the most High," that we may surmount the greater sense of evil which becomes manifest in the world, instead of combating evil or contending against it with force.

When as Christian Scientists we put on the whole armor of God, thereby making God's power and presence meet the demand through our reflection of His righteousness, His love will be shadowed forth through us to the undoing of hate and the casting out of fear. We thereby become true soldiers of Christ and are veritably living, moving, and having our being in divine Principle, which governs and controls our every thought, word, and act. Thus are we shielded and protected while doing His service—reflecting His power and presence.

The essential need that we "stand" clothed in the complete armor, grows upon us more and more as we advance in the understanding of Christian Science, for our progress demands an entire separation from sense and self. Thus the command to "stand" seems even greater than to have "done all," for standing requires steadfast, unwavering faith, and reliability of motive and purpose; a trust and faith stayed on the Lord which our former activity may not have called forth. We needs must realize that the true spiritual healing rests on our standing as Truth's sentinel or guard, reflecting consciously His completeness, requiring the consecration of every thought and faculty to this divine service. We do not overcome error or evil by retaliation, nor by personal resentment, but rather by so imbibing the Divine light and love that we may hold our own personal opinion or judgment in abeyance, thereby letting God find through our steadfast faith an avenue whereby He may use us to His own glory in rebuking sin and casting out error. We thus feel the imperative need of "praying always with all prayer and supplication in the Spirit, and watching thereunto with all perseverance."

SAMARIA AND JERUSALEM.

LOUISE DELISLE RADZINSKI.

And they did not receive him, because his face was as though he would go to Jerusalem.—*Luke*, 9 : 53.

WHAT happens when a man turns his face to Jerusalem, the city of the God of peace? Do the inhabitants of Samaria come forth from their villages and towns (their habitations of thought) to welcome him, to bathe his feet, to refresh him with food? When our Master, Jesus the Christ, passed through Samaria in the first year of his public ministry, his words to the woman who came to the well as he rested there (for the Scripture tells us he was "wearied with his journey") were received by her as the words of an inspired teacher, and she carried to her friends in the city the news of one who had told her all things she had ever done. Many of the Samaritans from that city believed on him, and came and besought him to abide with them; and he abode with them two days, and many more believed because of his words, for they realized that he was indeed the Saviour of the world.

The apostle does not tell of healing then performed, but we know that no one ever heard Jesus teach the love of God and the truth of Life without being blessed and healed; it was where unbelief ruled and closed the hearts of men that no great wonders could be done. These people received him and believed on him, and we may be sure their trust was well rewarded, that the two days Jesus spent among them were fruitful of good works and left a fragrant remembrance of the great Teacher.

Two years later Jesus set his face toward Jerusalem, sending messengers before him to announce him and make ready for him on his way to the holy city; and they went and entered into a village of the Samaritans to make ready for him. But the people of this village did not receive him, because his face was as though he were going to Jerusalem. Jesus was not looking for rest among them; they should gain nothing apparent to sense by entertaining him; therefore they did not receive him. His face was as though he were going toward the city of peace, there to give the highest demonstration of obedience to the Father's will, that the truth of life might be made manifest before all men, and they refused the priceless blessing of sheltering and serving him who brought with him the gift of true life.

Again is Truth's representative assailed by error; again is the messenger of Love refused a resting-place on the way to the city of the king of peace. Our beloved and revered Leader demands nothing of Samaritan, Pharisee, or scribe but privacy in her own home and time to assimilate herself to God,—to journey to the city of Jerusalem, and there dwell in the peace that passeth the understanding of men. She has given a lifetime to the service of her fellow-men; she has given generously of the result of her labors; she still sits at the foot of the cross, listening to the messages of Truth and Love, that she may continue to serve and enlighten those whom she has brought with her. Her face being turned toward Jerusalem, her feet being set upon the Mount of Zion, error would hold her back if possible, would strew a few more sharp stones in her pathway, to try her faith and her strength; but thanks to the one heavenly Father, His strength is hers, His power is hers, and no dream of evil can darken her path nor extinguish the light she has shed upon our way!

SOLOMON'S CONCLUSION.

J. PARKER NAUGLE.

THE great king and wise man who is supposed to have imbibed more of material knowledge than all his predecessors, near the close of his earthly career summed up his conclusions with the words: "Vanity of vanities, . . . all is vanity." This was the conclusion of one who had had the most wonderful experiences, and who seemingly had all the material blessings that could fall to the lot of man, but who had gradually become submerged in materialism, while still struggling to impart to his people a higher knowledge. No one was ever better fitted to arrive at a correct conclusion as to the value of materiality than was King Solomon. He had all that materiality can give,—riches, honor, and power greater than that wielded by any of his predecessors,—all that the world believes to be essential to happiness; but he had glimpses of reality, and in his more inspired moments he proclaimed all else to be vanity,

Digitized by Google

nothingness. Until this conclusion was reached he had failed to realize the truth of being,—that happiness is a product of Mind, and that this alone is real and eternal.

How many of us have wandered in the wilderness of materialism, seeking happiness in self-gratification and self-love, until the truth dawned upon our mental vision, through Christian Science. Daily I thank our dear Leader for the truth given to us through Science and Health. It came to me after many years of ritualism and creed, and I had much to unlearn before I was ready for the revelation. Like Solomon, I had to learn that human philosophy and experience are vanity and nothingness. Then, and not till then, was I ready to accept Mrs. Eddy's inspired and inspiring words, "All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). Christian Science takes up the life-problem where Solomon left it,—proclaiming material belief as vanity, nothingness,—with the declaration that God is All. It unfurls the banner of Truth and points us to the highway of freedom from the bondage of mortal beliefs, and shows us how we may possess the most wonderful peace and joy through the knowledge of divine Principle, of God as Life.

Christian Science is rapidly bringing the truth to our age, and is changing the entire trend of thought. It is the finger-post pointing the way to the true life. It is showing daily the worthlessness of material things and the great value of spiritual things. It is staying those in the mad race for wealth, and opening up before them the untold treasure which visions of material things had obscured. It is opening the flood-gates of Love, and bringing peace and joy to the disappointed searcher for Truth, who like Solomon had found that neither riches nor pleasure could satisfy.

When established firmly on the high level of Christian Science, following in the footsteps of our great Leader, daily working in obedience to the divine Principle of harmony, we may be stripped of all material possessions, and then find that we have but entered into a joy so great, a peace so sublime, a happiness so intense that we, too, will see that all earthly things are vanity. This instinct, this desire for true happiness, dwells in every breast, but how is happiness to be found? Christian Science answers by pointing us to the life-giving Principle of being. Thinking and working in accord with this Principle, solving our daily problems by the understanding of Love, true happiness and glorious glimpses of the future will be obtained.

[Written for the *Sentinel*.]

PERSPECTIVE.

MARION COOK.

WITH face close-pressed 'gainst this o'ershadowing wall
Of dense materiality, which seems
Impenetrable, immeasurably tall,
Opaque; defiant of our sorry plight,
Which thus permits no glance to left or right
(So close we stand—too close to focus true);
O mortal man, draw back! One step! One more!
Unloose thy hold, and see! the wall recedes!
No more it towereth huge—earth's mighty myth,
The dread reality to human sense;
Its dark proportions shrink, nor height impedes,
A new perspective is thy recompense.
A glimpse of freedom, as now faint and dim,
It croucheth low upon the horizon's rim;
Until some perfect day it vanisheth,
And God's own man rejoiceth in the view!

SELECTED ARTICLES.

[Elizabeth Pogson in *The Yorkshire* (England) *Herald*.]

Editor Herald:—Having once held the same opinions as your correspondent "Fairplay," regarding Christian Scientists and their asserted neglect of the children's health, I feel it my duty to enlighten him as to why those opinions changed. Seven years ago our little boy, then one month old, developed gastritis in a severe form. Six months previous to that we had lost a little girl, six months old, with the same complaint. She had been under medical treatment since her birth. The boy was under the doctor's treatment for eleven months, having the best medicine he could give him, and as this certain medicine was so expensive the doctor never resorted to it except in extreme cases. The latter part of the time the boy was supposedly kept alive on blood from raw steak. His condition was so bad that he had to be weighed twice a week for the doctor to tell if there was any change at all. When he was nearly twelve months old he weighed eleven and three-quarters pounds.

Just at this time Christian Science was presented to us, and after passing the usual criticisms and condemnation upon it, we decided to put it to the test upon myself, and I was wonderfully healed in five days of varicose veins. Still we dared not even then trust the children to it, for we would never dream of going to bed without the boy's medicine by our side. Soon, however, the time came when we knew that we must trust God with our children as well, so we threw away the medicine. That night the child had a bad attack, screaming with the usual pain, and I can assure you it would have been far easier for us to have given him a dose of medicine and consoled ourselves with the thought that we had done our best, than to sit up, after a long day's work, and read the Bible and the Christian Science text-book, and try to realize the omnipotence, omnipresence, and omniscience of God, also what Jesus meant by "the will of God." But this we did, with the result that in fifteen minutes he was quietly sleeping, and slept till morning. The next night he had another attack, which was overcome in less time, and that was the last attack he ever had, and very soon he began to manifest health and was able to eat food of any sort.

Now let "Fairplay" picture to himself a boy, strong and sturdy, who can eat anything at any time and do anything, and then picture what he gave promise of becoming if he lived, a sickly child, always suffering, kept on special diet, and unable to enjoy the sports of other children; then your correspondent will be able to judge whether we "neglected the health" of our child in giving him Christian Science treatment. Looking at these facts, is it any wonder that I should feel grateful to Christian Science and be only too willing to help any of the hundreds of mothers who are being worn out through the constant care of sick children?

[Willard S. Mattox in *The Scrantonian*, Scranton, Pa.]

In your issue of May 19 you comment at length upon Christian Science, and in the course of your remarks I note that you refer to the science of spiritual healing, which Mrs. Eddy has discovered, as being in reality the same art which was understood and practised by the apostles. This is exactly the position maintained by Mrs. Eddy with respect to her discovery. It should be remembered that Mrs. Eddy does not claim to have invented or created anything new. She says of herself that she is the Discoverer of Christian Science and the Founder of the religious denomination based upon the spiritual truths she discerned.

The writer of the editorial in question seems to disagree with the teaching of Christian Science that sickness and all bodily discord are the results of sin. I think you will find it possible to give your consent to this doctrine when the definition of sin is elaborated somewhat. As understood in Christian Science, sin is not a designation for a specific wrong act, but it is used in a generic sense to describe all unspiritual or un-Godlike thinking or being. The belief in any power, mind, being, creator other than God is sin, according to Christian Science terminology. There may be gradations of this belief in some other power beside God. It may be a moral and otherwise good belief about existence, present or to come, or it may be depraved and sinful, in the human sense of sin, but Christian Science classifies all that is unlike Spirit or God as sin. Cruden's Concordance to the Bible defines sin as "any thought, word, action, emotion, or desire, contrary to the law of God." Jesus said that he came to fulfil the law of God, and he also said that he came that mortals might have life more abundantly. Then it must have been according to the law of God that man should have immortality. Paul said plainly that "sin entered into the world, and death by sin," and again he said, "The wages of sin is death," and "to be carnally minded is death." What does this indicate but that the condition of existence precedent to dissolution is sin, *i.e.*, some phase of the carnal or mortal mind, and that sin is the cause of death. When death is not brought about by a violent accident it is the result of sickness of some kind; consequently, we have a right to argue that sin is the cause of sickness, accident, and death.

The schools of medicine have begun to recognize that evil or sinful states of mind produce a derangement of the organism. Such emotions as hatred, jealousy, revenge, anger, remorse, guilt, shame, fear, and inordinate desire have been known directly to engender diseased conditions of the human body. If this is a recognized fact,—and it is,—who shall say what is and what is not sin, or who shall say that the moral and ethical do not bear a vital relation to man's well being?

There is no evidence to prove that St. Luke was a practising physician after he became a disciple of Jesus. Jesus himself was the Master physician. He was the most competent the world has ever known, and he used neither medication nor surgery to bring about his cures. He taught his disciples his method of healing, and it is impossible to believe that St. Luke could have remained three years under this teaching and could have continued to practise the drugging system, which was at that time much more crude than it is to-day, and correspondingly inferior to Jesus' system. Jesus is also spoken of as the "great Physician," but that does not warrant us in asserting that he was a medical practitioner in the sense that he wrote prescriptions calling for material remedies. His prescriptions and remedies were all spiritual, as were those of his disciples, including St. Luke.

[Christian Andersen in the *Portland Oregonian*.]

Christian Scientists are not satisfied with saying that because our fathers had no exact or demonstrable knowledge of God, therefore we should be satisfied without such knowledge. They claim that through the efforts and sacrifices of one great and good woman, in striving to follow her Master, at least something of exact knowledge of God has been gained. They also claim that this knowledge is demonstrable, and point to the works as the demonstrations. They say that these works, or demonstrations, bear the same relation to what will be possible in the future that an example in simple arithmetic bears to a problem in differential calculus. Now, if these claims of good works were injurious to any one, or altogether false, it might be justifiable to criticise them (that is, if charity, or at least fairness, were observed in such criticism); but the amazing thing is that these claims seem stubbornly true. They may and do seem extravagant to many people, mostly because it seems to be too good to be true that an exact and demonstrable knowledge, however small, can be had of the very secrets of being and life. But after all, is it really a self-evident fact that nothing can ever be known beyond what these learned critics decree are the limits of knowledge?

The Christian Scientists say it is undeniable that there is such a thing as the truth about these matters, and that it seems reasonable that at some time and in some way this truth will become known. They claim that the time for the beginning of this knowledge has come—pointing to the works, they ask, "Why not?" Thousands of men and women, including doctors of divinity and medicine, have approached Christian Science in an attitude of doubt, and found to their amazement that cases of disease of many years' standing and of a nature commonly supposed to be the farthest removed from the class that can be cured by hypnotic suggestion, have suddenly vanished; undesirable traits of character or offensive habits have suddenly appeared so obnoxious that they have been abandoned. When you ask the Christian Scientist how it is done, he says, "It is by the application of a very little exact and demonstrable knowledge of God, and the reason that you do not understand it is that it is so very simple." . . .

Christian Scientists declare that God can be understood, and that in order to understand Him you must sometimes deny the evidence of the physical senses. This seems as hard to do as to reconcile the contradictions of the orthodox creeds. However, Christian Science has this advantage—its fruits are good.

Some time ago I noticed a striking example of these fruits: A number of Christian Scientists were together in one of their Reading Rooms. Some one mentioned an attack on Christian Science by a minister of the gospel. One of those present remarked that this critic had been helpful to her in enabling her to discipline herself to love and forgive those who ridiculed her and sought to injure the Cause of Christian Science. This remark was made in dead earnest and was taken as a matter of course by those present. Think of it—imagine an optimism strong enough to see a blessing in a thing like that; and a charity to match. These people actually seem to think that the command to love their enemies is meant in earnest.

[John A. Webster in *Conneaut* (O.) *News Herald*.]

When Mrs. Eddy declared in "Science and Health with Key to the Scriptures" that there is no matter, a great storm of criticism from materialists, theologians, and so-called material scientists, was raised against the fundamental teachings of Christian Science. A more respectful and greatly changed view is now taken by the more philosophical and thinking public. Some of the world's most renowned philosophers, Spencer, Darwin, Huxley, Tyndal, Leibnitz, Kant, Lutz, Balfour, all advanced material scientists, are practically united in declaring that what appears to be matter to the evidence of the so-called five physical senses, is but a prolonged deception, and Professor Fiske, an eminent physical scientist, says "there is no such thing as matter."

Until recently matter was supposed to be composed of infinitesimal molecules called atoms. An atom being the smallest subdivision of matter, it was supposed to exist only in mind, as it could not be recognized by any one, or all, of the physical senses. Recent experiments with this atom by physical scientists have led them to incorporate in recent deductions the result of their discovery, that matter is composed of force and not of atoms. Under quite recent date a

Digitized by Google

well-known religious magazine said, "Nothing less than a divine revelation is the great discovery that the solid frame of nature is not only made by intelligence, but is a compact of intelligent energy, the qualities of what we call matter, weight, immobility, resistance to touch, being only the manifesting of the force that constitutes it." From this it is evident that Mrs. Eddy's statements were not only true, but that they were made in advance of all experiments by so-called scientists.

The common error of misinterpretation, of wrong and illogical reasoning, often leads one not familiar with Mrs. Eddy's writings and the teachings of Christian Science to very erroneous and ridiculous conclusions. "There is no disease," to a Christian Scientist, is equivalent to saying, "God created nothing but what He pronounced good. His creation is real and eternal. His laws are unchangeable and eternal. Disease is not good, therefore it is not real and eternal. The so-called laws of disease are changeable and temporal, therefore disease is a law of mortal or carnal man, and is not a part of the real or spiritual man, made in the image and likeness of God. If disease is not real and eternal, and is not a part of God's law, it has no existence in God's kingdom, and hence has no real existence. It is no real thing, but is what it seems to be. Therefore to God, and to the real man, there is no disease." . . .

It is the spiritual realization of the nothingness of things as they seem to the senses, and the allness of things eternal, the deep consciousness of the existence of the substance of things not seen, by which bones are restored, muscles relaxed, and tumors dissolved. Such practices and teachings of Christian Scientists do not belittle the mighty works of Christ Jesus, but on the contrary prove his mighty works to be possible to those who follow his precepts. Our Master did not recognize the power of sin, disease, or death, as being greater than the law of love, harmony, and life, for he told his disciples that Lazarus was not dead, but asleep; and a conscious realization of life as apart from the body, by Christ Jesus, restored Lazarus to his loved ones. Again, of Jairus' daughter, he said: "The maid is not dead, but sleepeth," thus proving that he denied every evidence of the physical senses.

[W. E. Brown in *Corona* (Cal.) *Courier*.]

The healing which results from Christian Science is entirely different in Principle and effect from that of faith cure, mental science, hypnotism, and other methods which the uninformed think are akin to Christian Science. Hypnotism and mental science affect the individual through the operation of the human mind, while Christian Science excludes this mind in its practice and relies wholly upon its understanding of the divine Mind to destroy evil and sin. Again, these systems of the human mind in making their cures—which are always temporary—do not improve the patient spiritually. The Scriptures teach most emphatically that sin is the cause of all moral discord, the term sin including, of course, all unintentional wrong thinking and acting, as well as wilful disobedience. Hence there can be no true healing without the destruction of sin, and this is the real mission of Christian Science. It is very evident that the orthodox churches have not so taught, as witness their reliance on *materia medica*, hygiene, and other inventions of the human mind, not one of which was employed by Jesus or his followers. That Jesus knew sin to be the cause of disease is shown by his remarks to the impotent man at the pool of Bethesda: "Behold, thou art made whole: sin no more, lest a worse thing come unto thee." To the man "sick of the palsy" he said, "Thy sins be forgiven thee. . . . Arise, and take up thy bed, and go thy way into thine house." While Christian Science differs from the orthodox teaching and practice, it does not differ from that of Jesus Christ; and its students, according to their degree of understanding, are healing the sick and reforming the sinner in compliance with his commands.

[Alfred Farlow in the New York *Sun*.]

Our critic affirms that "functional, hysterical, or nervous disorders" are the only "diseases which Scientists can relieve." We believe that we may safely leave this question to the army of intelligent, reliable persons who have been the beneficiaries of this Science. In describing the ailments with which they were afflicted previous to their experience with Christian Science they repeat only what they have been told by reputable medical diagnosticians, and if physicians have erred in naming their afflictions the burden of responsibility must be left with the physicians. Whether the annoying troubles of which Christian Scientists have been relieved were real or imaginary, the certainty of relief and their gratitude therefor are none the less.

Some time ago a lady who had walked on crutches for a number of years, because a broken leg had never knitted, was perfectly well after four weeks of Christian Science treatment. In commenting upon this fact a physician said: "She could have walked long ago if she had made the attempt." In view of such an argument (?) it would seem useless to contend about the authenticity of Christian Science healings. We think the better plan is to let the twentieth-century public decide for itself whether its neighbors, who have been found responsible in their affirmations concerning all other subjects, are telling the truth about their experiences with Christian Science. . . . Until medical practice becomes a sure cure, or an approximation thereto, there can be no justification of the assertion that any given case might have been saved by the use of medicine early or late. When we take into consideration that some of the most eminent specialists of this country and foreign countries place almost no confidence in medical treatment for pneumonia, and that in New York City alone between eight and nine thousand deaths occur every year under that form of treatment, we are inclined to believe that the campaign of public inquests recently inaugurated in New York City is not prompted so much by love for humanity, or by an honest conviction that giving the medical fraternity the sole guardianship of the public health is an essential to the safety of the community, as for the purpose of menacing the practice of Christian Science.

Regarding the treatment of children, parents are the natural guardians of their children, and Christian Science parents are not an exception to this rule. It may seem natural that those who have only a cursory knowledge of Christian Science should regard dependence upon this Science and an exclusion of medicine as neglect rather than help, but to the Christian Scientist who has had experience, first with medicine and last with Christian Science, it does not so appear. If one's neighbor objects to Christian Science treatment on the ground that it is an inefficient remedy, it behooves him to make a careful investigation, and such investigation should include an examination not only of the failures but of the benefits of Christian Science treatment; and not only the successes but the failures of medical practice, in order to insure a just comparison and a wise judgment. . . . We think that the general public will agree that no school of practitioners has proved itself sufficiently successful to point the finger of indignation at the failure of others, and that it is inconsistent for the representative of a school which, according to published report, loses one case of pneumonia every hour to find fault with another school which so far as we know has lost only two cases in a year.

[R. Stanhope Easterday in the *Muncie* [Ind.] *Star*.]

The fact that we see to-day, as the critic himself affirms, "many intelligent men and women" seeking Christian Science, is possibly no more "surprising" than it is significant, and is in itself a strong argument in support of our contention that the Rev. Mr. S. errs, as is invariably the case with critics of Christian Science, in his conception of Mrs. Eddy's teaching. Paul indeed preached the resurrection of our Lord, and Mrs. Eddy lays no less stress upon it than did he.

Christian Scientists very reasonably concede the difference between our Lord's clear spiritual grasp of the truth which resulted in instantaneous healings and their own poor efforts to emulate the same, but they justly maintain that an honest though feeble effort at compliance with his specific command to heal the sick is, to say the least, commendable, finding a gratifying degree of consolation in his promise to every true follower, "The works that I do shall he do also," augmented by a degree of success that is already commanding attention. Those redeemed through the benign agency of Christian Science teaching are already numbered by the hundreds of thousands. Those who come to Christian Science for help, furthermore, do so, in the majority of cases, only after all else has failed.

[John L. Rendall in the *Oskaloosa* (Ia.) *Herald*.]

In the statements made as to the cause of attack upon Christian Science, one can readily see the animus of the proposed opposition. This is not a new thing in the world's religious history. It finds its prototype in the attitude taken by the chief priests and leaders of ecclesiastical monopoly in Jesus' time, which impelled certain elements of human thought to the crucifixion of the one who brought to the world its message of salvation from sin and sickness. If, as stated, many intelligent thinking men and women who are prominent in various denominations are leaving the same to unite with the Cause of Christian Science, it is because Christian Science offers them something which is evidently more satisfactory to their religious cravings than they have been enabled to find in their former church connections. This is a time of practical things—outgrown and outworn ecclesiastical dogmas and creeds are no longer sufficient to satisfy the enlightened religious thought of this age. Christian Science has presented to the world a satisfactory, reasonable, logical, and practical teaching of Truth, and the fact that intelligent people in and out of the denominations have accepted it and found peace within its borders is significant in itself. It is perhaps needless to say that no effort, whether organized or unorganized, whether in the open or subtle, can ever overthrow a positive and demonstrable teaching of Truth. If, as stated, the Church has failed to meet or "forgotten" to meet the practical needs of its membership, "the Church" should take pattern by Christian Science, which is meeting those needs and presenting to the world the teachings of our Master in their completeness.

[Lloyd B. Coate in *The Urbana* (Ill.) *Tribune*.]

To rightly understand Christian Science one must take all of its teachings and not detached sentences here and there. When Mrs. Eddy uses the phrase "divine Mind" she means the same as Jesus did when he spoke of God as Spirit, or as St. John did when he wrote, "God is love." When she speaks of matter as unreal and sin as unreal, she speaks from the spiritual and not the human sense of things. To the human sense of things sin, sickness, and death are real. When a man indulges in sin he makes sin a reality in his own belief, but when he accepts Christ and lives a Christian life he no longer sees pleasure in sin; then it becomes unreal to him; he beholds its powerlessness. The horrible things beheld by a man with delirium tremens are very real to him; but when he reforms from drinking, no longer indulging or seeing pleasure in a sinful life, he can see the awful unreality of that phase of sin. Darkness seems very real, but when light is admitted darkness disappears. The Scriptures speak of a time when a new earth and a new heaven shall appear; when all tears shall be wiped away, when there shall be no more pain and no more death. As this spiritual state of consciousness dawns upon mankind we shall see the unreality of sin, sickness, and death. The beloved disciple John saw this while on the island of Patmos. Christian Science teaches that in proportion as we come into possession of the same Mind manifest in Christ Jesus, we are able to help the sick, the suffering, and the sinful.

[V. O. Strickler in the *Truth Seeker*.]

In all the centuries that have intervened, it is doubtful if one single person has been prevented from believing on Jesus because of his refusal to cast himself down from the temple. He knew a better way to exemplify the power of God. The application of this incident to Christian Science is obvious. Christian Scientists believe that God is omnipotent, but that would not give them the right deliberately to put themselves in places of danger, as a dare or challenge to the Almighty. Christian Science teaches that God is an ever-present help in time of trouble, but not that one has the right purposely to place himself in such a position and then demand that God extricate him. Such action would instantly be recognized as improper even towards an earthly father. . . .

Christian Science has healed and is healing the sick through a right understanding of the teachings of Jesus. . . . No higher proof can be given than this.

OLD HOME WEEK.

Under the auspices of the Boston "Old Home Week" Committee, on Wednesday afternoon, July 31, at four o'clock, an organ recital, to which the public were invited, was given in the vast auditorium of The Mother Church, by Mr. Albert F. Conant, assisted by Mrs. Helen A. Hunt, soloist. The church had been open throughout to the public during the day, and large numbers of visitors availed themselves of the opportunity to see it. The auditorium of the church was crowded long before the beginning of the recital, and hundreds were unable to find even standing-room. Many of the visitors were doubtless in a Christian Science church for the first time, while a goodly number were Christian Scientists from distant points. There were many expressions of the pleasure received from Mr. Conant's rendering of well-known selections on our splendid organ, the chime effects being especially pleasing. Mrs. Hunt's excellent singing of two solos was greatly appreciated by all who were present.

A POCKET EDITION OF THE HYMNAL.

In response to many requests for a hymnal suitable for carrying in the pocket, a new edition of the *Christian Science Hymnal* has been issued. This edition is called the Pocket Edition, and is bound in full morocco, with round corners, gilt edges, and leather lining inside of cover. The size is $4\frac{3}{8}$ x $6\frac{3}{8}$.

The price for a single copy, prepaid, is $3.00, and for twelve or more copies to one address, prepaid, $2.50 each.

Send orders to THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, 250 Huntington Ave., Boston, Mass., U. S. A.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. *Beware of counterfeit letters.*

"THE JOY OF THE LORD."

We have before us a copy of *Zion's Herald* containing a symposium contributed by "representative ministers in our midst," in response to the editor's inquiry, "Is there anything in Christian Science, so called, that Christian ministers should recognize and utilize?" As might be expected, the sixteen clergymen whose views are given differ widely in their estimate of this faith, but the intolerant attitude of some of these gentlemen is hardly what might be expected of professed followers of the great Master, who commanded his disciples to heal the sick.

One gentleman is so pronounced in his opposition to the teachings of Mrs. Eddy that he would consider he had stultified himself should he use the word "Christians" in describing her adherents, and he makes use, among other epithets, of "renegade Christians" and "a company of backsliders" in expressing his views. Another, who is somewhat less violent in his general attitude, pronounces this faith "irrational, unscientific, unchristian, and unbiblical;" yet he practically admits that it is doing for humanity what his own church is not doing, and of which he says, "If we allow others to do it [preach this practical Christianity], while we are not living up to our high privilege, we have ourselves to blame." A significant feature of several of the answers is the *quasi* admission that the healing of the sick is a part of Christianity which had been sadly neglected by the Church until Christian Science again called it to the attention of the world. Of this healing one contributor writes, "What people want to-day is what they once filled the streets of Capernaum and tore up house roofs to get."

We are glad, however, that the desert of intolerance to which this symposium might be compared is relieved by one oasis of Christian and brotherly appreciation, in the shape of a letter from the venerable and universally beloved Rev. Lewis B. Bates, D.D., of East Boston, which we quote in full as follows:—

In answer to your question, "Is there anything in Christian Science, so called, that the Christian ministry should recognize and utilize?" permit me to say that, in my judgment, there are some things in Christian Science which any Christian minister would do well to recognize and utilize:

1. Their positive faith. They testify by thousands that they have been helped, physically, mentally, and spiritually. On this line their testimonies sound much like those of the fathers and mothers of Methodism a generation ago. At present the spirit of testimony is very quiet in the church.

2. Their spirit of charity. When reviled and attacked by those who know but little about them, so far as I am informed, they manifest much of the spirit of the real Christ.

3. The beauty and consistency of their lives. Many of them are living lives above reproach. For the past thirty years my work has called me for a portion of my time into the lives of the unfortunate and afflicted of our great city. In this work I have been aided many a time by so-called Christian Scientists. "By their fruits ye shall know them."

4. Their constant reliance upon living in harmony with God's Spirit. Ours is an age of materialism. We need more of the Holy Spirit in all of our efforts to help humanity.

5. The joy of their lives. "The joy of the Lord" is the strength of any man, and any system of religion and philosophy which emphasizes this element is strong because of it (Luke, 9: 49, 50).

I believe in "creative criticism" alone. Let me thank you, Mr. Editor, for the positive form of your question.

ARCHIBALD McLELLAN.

GRATITUDE.

It is not always seen that the great changes which are taking place in the material world but indicate the changes which have come about in the thought world,—that just as hitherto unknown elements are being revealed by chemistry, so we are beginning in Christian Science to recognize mental and spiritual qualities which were formerly unknown, or at least held to be of but slight importance. Through its teachings we learn the necessity of expressing those mental qualities which bespeak a recognition of the infinite Mind and a response to its activities. In *materia medica* it is considered of the highest importance to study disease in order to overcome it, but in Christian Science we are taught that it is necessary to understand all the manifestations of God, good, in order to destroy evil.

In the days of Christ Jesus and his followers, the desert wastes of human experience began to blossom and to bring forth the fruits of Spirit,—"love, joy, peace," etc.,—and thankfulness or gratitude for the healing truth was never absent from this fruitage. In witness of this we are told of the "very costly" ointment which Mary of Bethany poured out upon the feet of the Master who had but a few days before called her brother from the tomb. We are also told of the costly spices and ointments, "an hundred pounds weight," which Joseph and Nicodemus provided for the burial of Jesus. These were said to have been of immense value, worth a king's ransom, but they were not too costly to symbolize the gratitude of those who had learned from the great Teacher what it means to be "born of the Spirit." Mortal malice had offered Jesus the vinegar and the gall, but at the very hour when the cause of Truth seemed to be shadowed by defeat, these two hitherto unavowed disciples were prompted by gratitude to confess their loyalty to this cause and to give freely of their wealth in return for the treasures of Truth.

There are some who do not understand why Christian Scientists should express so much gratitude to the Discoverer of Christian Science. One writes that she did not understand this gratitude until she herself experienced the joy of healing another, and saw that other's thankfulness for being saved from a dread disease. "Then," she says, "my own gratitude overflowed to all to whom I was indebted for this understanding. I can never pay my debt of gratitude to Mrs. Eddy for the patient, persistent giving out of her discovery to the world, but I can try to pay part of it by passing on this truth to some other who needs it. It is the overflow that enriches!"

People do not think it wrong to express, even in extravagant terms, their appreciation of some teacher who adds to their store of human knowledge, but with strange inconsistency they protest when those who have been healed in Christian Science return heartfelt thanks to the one who has brought to humanity a knowledge of the saving truth. If all could but know that thankfulness for the healing, and even more for the understanding of the truth which heals, is a sure symptom of mental and moral health, they would encourage its every wholesome expression. They would also see that its expression is an aid to the fuller realization of the healing powers of Truth. Our revered Leader says, "If pride, superstition, or any error prevents the honest recognition of benefits received, this will be a hindrance to the recovery of the sick and the success of the student" (Science and Health, p. 372). This "recognition" is often the very thing needed to bring out the healing, and when it is attained gratitude will flow out as a stream of living water, refreshing its channel and blessing those who drink of it. Paul says, "With thanksgiving let your requests be made known unto God."

"AND FORBID THEM NOT."

SHE was just a little girl, lying on a cot by one of the windows of a great hospital, and over the wan cheeks and big brown eyes there flitted the lights and shadows of joy and sadness, patience and pain, laughter and longing,—the signs of ever-buoyant hope as well as of long-time trial. One hand supported her head as she looked out into that sunny world whose flowering paths she might not hope to enter, and with the other she toyed with a little flag, an emblem of the coming Fourth. The picture was touchingly pathetic, and it appealed to a passer-by in a way that well-nigh moved him to tears. He stopped a moment, and, raising his hat, waved a kindly greeting to the little sufferer. A sweet, sad smile and a gentle nod came back in swift return, and the bonny flag waved him a brave and cheery good-by as he went upon his way.

It was another glimpse of that torture of innocence with which human life so abounds; and which in all history, as in all the world to-day, records the refinements of error's cruelty. It led him to think of the vastness of the array if from the world's hospitals and homes there were gathered all these children of suffering. They belong to God's open air as surely as do the birds and the water brooks, and yet they are not only denied their heaven-willed freedom, they are manacled with the fetters of a felon! Why this iniquity, and by whom?

Jesus said, "Suffer the little children to come unto me," and can any Christian question what that coming would mean for such as these? Is the essential Christ absent from the world to-day? If not, who has dared to "forbid" to innocency the liberty and happiness which belong to it by every right of divine inheritance, of promise, and of desert? Surely "an enemy hath done this," and none other can he be who perpetuates the unspeakable tragedy by hindering the response these children would so gladly make to the Master's loving call and beckoning hand.

No one with half a heart could wrong them knowingly, and yet, in believing and declaring for the laws of heredity and of disease the human sense of every one of us has certainly been a party to this despicable business. Yes! let the fact be uncovered in all its repulsive nakedness, that "the exceeding sinfulness of sin" may appear and beget in us a revolt no less strenuous and outspoken than was that of the psalmist when he said of the enemies of Israel, "I hate them with a perfect hatred."

Humanitarians may provide the most favorable conditions, the most highly recommended alleviations, and the most kindly care for these sufferers, but in its ignorance of spiritual law material sense is ever bearing false witness against them; day by day it is multiplying and enforcing those exactions of mortal law which bind their tender limbs to the rack,—that law of disease and death which cannot be of God, and which Christ Jesus specifically declared and demonstrated that he came to annul and overthrow.

Christian Science reveals the relation of material sense —the false beliefs we have both indulged and maintained— to this torture of gentle innocency, and if Mrs Eddy had wrought no other work than that of awakening humanity to the more spiritual apprehension of Truth by which men recognize their responsibility in these wrongs, she would have merited the loving appreciation of every present and prospective parent in the world.

To be kind to the cripple means very much more in Christian Science than to supply him with an improved crutch. It means that our every thought shall be his advocate and helper. It means that at all times and in all things we shall abhor and separate ourselves from that consent to materiality and sin which has registered and still registers its wicked and unjust rule in the faces of the unnumbered little ones who think longingly of our freedom as they see us passing by.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Chicago, Ill., July 20, 1907.

Beloved and Revered Mrs. Eddy:—In acknowledgment of recent magazines containing articles by Christian Scientists, which I sent to Mrs. Adèle von Portugall, I received the enclosed two postal cards, the translation of the part written in Italian being as follows:—

"*Dear Friend:*—I received what you sent me and read it with great interest. It displeases me that Mrs. Eddy, for all the good that she has done and is doing for humanity, gathers so much ingratitude. But this test, which would destroy the peace of anybody, for her is nothing but a victory of Spirit over error."

Mrs. von Portugall is and has been for over twenty years the Directress of the Froebel Normal Institute in Naples, Italy, which college was established by virture of a dictatorial edict of General Garibaldi, in the year 1860, an edict which has been sanctioned and respected ever since by the Italian Government. Mrs. von Portugall is a German lady, who spent many years in England devoting herself to the cause of woman's education. She learned of Christian Science a few years ago by studying "Science and Health with Key to the Scriptures." A voice coming from a land that has known abjection, and expressing the correct sense of the Revelator of Truth, who dwells with us as the representative of Principle, gladdened my heart, and I felt that I should forward it to you.

As one of many thousands who have been redeemed from hopeless ignorance of God by your utterance of the truth, I have known what Life is for over twelve years, and I am, as a follower of Christian Science, praying and confidently waiting for the complete establishment of the kingdom of God on earth.

With a profound sense of gratitude and an ever-increasing appreciation of your example of divine Love, I am

Your student's student,

ERMETE VENNI.

Marinette, Wis., June 27, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Dearly Beloved Leader:—Our students' association has for some time past desired to express its deep, loving gratitude to you, our precious Leader, for the unceasing labor of love you are constantly bestowing upon us.

Science and Health is our wayshower and guide, the voice of God to us, and words are inadequate to express our deep gratitude for this dear book. The crucial ordeal through which you are passing in this hour of persecution reminds us of the Scripture, "They parted my garments among them, and upon my vesture did they cast lots;" and we know that the same divine Love and presence which sustained the Master is sustaining and comforting you.

We thank God for giving us such a Leader, and have perfect confidence in your leadership as the channel through which the true understanding of Life and Love is being borne to human consciousness.

Through our early class teaching with your loyal student and helper, Mrs. Laura E. Sargent, we imbibed a deep sense of gratitude, appreciation, and love for you as the chosen one of God who has discovered and founded the truth in this age, and especially do we want to thank you for your sweet life, its tenderness, gentleness, loving-kindness. The influence of this consecrated life of self-less love has always been a benediction to us, and we pray that we may ever be obedient, loyal, and loving followers.

Gratefully and lovingly,

THE COMMITTEE FOR THE ASSOCIATION.

Concord, N. H., Aug. 1, 1907.

Beloved Leader:—It was my privilege to be present for a short time at the organ recital at The Mother Church on Wednesday afternoon of this week. It was encouraging to see the vast throngs of fine looking people pouring into the church from all directions. I visited the auditorium half an hour before the time for the beginning of the recital and found all seats taken except a few in the upper balcony. At four o'clock the standing-room was all taken and yet the throngs were still coming. There were hundreds, if not thousands, who could not gain admission. Are not these beautiful omens that the prejudice against Christian Science is reaching a vanishing-point, and that a true understanding of its beneficent mission is widely taking possession of the thinking public? I was told that the city had sent fifteen hundred programs, as they had done to the other churches, but there were four times as many programs required as furnished. It seems difficult for those outside of Science to realize its growth and the strong hold which it has already taken upon the public.

I could but note the kindly attention which was accorded to all visitors by the gentlemanly ushers of the church. It was pleasant also to notice many of your followers standing that seats might be given to the great throng of visitors. It was significant to observe the look of surprise and approval on the faces of the strangers. It does not require the son of a prophet to foresee that many who visited the church for the first time during Old Home Week will remember it as the dawn of a new experience in their religious life.

Yours lovingly,

IRVING C. TOMLINSON.

Baltimore, Md., July 12, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Dearly Beloved Leader:—Truly the hearts of all Scientists, those to whom your life-work and sacrifice have brought so much joy and freedom from bondage, must be peculiarly drawn to you in unspeakable gratitude, love, and tenderness this week, as they study in the *Christian Science Quarterly* the wonderful Lesson-Sermon on "Sacrament" for next Sunday. It is a clarion call to be up and doing, and once more calls to our mind that you have never forgotten to do kindly acts or to share your understanding of Truth with others, and that sacrifices of this kind are the ones acceptable to God (Heb. 13:16. 20th Cent. N. T.). Notwithstanding the onslaught of error, the world was never more alive to the fact that your works—which cannot be numbered—have always been for good only. God grant that your students may be sufficiently alive to the issues to watch with you and never forsake that for which you have striven.

Reverently yours,

WILLIAM M. GOODWIN.

Chicago, Ill., July 11, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—The members of Second Church of Christ, Scientist, of Chicago, send you loving greetings. Our hearts are filled with gratitude to God for the priceless gift we have received through your discovery and revelation of Christian Science. This Science is indeed the leaven that will "leaven the whole lump," the "grain of mustard seed," the "pearl of great price." Your precious book, "Science and Health with Key to the Scriptures," has unlocked to us the Scriptures, revealing God as the only Life, Truth, and Love, that healeth all our diseases; it has come "to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised." It is "turning our mourning into gladness," "our sorrow into joy." Our gratitude to you, dear Leader, cannot be expressed in words, but in deeds only; and our love and loyalty to you can only be measured by our willing obedience in following in the way you have so wisely, lovingly, and unselfishly pointed out. In this hour of seeming trial, when the great red dragon is endeavoring to lift its hydra head, we know that "there shall no evil befall thee, neither shall any plague come nigh thy dwelling," for "when the enemy shall come in like a flood, the Spirit of the Lord shall lift up a standard against him." "He shall cover thee with his feathers, and under his wings shalt thou trust: his truth shall be thy shield and buckler."

With much love, we are gratefully and obediently yours,

BOARD OF DIRECTORS AND TRUSTEES.

New York, N. Y., July 16, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—Although as one of the directors of the Reading Room work of Second, Third, Fourth, and Sixth Churches of Christ, Scientist, of New York City, I am represented in the telegram dated July 13, and sent to you in response to your letter to us, still there is such a sense of gratitude and love for your unceasing, wise, and tender watchfulness over all the avenues that are blessing mankind to-day with the knowledge of the truth as taught in Christian Science, that I feel I must express it personally. Surely a great and glorious day is at hand for you and your faithful followers when you, our beloved Leader, can stand amidst so many seeming shadows, and, undisturbed, continue to watch, guide, and counsel the broadening of these channels for the message of "on earth peace, good will toward men." Surely all barriers melt away when we recognize in place thereof only spiritual co-operation—and we can hear and follow the voice of Truth with a stronger faith when we acknowledge that there is but one center. Your letter to the directors helped me much, and made me realize as never before that we should all rejoice, for "our Father's at the helm."

Lovingly and gratefully.

MILDRED GORDON.

Canon City, Col., July 12, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—As a church we unite, this Friday evening before our Communion, in sending an expression of our gratitude, love, and loyalty to you for giving us Christian Science. We have all been blest beyond measure, and we hope to help you by gaining in understanding and giving the fruits to the world. To quote your own words, "They drink the cup of Christ and are baptized in the purification of persecution who discern his true merit,—the unseen glory of suffering for others. Physical torture affords but a slight illustration of the pangs which come to one upon whom the world of sense falls with its leaden weight in the endeavor to crush out of a career its divine destiny" (No and Yes, p. 43). We know the world of sense cannot devour one who dwells "in the secret place of the most High," and so near to the great heart of Love. Your beautiful example shows us you are "mounting to the throne of glory, in purity and peace" (No and Yes, p. 44).

Gratefully yours,

First Church of Christ, Scientist, Canon City, Col.

MRS. MINNIE S. AVERY,
Committee.

THE LECTURES.

ENID, OKLA.

A large audience turned out last night [June 27] to listen to the lecture by Miss Mary Brookins of Minneapolis, Minn., on the subject of Christian Science, at the new Loewen Theater. The speaker was introduced by Hon. Charles Moore of this city, who said in part,—

This new creed has made remarkable progress in the past few years, and has attracted to it many of the brightest minds of the age. Whatever our religious opinions may be we should seek further enlightenment and welcome any investigation that may bring us good.

The Enid Eagle.

LONDON, ONT.

The Grand Opera House was filled Sunday afternoon, June 16, to hear Mr. Edward A. Kimball deliver a lecture on Christian Science. The lecturer was introduced by William H. Huyck, First Reader of the Christian Science Church in London, who spoke in part as follows:—

Christian Science, at the present time, is uppermost in the public mind, and deservedly so, for it is a theme of absorbing interest, which is as sublime as it is beautiful, and sweet as it is simple. It is a religion susceptible of all good and no evil, and bears the same relation to health and holiness that music does to harmony. It is practical Christianity, which centers in the affections and radiates from the heart. In short, Christian Science is the religion of Love, which finds expression in goodness, and by virtue of its spiritual nature reaches out to all humanity and touches the farthest shores of thought.

Correspondence.

VENTURA, CAL.

Judge William G. Ewing lectured on Christian Science at the Lagomarsino Theater June 28. He was introduced by Judge B. T. Williams of the Superior Court, who said in part,—

It is a decided pleasure to me to introduce to you so distinguished a gentleman as the guest of the evening, to an audience so representative. This audience represents persons of various positions in our community, of many religions, of most of the professions, and of different occupations in life. The world has reached that point where no person with any claim to breadth or culture can afford to say of any plausible thought, when first advanced, that it is not true.

When Jesus came and taught brotherly love he was scorned and crucified, but his word has come to be the universal law. When Columbus claimed that the earth was round he met with no belief or sympathy, only with ridicule. Only one hundred and thirty-one years ago, when our forefathers proposed a government founded upon freedom, and in which all should be equal, the astonished world denied its possibility; but it came to pass and has blessed mankind. So when human slavery was challenged, it was said that it always had been, and consequently was right; but Lincoln wrote the verdict declaring it to be wholly wrong, and we all marvel that it ever could have been tolerated. I need not multiply instances. They are so numerous that they have taught the world tolerance, and the folly of denying a cause unheard. So it is with Christian Science; we will hear its cause with respect and decide its claims with justice. If it is all wrong it will perish, if all right it will live; but, live or die, we will praise or condemn it according to its merits and not according to blind prejudice. The question with each one of us is not whether the thoughts we shall hear to-night are new and strange, or that they conflict with our preconceived beliefs, but simply, are they true?

Correspondence.

AMONG THE CHURCHES.

ST. JOSEPH, MO.

With hearts overflowing with gratitude to God, and to our Leader, Mrs. Eddy, the edifice of Second Church of Christ, Scientist, 910 Edmond Street, was dedicated Sunday morning, June 30. The usual services were held, and were preceded by remarks by Mrs. Alice Fairleigh, who said in part,—

"If ye then be risen with Christ, seek those things which are above." To read the truth, to teach it, and to preach it, are comparatively easy; but to realize and live it are tests of true discipleship. The spirit, not the letter, is what we are earnestly striving for. The material church has been and still is a means of reaching some conception of our house within the veil, "an house not made with hands, eternal in the heavens." It is a candle-stick of the letter and the law, wherein we may place our lighted candle of truth, that it may shine with an undimmed light. Through all the past ages, even as now, have homesick prodigals sought the way to the Father's house through the means of an earthly shrine.

Doubtless there are those with us to-day who do not know as do we how great is the debt which mankind owes to our beloved Leader, but "these things are not done in the dark," and all must realize in a degree what a boon has been brought to mankind by her untiring labor of love. It is through this labor of love, and this kingdom of heaven in our hearts, that it has been made possible for us to dedicate this, our dear little earthly tabernacle, to-day. True, it is but a very modest little church, but the love which is manifested here proves that it is but an externalizing of our house within. The money with which the debt of our church was paid was raised without solicitation other than to state our need, and we have had only two donations outside of those directly interested in Christian Science.—*Correspondence.*

OTTAWA, ILL.

There has been completed in this city a beautiful little chapel which is a credit to the society in whose interest it was erected, as well as to the city generally. It is the new edifice of First Church of Christ, Scientist, and the first services will be held in the church to-morrow [July 28], both morning and evening.

This chapel is situated on Lafayette Street, just west of Reddick's library, facing Washington Square, which at this time is truly beautiful to look upon. As the new church is seen from the square it appears as a work of art and beauty, suggesting one of those temples of ancient Rome, renewed and set down amidst that group of public buildings which grace the city and are located near the northwest corner of the square—the library, Appellate court-house, the high school, and the Episcopal church. It seems eminently fitted to the surroundings. The entire building, both inside and out, is attractive and homelike, and is a credit to its architect and to the church building committee.

First Church of Christ, Scientist, of Ottawa, was organized as a society with five members April 5, 1897. Its organization under the State law was effected in January of the following year. It now has enrolled a membership of twenty-five.—*Republican Times.*

TESTIMONIES OF HEALING.

I am desirous to tell other sufferers something about the healing effected by simply reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. For upwards of twenty years I had suffered from time to time with severe rheumatic trouble and lame back, and the last four or five years I was compelled to wear a flannel band around my waist day and night. For many years I suffered at times intensely from liver complaint, and was attended by three different physicians, who each pronounced my malady incurable. The last one who attended me declared that I could not live more than three months at most. This was in 1901, and just at the time when Christian Science was first presented to my wife. I at first regarded the subject as nonsense, but took up Science and Health and read it carefully to ascertain for myself what it all meant, and in a very short time (I know not exactly when) I realized that I was healed. My diseases all disappeared, and I cast off my flannel band. From that day to this I have not only never had a return of these complaints, but not even a reminder of them. I had also been an inveterate smoker since my youth, but while I was reading this book (about the first week of my study) my pipe became nauseating to me, and since that time I have not smoked nor had any desire to do so. All my old friends tell me that I look twenty years younger than I did five years ago, and I can conscientiously state that I feel it. I used to be a scoffer and almost an infidel, but now my whole thought has been changed,—in fact I have been healed mentally as well as physically. I enjoy robust health and untold happiness.

I cannot find words to express the deep and sincere debt of gratitude I owe to our revered Leader for enabling me to discern the truth and prove beyond a doubt that Christianity is practical and that the kingdom of heaven is really "at hand." I sincerely trust that the experience which I have narrated will arrest the attention of some who are at present in a state similar to that which I so long endured; and that they may, like myself, be healed in body, renewed in mind, and made happy.

C. W. IRELAND, Seattle, Wash.

For fifteen years I suffered from stomach trouble. Having some knowledge of medicine, I treated myself, but at last was compelled to call a doctor. I was told that I had an affection of the liver, etc., but I received no relief from his treatment. Other distressing conditions began to appear, sleeplessness, spinal trouble, nervous and mental trouble,—so that I could not even write a letter. The doctor changed my medicine frequently, and said that I might pull through. I was residing in San Francisco during this treatment. About a year before this, while residing in San Jose, my sight began to fail. Thinking it was the natural result of age, I procured glasses, but obtained no relief. I then called on a physician, who treated me for six weeks, four of which were passed in a dark room with my eyes bandaged so as to exclude all light. He then told me that the eyes were well and ordered a pair of dark glasses until they regained their strength. Just about this time it became necessary to remove to San Francisco, and instead of my sight being healed I soon found that it was worse than before taking treatment, and one evening I found myself temporarily unable to see. I then went to the best oculist in San Francisco, who told me that I had a serious trouble, that I had two out of five chances of being healed, but must submit to an operation. I went to two other oculists, who told me the same, only one gave me three out of five chances. I then had three operations performed and was ordered to report for the fourth, when two of my friends, who had been healed by Christian Science, persuaded me to go to a practitioner. I went with very little faith, but because I knew of no other place to go.

This was what seemed to be my condition: A physical wreck, fast becoming a mental one; with liver, stomach, and spinal trouble; nearly blind; very positive and quick-tempered, with no faith in God or man—the story of Christ to me an Oriental fable. From the first I began to get better; the second treatment gave me the first good sleep I had had for many a night. I slept eleven hours and did not turn over in bed but once. I do not think that any one ever looked (to me at least) quite so much like an angel as did my practitioner when I saw her next. Away went the medicine bottles and instruments, and pill boxes which I had carried in my pockets for years were thrown into the fire. One by one the troubles disappeared. Away went goggles and reading glasses, fear, positiveness, temper, and self-conceit—a regular house-clearing. A new man began to appear, and one day he went home in peace to thank God for what He had done.

My wife was healed of long-standing stomach and bowel trouble, the latter in four treatments. Both of my daughters were healed of throat trouble. We are all members of First Church of Christ, Scientist, in San Francisco, as happy, loving, contented a family as there is in the city. No one need tell me Christian Science does not heal; I know better. This is my experience, and I ought to know whereof I speak. I am sixty years of age. I have written this testimony without glasses; do not use them at all, although I work nights, and there is no man young or old that turns out in the morning from his work fresher or stronger than myself.

During my experience with doctors and drugs I was in such an extremely nervous condition that, taken in connection with my other troubles, I think without any doubt three months more would have found me either in an insane asylum or in a grave. The statements I have made on these pages can be verified by a dozen or more people who know me well. For seven years I have been a Scientist, and during that period have not taken any medicine. Am I grateful for what God has done for me? Am I grateful to Christian Science, to Mrs. Eddy, to my friends who persuaded me to try it? Yes, so thankful that I cannot express my gratitude in words.

W. H. DECKER, San Francisco, Cal.

It is with a heart filled with love and gratitude that I write of what has been a help to me. About eight years ago I was healed of a severe spinal and nervous trouble through Christian Science. I had been given up to die, after having been under the care of the best doctors in Washington, D. C., and other places. For sixteen weeks I had not left my room, but after two treatments in Christian Science I was up and dressed and went down two flights of stairs to breakfast. I gained strength slowly but surely, although I was sometimes discouraged, as I thought I could not understand Science and Health and depended on the practitioner. After I was strong and well I studied our text-book, and at times seemed to understand some of the great truth it contains. I had some beautiful demonstrations of Truth's power, but as yet had no intense desire to get more and more understanding. Last summer the trouble manifested itself in an aggravated form. I took treatment and read Science and Health, but did not seem to improve much. In the fall I had a very trying experience, and while the later grief and disappointment seemed terrible, yet I was thankful for the joy and happiness which I had

Digitized by Google

experienced, and I learned a lesson of love. I had longed to understand Love, and in passing through this experience all sense of hate or dislike, or lack of forgiveness, disappeared, and since then love for others has been easy to realize, and I have studied, loved, and understood Science far better than before. I have had trials to overcome, but I know God is giving me the victory. I must know the truth if I would be free, and I know Christian Science is the truth. The overcoming of many ailments through what understanding I have, has proved to me beyond a doubt that Christian Science is all true and that any seeming failures are due to a lack of understanding and faith.

The spiritual help is more than words can express, and the freedom from worry and fear of the future which Science has given to me, is worth everything. I am thankful to God, who has blessed us so abundantly, and also to Mrs. Eddy. The testimonies in the *Sentinel* and *Journal* have been a great help to me, and I hope that what I have written will help some one else who is struggling to reach the light.—MARY GREENE IKENBERRY, Adel, Ia.

I became interested in Christian Science after being sick for about two years, and am thankful to be able to say that Christian Science has done for me what the best of medical treatment failed to do. This is the whole story in brief. I may say, however, that during those two years I spent three months in what is considered one of the best hospitals in Chicago, being treated by a medical expert on skin diseases without any permanent relief. I was sent from the hospital to continue the treatment at home, which I did until a short time before I became interested in Christian Science. After stopping the treatment recommended by the Chicago doctor who attended me at the hospital, I consulted a specialist in this city without any good results. This made me very discouraged and death would have been welcome. I even prayed for death, which I thought would be a relief, not only to myself but to those around me, because I was a burden to have about the house. When Christian Science was brought to me from friends whom I did not know at the time, this thought was quickly changed, to the satisfaction of myself and everybody else who knew me. I am very thankful to Christian Science for what it did for me when everything seemed darkest, and is still doing for me.

CHARLES RINKER, Dubuque, Ia.

Several years previous to October, 1903, I developed a peculiar hip trouble, which took the form of acute pain. The attacks would come at intervals of several weeks, and gradually became more frequent and more intense, until I suffered nearly all the time. I was treated by a number of physicians, and also had osteopathic treatment; but none of these doctors could agree as to the cause of the trouble, and as a result I was very miserable for a long time. I finally went to a specialist here, who advised an operation after his treatment had failed. During the time I was seeking relief I spent a large amount of money. My last physician charged five dollars a visit and I went twice a week for some time. I had also tried so-called mental science, but in no case did I experience any permanent relief. One day, while down town in the shopping district, I was taken with a very violent pain in my hip, and almost fainted. With my mother's assistance I went into a building in which several Christian Science practitioners have their offices, and entered the first office I came to. I left the office in a short time and can truthfully say that I was healed of the hip trouble in the treatment then received. I continued for some time to take treatment for minor ailments, which were all overcome through Christian Science. I have gained in weight and my general health is very good. My entire family are interested in Christian Science.

MRS. WILLIAM T. GARRETT, San Francisco, Cal.

In thinking over what Christian Science has done for me, I came to the conclusion that it was time for me to give it out to the world. It is just two years since I became interested in Science. I had been an invalid for eight years, and had tried every remedy that was recommended. I was in bed part of the time, never able to walk any distance during all the eight years. I was in a hospital and underwent an operation, took vapor baths, also a course in physical exercise, and had treatment from different doctors, until it seemed that everything had been tried. The doctors then said there was only one thing left to do, and three of them advised a very serious operation. I was anxious to get well, but dreaded another operation and had the feeling that I would be no better after it; in fact, I had reached the place where I felt sure no one but God could help me, for everything else had failed.

Just at this time I remembered what a lady had told me a few months before, that Christian Science had done much both for herself and her husband. I lived a long way from any Scientists, but I wrote to a friend in the city that I had decided to try Christian Science, and asked her to find a practitioner, lay my case before her, and let me know what I was to do. In about ten days I heard from the practitioner, and she also sent me a copy of Science and Health with the request that I should read it and put aside all material remedies; also to read the 91st Psalm very often, and try to understand it as best I could. It took me quite a while to get even a slight understanding of it, but it came little by little. I prayed to God to give me understanding, for it was the beginning of a new life to me, and I now know what a lot of nothingness I had to get rid of. I never read anything in my life that interested me as Science and Health did, and I would find myself wishing that no one would come in to hinder me from reading. In about a month I went a hundred miles to visit the practitioner, and was helped at once. After the fourth treatment I walked two miles without any discomfort, something I had not been able to do for over eight years. I began to realize that I had found God and the truth at last. A great longing filled my heart with the desire to know more of this God who had done so much for me, and I have been seeking and striving ever since. Sometimes my progress seems slow, and again I can realize that I am moving in great strides and have reached the point where I can say that "I rejoice in tribulation," for it brings me closer to God every time and I am enabled to prove His goodness.

It is now two years since I gave up all kinds of medicine, and my little girl seven years old has taken no medicine since I got an understanding of Science. She goes to Science and Health or "Miscellaneous Writings" if anything is wrong with her. We are both perfectly well and strong. This is the kind of Christianity that meets every need. It helps us to love our neighbor as ourself and to rejoice always. It helps us to know that we have nothing to fear and much to love and be thankful for. I am thankful even for the eight years' tribulation which led me to seek this light. I am thankful for the *Sentinel* and *Journal*. I often count the days until they come and how I do enjoy the testimonies! In expressing my gratitude to Mrs. Eddy, words fail me. She has done so much for the world and for me. All I can say is, God bless her.—EMMA GILBERT TITUS, Grand Marais, Minn.

Digitized by Google

Eleven years ago I was a great sufferer—almost helpless from the effects of rheumatic trouble, which had held me in bondage for twelve years and was believed to be hereditary. Through the persistence of a kind and loving friend, who had been helped by Christian Science, I was led to investigate it. After studying Science and Health in connection with the Bible for six months, I was taken with one of my so-called acute attacks, which had baffled the skill of the doctors, although they had been patient and kind and had done everything in their power to relieve my suffering. Convinced that my help could come only from God, I sent for a Christian Science practitioner and was relieved in one treatment. Since that time I have received help in every way, spiritually, mentally, and physically, and of all the benefits, I am most grateful for the spiritual enlightenment which comes from the study of the Bible in connection with the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

I am grateful first of all to God, for sending His Son, Jesus Christ, to reveal His wonderful love to the children of men, and I am grateful to our Leader for living so close to God that she was able to rediscover the truth I am also thankful to the committee which prepares for us the beautiful Lesson-Sermons each week. Many times, when suffering from severe ailments, I have been healed by studying the Lesson. I wish to show my gratitude by living this wonderful truth, that I may add my mite of good in hastening the coming of the day when "they shall all know me [God], from the least of them unto the greatest of them."

EMMA RUTH PRICE, Kiota, Ind. Ter.

In 1904 I began the study of Christian Science, and it would take considerable time and space to tell of all the blessings I have received through this study. I was diseased both in mind and body. Physicians had failed to help me, except temporarily. I had been through an operation, which left me in a worse state than before it was performed. Two physicians had agreed that another operation was necessary before I could expect to be well again, but two others advised me not to undergo another on account of the ill effects which might result from it, and one doctor told me that medicine would do me more harm than good. I did not know where to turn for help.

At this time Christian Science was presented to me, and I went to see a practitioner. She told me something of this truth which heals all our diseases, and my burdens began to lighten from that hour. I commenced the study of the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, and this gave me a new understanding of God. Here I would say that I had been hungering and thirsting after righteousness, for something better than I had known, and I had earnestly prayed for light. I have since learned that if with all our hearts we truly seek Him, we shall surely find Him. One after another of my ailments left me,—bowel trouble of long standing, weakness of the heart, and extreme nervousness. A great sense of fear has also been almost entirely overcome. Before coming to Christian Science I was never without medicine in the house, now I have no physician but God.

I am very grateful for all that has come to me through Christian Science, grateful for better health, and most of all for a better understanding of God, which helps us to overcome not only physical ills, but everything that is not Godlike. When I think how much Christian Science has brought to me, I realize how great is the debt of gratitude I owe to Mrs. Eddy, our dear Leader, and my greatest desire is to so live that I may reflect in some measure this light of truth which she is ever reflecting, the truth which makes us free.—MRS. CORA E. LUCAS, Pasadena, Cal.

With a heart full of love for what Christian Science has done for me in the ten years that I have been studying the Bible with the aid of Science and Health, I give this testimony. Many physical conditions have been overcome, such as severe headaches, rheumatic trouble, and sore throat; but the wiping out of a sense of hatred which I had cherished for many years, brought the sweet peace which is our heritage. The following events took place when I had been interested in the Science about three years, and were proof to me of the loving care of our heavenly Father when we turn to Him knowing that our needs will be supplied.

I wanted very much to do a certain thing, but could not seem to bring it about in my own way. One morning I was very much confused in thought because of this, and I was advised to study the book of Jonah; which I did conscientiously for many mornings, and I received wonderful help and light. It dawned upon me that I was a Jonah in thought, full of resentment and not willing to be guided by the "still, small voice" of Truth. I saw that I had been, as it were, in the whale's belly; and when I turned to God, good, and said, lovingly and self-forgetfully, "Thy will, not mine be done," then I knew why I had been advised to read this story. To me, now, this old prophet is a living character. During that spring and summer Second and Third Churches of Christ, Scientist, of Chicago were being erected, and I had subscribed what at that time seemed to me a large sum, without knowing where the money was coming from, but I knew that God would show me the way. Through the summer I did my mental work to the best of my understanding, and rested in divine Love. About the first of September I received a letter from a friend, asking me to take a position with her. I accepted the position, and when she began to speak about the salary I thought, "I shall be very happy if I get enough to pay up my subscription to the building fund of the churches." My joy was complete when I was offered just twice that amount and then, at the same time, the thing which I had so longed to do in the spring came about in the most natural way,—in God's own time and way.

Like all Christian Scientists I feel a sense of gratitude beyond words to dear Mrs. Eddy. My desire is to go on working in such an understanding way, and that my light may so shine before men, that they may see my good works and glorify our "Father which is in heaven." In so doing I am helping the Cause which is so dear to our Leader, who most lovingly, amidst trials of which we can know nothing, points the way onward and upward.

WINIFRED C. SMALE, Weston, Mass.

It is with pleasure and a heart full of gratitude to God that I give this testimony of my healing. From childhood I was sickly, and a large sum of money was spent for medical treatment. I suffered from severe headaches, and in 1898 I had a fever which left me with rheumatic trouble and very poor health up to 1905, when I was led to see the truth as demonstrated in Christian Science. I had been treated by one of the best doctors in our city and two specialists. They gave me no hope, saying I could not be cured. On my way from Cincinnati, where I had been for medical treatment, I stopped in Dayton, O., with a friend who had been healed in Christian Science. I attended a Christian Science service, and there I met a friend of my school-days, who had also been healed in Christian Science and was a practitioner. He told me that God is to-day the same God who healed men nineteen hundred years ago, and this statement I have found to be true! He referred me to a practitioner in my home city, and I took treatment. The demonstration was wonderful! I was healed of rheumatic trouble and of a rupture of twenty-eight years' standing, and the desire for tobacco, which I had used for twenty

Digitized by Google

years, also left me. I had been a hard drinker, a habit which I had tried hard to quit; but now the desire for liquor is gone, and in its place I have peace and love. Knowing that God is All in all, what more could we ask? I hope this testimony may throw a ray of light on the path of some one in darkness, and lead him to Truth.

FRANK B. HAMILTON, Piqua, Ohio.

During the month of July, 1893, I was visiting a friend in Pueblo, Col., when I became quite ill. She summoned a physician, who said I had a serious throat trouble. My friend, being much alarmed, sent for her family physician, to see if the first diagnosis was correct. He said it was; so I was quarantined in one room and every precaution taken to protect the family. I had been confined to my room for fourteen days, when the fear of death came upon me. A message was sent to my mother, who notified the rest of my family of her fears. At last I asked my friend if she would call a student of Mrs. Eddy to visit me. This student kept a green-house, and when she came she brought me a large bunch of pink roses. As she entered the room she said, "Dear, did you know that God is Life?" Such a sense of warmth came to me, and I was filled with love for all mankind. She remained a few minutes, and left me a new woman. In an hour I sat up, and the next day was dressed, although she had given me but one treatment. The second day my mother took me to our home in Canon City, Col., a distance of about forty miles. I did not realize at the time how it was done, but the words, "God is Life," remained in my consciousness.

There were days when I was full of fear, and again I had more courage. I did not read or study Christian Science, as I had no literature, though I knew there was a book called "Science and Health with Key to the Scriptures" by Mrs. Eddy. For two years I read other kinds of literature, called "mental and divine science," till the year 1895, when I met some loyal students of Christian Science in Denver, Col. Their love and patience endeared them to me. It was the truth which they lived, as taught in Christian Science, that led me to become a loyal student of Christian Science after I had again strayed into the by-paths. In 1898 I sent to Boston for as many of Mrs. Eddy's books as I could then afford, and shortly after subscribed for the periodicals. I did not know it at the time, but I found that Christian Science had cured me of chronic bronchial trouble, and also of a bowel trouble which had caused much pain, and to-day I am perfectly well. I have been a member of The Mother Church since 1902. So much love has been shown us by the students of Christian Science in Montana, Utah, and Colorado, that I cannot express enough gratitude to God, and to our beloved Leader, Mrs. Eddy, save to follow faithfully the Christian example set me, that others may be led to see the truth to which I was so lovingly led.—MRS. MARY C. M. BEACH, Denver, Col.

Just nine years ago Christian Science was brought to my notice. For several years previous to that time my health had been failing. I had severe stomach and female trouble, besides a distressing nervous affection. I was continually under a sense of strain and excitement, which with my other trouble seemed to be wearing away my physical strength. I feared and dreaded the long, weary nights, which were almost wholly sleepless. The thing I feared most was insanity, which I felt to be creeping upon me. Either my husband or children were constantly with me, and though they knew my condition they could not possibly realize my suffering. I was from time to time under the treatment of different physicians, all of whom were very attentive, kind, and sympathetic, but they failed to give me permanent relief. Among them was the physician who had had the care of our family for upwards of twenty-five years. He gave us to understand that there was little hope for my recovery, and my suffering was so intense that I felt I could not hold on to the spark of life much longer. Powerful medicines were my only reliance, yet I feared that they would cease helping me, and asked our physician if I could not stop for a while. He replied that I must continue taking them for years.

But, thanks be to God, Christian Science was brought to me, and I was freed from the dreadful bondage. Soon after hearing of Christian Science I procured the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and commenced reading it. I became intensely interested and devoted all my time during the winter and following spring to the study of the book. Then the time came when I understood that I had come to the parting of the ways, which was to decide between *materia medica* and Christian Science. I chose the latter, and destroyed all the material remedies in the house. After about five weeks of reading Science and Health (I had no treatment from practitioners), I realized that I was entirely healed, not only of one, but of all the diseases. All physical ailments had disappeared without any effort on my part, as I did not know at that time anything about giving a treatment. None of these ailments have reappeared during the past nine years, and I am to-day a perfectly well woman.

The understanding of Truth, I know, is utter destruction to everything unlike God, good. I owe many thanks and deep heartfelt gratitude to our dear Leader for this glorious truth which frees us from all material bondage.—MRS. ROSE G. WELLS, Prescott, Ariz.

[Written for the *Sentinel*.]

"THE THREE-FOLD CORD."

BEN. HAWORTH-BOOTH.

IF God is Life, and there is none but He
In the full-orbed temple of the skies,
Then what is death? A fear, a phantasy
Of cold white fingers and of glassy eyes;
A dream within the dream of mortal strife:
He dies who knows not God, for God is Life.

If God is Truth, and true is all that is
In God's domain, true things are all from God—
His light or His reflection. All are His
In earth, and all within the paths untrod
Of boundless heaven; and our eternal youth
Draws its true life from God, for God is Truth.

If God is Love, and God is All in all,
Then all is Love, and all beside is naught.
Blind mortals, gaze around! Your footsteps fall
On flowers beautiful as angel's thought;
And each reflects its beauty from above,
Where all is Love's and God's, for God is Love.

Breathe but in accent ever soft and low
His name of Love, and humbly bend the head.
This side the veil mortals may dimly know
The Love that saves the sick, the sad, the dead,—
White-winged and holy, like the paschal dove:
But man with Love is one, and God is Love.

Thus in this Life we live, and in this Truth
Is all we have and all we truly hold.
In His all-wisdom we are wise forsooth:
Wisdom and Love are one; the cord three-fold,
Life, Truth, and Love contains the whole complete;
Then hush, my heart, and fall before His feet!

FROM OUR EXCHANGES.

[*The Congregationalist.*]

The *Churchman*, with a candor that is admirable and with wholesale depreciation which we should not have dared to venture on in referring to our Episcopal neighbors, says that the history of the Protestant Episcopal Church (it says American Church) is "a history of dearth in productive and creative scholarship." It concedes that its ministry "gets very little sunshine from the works of its own scholars." It points out that the Protestant Episcopal Church took no part in the revision of the Bible and has consistently refused to authorize its use. It shows that out of twenty-nine American contributors to the Dictionary of Christ and the Gospels, edited by Dr. Hastings, just issued, not one is an Episcopalian. The practical bearings of this, the *Churchman* says, are that "a truth-bearing church cannot do its work on borrowed learning, nor can a church retain its self-respect in a state of intellectual dependence." Fortunately the *Churchman* notes a change for the better taking place.

[*The* (London) *Christian World.*]

Whatever be the immediate issue of the present movement, one thing is certain. The old theology has gone, never to return. Scotland, its ancient home and stronghold, has itself turned against it. It is Calvinistic in the old sense no longer. This time it is not the outsiders—a Burns, a Hume, a Scott—who repudiate the dogma that consigns by foreordination the mass of mankind to perdition; it is the Church itself, speaking through its representative ministry. What is happening, it is clear, is not an outbreak of caprice here and there, but a mental and moral evolution as resistless as the tide. The Scottish clergy, a body of devout and at the same time alert and highly educated minds, represent in their present attitude that further opening of the human intellect and heart in spiritual things which may well be called the Divine revelation of our time.

[*The Universalist Leader.*]

How hard it is to get religious "copy" only the editor of the religious journal may know. It is a fact that he is overwhelmed with articles which have no bearing on the religious interests, and on subjects in which religion has no interest. Of course religion is interested in all life, but there is a large life and a small life, and while both are life, there is a choice of interest. It would seem that the mind trained in theological thinking would be glad to take its exercise along the lines of its training, but alas, most of those thus trained plead "lack of time for such themes;" they say they want to treat of "life;" verily it is "life," but such a little life, it is of the earth, earthy! Is it possible the ministry has lost its vision of a larger life than that bounded by a few short years and a few acres of ground!

[Rev. R. J. Campbell, A.M., in *The British Congregationalist.*]

Realize that you are no strangers in a strange land, but children in the Father's house, resting on the Father's heart. You are this very moment at the very center of all existence; God will never be any nearer to you to all eternity than He is just now. He could not be nearer, for "in him we live, and move, and have our being." Infinity is a circle with its center everywhere and its circumference nowhere; here is all the fulness of God; here is the spiritual presence of Christ; here is everything that the soul can need or desire in the fulfilment of its destiny.

[*The Examiner.*]

"The lives of Christians are the world's Bible," said the saintly Christlieb. Would that all Christians might realize the truth of the saying, and order their lives accordingly.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.
It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

MR. KIMBALL'S LECTURE. 31 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. 25 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By Rev. ARTHUR R. VOSBURGH. 28 pages.

HEALING THROUGH CHRISTIAN SCIENCE. Discourses and Editorials. By JUDGE SEPTIMUS J. HANNA. 36 pages.

HEARINGS ON PROPOSED MEDICAL BILLS IN MASSACHUSETTS AND NEW YORK. 23 pages.

ANSWERS TO QUESTIONS CONCERNING CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. 26 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 63 pages.

THE CHRISTIAN SCIENCE MOVEMENT. Revised by CAROL NORTON. 28 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the *Journal*. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 40 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 38 pages.

A CRITIC ANSWERED. By ALFRED FARLOW. Printed in German only. 31 pages.

Price: One copy, six cents; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER G. EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each, prepaid $3.18
Two to twelve books (cloth only) to one address, each, prepaid 3.00
Twelve or more books to one address, each, prepaid 2.75

Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . 3.75

Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid . . 5.00
Twelve or more to one address, each, prepaid . . . 4.75

Levant, divinity circuit, leather-lined, round corners, gilt edges, silk-sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6.00
Twelve or more to one address, each, prepaid . . 5.75

Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price prepaid, single copy $5.00
Twelve or more copies to one address, each . . . 4.50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), each, prepaid 2.25
Twelve or more books to one address, each, prepaid 2.00

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . . 3.75

Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75

Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.

Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.00; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT, Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.60.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration will be found on the wrapper. No other notice will be given.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba; twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

In all other countries, six cents per copy, postpaid to any address; twenty-five copies, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST

National.

In a public report, Herbert Knox Smith, Commissioner of Corporations, concerning the operations of the Standard Oil Company, says; "The total dividends paid by the Standard from 1882 to 1906 were $551,922,904, averaging 24.15 per cent per year. The dividends, however, were much less than the total earnings. It is substantially certain that the entire net earnings of the Standard from 1882 to 1906 were at least $790,000,000, and possibly much more. These enormous profits have been based on an investment worth at the time of its original acquisition not more than $75,000,000.

The Cunard Steamship Company, owing to the size and draught of the big Lusitania, about to cross the Atlantic on her maiden trip to New York, has been authorized by the War Department to use the uncompleted Ambrose Channel, which has been dredged to a depth of thirty-five feet and to varying widths. When completed the channel will have a depth of forty feet and a width of two thousand feet. The use of the channel is restricted for the present to vessels of twenty-nine feet draught and over. This will limit its use to probably a dozen vessels a week.

Charging unreasonable freight rates and discrimination in shipments of flour and wheat products, the great milling interests of western New York, with headquarters at Buffalo, have filed complaints against the railroads running from Buffalo to the Atlantic seaboard. It is alleged that higher rates are charged the western New York milling concerns than the big milling interests of the central West and Northwest.

The General Assembly of Connecticut has just passed a bill providing for the appointment of a Public Utilities Commission, to "consider the laws of the State relating to public service corporations and to recommend to the next General Assembly legislation to correct such evils and defects as they may find to exist therein, or any legislation on the subject which they may deem desirable for the public interests."

More than $750,000,000 worth of manufactures passed out of the ports of the United States in the fiscal year ended June 30. Practically two-thirds went in finished form ready for consumption, and practically one-third in partially manufactured form for further use in manufacturing.

Judge Landis, in the United States District Court at Chicago, on the 5th, ordered the dissolution of the Church and School Furniture Trust, recently punished by fines amounting to $43,000, for admitted violation of the anti-trust laws.

The Chicago Directory for 1907, just published, gives figures estimating the population of Chicago at 2,367,030. The total number of names in the directory's alphabetical list is 737,400.

The new direct cable from New York to Colon, Panama, was opened for business Aug. 1 by the Central and South American Cable Company.

Motor cabs equipped with taximeters are coming into use in the public service in New York city.

International.

The Foreign Office at Pekin has announced the opening to the international trade of seven cities in Manchuria. These are the last of a total of sixteen which were to be opened in Manchuria, as provided in the China-Japan treaty of 1905.

Emperor William of Germany and Emperor Nicholas of Russia met on the 3d in the Baltic Sea, off Swinemuende. Emperor William was on the yacht Hohenzollern and the Russian emperor on his yacht, the Standart.

Two hundred ships of war, constituting Great Britain's home fleet, paraded before King Edward and Queen Alexandra on the Solent last week, furnishing a magnificent pageant for the opening of the annual Cowes Regatta week.

The English Government has decided to build four hundred miles of railroad in northern Nigeria, from Baro to Kano, with the object of developing the colony and especially the cotton-growing industry.

The French Chambers of Commerce have been placed upon an equal footing with the German Chambers in the matter of certificates in relation to the valuation of exports to the United States.

The balloon of the Wellman-*Chicago Record-Herald* polar expedition has been successfully inflated, and the start for the pole is scheduled for the middle of August.

Both houses of Parliament have approved the grant of $250,000 to Lord Cromer, who recently resigned the post of British agent and consul general in Egypt.

A project for a new ship canal between Hamburg and Bremen is now under consideration. The new waterway will be about seventy-five miles long.

The King of Siam is credited with having spent $2,500,000 for gems and silver-ware in the course of his European tour, which is now drawing to an end.

Industrial and Commercial.

Fire insurance companies operating in Louisiana wrote $234,435,065.79 in risks during 1906, received $4,017,216.59 in premiums, paid $1,561,271.11 losses, showing a net profit of $2,455,945.48 during the twelve months. Life insurance companies operating in the State had $135,196,456.12 policies in force Dec. 31, 1906; they received $4,815,976.22 premiums during that year and paid $1,446,196.71 claims.

The "Zion City" lace factory has been sold to a Chicago drygoods firm for approximately $265,000. It is declared that the purchaser will make arrangements at once to improve and extend the plant at a cost of $1,000,000, and operate it day and night to its full capacity. The sale carries with it the lease restrictions prohibiting liquor and tobacco on the premises, and the use of profane language by the employes.

It is reported that the David Ward estate tract of virgin forest in lower Michigan has been purchased by a syndicate for $5,000,000. The estate totals 78,000 acres, and includes large tracts of cork pine,—the straight, tall trees without a branch,—the famous Michigan white pine. It is estimated that there are 300,000,000 feet of white pine lumber in these trees, and from 1,000,000,000 to 2,000,000,000 feet of hardwood.

Final papers in the largest timber land transaction ever consummated in the State of Maine have passed, transferring over two hundred thousand acres of the finest timber land in the State, located on the east and west branches of the Penobscot and Aroostook Rivers.

Paper-making by hand in the United States is believed to have passed into history with the closing down in the town of Adams, Mass., of that department of the L. L. Brown Company, which had carried the industry through twenty-five years with little profit.

A boat to skim over the water instead of ploughing through it, and capable of making one hundred miles an hour, is reported to have been invented by Peter Cooper Hewitt, who claims to have attained a speed of thirty-eight miles an hour with a rough model.

In accordance with its profit-sharing scheme adopted last year, the Boston Consolidated Gas Company has credited to the most efficient of its employes the sum of $26,029, or seven per cent of the earnings of each for the nine months ended June 30, 1907.

A raft consisting of six thousand spruce logs, three hundred and twenty feet long, forty feet wide amidships, and twenty-five at the ends, drawing thirteen feet of water, has been successfully towed from Nova Scotia to New York.

The total production of wheat for the State of Washington this season is estimated at between thirty-five and forty million bushels.

The potato crop of Aroostook County, Me., is estimated this season at fifteen million bushels.

General.

In a recent letter to the *London Times* Lieut.-Col. Burnley Campbell wrote that he landed at Dover on the 13th of June, and so completed a trip around the world which occupied forty days and nineteen and one-half hours. He left Liverpool on May 3 at 7.20 P.M., reached Quebec at 3 P.M. May 10, and was at Vancouver on the Pacific coast at 5 A.M. on May 16. Leaving there about noon of the same day, he reached Yokohama on May 26, Tsuruga on May 28, and leaving there by steamer at 6 P.M., he reached Vladivostock May 30. Here, after a wait of about four hours, he took a trans-Siberian train, reaching Harbin on May 31, Irkutsk on June 4, Moscow on June 10, and Berlin on June 12. On the following day he was at Ostend, which he reached at 7.30 A.M., and at 2.50 P.M. of the same day he landed in England at Dover. Throughout the whole trip Lieut.-Col. Campbell was remarkably fortunate in making connections; otherwise his time would have been several days longer.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

[From *Fine Arts Journal.*]

CHRISTIAN SCIENCE FROM A MUSICIAN'S STANDPOINT.

FREDERIC W. ROOT.

THE Science which answers, so far as our human apprehension can go, the question of the ages and shows man his relation to God and the universe, is so vast a subject that different standpoints signify no more in the general understanding of it than views of the sun from different parts of the earth's surface to a comprehension of that luminary. However, as the object of the present article is not to explain this new system, but to comment briefly on its operation as observed among musical people, possibly something of interest may be said from their point of view, as well as from the universal standpoint.

In the first place, it is to be observed that Christian Science seems to appeal rather strongly to musicians, more forcibly, perhaps, than to those engaged in other occupations. Throughout all lines of professional and business activity people are bound by materialistic trammels, which tradition, education, and practice have fastened upon them. The musician is perhaps less hampered than others by a stolid materialism. The subject with which he occupies himself is largely idealistic; and his professional success is manifestly a question of consciousness rather than of matter. Naturally, then, whatever teaches a science of Mind that proves as fruitful of good results as does Christian Science, is attractive to him. Neither do musicians experience temptation to materialism to the extent that others do because of the gains derived from labor. There is very seldom one of this profession who must contemplate with perturbation the Scriptural simile involving a camel and the eye of the needle.

The musician's temperament and education incline him to respect intuition and spiritual vision, by means of which great discoveries are made; to appreciate the logical development of a theme; to discern harmonious proportions in a structure; to discriminate between that which is refined and that which is commonplace and banal; to give proper value to sentiment—indeed, to respond readily to demands upon the finer faculties. Christian Science makes such demands; and here in Chicago, at least, many musicians have perceived the congeniality of its philosophy, have satisfied themselves of its value, and are endeavoring to follow its teachings.

Mrs. Eddy, the Discoverer and Founder of Christian Science, makes frequent allusion to the science of harmony for the purpose of illustration, showing her recognition of the congeniality between the two lines of thought. Music and mathematics would seem to furnish the most striking parallels for use in elucidating this subject. It is an effective reply to one who condemns Christian Science because of the occasional failures of its followers, to say that mathematics is not condemned because its students sometimes get wrong answers to their problems; or to say, when the most advanced demonstrations, like the raising of the dead, are demanded, that a knowledge of addition, subtraction, *et cetera,* does not at once bring one to the mastery of trigonometry. Mr. Bicknell Young, one of our local musicians, who is now a Christian Science lecturer, in a recent discourse at the Auditorium pointed his argument for the reality of good and the nothingness of evil by an illustration which all can easily perceive; it was, in substance, that if handsful of unrelated, discordant notes were struck upon the organ, they would appeal to sense for recognition as reality even more strongly than would Schumann's "Warum" or Schubert's "Serenade," but that such noisy discords would have no vital basis and would become nothing the moment their sound ceased, because they were nothing in the first place; whereas the other strains, possessing the attributes of Truth, may be classed as real and enduring.

Because of his sensitive temperament and the peculiar besetments of his profession, a musician who has no strong scientific rule to live by is very likely to become inoculated with pessimism. In the biography of noted musicians we find more reference to the philosophy of Schopenhauer than to any other; and a habit of embittered thought often becomes manifest among workers in the profession—the public is unappreciative; pupils are stupid; critics are hostile; Blank is doing what he can to injure, *et cetera.* People suffering from this frame of mind may be able to preserve a calm front and pursue their avocation with a fair degree of outward cheerfulness; but one whose mind is filled with impatience, envy, jealousy, vindictiveness, fear, and the like, lives in hell despite the mask of serenity, and is propagating within himself the germs of disease and woe.

Some years ago a distinguished music teacher, commenting upon the apprehension regarding business with which teachers often approach the new season, said, "I always feel as if the devil were after me." Now in order that the "devil" need not be an object of terror, in order to banish from the human mind the malign influences which lay hold upon it, we need the divine optimism of Christian Science. There are systems of optimistic philosophy, including "the consolations of religion," offered for the comfort and encouragement of such as are disheartened and embittered, but they all lack the vital touch which Christian Science possesses. They hold to the belief in the reality, inevitableness, and power of evil; and where theology is mixed up with this tenet, they affirm that the creator ordains evil and wills it to operate among men as a phase of divine government. Men are likely to find this dogma repellant, and are inclined to rebel against creeds and systems that maintain it, and so become agnostics or atheists—"freethinkers" of some sort. This, as some of us know from experience, is to embark for a rudderless cruise on a stormy sea of speculation, with its consequent unrest and dissatisfaction.

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

A recent magazine, commenting upon business qualifications that make people successful and happy, says among other things that the "microbe of unrest" blurs perception, unbalances judgment, sours healthy ambition, urges to immature action, and is fatal to contentment. The article then goes on to counsel a willingness to wait, a self-poise which will keep the eye true, the mind clear, and the judgment keen; good counsel which, however, one who has acquired the habit of unrest can hardly follow by a mere exercise of the will. He needs to be shown how to destroy the baleful moods to which he is a slave: how to deny effectually either the power or the necessity of evil; how to realize the good and true,—the harmony, the healthful vitality which in spite of seeming contradiction are the eternal verities of the universe.

This is what Christian Science can show him. Such teaching will not appear to one who gives the subject a single glance of hostility or skepticism; who takes it for granted that his previous modes of thought are all that are necessary fully to comprehend and judge this new philosophy. That is the treacherous ground Mark Twain takes in his attack on Mrs. Eddy and her Church. Like critics in other departments, he seems not to suspect that anything can lie beyond his horizon; and in condemning the text-book of Christian Science because he does not understand it, he makes a statement which musicians, from frequent experience in their own line, will easily perceive to be a boomerang; that is, his characterization of the Christian Science text-book, "A stream of sonorous words that convey no meaning." How much musicians hear that sort of talk about the best music! And how familiar an object is the complacent critic who, first defining his position with the "bromidic" remark, "I don't know anything about music, but I know what I like," undertakes to pronounce with finality upon some of the great inspirations of our art. The present writer was once seriously argued with by a gentleman amateur who contended that "Carmen" is a "jumble of discords," and that a pretense to admiration of such music is unbearable affectation.

Many years ago a well-known magazine writer assumed from his success in other fields of criticism that his dictum upon musical matters would be of importance to the world, so he undertook in a series of articles to settle the standing of some eminent composers, Wagner among the number. This writer judged Wagner's compositions exactly as Mark Twain and others are now judging Mrs. Eddy's writings, saying that they were meaningless; and he cited, printing the music, the beginning of the introduction of "Tristan and Isolde" with the naïve comment that he could "make nothing of it but discordant nonsense." In these later years everybody has come to see that such judgment is the height of ignorant presumption so far as Bizet and Wagner are concerned; but it seems impossible for some critics to draw the natural inference from such cases. One might suppose that history would teach caution to such as assume to settle the new problems as they arise, problems which occupy the serious attention of thinking people.

One of the most serious obstacles to the progress of genuine musical art among its professed students is the false mental attitude they hold toward it. A serviceable definition of art is: that which produces an exalted mood, that which has the power to set aside the commonplace by awakening in us sentiments, impulses, memories, associations, imaginations, by which we live for the moment among ideal conditions above the temporal and material. The study of Christian Science leads one to put Principle in the foreground, holding it constantly in thought, while it puts material selfhood as much in the background as possible. The effect of this upon musical performance is to encourage that which is artistic in it, to develop the spiritual element and to suppress the self-conscious display of bodily action which so seduces the average performer. . . .

However, this method, properly applied, does not undertake to obtain results without persistent practice. It is not, as some have imagined, possible to get results by talking about them in transcendental fashion, admitting the inference that technique may be neglected. Some have felt that they need not submit to certain physical limitations—that they might assume, for instance, to transform the natural voice into whatever unnatural timbre and compass they might choose to hold in thought as a model. Christian Science teaches that one should adhere to the normal in all things, making progress to more advanced stages only by successive demonstrations of understanding gained by unremitting work. . . .

The vocal organs, the hands, all bodily members, move and combine solely in accordance with thought; and their action produces a valuable result only in proportion as thought reflects Truth in grace, symmetry, appropriateness; Love in sympathy, temperamental warmth; and Life in vitality, power, mastery. These are the three entities which, according to Christian Science, constitute the creative Spirit of the universe, the Soul of all things, the omnipresent intelligence, God. . . . The awakening of the world to clearer views which has been going on in so marked a degree in the last quarter of a century,—perceptions of Truth unsettling old religious dogmas, stimulating social reforms, purifying political and business methods, promoting temperance and longevity, pleading for peace among nations—all these things, coming like a flood of light after the comparative moral dulness of preceding ages, may fairly be taken to indicate the presence among men of some wonderful new force; and there are many of us who can discern no new agency making for righteousness and illuminated intelligence which approaches Christian Science in efficiency.

The healing power of Christian Science operating among musicians has the usual beneficent results. Singers are less frequently or not at all disabled by colds and catarrh, and there is much testimony from pianists to the cure of disabled arms, a sort of paralysis brought on from over practising, for which material means provide little help. Such bodily healing most certainly is a great boon to one who experiences it, and his gratitude to the woman through whom his deliverance has come is deep, and is only intensified by ignorant and malicious attacks upon her. But the greater ministry of Christian Science is the introduction of one into the kingdom of Mind, thus saving him, according to the measure of his understanding, from all manner of evils and opening to him infinite possibilities.

The services in the Christian Science churches are extremely simple, the musical part in most cases consisting of one solo, three congregational hymns, and the usual organ voluntaries. The soloist is the precentor, who leads in the hymn singing, and is usually one in close sympathy with the spirit of the services if not a student and follower of the teachings of Christian Science. Consequently the solo sung at any service is intelligently prepared for that service. It is made easily possible to do this in the churches of this denomination by the custom of printing in pamphlet form the data of all the Lesson-Sermons for three months at a time. In this way the singer knows, long in advance, the subject to be expounded at any Sunday service, together with every text of Scripture that will be used in the exposition of it, and so has all the suggestions that could possibly help in the selection and preparation of something appropriate to the subject. There are a few Christian Science churches

Digitized by Google

that have a somewhat more elaborate musical service, but in The First Church of Christ, Scientist, in Boston, the simpler musical service is employed; and the usage in this, The Mother Church, is commonly accepted as the model for the branch churches.

THE CHURCH AND CHRISTIAN SCIENCE AS AN OUTSIDER SEES IT.

REV. FRANK N. RIALE, PH.D.

I HAVE just received a letter from a ministerial friend in our church, of the very highest standing and largest influences. In it he speaks of Christian Science thus:—

> I have seen too many wonderful works . . . and people . . . come out of Christian Science to ever say one word against it. And I have always taken its part when Dr. ——— and other ministers have preached against it. That course has only tended to drive farther away from the evangelical churches those who should never have been allowed to go away at all. I have always insisted that everything good in Christian Science is in Presbyterianism.

This spirit is pervading and perfectly honeycombing the ministry of the Church. It burns most brightly in the breasts of those whose lips and lives are acknowledged to be filled most fully with Christ's "sweetness and light." Certainly the "rock foundation" of Christian Science is the rock foundation of Christianity from its very birth—that God is "in Christ, reconciling the world unto himself." Faith in God as our Father, and the mystical presence of Christ, the express image of His glory, in the heart of the believer, is the very fountain fact from which all else flows forth. The deductions and inferences that have been called forth from this cardinal truth may not be the same as those in the other creed formulas of the Church; but this is not at all essential. If "new occasions" teach "new duties," it is not at all unlikely that new occasions will teach new truth. The words of Daniel Webster have ever been the deep unwritten conviction of the Church: "There is more valuable truth yet to be gleaned from the sacred writings, that has thus far escaped the attention of commentators, than from all other sources of human knowledge combined."

Christian Scientists believe most sincerely that the Bible is the Word of God. Few revere or read it more devotedly than they. They believe that one commentator, Mrs. Eddy, has, through the leading of the Spirit, opened up a mine of spiritual wealth which has always been there, but never appreciated or fully realized by the Church as it should be. This rich vein of truth they are working with rich blessing to thousands. It is a great discovery in the kingdom spiritual, just as radium or electricity is in the physical world. The truth discovered may not be the whole truth. It may not be a truth set as yet in its proper proportion, in the wisdom of God. But that it is a mighty soul-uplifting, life-transforming power that bringeth forth fruits of healing and higher and holier living, no one with sane mind can for a moment doubt. Its one great aim is to restore to its proper place the work of healing in the religion of Jesus. No aim could be higher than this. It claims that the central verse of the Bible, as one counts the passages of the sacred pages, falls on that one tremendous statement of God's purpose, to forgive all our sins and heal all our diseases, as set forth in the 103rd Psalm. This is the divine purpose ever in the incoming of the Divine into the human.

Christ Jesus, who was the full incarnation, made this as the double purpose of his earth mission. He was the great sin saviour. He went about ever "healing all manner of diseases." He seemed to feel that these works were not independent, but varied manifestations of the one divine purpose. "Whether is easier, to say, Thy sins be forgiven thee; or to say, Rise up and walk?" He seemed to school the twelve for just this work. Once he made a little test of their new-given power, and sent them forth to preach the good news of being at-one with God in His kingdom and His purpose. This was the evidence that they were to have of their real belief; that all manner of diseases should vanish before their faith-touch, and whatsoever sins they should forgive, would be forgiven also. They could so touch men as to bring them in touch with God. The way this new life would be manifested would be the sloughing off or the passing away of sin and all manner of disease.

The very last words of the Redeemer in the Great Commission gave just the final and full emphasis of this great cardinal thought in the heart of the Father. "Go ye into all the world" with the precious, priceless message—that God has revealed Himself to us in Christ, to cleanse us from all our sins and to heal all our diseases. "Remember," he seems to say, "that these signs shall follow them that believe. In my name"—in the new nature they would receive through the faith which the Spirit alone can give—"shall they 'cast out devils,' 'heal the sick,' 'raise the dead' "—do all the marvelous works that he himself did, and greater ones also.

This great cardinal truth of God's purpose in coming into the hearts of a world that has lost the conscious sense of His all-powerful presence—this thought was revealed, drawn out in living character in Christ Jesus; and this must be the thought of the Church ever. We certainly have no desire to live on any lower plane of purpose. We have no command that we ever must do so. Why do we live the muck-rake life? God is to be had with His mighty power as revealed in Jesus—had for the asking—and all the heaven that is in Him is ready to be given away to all who will believe.

Christian Science has gotten a glimpse of this glory that awaiteth. There is no doubt of that! If Christendom or any of the creeds of Christendom has a more glorious vision of it, let them speak forth, for the world is dying to hear it. The working hypothesis by which this great world-transforming truth is worked out in Christian Science seems to some very crude, if not indeed senseless. It is because of its seemingly absurd metaphysics that so many thinkers of the Church think there can be in it no possible presence of God in His Christ-revealing. If the Church can find a better working hypothesis to do the work, we want it. There is nothing we want so much. Perhaps the hypothesis is very crude, as the divine sees it—so are all our hypotheses in the world-physical. There is not one of these which sooner or later will not be thrown into the garret. They are but the crude scaffolding which we put up. But if "it is better to have loved and lost than never to have loved at all," it is surely better to have tried to work out, here and now, God's great purpose in our redemption,—to forgive men of their sins and heal their diseases, by the inbringing of the Spirit of the Most High into their hearts,—than not to have tried at all. It is the good-will, it is the God-will that men be delivered from sin and sickness. When that is the will uppermost in men's hearts, He will reveal the good way, and a better way by far than the world has yet dared to dream or think.

We must be thankful that Christian Science as a Church has made us see the whole will of God for us, with far more clearness than we have yet realized it—to forgive men's sins and heal their diseases. If they have not shown us the way most perfect by which this will is to be worked out, then once more let me say, let Christendom rise and tell us what that more excellent way is; and thousands will leap for joy at the privilege of walking in it.

Lincoln used to say that in every case he ever tried

Digitized by Google

he granted his antagonists every bit of truth he could find that they possessed. Then if he was not able to give more, he ought to lose the case. It seems to me—a minister "in good and regular standing" in my church—that this is the position we should take in regard to Christian Science. If any man think that Christian Science is a song of the sirens luring us to destruction, let him sing some sweeter Orpheus song, and the waiting thousands will be drawn to it.

[This excellent article is written from Mr. Riale's present personal standpoint. He does not claim to be a Christian Scientist, but his Christian spirit and kindly attitude toward Christian Science can but appeal to all who "love his [Christ's] appearing." The article recalls our revered Leader's words (Pulpit and Press, p. 31): "Christ will give to Christianity His new name, and Christendom will be classified as Christian Scientists."—EDITOR.]

"THE WILES OF THE DEVIL."

REV. G. A. KRATZER.

ST PAUL tells us that "we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places;" in other words, against the works of the devil, the evil mind, "mortal mind" in its various phases or segregations, such as hypnotism, animal magnetism, malice, doubt, fear, discouragement, disease, and various other members of evil's brood. Meanwhile mortals think that the physical body, or some person whom they do not like, or some apparently disastrous combination in outward affairs, is responsible for the discord, and they are thus deceived into believing that their troubles spring from these sources. Accordingly, they begin to attack such things fiercely, with ways and devices of their human understanding. They attack the diseased body with medicine, or massage, or surgical operations, or electricity, or osteopathy, or will-power, or some mesmeric perversion of mortal mind. They attack discords in human relationships with arguments, malice, anger, jealousy, revenge. They attack untoward conditions in their business affairs with plans of human making, with intrigues, underhand devices, technicalities of the law, and other means of similar character. In such ways mortals hope to help themselves, and earnestly endeavor to do so, but they never have permanent success and often do not get even temporary aid. The reason is that all the time they have been deceived into mistaking effect for cause. While they have been engaged in fighting the outward or visible conditions, thinking that these occasion their distresses, they do not perceive the source of the annoyances, and so mortal mind continues to torment them; but when men grow wiser, and recognize that these outward effects, such as diseases of the body, discords and quarrels with their fellow-men, and derangements in their business affairs, etc., to be but the phenomena of mortal mind, and begin to fight with the sword of the Spirit and the shield of understanding, the overcoming they have so longed for is realized.

Error often places before men some supposed worldly good,—such as wealth, fashion, fame, worldly wisdom, stimulants, the satisfaction of fleshly lusts, and various fads and foibles,—and until they become wise they are given to chasing after these things, in the hope of getting happiness from them. Some of us gave many years to this folly, but finally we woke up to the fact that in pursuing the wisdom and pleasures of this world we were "ever learning, and never able to come to the knowledge of the truth," and that "to be carnally minded is death; but to be spiritually minded is life and peace." We have learned that "eye hath not seen, nor ear [sense testimony] heard, neither have entered into the heart of man, the things which God hath prepared for them that love him. But God hath revealed them unto us by his Spirit;" that "we have received, not the spirit of the world, but the spirit which is of God; that we might know [realize and enjoy] the things that are freely given to us of God,"—health, prosperity, and peace and harmony with our fellow-men.

So also, after much experience and pain, we learn perchance that our troubles spring, not primarily from pleasures and pains in matter, or from untoward outward conditions, but primarily from evil thought-influences, the manifestations of mortal mind. We learn also to break these mesmeric influences by striking at their source, mortal mind itself, by knowing that there is no evil mind to deceive and govern us, because God is the only creator, and He, being good, did not make any evil mind. Thus we employ our understanding of Christ, Truth, and the sword of the Spirit, which is the word of God, "to quench all the fiery darts of the wicked," "to stand against the wiles of the devil," and thus, like Christ, "to destroy the works of the devil."

GROWTH.

JOHN E. FELLERS.

GROWTH in spirituality is the slow undoing of the wrong that has been slowly done. Putting off "the old man with his deeds" is the giving up or forsaking of false beliefs. The continuous dropping of water on a stone finally wears the stone away. Each drop does its part. Every realization of the great fact that there is no error, brings us a little nearer to the destruction of the belief that error exists as an entity. Every declaration of God's allness, made with understanding, is a step toward the light.

The first warm breeze that came from the south last spring announced to the chilled bud the law of life and growth, but the bud made no response. The second warm breath announced the same fact, but the bud still shivered in its cell. The third, the fourth, and perhaps the hundredth wave of the south wind declared to the bud that all creation expresses life. Then the little bud began to open its eyes. The warm rays of the sun came to forward the work of the soft atmosphere, and in due time the bud looked out and into a new world. As the weeks went by it told its own story of life and growth and hope, and at last there appeared the pretty June rose—a floral triumph. Step by step the rose had been led out of its cell into the sunlight. Gladdening the world with fragrance, it is a type of the real, for

> The beauteous rose which thine outward eye doth see,
> Hath blossomed thus in God, from all eternity.

BROTHERHOOD.

The crest and crowning of all good,
Life's final star is brotherhood:
For it will bring again to earth
Her long-lost poesy and mirth;
Will send new light on every face,
A kindly power upon the race,
And till it come, we men are slaves,
And travel downward to the dust of graves.
Come, clear the way, then, clear the way:
Blind creeds and kings have had their day.
Break the dead branches from the path;
Our hope is in the aftermath—
Our hope is in heroic men,
Star-led to build the world again.
To this event the ages ran:
Make way for brotherhood—make way for man.

MRS. EDDY AND HER "NEXT FRIENDS."

The case brought against Mary Baker G. Eddy, which involves her liberty and property, by so-called "next friends," is a species of injustice under the forms of law that should arouse an indignant protest from the press and the people of this country. Here is a woman who has devoted her whole life to doing good for others. She has founded a church on what she and her followers believe to be the right interpretation of the Christian faith. She has spent a long life in writing, talking, and teaching the plan of salvation as given by our Saviour, as she understands it.

Whether her philosophy be perfect, better, or not so good as that taught by other Christian sects, it cannot be devoid of a great truth, else it could not have such a large and intelligent following. Not alone in this country, but in many other countries there are men and women who believe in the teachings of Mrs. Eddy. No one can claim for a moment that her teachings are immoral. Everybody concedes that her whole life has been one of peculiar devotion to what she thought was right. Mrs. Eddy is a publicist of world-wide reputation. There are a million of people, or more, in the United States who believe that she has accomplished more good than any woman who ever lived. While there are others who disagree with her philosophy, there are none but concede the purity of her motives, as well as her phenomenal ability in propagating and advocating her faith.

She has secluded herself from the world in a modest home, surrounded by those who love and revere her. It is the universal testimony of her neighbors and friends that she is an ideal citizen, who has consecrated her life to the betterment of her race. . . . As to the ability of Mrs. Eddy to take care of herself, testimony has already been given by some of the most eminent and upright people in this country who have recently visited and talked with her—men like Arthur Brisbane and Edwin J. Park. The devotion of her followers is the safest protection she could have, if she were wanting in anything in this world. Many of them are among the very brightest and best people in the country. They could not be deceived by designing persons imposing upon Mrs. Eddy. They would act and act promptly if she were in need. Everybody must know this to be true.

The legal proceedings instituted against Mrs. Eddy are founded on the hypocritical pretense that she is incapable of managing her property or caring for herself, and that designing persons are maltreating her. If there was a scintilla of truth in such assertions there are thousands of Christian Scientists whose devotion to this woman would have caused them to act in her behalf before now. The universal testimony of the very best people in the community where she lives, many of whom are not Christian Scientists, gives the lie to the charges made against her by these spurious "next friends."

Behind the greed of these people seems to be lurking a mean and contemptible desire to injure the Christian Science faith. It may be that the whole proceeding is founded on greed, but when one of the attorneys against her goes out of his way to make a vituperative attack upon Mrs. Eddy, denouncing her as a humbug and a fraud, and hurling anathemas at her faith, it would seem that a part of the plan is to injure Christian Science, as well as to rob Mrs. Eddy of her property and liberty. It will all fail.

In strange contrast to the greed and malevolence of these "next friends" is the sweet, pure, and holy life of this venerable woman. And we cannot help but think that there is enough justice in the State of New Hampshire to protect this saintly woman against the machinations of her enemies. In saying this we do not speak as a member of the Christian Science Church. We are not a member of that organization. Nor is it the purpose in what we have said to make any plea whatever in favor of that religious faith. We write as an American citizen, in behalf of a good, pure woman who has devoted her life for the good of others. We would enter a protest against the wrong, against the injustice that is being heaped upon this venerable woman in the name of law. The whole proceeding against her is rank hypocrisy. It pretends to be in the interest of Mrs. Eddy. Its first purpose is to get her property, and we very much fear its next purpose is to try to destroy her and her usefulness.

Mrs. Eddy is entitled to her belief. This is a land of religious liberty. She is entitled to the law's protection in the enjoyment of her property—property she has earned with her pen. If she is disturbed in her property or liberty it will be a foul blot on the administration of justice in New Hampshire; worse than that, it will be an indictment of the civilization of the twentieth century.

[Editorial in the *Concord* (N. H.) *Daily Patriot*.]

CURTIS WRITES OF MRS. EDDY.

In the Chicago *Record-Herald* of last Thursday appeared an article on Mrs. Eddy from the pen of William E. Curtis, who in the earlier part of the month spent some days in Concord and in other sections of the State.

The display head under which the communication appeared, made plain the impression left upon this famous newspaper man by the woman whom heirs-at-law and interested lawyers are trying to have it appear is unable to look after her private affairs and incompetent to manage her own estate, and are asking a court to appoint them, or some one or ones of their choosing, to take charge of her money and other property and manage it for her. This is how the headlines read: "Mrs. Eddy, marvel in mental activity"—"Vitality wonderful in woman of eighty-six years, who still seems in perfect health."

We do not intend to publish the Curtis letter in full; but a few extracts from it, coming from a man of broad experience, from a man of keen and discriminating intellect, from one who has spent his life in measuring the mental capabilities of men and women in high and low station, will be interesting reading, and will aid in removing any lingering doubts, if any there be, as to the injustice of this unwarrantable proceeding. Mr. Curtis says:—

There was no difficulty in securing an interview with Mrs. Eddy. As soon as Mr. Meehan, editor of the Concord *Patriot*, notified her household, I received an invitation to call at Pleasant View at two o'clock, and he went with me. . . .

As we entered her study, Mrs. Eddy arose from an easy chair in which she had been sitting beside a desk covered with correspondence and books and gave me a hearty greeting. Her hand is thin and almost transparent. . . . The veins stand out boldly, making a mysterious map of blue lines. She was dressed simply in a white shirtwaist, trimmed with a good deal of lace, and a black skirt. A gauze scarf was thrown over her shoulders and a brooch of diamonds with delicate settings in the shape of a coronet was fastened at her neck. Her hair is abundant and perfectly white, and is dressed low on her forehead with graceful waves. . . . Her eyes are full, clear, and bright. Her grasp is quite strong and indicates considerable physical vitality. Indeed, I have never seen a woman eighty-six years of age with greater physical or mental vigor.

As we stood for a few moments exchanging greetings, my companion slipped his hand under her arm. She drew away impatiently, inquiring:

"Why do you take hold of my arm?"

"To support you," was the reply.

"I need no support," said Mrs. Eddy, rather independently, "but I think it is better that we all sit down."

She indicated a chair beside her table for me and another for my friend, and resumed her seat in a large easy chair upholstered in red velvet, which she had been occupying before we came into the room. I watched her very closely—every motion that she made—

Digitized by Google

because her physical and mental condition is now the subject of litigation; but during the interview, which lasted about twenty minutes, I did not see the slightest sign of the "senile debility," "mental infirmity," or "physical incapacity" which has been alleged as the basis of a suit to deprive her of the care of her property.

And so it has been from the beginning—every one who has come to Concord impressed with the belief that there was some reason or justification for the lawsuit instituted by the so-called "next friends," and who has had opportunity to talk with this remarkable woman, has gone away with the well-defined conviction that among sane people Mrs. Eddy is one of the most sane, that among responsible people she is one of the most responsible, and that among competent and successful business men and women she is one of the most competent and most successful.

In the face of the evidence adduced and the record of revealed facts standing out for all to see, and the absolute absence of any contradictory testimony of any kind or character produced by the plaintiffs after many months of effort, it is to be regretted that this persecution directed against the peace and quiet of an aged woman should be permitted to continue.

Mrs. Eddy has proven by her wonderful words and works a high conception of citizenship and womanhood, and in her life she has demonstrated the value of right doing by living up to these conceptions.

What man or woman in Concord or in New Hampshire or elsewhere, having respect for mental and moral endowments, accomplishment, womanhood, and motherhood, can do otherwise than deplore, in a community like Concord, that a woman who has attained the ripe age of eighty-six years; that a woman who, by preaching and teaching the gospel of "on earth peace, good will toward men," has won the respect and the acclaim of hundreds upon hundreds of thousands of well-thinking people throughout the world; that a woman who by patient, intelligent effort and becoming enterprise has acquired a fortune; that a woman who has given and is giving patriotically and liberally to every worthy undertaking, whose purse is ever open to every deserving unfortunate or honestly struggling person; that a woman who has founded a religion, the pivotal principle of which is the denial and destruction of sin and sickness and the substitution therefor and the inculcation of moral and civic virtue and physical health,—we say it is to be regretted that such a woman cannot be protected from the annoyance which meddlesome and malicious and covetous persons seek to heap upon her.

If Mrs. Eddy had not been provident, if she had not husbanded her resources, if she had grown great only in God's work, if she had only been poor, these patriots (through hope of reward) would not know her; just as they did not know her when she was struggling with adversity.

Mr. Curtis' letter will be read by millions of Americans and will be believed by them, because his interpretation of conditions and men and women in every part of the well-known and even but partially-known world, from frozen and sunny lands, peasant cots and kingly courts, has been true,—neither colored by personal interest nor shaded by desire to please or intent to offend; and it was in this spirit of simple justice that he said, "Mrs. Eddy is very sane, very responsible, very competent."

[From *The Christian Herald.*]

At the Red Cross conference recently held in London the subjects discussed were many, varied, and most interesting. As Professor Martens of Russia and Professor Renault of France, two renowned authorities on international law, were likewise the representatives of their respective governments at The Hague Peace Conference, and were due there the latter part of the week, the subjects that they desired to discuss were first taken up: the extension of the provisions of the Geneva, or, as it is sometimes called, the Red Cross Treaty, to naval warfare, so that hospital ships shall receive its full protection; the succor of prisoners of war by the Red Cross Societies, and the question of the abuse of the Red Cross name and emblem. In speaking of the second subject, Professor Martens, who was in charge of this special Red Cross department during the Japanese-Russian war, said: "Indeed, by a happy innovation, the Japanese and Russian Prisoners Aid Societies of the Red Cross corresponded directly and regularly with reference to prisoners of war. The St. Petersburg office replied to over seventeen thousand inquiries for information and forwarded some fifty-five thousand letters and seven thousand postal packages. Baron Knesebeck, President of the German Red Cross, told of the care given by this society to the Japanese prisoners when they passed through Germany to embark at Hamburg for home.

The kindest hospitality was shown the delegates by their English hosts. A reception was given by the King and Queen at Buckingham Palace, at which the delegates were each presented in person. Slight, fair, and almost girlish looking, the sweet-faced Queen, dressed in purple velvet, went from delegate to delegate, talking of her interest in the Red Cross; and his Majesty, looking well and hearty in his brilliant red uniform, welcomed in English, French, or German the representatives of the various countries. Baron Ozawa, vice president of the Japanese Red Cross, entertained the delegates one evening with stereopticon views and a description of the Red Cross work during the war. Nothing reveals more the horrors of war than the Red Cross reports and its exhibitions of trains, ambulances, litters, and other appliances to mitigate suffering.

An invitation was extended by the American National Red Cross to the Central Committees of the other Red Cross Societies to hold the next International Conference in 1912 in the United States, and it is highly probable that this invitation will be accepted. Long before then, it is hoped, our people will be aroused to such an interest in and enthusiasm for this wonderful and noble organization that in 1912 we may prove by the size, strength, and system of our American Red Cross that we are not any longer behind the other peoples of the world in our patriotism and humanity. The following is the Queen's welcome to the members of this conference:—

Buckingham Palace.

It is with the greatest pleasure that I, as the President of the British Red Cross Society, welcome you all here on the occasion of the first international meeting on British soil. The delegates may be assured that they have my warmest and most heartfelt sympathy in their united endeavors to further still more the great scheme for relieving the suffering of the sick and wounded in times of war.

ALEXANDRA.

[WE have much pleasure in giving, in part, the following excellent article from *Uncle Eli's Magazine*, of recent date, by Clarence B. Hadden, B.L. It may not be amiss to say that the ushers for The Mother Church, to whom Mr. Hadden refers, are a remarkably fine set of men, and their efficiency and courtesy are often remarked upon by visitors to this church.—EDITOR *Sentinel.*]

On the tenth of June, 1906, it was my privilege to be appointed one of one hundred and fifty ushers to assist in

Digitized by Google

seating the thirty thousand people who attended the dedication services held in The Mother Church Extension,—The First Church of Christ, Scientist (as it is known officially), in Boston, Mass. The beautiful structure, rearing its lofty dome to the height of Bunker Hill monument in the northern part of this liberty-loving and historic old city, shone resplendent in the sunlight of a perfect June day. The impression of solidity and strength, coupled with that of perfect harmony of design and beauty of its chaste, yet ornamental style of architecture—Italian Renaissance—can scarcely be appreciated by any one who has not seen it. That morning, I remember, it seemed to stand there in all its completed grandeur, as a material type of spiritual achievement, fully conscious of its mission to the world. Hardly did it seem possible, as we looked upon the great composite edifice, typifying the wonderful growth and unity of the force for righteousness behind it, that only twenty-seven short years before this Church had been organized by Rev. Mary Baker G. Eddy with only twenty-six members. That even twelve years before—in 1894, when the smaller Mother Church was built—the membership was only 2,536, and that in these last twelve years, up to the present time, the membership of the Church had grown by leaps and bounds and had spread to all parts of the earth, until it then numbered forty-two thousand members, with adherents of its branch churches and students of its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, numbered by the hundreds of thousands. It did not seem possible that there were nearly one thousand branch churches and societies scattered throughout the world, which, on that very June morning, would hold services similar to the one in which we were about to participate. But such was the fact, and this beautiful structure was not only complete, but fully paid for, every obligation being provided for before the dedication, as is the custom with all of our churches.

I think I reflected in my feeling of gratitude and love for our wise Leader, Mrs. Eddy, the thoughts of that vast throng of people who were waiting to enter—at the early hour of six o'clock in the morning—to the first service at half past seven, when I silently prayed and thanked God for the opportunity of not only being a part of this great movement, of having contributed my mite toward the cost of this great edifice, but especially that He had seen fit in His infinite wisdom to give to the world one who through bitter trials had the divine support, and understanding sufficient to "press on" in her "untiring" fight to establish, on sure foundations, the truth of Christian Science, which she had discovered only forty years before and which has so greatly needed and profited by her guiding influence and care during all these years of its tender youth. And as I was ushered into that vast auditorium and thought of what it represented, the words of our Leader's Message of that eventful day came to me as the best expression of the impression I then received. The Lesson-Sermon, consisting of appropriate passages from the Bible and correlative passages from Science and Health (which is all the sermon or pastor the Christian Science Church has throughout the world), was full of meaning. Then came the reading of the dedicatory Message of our Leader, "Choose ye." It was like a benediction and was full of hopeful thoughts. After a solo, organ offertory, and hymns, and the sending of a congratulatory telegram to Mrs. Eddy, the first of the six services of the day was concluded. It was the most profoundly sacred, religious experience I have ever had.

The great concourse of people, gathered from all the ends of the earth by a common purpose, represented much of the fruits of regeneration that is being wrought by this Christian religion in our time. Christian Science is primitive Christianity understood in all its completeness. It has restored the "lost art" of healing after the manner of Christ's teaching and practice. Hence it is just as impossible to understand and appreciate this religion, or to write a history of Christian Science or the life of its Discoverer and Founder, Rev. Mary Baker G. Eddy,—as a certain magazine is claiming to do,—without carefully considering the overwhelming volume of testimony of healing (the signs that accompany it), as it is to understand and appreciate Jesus and his teaching and practice, while ridiculing or trying to explain away on some other than a basis of Divine power, the works of healing "all manner of diseases" that he and his apostles and followers performed and accomplished. Thousands upon thousands of such testimonies of persons cured of "all manner of diseases" are on record in the periodicals of our Church; the *Christian Science Sentinel*, a weekly, and the *Journal*, a monthly, each publishing from fifteen to twenty in every issue, and this method has been carried on for at least ten years. This great good to humanity in this generation has not come through chance, nor through suggestive therapeutics, nor through any other human agency or speculative hypothesis, but it is the direct result of the power of the omnipotent creator and Father of us all, as revealed in the life and teachings of Christ Jesus and as interpreted by Mrs. Eddy and exemplified in her unremitting toil and self-sacrifice, in her purity and patience.

The old theology ignorantly makes God the author of pain and poverty, sickness and sin, suffering and death, and declares they are all as necessary and everlasting as their opposites. This is not the God of Love the Christian Scientist worships and declares to the world. Instead of attempting to make God human or trying to compress the infinite into the finite, its whole effort is to make man Godlike; to see and know God as He really is,—all good, all power, all wisdom, and always present,—of too pure eyes to behold iniquity, and to recognize man as the image and likeness of this kind of a God. As Jesus said, the knowledge and whole-souled love of the real Father, as He is thus seen to be, constitutes one half of man's duty, and his love of his neighbor as himself constitutes the other half, for "on these two commandments hang all the law and the prophets." This understanding, which all Christian Scientists are striving for, is the little leaven that is leavening the whole lump, and when practised and demonstrated in daily living, it will cure mankind of all its ills of every sort.

[Alfred Farlow in the *Boston Times*.]

Christian Science recognizes the possibility of progression from the imperfect to perfect manhood, but sustains the proposition that man is perfect at the outset, and that what we have termed development is simply bringing into activity and manifestation the ideal manhood which is forever intact; attaining a complete and satisfactory state, according to the idea expressed by the psalmist: "I shall be satisfied, when I awake, with thy likeness." Education, therefore, is not a process of bringing new ideas into existence, but the disposition of ignorance. Spiritual evolution consists in putting "off the old man with his deeds," and putting "on the new man, which is renewed in knowledge after the image of him that created him."

A POCKET EDITION OF THE HYMNAL.

In response to many requests for a hymnal suitable for carrying in the pocket, a new edition of the *Christian Science Hymnal* has been issued. This edition is called the Pocket Edition, and is bound in full morocco, with round corners, gilt edges, and leather lining inside of cover. The size is $4\frac{3}{8} \times 6\frac{3}{8}$.

The price for a single copy, prepaid, is $3.00, and for twelve or more copies to one address, prepaid, $2.50 each.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. *Beware of counterfeit letters.*

[From the *Grand Rapids* (Mich.) *Press.*]

MRS. EDDY DESCRIBES HER HUMAN IDEAL.

In a modest, pleasantly situated home in the city of Concord, N. H., lives at eighty-six years of age the most discussed woman in all the world. This lady with sweet smile and snowy hair is Mrs. Mary Baker Glover Eddy, Founder and Leader of Christian Science, beloved of thousands of believers and followers of the thought that has made her famous. It was to this aged woman of world-wide renown that the editor of *The Evening Press* addressed this question, requesting the courtesy of a reply:—

"What is nearest and dearest to your heart to-day?"

Mrs. Eddy's reply will be read with deep interest by all Americans, who, whatever their religious beliefs, cannot fail to be impressed by the personality of this remarkable woman.

Pleasant View, Concord, N. H.

Editor of The Evening Press:—To your courtesy and to your question permit me to say that, insomuch as I know myself, what is "nearest and dearest" to my heart is an honest man or woman—one who steadfastly and actively strives for perfection, one who leavens the loaf of life with justice, mercy, truth, and love.

Goodness is greatness, and the logic of events push onward the centuries; hence the Scripture, "The law of the Spirit of life in Christ Jesus hath made me [man] free from the law of sin and death."

This predicate and ultimate of scientific being presents, however, no claim that man is equal to God, for the finite is not the altitude of the infinite.

The real man was, is, and ever shall be the divine ideal, that is, God's image and likeness, and Christian Science reveals the divine Principle, the example, the rule, and the demonstration of this idealism.

Sincerely yours,

MARY BAKER G. EDDY.

"CHRISTIAN SCIENTISTS AND JURY DUTY."

In an editorial in the *Sentinel* of July 20 we quoted a newspaper item in which it was alleged that a Christian Scientist in Chicago had been excused from jury duty upon his representation that it would be inconsistent with his religion for him to serve as a juror. We were glad to receive a letter from "our friend in Chicago" in which he explained that the report was erroneous; that he served his full term as a juror and received pay therefor. It seems that there were several cases pending against a corporation with which he had recently preferred and settled a claim for damages; and it was for this reason that he was excused from serving as a juror in these cases, and not because he was a Christian Scientist. What we said about the civic duties of Christian Scientists is in no wise affected by the fact that the report about this juror was untrue, and we are much pleased to find that our views on this subject are highly commended by Christian Scientists in general.

ARCHIBALD MCLELLAN.

THE "SCIENCE OF SOUL."

For what shall it profit a man, if he shall gain the whole world, and lose his own soul?—JESUS.

THERE is no word of Scripture more tenaciously held to by religionists than is "soul," and none whose meaning is so much questioned by the average thinker. Until Science and Health was published the soul was supposed to be something located somewhere in the material body, its functions unknown. It was held to be conscious of both good and evil, and yet to be immortal. The writer remembers hearing two zealous church members discussing its location, the one contending that it was in the brain, the other in the heart, and their arguments were marked by anger rather than by good logic. Later, a discussion of the same subject by eminent physicians appeared in the newspapers, but no more light was thrown upon it than had come from the opinions of the deacons aforementioned. The doctors were agreed that if the soul existed in man, its location and functions would surely have been revealed by the scalpel or microscope, and as there was no material evidence of its existence, it was reasonable to conclude that it did not exist.

In striking contrast with all mere opinion on this subject is the inspired declaration of our text-book, that Soul is divine,—that "God and Soul are one, and this one never belongs to a limited mind or to a limited body" (Science and Health, p. 335). The study of this whole subject in the light of the wonderfully illuminating statements of it in Science and Health, clears away the sense of mystery with which it has seemed to be enshrouded and offers the sincere thinker a scientific working basis instead of a speculative theory. The great Teacher's statement which we have quoted shows the tremendous importance of gaining the right understanding of Soul, and then of living up to its demands. He declares in unmistakable terms that the possession of "the whole world" counts as nothing over against the Soul of man,—his divine being.

Some students of the Bible complain that it presents difficulties in the way of a clear understanding of the subject of Soul,—that many of the statements appear contradictory. The scholars tell us that there are several different words in the Hebrew and Greek which are translated "soul" in the authorized English version. Besides this, we must remember that the Science of Soul was not stated in definite terms until it was given to the world in "Science and Health with Key to the Scriptures" by Mrs. Eddy. Her simple rule for the use of the word "Soul," as given on page 482, lines 6 to 10, is a wonderful guide to the study of the Scriptures. Where men cry out in anguish that "their soul is melted because of trouble," it is mortal sense, not the spiritual, which is referred to.

Christian Science teaches that the true man is governed by Soul and reflects Soul. It also reveals the great importance to all mankind of a right understanding of this subject. Our revered Leader shows clearly, on pages 122 and 123 of Science and Health, that the correction of popular error respecting Soul and body is of the most vital import to all mankind, and that Jesus' marvelous demonstrations over sin, disease, and death were based upon the Science of Soul. As we learn in Christian Science that God is the Soul of man, the harmony and immortality of being become more and more apparent. Health and happiness are no longer believed to be at the mercy of chance and change, but are seen to be governed by immutable divine Principle. So, also, is every event in man's career!

To the loyal Christian Scientist, Soul has priority in all things; for "what shall it profit a man" to seek material gain or pleasure, and so "lose," even temporarily, his sense of Soul, with its divine peace and power, its abundance of all good things? No, not even "the whole world" could compensate for this loss! Our Leader's great discovery of

Digitized by Google

the Science of Soul is fulfilling the hope expressed in an old hymn:—

Our souls [spiritual sense], we know, when He appears,
Shall bear His image bright;
For all His glory full disclosed
Shall open to our sight.

ANNIE M. KNOTT.

A PREREQUISITE OF PROGRESS.

IT is an interesting fact that we cannot knowingly entertain contradictory opinions about a given subject at one and the same time. Try we ever so hard, it is impossible for us to think that a given statement is both true and untrue, so long as we give the same content to its terms. It follows that we cannot realize either spiritual or intellectual progress apart from a succession of concepts, each of which is truer and nobler than its predecessor.

For the truth-seeker this means that all undemonstrated propositions must be held tentatively until a provably correct apprehension is reached. It means also that the moment our attachment to any mere theory or belief, whether acquired through heredity, education, or experience, becomes so great as to bias and control our judgment, that moment our growth in the given direction must cease. Fixedness of opinion under such circumstances not only interdicts all progress, it inevitably results in mental atrophy.

In most departments of thought the acceptance and substitution of improved beliefs in human consciousness goes on steadily, in large part unconsciously, and without friction or ferment, and the gain to humanity is constant and uniform. To illustrate:—

Not long since two celebrated scientists discovered in pitchblende an ingredient whose molecular action led to conclusions that practically cancel the beliefs which have been entertained by scientists for unnumbered years respecting the nature of so-called material substance. This discovery has been accepted by the scientific world without protest, and in a kindred way one after another of the theories which have served as the working basis of material investigation are being replaced by those that are more adequate and satisfactory, and thus the steady advance is being made which finds expression in the wonderful physical achievements of modern times.

On the other hand, the effect of an opposing attitude is well illustrated in the history of Egyptian art. As compared with the art of the Greeks, which advanced with untrammeled speed to the most glorious consummations ever reached, the staid uniformity of its design, and especially the persistence of a distorted drawing of the human figure, is painfully apparent. Age after age a strained and impossible pose was maintained, and one is quite at a loss to account for it until he learns that the determination of the matter lay with a religious tradition which was fixed and final. The result was that for thirty centuries the utterly foolish immobility of false belief manacled the art of the world's foremost nation, and in so far the art progress of the whole world.

To-day, as one enters the realm of religious thought, he is compelled to recognize the saddening fact that the same prejudice and resistance which in the Middle Ages obstructed all progressive ideas, whether chemical, astronomical, political, or spiritual, and which precipitated the most sanguinary struggles and persecutions of history,—that this attitude of resistance still characterizes the thought of many and leads them to antagonize the advance of spiritual apprehension. While the forms of their expression have changed, the distinctive earmarks of the bitterness and bigotry of the sixteenth century are not infrequently seen, and these facts constitute one of the most impressive incongruities of present-day civilization.

The explanation is sometimes found in malice or a desire to injure, sometimes in the misapprehension of ignorance, sometimes in a superstitious reverence for so-called sacred teachings, sometimes in a pitiful failure to discriminate between essential truth and some passing form of belief. The man who identifies the theology of his belief with the Word of God is impelled to resist any teaching which imperils the standing and authority of that theology, and thus it has come about that every true reformer, every great and inspired leader of religious thought, has been called to pass through fiery ordeals.

Christian Science teaches that only that which is wholly and hence demonstrably true has any place in science, and that for this we should not only rejoice to surrender every phase of error but every half truth, and Mrs. Eddy has pertinently defined the mental attitude which all who hope to progress must maintain, when she says (Science and Health, p. 324), "Willingness to become as a little child and to leave the old for the new, renders thought receptive of the advanced idea. Gladness to leave the false landmarks and joy to see them disappear,—this disposition helps to precipitate the ultimate harmony." JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Boston, Mass., July 27, 1907.

Rev. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader and Teacher:—It is a great pleasure to send you the enclosed statement, showing the business of the Publishing House for the six months ending July 25, 1907. The Trustees desire to express their gratitude to you for having made this good statement possible. We recognize it as the result of your discovery and message to mankind. The business of the Publishing House has been steadily increasing, and this summer we have had no cessation in our work as in former years, showing that interest in our Cause is growing and that our literature is in greater demand.

For some time we have felt the need of larger quarters, and to supply this demand temporarily the three-story house, No. 252 Huntington Avenue, which adjoins us on the west, was rented and added to the Publishing House, thus adding about four thousand square feet to our floor space, all of which is now occupied for our work.

Gratefully and lovingly yours,
BOARD OF TRUSTEES,
The Christian Science Publishing Society,
By A. V. STEWART.

Mineapolis, Minn., July 4, 1907.

Beloved Leader:—On behalf of Second Church of Christ, Scientist, Minneapolis, Minn., we, the Board of Directors, send to you, with gladness and with love, greetings for the Communion season. As we approach this period, fraught with its demand for proof rather than profession of at-one-ment with God, we are awakened to a clearer realization of the fruits of your constant communion with Him. Through it has come to the world, not only the revelation of Christian Science, but the incentive for the practical proof of its rules,—the demonstration of the healing and saving power of Christ. As we look back in our experience we appreciate how clearly you defined our old life in the words,—"It is sad that the phrase *divine service* has come so generally to mean public worship instead of daily deeds" (Science and Health, p. 40).

Certainly humanity owes boundless gratitude for the

Digitized by Google

raising of Christendom out of the grave-clothes of the letter into the living reality of the spirit. This awakening has been exemplified in our midst by the constantly increasing "cloud of witnesses" to the healing power of the Word of God.

During the past year, each Sunday morning found the capacity of our auditorium, seating twelve hundred, so overtaxed that it became necessary last February to provide an overflow service in the Sunday School room, which now enables us to shelter, under one roof, a congregation of over seventeen hundred people. From this multitude of grateful Christians goes forth to God a prayer of thanksgiving for your holy, uplifting life, and assurance that the Lord will continue to "bless thee, and keep thee;" to "make his face shine upon thee, and be gracious unto thee;" to "lift up his countenance upon thee, and give thee peace."

EMMA A. THOMPSON, MATILDA R. HAHN,
ABIGAIL D. THOMPSON, JOSEPHINE W. KNEELAND,
MARGARET J. I. NIVEN, LILLETTE A. HEWITT,
ADDIE KEITH MERRILL, ELIZABETH P. BRADFORD,
LOUISE W. CHAPMAN.

Poughkeepsie, N. Y., July 9, 1907.

Mrs. Mary Baker G. Eddy,
Concord, N. H.

Our Beloved Leader:—We, the members of First Church of Christ, Scientist, of Poughkeepsie, N. Y., in regular quarterly meeting assembled, do unanimously pledge our love and loyalty to you and the Cause of Christian Science in this hour. We know that omnipotent Love will guide and guard you and safely deliver you from the hands of the enemy. We know that you reflect Divine wisdom and intelligence, and those who seek to ascertain your mental capacity will find you richly endowed with that wisdom from on high which emanates from the only source of supply. We rejoice with you in the grand results your life and teachings have accomplished the world over, and feel that you will rejoice with us in the substantial growth manifested in this field as a result of the teachings of truth as set forth in our text-book, "Science and Health with Key to the Scriptures," by you, our dear Leader in this blessed truth. A large number are to be added to the membership of our church on next communion Sunday.

We thank you for your example of love, sacrifice, and a consecrated life, and assure you that we will "strive, watch, and pray for that Mind to be in us which was also in Christ Jesus" (Science and Health, p. 497). Again we pledge you our tenderest love and lovalty at all times.

First Church of Christ, Scientist, Poughkeepsie, N. Y.,
WILL H. MCLEAN, *Clerk.*

Boston, Mass., June 14, 1907.

Beloved Leader and Teacher:—Your wonderful demonstration of love, bringing light out of darkness and harmony from discord, fills my thought with deepest reverence and gratitude to you, who are overcoming the malignity of this world's hatred toward the Discoverer and Founder of Christian Science,—you who have brought the truth of God to thousands now rejoicing in it. Communion Sunday, the annual meeting, and the Wednesday testimonial meeting, were filled with a higher consciousness of God, and the feeling of love and loyalty to our Leader was expressed with such earnestness and individual power of conviction as to stimulate every honest heart.

The location of the Christian Science Reading Room was changed May 1 to the new Berkeley Building, corner of Boylston and Berkeley Streets. It is so constructed that windows form the sides of the two rooms on each street. This floods the rooms with light, and is such an advance on the former rooms as to recall the record of the creation, "And God said, Let there be light: and there was light." May the results accomplished bear out this beautiful symbol. The increase of interest is shown by the newcomers to the Rooms, and unequaled sales of literature, barring the fortnight last year, at the dedication of The Mother Church. Knowing you are interested in this forward movement, I take this opportunity of sending my heartfelt, reverent love for you, my beloved Teacher.

ALICE S. BROWN.

St. Joseph, Mo., July 11, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

Dear Leader:—We, the members of First Church of Christ, Scientist, St. Joseph, Missouri, have often desired to give expression to our gratitude and appreciation for what you have enabled us to accomplish in healing the sick, reclaiming the sinner, and in building a beautiful church edifice,—all through the better understanding of God as set forth in your writings, which are revealing to mankind the true idea of existence in God, and bringing a present salvation from all the ills that beset mortals. Your Christly living and example have ever been an inspiration to us, and the consequent persecution that you have had to endure has only brought us nearer to you and caused us to be more faithful and earnest in the grand work of awakening others to the great realities of a life hidden with Christ in God. We all desire to be your loyal and faithful followers, realizing that the best way to show our appreciation of your untiring love and unselfishness is to obey your precepts.

Lovingly yours,
BOARD OF TRUSTEES AND DIRECTORS.

Oakland, Cal., July 6, 1907.

Mrs. Mary Baker G. Eddy.

Beloved Leader:—We, the members of First Church of Christ, Scientist, Oakland, California, at a regular quarterly meeting held in the church edifice July 1, 1907, by a unanimous vote passed a resolution to send to you an expression of our devotion and loyalty, which in this hour becomes not only a privilege but a loving duty. As a branch church, and part of the great body of Christian Scientists, it is with deepest reverence that we recognize the exalted position which you hold. God is shielding and protecting you, and the world is being benefited thereby.

Again we assure you of our grateful appreciation of all you are to us and to humanity. Faithfully and lovingly your followers,

The members and Board of Directors,
CHARLOTTE A. WHEATON, *Clerk.*

Oxford, Mich., July 13, 1907.

Beloved Leader:—The members of First Church of Christ, Scientist, assembled at their regular meeting, wish to express love and gratitude for all that you have done in giving to us and to the whole world that pearl of great price, Christian Science. We appreciate your ceaseless and tireless efforts, which have brought innumerable blessings to us, both in the healing of sickness and in redemption from sin. We earnestly desire to prove by our lives, that "truth is revealed. It needs only to be practised" (Science and Health, p. 174). Initial steps have been taken at this meeting to provide a church home for this branch of the Vine. We know that God is leading and sustaining you.

Gratefully yours,
EMMA A. RIXFORD, ALLIE J. YETTER,
JULIA K. HAINES, *Committee.*

AMONG THE CHURCHES.

WILMINGTON, N. C.

The handsome new church edifice completed for First Church of Christ, Scientist, of this city, at a cost of five thousand dollars, was dedicated with simple yet impressive ceremony at Carolina Place, Seventeenth and Market Streets, Sunday morning and evening [July 28]. Although built for temporary use, the church is one of the prettiest and most convenient houses of worship in the city, and it was thronged both morning and evening with members of the congregation, and the public at large who had gathered to witness the exercises. The dedication was in every way a perfect success and marks a new era in the life of the denomination in Wilmington. The church is of the colonial style of architecture and is pleasing in every respect. The order of exercises for the dedication on Sunday consisted of a solo, "Feed my sheep," words by Mrs. Eddy; Scriptural selection; prayer; reading of telegrams, cablegrams, and church history; Lesson-Sermon, and the benediction. The exercises were listened to most attentively by the large overflow audience which was present at both services. The dedication of the new church attracted large numbers of visitors to the city, among whom was Mrs. Sue Harper Mims, C.S.D., of Atlanta, Ga. To the general public the reading of the church history was perhaps among the most interesting features of the ceremony. It was in part as follows:—

In 1897 a resident of Wilmington was healed under Christian Science treatment, and received class instruction. The patient and student, thus healed, came home convinced that Christian Science is synonymous with primitive Christianity, and that its students, in the degree to which they live the Christ-life and think the Christ-thought, can do the Christ-works. The following Sunday the Christian Science service was read aloud for the first time in this city. It was read in a private parlor by one person, without a hearer save God. However, the seed was sown, and from that day to this Christian Science has never been without a witness in our midst; and until time shall be no more, will its gentle, loving ministry be with us, fulfilling the scripture of Isaiah, "to bind up the brokenhearted, to proclaim liberty to the captives, and the opening of the prison to them that are bound. . . . To give unto them beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness."

In 1898 a little group of six persons met in one of the homes represented, and held the first united service in the local history of this work. In 1902 the Christian Scientists of the city met in a hall, and organized themselves as First Church of Christ, Scientist. On this date began our real church history. In touching on the inner life of this church, I cannot fail to speak of our gratitude to God for the book, the work, and the life of Mary Baker Eddy. Through them we have learned, as we never knew before, how to love our fellow-man and to follow Christ. In a message to The First Church of Christ, Scientist, of Boston, Mass., she said, "Follow me only as I follow Christ." Those who know the true history of that life can testify to its consecration—its purity—its love for God and man.

Perhaps the feature most appreciated by the Christian Scientists in connection with their church dedication was the receipt of a telegram from the revered Leader, Mrs. Eddy, the text of which was as follows:—

Concord, N. H., July 27, 1907.

First Church of Christ, Scientist,
Wilmington, N. C.

My Beloved Brethren:—At this dedicatory season of your church edifice in the home of my heart, I send loving congratulations, join with you in song and sermon. God will bless the work of your hearts and hands.

Lovingly yours,
MARY BAKER G. EDDY.

FORT DODGE, IA.

A business transaction was closed July 23 whereby the property owned by the German Methodist Episcopal church, at the corner of First Avenue North and 12th Street, is transferred to the Christian Scientists of the city. The property is that occupied by the small white frame church and parsonage and is a valuable piece of property in the central part of the town and on two paved streets. The fact that after only a few years' organization in the city, the Christian Scientists are strong enough to be able to purchase this valuable property, is of itself an eloquent testimony to the earnestness of the church followers and their endeavors along the line of growth. Although they have not made public any plans regarding their purchase, it is very probable that they will set their endeavor at once toward a fine new church building to occupy that corner.

Christian Scientists have lived in Fort Dodge for a great many years, but until within the last few years there has been no definite organization or united strength to stimulate and promote rapid growth. As soon as a church was established here, however, the Scientists began to grow and increase in numbers and influence, until they have secured for themselves a permanent and prominent place among the list of religious organizations.

Fort Dodge Messenger.

NEBRASKA CITY, NEB.

At a meeting of the Christian Scientists, held last evening [July 10], it was decided to erect a new church on the lots which they recently purchased at the corner of Twelfth Street and First Avenue. The committee was instructed to have plans drawn for a seven-thousand-dollar building, and to have it completed and ready for occupancy this fall.—*Lincoln* (Neb.) *Journal.*

CORRECTIONS.

In the Aug. 3 issue of the *Sentinel* it was stated in an article copied from the *Springfield* (Mass.) *Republican* that the edifice of First Church of Christ, Scientist, of that city was dedicated in 1905. We are informed by a member of the church that the building has not been dedicated as yet.

A lecture was credited to Durham, N. H., in the issue of July 6. It should have been Dover, N. H.

DISTRIBUTION OF LITERATURE.

The semi-annual report of the Committee on Publication for the State of New Hampshire, contains some interesting information, and we quote from it as follows:—

Your liberal contributions have enabled the Publication Committee to distribute in the State a total of eight thousand four hundred and thirty-one periodicals in these five months, including magazines and papers containing friendly articles upon Christian Science and its beloved Leader. It should also be remembered that the press of the State have contained many kindly articles, including lectures, editorials, etc.

The eight thousand four hundred and thirty-one pieces of literature sent out by the Committee on Publication do not include the papers containing Judge Ewing's lecture, generously given the churches in this State by First Church of Christ, Scientist, of Dover.

TESTIMONIES OF HEALING.

In my youth I seldom prayed, except my childhood prayer at night, because I had heard so many of the best Christians I knew say, "The Lord helps those who help themselves," and I received the fixed opinion that it was never right to pray to God for anything until I had first done everything I could for myself. I did not read my Bible, because I could not understand it, but my Sunday School teacher had given me a small book with a text for each day, the text being a promise and another verse which explained what was required of us to obtain the fulfilment of that promise. This small book was dear to me always, but there were no texts in it which explained God's willingness to heal sickness. On account of eye trouble, I had not read any at night for over a year, and but little in the daytime. The physician consulted said that there was nothing to do but to use the eyes as little as possible.

After experiencing considerable relief from this trouble, I found myself, three years later, in the same condition as before. This seemed a very great hardship at that time, because I was confined to an invalid's chair and had been for nearly a year, owing to the cumulative effects of an accident which had occurred some years before, and if deprived of my drawing or needlework the time would seem to go slowly indeed. The internal injuries which seemed to cause me constant suffering I still supposed *materia medica* could heal, and I also held to the notion that I must not ask God to help me till I had tried everything else first. After suffering night and day for two years, trying a specialist for a year and learning that not even in the operations they were talking of was there healing for me, hope and courage deserted me and despair came. I said to my husband one morning, "Where is God?" He urged me to pray and not give up. When he had gone I simply gave up every other reliance and asked for divine help. I remember that I said, "If there is a God at all, He would not make me so helpless that all my little strength would need to be spent on myself. I believe that God made me to be of some help in some way, else there would have been no need of creating me."

At this time we had rooms with a family in which was a young lady who said she was a Christian Scientist, and that if I wanted to read her book about Christian Science, I could have it. I told her no, that I would not even look at the outside of it, but of course I thought she had a right to believe whatever she wanted to. I had been strictly brought up by devoted Christian parents, who would not allow Christian Science mentioned in the home. I did not know the name of the book referred to, nor the name of the author, or that Christian Science claimed to heal sickness and sin.

Early the next morning, after my prayer of despair, I thought while sitting up I would read some in the New Testament, which seemed easier to understand than the Old. I had just started to do so when the strongest impulse came to me to go and borrow the book about Christian Science which had been offered me. At first I paid no attention, but the impulse became so strong that I felt I must go and get the book. Afterwards I was reminded of Paul's words, "We know not what we should pray for as we ought: but the Spirit itself maketh intercession for us with groanings which cannot be uttered." I sat there and resisted the truth, but at last I heard the lady in the hall, and I cannot express the relief I experienced when I sat down to read "Science and Health with Key to the Scriptures" by Mrs. Eddy. I commenced at the preface and read it eagerly, thankfully, and said over to myself, "It is the truth; it is, it is! oh, why did no one ever tell me this before! Why did not my minister preach it!" Finally I came to the chapter on Prayer, and as I read I felt such a content. Here at last I was to be told what I had always longed to know. I read on till I came to that utterance of divine truth, "Become conscious for a single moment that Life and intelligence are purely spiritual,—neither in nor of matter,—and the body will then utter no complaints. If suffering from a belief in sickness, you will find yourself suddenly well" (Science and Health, p. 14). I stopped for a moment in deep thought, and then, although there was no sunshine that day, the light broke upon me. I said, "Can it be possible that the truth is so simple as this? Then I am well!" The dark room was filled at once with light.

The spiritual uplifting or joy which accompanies that consciousness of a nearness to God, divine Truth and Love, so overwhelmed me that I fell upon my knees to pour out my gratitude to God that I need no longer grope in blind faith, but that here on earth—now—I had found something absolute, which could not only be applied to my great needs, but to my smallest ones as well, and it was the understanding of divine Principle! I walked over two miles that evening—indeed it was a year and a half before I recalled there was such a word as tired. Then I stopped suddenly in the middle of a stairway and remembered that the specialist last consulted had said I could never be well! I was using seven different medicines and applications a day when the healing came. I completely forgot them for two weeks, then threw them away and have never used any since then—nine years and a half ago. I had not been able to lie on my right side for over a year, and that first night I found I still could not; but I knew the truth and why evil was unreal! I held to the truth, indeed I could not do otherwise when I knew. In less than two weeks I awoke to find I had been sleeping on my right side. Mind had been my surgeon! The eye trouble also left me that day I read the book. I now weigh forty pounds more than I did then.

I could not think of the author of our wonderful textbook, she seemed so far beyond me, till one day I heard something said against her. Then love and gratitude poured out of my heart for her selfless life, and have continued to do so ever since. It is not the physical healing for which I am most grateful, but that I have a better understanding of God and the Bible. It is such a pleasure to read it now, instead of a duty. It was not the healing which brought us into the Christian Science Church, but the direct and impersonal way in which I was led to read the book, Science and Health, by Mrs. Eddy. We were so attached to our old church and so prejudiced against the new that we would have been glad to call the healing "faith cure" and not know it was the understanding I got from that book, had it not been I was led to it in that manner. That text in the Scriptures rang in our thought till we gave up the old for the new church and the "new name"—that powerful command, "This is the way, walk ye in it."

GERTRUDE C. MAHIN, Denver, Col.

That "man's extremity is God's opportunity," was proven in my case. It was only as a last resort, and to please my friends, that I consented to try Christian Science for the cure of the liquor habit. I had used liquor for a number of years in a social way, but believed—like many others—that I was master of the desire, until I discovered that I had become a victim of the habit. Through will-power alone I would stop for a week or two, only to return to it more of a slave than ever. I experienced all the misery and suffering which follows the victim of this evil,—I was reduced to a moral, physical, and financial wreck; I lost my home and friends, and was considered a hopeless case.

When I was told that I could be healed through Christian Science, I did not believe it; but knowing that the prayers of the Christian Scientist could do me no harm, I

Digitized by Google

went, though very reluctantly, with my sister, who was hopeful of my healing, to see a practitioner in Washington, D. C. I was given a treatment, but did not feel that anything had been done for me, and was disappointed and discouraged; this indicating a certain amount of faith of which I had been unconscious. But on the following day I went again for treatment, and on the way to the practitioner's home I met an old friend, who insisted I should drink with him; which I did, and then continued on my way. I was asked if I had been tempted, and was told that I would not drink any more. On the third day before the treatment was over I realized that I had been healed. I continued treatment, however, for two weeks, and having been asked if I had any physical ills to be destroyed, I replied that I had one, but that Christian Science could not reach it, as I had suffered from hernia for seventeen years and was compelled to wear a heavy steel truss. At the end of the two weeks, almost without realizing it, I was healed of this physical ill also. I left off the truss, and to-day am strong and have splendid health. I was also cured of the use of tobacco, and during the first year after I came into Christian Science I was healed of two attacks of acute illness. The constant value of Christian Science to the business man, in enabling him to solve his problems and master his difficulties, if obedient to its rules, is inestimable.

I am very grateful to God for my healing, and for giving to us our Leader, Mrs. Eddy, who through Christian Science is showing us how to avail ourselves of the truth that makes us free. I am indeed grateful that I was healed and given my first glimpse of the truth, and also for the spiritual uplifting and the privilege of helping others.

GEORGE G. SMITH, Asheville, N. C.

The many positive proofs of the truth of Christian Science which my husband and I have had during a period of about four and a half years, make me feel it a joyful privilege to bear witness to its healing power. For quite a long time I had suffered with stomach trouble, headaches of frequent occurrence, a tendency to take cold very easily and often, and other physical troubles; also many mental worries and anxieties. I was always ready to try anything which promised relief, and when told of Christian Science I immediately wanted to know something about it. The aid of a practitioner was sought, and at last I found that we can be healed to-day as Jesus healed the sick. Material remedies were then discarded, and gradually all my ills have disappeared. For the freedom which has come through the power of Truth I am deeply grateful, but it means much more to me to know God as infinite Life, Truth, and Love, and to know man's relation to Him. My heart is filled with gratitude to dear Mrs. Eddy for giving us this practical knowledge of the Christ.

MRS. LOUISE O. NEWELL, Chicago, Ill.

About eighteen years ago Christian Science was first presented to me by a sister, who had been healed by it after the doctors had given her up. I did not question by what means it healed, and knew absolutely nothing about it. I was, however, quite ready and willing to give it a trial. I had tried everything else, and why not Christian Science? I had suffered intensely with severe rheumatic trouble, and at this time it seemed to me that I was suffering more than ever before; I could not even raise my arms from the bed. My sister telegraphed for a practitioner, who came the next afternoon and gave me treatment that evening. I slept soundly all night, and got up the next morning and dressed myself. A little swelling was all that remained to remind me of my former suffering. I immediately purchased a copy of Science and Health and tried to read it, but like many others I laid it aside, because it seemed hard to understand, and I thought it would be much easier to go to a practitioner when in need than to study for myself. A year later I again had this ailment, and of course I hurried to the practitioner; but I was not benefited physically until I studied and learned for myself how I was healed. I had to work out my own problem, and for this I am more than thankful, for with my better understanding I was enabled to overcome a supposedly inherited catarrhal trouble. I could not remember the time that I did not suffer from its worst form, although I had tried everything of which I had ever heard. Only those who have had this loathsome disease can appreciate what it means to be free from it. I could not tell the many blessings we have had in our family from Christian Science, but I am more and more grateful each day to Mrs. Eddy for giving us Science and Health.—MRS. EVLYN G. MYERS, Mena, Ark.

Since taking up the study of Christian Science I have been healed of several different ailments, some chronic, and two supposed to be hereditary. In this testimony I will speak particularly of my first proof of the healing power of Christian Science. From early childhood I had been subject to severe headaches, each attack lasting from three days to two weeks, affecting my eyes to such an extent as to interfere seriously with my university work. A few years ago I began to read the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and from that day to the present time I have had no return of the headaches, and have been able to use my eyes continuously without the slightest discomfort. To me this first healing is the strongest evidence that the interpretation of the Scriptures as given by Mrs. Eddy in the Christian Science text-book, is the true interpretation.

I had been an active member of an orthodox church, and knew so little of Christian Science that I believed it to be a synonym for spiritualism. I had no one to influence me in favor of Christian Science, and did not know that any one had ever claimed to have been healed through reading Science and Health, yet I was healed, not only of headaches, but of extreme nervousness and stomach trouble. The other healings came gradually, as the result of spiritual growth, but not without treatment and faithful teaching, with precept upon precept. I find I am still much "like a feather bed [which], needs often to be *stirred*, sometimes roughly, and given a variety of *turns*, else it grows hard and uncomfortable whereon to repose" (Miscellaneous Writings, p. 128).

I did not come to Christian Science for the physical healing; it was mental unrest—a longing to know God—which led me to investigate, and to-day I am most grateful for the purification of thought, and for my increasing appreciation of the beauty of holiness.

MISS GERTRUDE YATES, New York, N. Y.

During the past winter I had an experience which clearly shows the power of Truth as revealed in Christian Science. I was on my way to the Wednesday night meeting, when suddenly I felt a terrible sense of pain in the back, and I became entirely helpless. I feared that I would fall, and looked at a fence which was near me with the thought that if I could only lean against it the terrible pain could be borne, but not one step could I take. I would be glad if I could truthfully say that I immediately realized God's love and power, but I was so frightened and bewildered that I began to totter, when like a flash of light came our Leader's beautiful words in Science and Health, "To those leaning on the sustaining infinite, to-day is big with blessings" (Pref., p. vii.). I was roused from my lethargy and began to real-

Digitized by Google

ize that as God's child no evil could happen to me; then I found I could move my feet a little, and instead of trying to lean on the fence for support I leaned on God, and with His help managed to walk, although slowly, to the church, and when the services were over I was entirely free from pain. I walked home, a distance of five blocks, with perfect ease. I remembered that many years ago my mother was attacked suddenly just as I had been. She was lifted into bed and the family physician attended her for several weeks, diagnosing the disease as sciatic trouble.

The Bible is replete with promises of help to those who put their trust in God, but we never seemed to make a practical use of these promises until our Leader, Mrs. Eddy, realized the great truths of Christian Science through God's gift of spiritual understanding; and thousands of people all over the world have been lifted from beds of suffering, from the thraldom of sinful habits, and brought into the glorious freedom of God's children. What a debt of gratitude we owe her! She has shown us a way through the tangled wilderness of error, so that we no longer are bound in the chains of sin and suffering, and the least we can do is to be loyal to the divine Principle of Christian Science and to our Leader, knowing that she is guided alone by God.

ANNA L. WALTERS, Chicago, Ill.

I think that I have been interested in Christian Science long enough to prove the efficacy and permanency of its cures. A little over two and a half years ago I was healed of the whisky habit at a Wednesday evening meeting. This was the second meeting I had ever attended. I had been addicted to this most insidious habit for about fifteen years or more, and how I longed to be free. I had prayed often in the old way to be cured —but to no avail. Each day I had woven in another thread of this awful habit, until it seemed a cable too strong for human power to break. But the joy and the peace that have come to me and mine since that healing no man can tell. It is truly "the peace of God, which passeth all understanding." I write this in the hope that it may be read by others who are under the same bondage and that they may know the good that does result from attending the Wednesday evening testimonial meetings. In February, 1906, I took treatment for the cigarette and tobacco habit generally, and was healed of it in five days. I had been using tobacco for fifteen or sixteen years prior to this treatment. For these two most beautiful demonstrations, as well as for many others in my family which are just as wonderful, I am indeed grateful to God, who has made it possible in this age, through our beloved Leader, Mrs. Eddy, for us to know and demonstrate that the truth makes us free.

BENJAMIN WEST POINDEXTER, Richmond, Va.

Before I give the following testimony I want to express a few words of appreciation and thankfulness to our revered Leader for her wonderful gift to a sin-sick, heart-sick, body-sick world. One of the greatest blessings to me accruing from the study of Christian Science, has been a sense of peace and an absence of fear. For the past year and a half it has been my privilege to serve the Cause in the capacity of assistant publication committee, and I have looked in awed wonder at the sweet humility and forbearing patience of our peerless Leader during these months of fiery trial.

One afternoon I put my hands up to my closed eyes, when to my surprise a pain shot through the left eye and I noticed a little hard knot under the eyelid. I tried to realize the truth of our Leader's teaching in "Unity of Good," on the non-intelligence of matter, the spirituality of sight, and the scientific fact that we look mentally through our eyes, not with them. In the evening, as is my daily habit, I sat embroidering some fine Dresden work, and felt no inconvenience in seeing at all. When I went upstairs I examined my eyelid. Without a thought of fear I discovered an abnormal growth about the size of a pea. As my usual custom is, I lay in bed reading for a half hour. Three times during the night I awoke and had to bathe this eye to open it, but without any sense of pain, falling asleep immediately. In the morning upon my appearance at breakfast exclamations were rife at the swelled appearance of my eye; it was open and that was about all. I said, "Your sympathy is one day late. After breakfast I will tell you about this." I lifted the lid and showed my mother where the growth had been. Even upon close examination the eye showed not the slightest inflammation. I read, sewed, and wrote all day without inconvenience of any kind. The next morning the eye was clear and smooth inside and out.—KATE MCCORD SMITH, Pensacola, Fla.

Something over two years ago I came to know of the healing power of Christian Science. Prior to the birth of twins I was under a physician's treatment for a long time, he visiting me twice daily. I spent the most of my time in bed, and was taking medicine every hour, but with no change for the better. I had a high fever, was extremely weak and emaciated, and ate but very little. Finally I reached the point where I felt that something had to be done, as I could not continue in that condition. A few months previous to this time a friend had told me of Christian Science, and while I had read but very little about it, I was ready to try almost anything. I wrote to a practitioner about my condition, and she at once gave me absent treatment. I began to improve, and in less than a month I was able to make the trip from Denton, Md., where I had been staying, to my home in Cumberland, without any inconvenience whatever. Three weeks after my arrival there the babies were born. I had absent treatment again, and the birth was perfectly natural. The third day I sat up in a chair and the babies and I got along as nicely as could be. I had a good appetite and ate heartily all the time. Later in the winter the little girl was taken with a very bad cold, hard coughing, high fever, etc. I immediately telegraphed to the practitioner, and she was relieved in a short time. The little boy was also threatened in the same way, but was relieved before it got a hold on him. Neither one of them has ever had a drop of medicine in any form. Other members of my family have also been greatly benefited in many ways, and we owe much to Christian Science.

MRS. E. P. WOODFORD, Cumberland, Md.

Some years ago I was working at my trade as wagon-maker in different carriage shops. Love of money and the fear of a "rainy day" were the excuse for an incessant grind of work. Job said, "The thing which I greatly feared is come upon me," and so it proved with me. The rainy day came; my health began to fail to such an extent that during four successive years I got in only eight months' work at my trade. Several local physicians were consulted at different times, and their remedies applied with results varying from unsatisfactory to entire failure. I had Christian Science treatment, somewhat irregularly, but generally with better results than from *materia medica*. My unwillingness to accept wholly and unreservedly the teaching set forth in Mrs. Eddy's works, was undoubtedly prolonging the struggle. This inability to regain my health, alternating between a gain and a relapse, made it evident that something

Digitized by Google

decisive must be done, as the trouble began to assume alarming proportions. Accordingly a noted doctor was called in consultation with the leading local doctor. A dreaded disease of the spine was their verdict, and they prescribed accordingly. When beginning to use their medicine I was able to walk across the room with the aid of a chair, but three months later, having taken the medicine every day, I could only creep, and hardly that. Our hope of getting any help from *materia medica* was by this time well-nigh gone, and we saw no other possible thing to do than turn to Christian Science again. A Christian Science practitioner was called, and lovingly took the case, while I turned myself to the study of the Bible and Science and Health, which teaching I endeavored to imbibe, even though it did not fit my preconceived notions. Then came the test! All eyes, as it seemed, were on the case, watching the outcome. The first two or three weeks it was a fierce struggle, then to my intense joy and almost amazement of others, it was recognized that I was actually gaining, and so it has kept on. I am able to walk for miles, and to be on my feet practically all day. The patience and loving kindness shown me was simply marvelous, and I cannot help but entertain the most profound gratitude to God, and to our dear Leader, Mrs. Eddy, for all the good that has come to me through Christian Science.

TED OLSON, Watertown, S. D.

During many years of earnest seeking for spiritual enlightenment I went to many churches and wandered through the mazes of many beliefs, the last and most disastrous being "mental science," which proved a broken reed in time of trial and left me "without hope and without God in the world." This teaching took from me love of church, and destroyed all faith in drugs, but gave me nothing in return to sustain me in a very serious illness of an internal nature, which lasted three years. Through much suffering I was impelled to seek help from some of our best specialists and surgeons, but in spite of their faithful efforts, including a most serious operation at the hospital (which afforded only temporary relief), I gradually grew worse. I was never free from pain, nor able to walk without intense suffering, and much of this time was confined to my bed. Finally, the fear of a second similar operation made me ready to try anything that would save me from the repetition of such a trying ordeal. During the two years and a half of chronic invalidism, extreme nervous and mental disturbances, also sleeplessness, had one after the other been added to my list of ailments, and these last seemed harder to bear than the former troubles.

About this time I heard of a lady who had gradually regained her health by attending the Christian Science church. This gave me a little hope, and I resolved to go to that church as soon as I was able, and see what it would do for me. I did try to go, but Sunday after Sunday went by, finding me quite unable to bear the weight of street clothing or even to walk a short distance to the street car. Thus six months passed, and then one day, in desperation, I decided that I would go the next Sunday, if I had to crawl on my hands and knees to get there. The next Sunday, although in extreme pain and with great difficulty, I found my way to The Mother Church. Strange as it may seem, I was not seeking physical healing, but desired above everything else to get my thought changed from what seemed to me almost insanity, into a more cheerful mental state. I shall never forget "the peace of God, which passeth all understanding," that came over me as I sat there, for the first time, in that atmosphere of love, and drank in the spiritual draughts of which our Master spoke to the woman at the well: "Whosoever drinketh of the water that I shall give him shall never thirst." I realized that I had at last found my church home. This was Oct. 18, 1903, and during this service, for the first time in three years, I lost all sense of pain, and as "the scientific statement of being" was read (Science and Health, p. 468), I realized the spiritual uplifting which made me free mentally, but I did not then know that I was also healed physically of these chronic difficulties, until I found myself doing, with perfect ease, the things which had been impossible to me during those weary years of illness.

A few days afterwards I walked three miles without stopping, and I have never known any difficulty in walking since that time. I was also healed at this service of chronic throat trouble, being able to sing the last hymn in my natural voice. Stomach and bowel trouble, from which I had suffered for many years, was healed in about ten days by reading Science and Health and the *Sentinel;* but the belief in diseased nerves, which so many people think is the only thing that can be helped by Christian Science, did not wholly yield for several months. My whole outlay for this healing was the cost of the text-book,—"Science and Health with Key to the Scriptures" by Mrs. Eddy, and my car fares to and from The Mother Church. Not one penny has been paid out for myself or my little girl for doctors or medicines since that time, and we have both found God to be an ever-present help in time of need. Previous to this healing my husband had paid out in one year more than five hundred dollars for doctors and surgeons, bringing no permanent benefit.

For the mental and physical healing I thank God with my whole heart, and also our dear Leader, whose faithfulness as God's messenger to this age has made this healing possible, but my gratitude is far deeper for the constant spiritual uplifting I get from the daily study of the Bible (it had become almost a lost book to me), in connection with our text-book, which illumines the Scriptures and is indeed the "key" to countless and priceless spiritual treasures. The joy in my own spiritual growth has been greatly augmented by the healing I have been permitted to bring to so many others through the early application of this divine Principle—"yet not I, but the grace of God which was with me," to quote St. Paul. I have been enabled for nearly three years to devote all my time to the healing of the sick,—to follow meekly in the footsteps of the Master; and this to me seems the only fitting way to pay my debt to divine Love.

MRS. HELEN FRIEND ROBINSON, Somerville, Mass.

I have derived a great deal of benefit from the testimonies in the *Sentinel* and *Journal.* Although I know personally that Christian Science does heal, I love to read them, as they show me what the "word" of God is doing for mankind. I was healed through Christian Science of stomach trouble, after the physicians had exhausted their skill. My son was healed of a severe bowel trouble in its worst and last stages, when from a material standpoint there was nothing that could save him. He is now a happy, healthy, and strong boy, thanking God for his healing. My husband was healed of rheumatic and heart trouble, the tobacco habit, and other troubles. The physical healing is beautiful, but is as nothing compared to the spiritual uplifting. In Christian Science I have found the way to work out my salvation from all the claims of error. I have learned that God is Love, the "primal cause," and as it says in Science and Health (p. 207), "there can be no effect from any other cause." Is it any wonder that we love our Leader, who has given us the "key" which unlocks the Scriptures, so that we may understand them and apply them? God bless her! is my prayer.

MRS. GEO. H. PIERCE, Aberdeen, Wash.

He who would obey the law of God must first learn to read that law within his own soul.—*The Outlook.*

FROM OUR EXCHANGES.

[*The Pacific Christian Advocate.*]

If we are strong, if we are pure, if we are holy and merciful and kind and tender and just, people will find it out. The world knows us much better than we expect. Men are much more profoundly impressed by what we are than by what we claim to be.

[*The Universalist Leader.*]

The life we enjoy now through faith in Christ is a foretaste, an earnest of that which is to come. We know by it what our heavenly life is to be, not in quantity, but in quality. The spiritual joys of the Christian life are the first fruits of the heavenly harvest.

[*The Christian Life.*]

The spirit of democracy which is in the air of civilized society to-day is now making its subtle influence felt in the realm of theological thought. The creeds of the churches are being brought to the bar of common sense, and the common experience of human life. In connection with matters of religion, men are no longer willing to bow to the authority of ecclesiastics, or the pronouncements of experts in divinity. The moral instincts of the million are beginning to insist upon being taken into account in all questions which concern the relations of God and man, time and eternity. This is true more or less of Christendom at large. It is a new feature of our time, full of significance, and of good promise for the future of the race.

[*The Sunday School Times.*]

Because we love our dear ones is not a good reason for wounding them freely. Yet we actually seem to make it so in much of our daily life. Some one has said keenly, "Any one can be courteous to a stranger." It is easy to be careful for the feelings of those about whom we care little. Should we not do as much for those who are dearest to us? There is no greater cruelty than to count upon our love's "tiding over" the effect of impatience, discourtesy, harsh criticism, and all the unloving, stinging darts that most of us reserve for home use. There is no better way of loving and proving our love than by using at home all the courtesies, attentions, cheeriness, sunshine, and "better side" of our natures that most of us reserve for company use. For love that takes these things for granted is either counterfeit or perilously near death.

[*The Outlook.*]

To him [Jesus] heaven was not a place, a distant star, a hidden world to which some day he would return. Heaven was a kind of life, as truly present as future, as real now as after death. The kingdom of heaven was the domination of this kind of life over the minds and hearts of men. The kingdom of heaven is the kingdom of God, the victory of the spirit of God in human life; to use Paul's phrase, "righteousness, and peace, and joy in the Holy Ghost." To lay up treasures in heaven is to prize those things that will endure when this spirit shall rule in the world.

By this truth we may test all our experiences. The man who does his daily task just to secure that which perishes with the using, is laying up treasures upon the earth. His neighbor, who may be engaged in the same kind of business, but is intent on making that business a means of genuine service, is laying up treasure in heaven. There is nothing magical or mystical in this.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

MR. KIMBALL'S LECTURE. 31 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. 25 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By Rev. ARTHUR R. VOSBURGH. 28 pages.

HEALING THROUGH CHRISTIAN SCIENCE. Discourses and Editorials. By JUDGE SEPTIMUS J. HANNA. 36 pages.

HEARINGS ON PROPOSED MEDICAL BILLS IN MASSACHUSETTS AND NEW YORK. 23 pages.

ANSWERS TO QUESTIONS CONCERNING CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. 26 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 63 pages.

THE CHRISTIAN SCIENCE MOVEMENT. Revised by CAROL NORTON. 28 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the *Journal*. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 40 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the *Journal*. This pamphlet is also printed in German. 38 pages.

A CRITIC ANSWERED. By ALFRED FARLOW. Printed in German only. 31 pages.

Price: One copy, six cents; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2.25
Twelve or more books to one address, each, prepaid 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4.00
Twelve or more to one address, each, prepaid . . . 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT, Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.60.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration will be found on the wrapper. No other notice will be given.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba; twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

In all other countries, six cents per copy, postpaid to any address; twenty-five copies, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST

National.

Postmaster General Meyer proposes the establishment of a parcels post and a savings bank in connection with the post-offices. The savings bank, which is to be patterned after a similar department in the English and Canadian postal service, would not be run in opposition to the regular savings institutions, but simply to encourage thrift among the working classes. The amount of deposits will be limited, probably to $2.50 or $5, payable only to bearer. The proposed parcels post system would probably be limited to eight or ten pounds. Stamp-vending machines also will be introduced, similar to those now in use in Germany. These machines, which it is expected will increase the postal revenues, will be placed in hotels and public places. A reduction of foreign postage rates to a two-cent rate to such countries as are in direct steamship connection with the United States, will also be recommended.

The Jamestown Exposition is declared to be complete, in a statement issued by Director General Barr, who says: "It fittingly commemorates the great historical event which it was designed to celebrate, and it reflects credit on the State of Virginia, the South, and the Nation. In the character of its buildings, the excellence of its exhibits, and the beauty of location on historical Hampton Roads, it compares favorably with any exposition held in this country, and it fully justifies its management in asking the united support of the people of the country."

Convictions on all the counts of the indictment just returned by the Federal Government for western New York would render four corporations liable to fines aggregating $18,240,000. The report charges the Standard Oil Company, the Vacuum Oil Company, the New York Central and the Pennsylvania railroad with giving and receiving special illegal concessions on shipments of oil from Olean, N. Y., to points in Vermont.

Proceedings to dissolve will be instituted soon by the Government against the International Harvester Company. The Government expects to prove that the company controls at least seventy per cent of the output of reapers, mowers, and other agricultural implements in the United States, and that it is violating the Sherman anti-trust law.

The directors of the United States Steel Corporation have decided to invest an additional $45,000,000 in the construction of the model city and steel plant at Gary, Ind., in addition to the original appropriation of $75,000,000.

Owing to the failure of the contractors to install the Roosevelt's new boilers in season, the main expedition of the Peary Arctic Club will be postponed for a year.

Internal revenue receipts of the United States for the fiscal year ended June 30, 1907, showed the aggregate receipts from all sources to be $269,064,022.

The government of Costa Rica has ratified a contract with an American banking house authorizing a $2,000,000 issue of six per cent gold bonds.

International.

The Russo-Japanese convention which was signed on July 30 last, was published on the 15th ult. The preamble recites: "The governments of the Emperor of Russia and the Emperor of Japan, animated by a desire to strengthen the peaceful, friendly, and neighborly relations which happily have been restored between Russia and Japan, and to remove the possibility of future misunderstandings between the empires, have entered into the following agreements:—

"Article I. Each contracting party undertakes to respect the present territorial integrity of the other, as well as all rights accruing from existing treaties, agreements, or conventions now in force between the high contracting parties and China, copies of which have been exchanged by the contracting Powers, so far as these rights are not incompatible with the principle of equal opportunities enunciated in the treaty signed at Portsmouth, N. H., Sept. 5, 1905, and in the special conventions concluded between Japan and Russia.

"Article II. Both contracting parties recognize the independence and territorial integrity of the Chinese empire, as well as the principle of equal opportunities in commerce and industry for all nations in said empire. They also pledge themselves to the maintenance of the *status quo* and the respect of this principle with all the peaceable means at their disposal."

In accordance with the imperial decree recently issued, all the opium dens in Canton were closed Aug. 6 without disturbances. The new departure caused general rejoicing throughout the city, the streets were decorated and a number of processions, headed by bands of music playing lively airs, marched through the main thoroughfares. The Emperor of China issued a decree on Sept. 21, 1906, that the use of opium in China should cease within ten years. No new ground can be placed under cultivation for poppies, and the ground under cultivation now must be reduced one tenth every year, under penalty of confiscation. All persons who use opium must be registered, and so must the quantity each uses. Only a registered person can buy opium. No one may begin the use of opium after the issuance of the regulations. Shops that sell opium are to be closed gradually. It was ordered that all opium dens be closed within six months of the issuance of the order. This time expired, according to the Chinese reckoning, in May, by which time, with but few exceptions, of which Canton was one, the law was in enforcement throughout the empire.

Another chapter in the controversy between the New York and Bermudez Asphalt Co. and the Venezuelan Government was added recently, when the Civil Court of First Instance of Caracas found the company guilty of having extended assistance to the Matos revolution, which was directed against President Castro, and condemned it to pay a fine of $5,000,000 to the Venezuelan Government. This sum is the estimated cost of putting down the revolution. Furthermore a large additional sum for moral and material damages is to be assessed later. It is expected that the company will appeal to the Superior Court of Venezuela.

King Edward was met by Emperor William at Wilhelmshohe on the 14th. Unusually large crowds gathered to witness the meeting of the monarchs, who were escorted to the castle by a squadron of Hussars. The presence of Chancellor von Buelow and of Sir Charles Hardinge, permanent under-secretary of the British Foreign Office, is interpreted as giving great political significance to the meeting.

The new turbine steamer Lusitania and the fast Lucania, now holding the trans-atlantic record for the western passage, are scheduled to start from Queenstown practically together, on Sept. 7. The object, it is stated, is to determine how the two vessels compare in speed under exactly similar conditions. The record now is five days, seven hours, and twenty-three minutes.

The United States, Great Britain, France, and Germany have definitely agreed on a scheme for the establishment of a permanent court of arbitration. It will be called the International Court of Justice, and thus be distinguished from The Hague Tribunal established by the Peace Conference of 1899.

Three Japanese settlements will be established in the State of Rio Janeiro. The Government of the State has given its sanction to the project.

An exposition is to be held in Buenos Ayres in 1910 in celebration of the centennial of the independence of Argentina.

The Empress Dowager of China has announced her determination to abdicate at the next Chinese New Year.

Industrial and Commercial.

The first large shipment of furs from the north, the pack of the Colin Fraser, which is expected to be the second largest one of the season, has been received in Edmonton. The skins comprise many bears, two hundred lynx, thousands of muskrats, ninety-six cross foxes, two hundred golden brown mink skins, three hundred red foxes, eighty otters, three hundred ermine squirrels, one hundred and four wolverines, six hundred martens, and thirteen silver foxes. One of these, a black fur shot with silver, is valued at five hundred dollars.

A warehouse and cleaning and shelling plant, to be used as headquarters for handling the Oklahoma peanut crop, is to be established at Enid, Okla. The warehouse will have one hundred and fifty thousand feet of floor space. Six thousand acres of land which have been purchased in the northwestern part of the State will be planted with peanuts the coming season.

Automobiles valued at more than $10,000,000 passed through the ports of the United States in its foreign trade in the fiscal year just ended. Five and a half million dollars' worth of these were exports and the balance were imports.

Greater Boston is reported to have more telephones in proportion to the population than New York, Chicago, Philadelphia, London, Paris, Berlin, or Vienna.

The total amount of the sock-eye salmon pack in British Columbia is placed at two hundred and twenty-five thousand cases for the season.

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

UNCONDITIONAL SURRENDER OF "NEXT FRIENDS."

THE suit commenced on March 1, 1907, in the name of Mrs. Eddy by so-called "next friends," but without her knowledge or consent, came to a sudden termination on Wednesday last, when the counsel for these "next friends" not only abandoned the proceedings before Judge Edgar Aldrich, Hon. Hosea W. Parker, and Dr. George F. Jelly, masters appointed by Judge Chamberlin to determine Mrs. Eddy's competency to manage her business affairs, but also filed a voluntary motion for the dismissal of the suit itself. The following is a full transcript of the proceedings of Wednesday (Aug. 21), the sixth day of the hearing:—

Judge Aldrich.—What next, gentlemen?

Mr. Chandler.—May it please the court, it will doubtless be a relief to the masters to be informed that the counsel for the "next friends" have this day filed with the clerk of the court a motion for the dismissal of the pending suit, and that they hereby withdraw their appearance before the masters without asking from them any findings upon the questions submitted to them by Judge Chamberlin. There are many reasons for this action. The principal one arises from a consideration of the unprofitableness of any immediate result of a decision in their favor upon the exact issue as now framed, compared with the burdens and disadvantages to be endured by us, both before and after such a decision. The suit has been almost wholly altruistic in its nature, and not a single dollar of the large fortune whose existence is disclosed, or which might be enlarged in consequence of this suit, can become at this time the property of the "next friends." There are also reasons, sentimental in their character, overcoming the strong desire of the "next friends" to prove the facts and vindicate the reasons upon which the suit has been based,—which suit, however, is now hereby dismissed.

Mr. Streeter.—If your honors please, in behalf of Mrs. Eddy, my associates, the Attorney-General, Mr. Eastman, and Allen Hollis, join me in presenting the following motion:—

Judge Aldrich.—The following what?

Mr. Streeter.—The following motion: "That the masters proceed with the hearing, to determine the question submitted, namely, Mrs. Eddy's competency to manage her business affairs March 1, 1907."

Upon this motion I desire to speak briefly, and perhaps more temperately than the circumstances would justify me in speaking. If we are allowed to proceed, we shall show you that on Feb. 12 Mrs. Eddy began to arrange for the entire management of her property during her life, and to make liberal provision for her kindred during that time. I will not go into the details of these matters, excepting to say to you that if your honors are not already satisfied, we should be able to satisfy you beyond question, not only of Mrs. Eddy's absolute competency to deal with her affairs, but that during the last two weeks of February, the last two weeks before this suit was brought, she was dealing with those questions with sagacity, so far as her business matters were concerned, and as a noble Christian woman, so far as her next of kin were concerned.

Now, your honors, neither Mrs. Eddy nor her counsel have got the power to prevent her so-called "next friends" from trying to persuade Judge Chamberlin to let them dismiss the bill and get out of court. Neither have we the power to prevent their unconditional surrender in the middle of this hearing before the masters. They volunteered to begin this wretched assault upon the person, property, and religious faith of an aged citizen of New Hampshire, and now, six months later, when their charges have utterly collapsed, they run to cover. This is their legal right; but I speak of the legal rights of Mrs. Eddy.

Let me temperately review the situation. She is an honored citizen of this State, entitled to the protection of its courts. She is the founder and head of a great religious organization, with many hundred thousand devoted followers. On March 1 last she was living peacefully in her own home, surrounded by faithful friends of her own choice. She was possessed of a large property, acquired almost solely from the sale of her religious writings. It will some time appear that, after providing liberally for her own kin, she has devoted much of her estate to the promotion of the religious views taught by her. She was a good citizen. She was, and is, entitled to the protection of the law.

On that day, March 1 last, this suit was instituted by a great newspaper, which had hired and paid eminent counsel to bring it. It was, primarily, an attack upon the religious teachings of a great religious leader. A son and an adopted son inconsiderately loaned the use of their names as "next friends;" and the agent of this newspaper who visited and persuaded the son at Lead, Nov. 29, and the adopted son at Waterbury, Vt., March 6, and persuaded them to co-operate, is now writing in the presence of your honors at the reporters' table.

This suit was brought in her name against ten honest men; alleging first, that she was incompetent to protect her property, and second, that these ten defendants have wrongfully misappropriated her funds. Not one of these defendants had ever taken a dollar of her money. They have answered under oath. The truth of their answers is admitted. The suit was based on false pretenses.

The situation was unique in legal history. Mrs. Eddy, in the eye of the law, was not a defendant, although the proceedings were in fact being directed solely against her. She was not plaintiff; the suit was brought against her will. Her trustees, who held and were managing her entire estate under a valid deed, prayed for leave to intervene; their petition was denied. She personally appealed to the court for protection. She urged that the maintenance of these proceedings by these alleged "next friends" was an abuse of the processes of the court and an unwarranted inter-

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

ference with her constitutional and legal rights, and that she was entitled to speedy relief.

She represented that under the constitution and laws she was of right entitled to a determination of the questions: first, whether her property interests have been and are now fully protected, and whether there is any lawful or just occasion for the maintenance of these proceedings by said "next friends;" second, whether the trust deed and the appointment of trustees and attorneys by her was thereby her free and intelligent act and carried out her own wishes; and third, whether the proceedings were brought in good faith for her personal benefit, and as a citizen she prayed for a speedy determination of these and other questions—all without avail. These so-called "next friends," her assailants, bitterly opposed her petitions, and they were denied. They insisted that her competency should be determined by the court, and their requests were granted against her protests.

You were appointed masters to pass on the question submitted in your commission. Knowing that upon the evidence there could be but one outcome of this hearing, she did not hesitate to submit to your decision. She has co-operated with you to obtain a full investigation. She has assented to every suggestion made by the masters to enable them to arrive at a just decision. She has submitted herself to your personal examination in the presence of counsel for the alleged "next friends," and the stenographic report thereof, inaccurate in many respects, has been given to the world. She has been asked to submit herself to the examination of hostile alienists, and, for the purpose of enabling you to reach a just conclusion in your own way, she has assented to that. Nothing that your honors thought would aid in the ascertainment of the truth, has been objected to by her or her counsel.

This trial has been proceeding five days, and with the exception of her own examination before you, the only evidence submitted is a few letters selected out of thousands written by her, and a few fragments of her other writings. Upon the charge that her money has been misappropriated, that her property was not safeguarded, not one word of testimony has been introduced. The charge that she is incompetent has utterly collapsed, and now these altruists, who pretended and represented to the court that they brought this suit as her friends, for her protection and in her interest, have made their public confession to the world. It will be found in the columns of a Boston newspaper published this morning, wherein it appears that they regard their success in the present proceedings as hopeless; that they cannot succeed in demonstrating Mrs. Eddy's incompetency while she is living, but (I quote) "it is now proposed to await Mrs. Eddy's death," and when she can no longer speak to contest her last will and testament. It is there stated that these eminent attorneys have (I quote) "agreed that the *shrewdest* plan was to suddenly and unexpectedly do away with the lawsuit now in progress, and to have in store as reserve ammunition all the evidence as to Mrs. Eddy's alleged delusions which they have thus far succeeded in placing on the court records during the masters' hearing;" evidence upon which they admit that their case is hopeless here, but when Mrs. Eddy's eyes have closed in death they hope may be useful in subsequent litigation, to which the men of New Hampshire are invited at a later date; and so they withdraw for the purpose, for the admitted purpose, of avoiding a finding by you that Mrs. Eddy is competent.

Under these circumstances we submit that Mrs. Eddy has a legal right to a finding of her competency—to such a finding on the case as it now stands. If you think otherwise, then to a finding upon such further evidence as she may produce. Any other result will bring reproach in the eyes of the world upon the administration of justice here.

I speak, your honors, not only for Mrs. Eddy, but for every other aged citizen of this State whose persons, property, and religious convictions are now endangered. In their name, and in the name of this aged and honorable and honored woman, we respectfully demand that a finding of competency be made by your honors upon this issue, thrust upon her and submitted to your decision by the court.

Judge Aldrich.—Is your motion in writing, Mr. Streeter?

Mr. Streeter.—I have not filed it in writing.

Judge Aldrich.—It will go into the record as you stated it.

Mr. Streeter.—How?

Judge Aldrich.—It will go into the record as you stated it.

Mr. Streeter.—Yes, your honor, of course.

Judge Aldrich.—We have only this observation to make with reference to the present aspect of this case. We have acted from the beginning upon the idea that the issue submitted to us was a property issue. We have endeavored to hold the lines of the trial with that view of the controversy, excluding so far as possible all considerations in respect to religious doctrines or religious faith. Of course, in order to have an issue, there must be a suit, a proceeding, either at equity or at law. There was such a situation in respect to the parties in this case, and out of that suit Judge Chamberlin framed an issue which he submitted to the masters here, and in which he in detail provided what appearances should be made, what parties should appear here; and evidently contemplated that the "next friends" were to go forward and maintain their claim with respect to the issue presented. They having withdrawn from this hearing, and with notice that they intend to exercise the right to dismiss the bill in the superior court, we think there is nothing left to be answered by Mrs. Eddy or decided by us. Therefore we should not feel warranted in going forward *ex parte*, with the view to establishing the mental status of Mrs. Eddy on the first of March. We think we should report to the court what has been done—that is, report the evidence under the commission. The commission, I think, requires that we should report the evidence.

We may be wrong in our disposition of your motion, Mr. Streeter, but, although this is a friendly suit, as we have said, it in a sense of course involves the interest of different parties, and when the party who asserts a lack of mental capacity withdraws, there is really no controversy left. Mrs. Eddy stands with nothing to answer, as we view it. If we take the course which I have just suggested,—report all the evidence up to the present time,—and then report what action has been taken by the "next friends" on your motion, then, in case we are in error about the effect of this withdrawal, Judge Chamberlin will only have to direct that the trial proceed; and if we are right, he will only have to accept the situation as one in which the plaintiffs have the right to dismiss the bill and end the controversy.

If we should go forward we might do something unwarrantable, and according to our view we should, if we undertook to decide this issue, to go forward in the absence of "next friends" and decide upon the question of Mrs. Eddy's capacity. If we should stop, and report what has been done to Judge Chamberlin, there could be no harm done, except such as results from delay.

I think, before these three volumes which have come from the stenographer are formally made a part of the report, the record should be corrected, either by myself, or in connection with Mr. Parker and Dr. Jelly, or by

Digitized by Google

counsel. There are necessarily some verbal errors, of course. We do not mean that as any criticism upon anybody. Is there anything further to be said? Do you except to this, Mr. Streeter? Do you except to the refusal to proceed?

Mr. Streeter.—I cannot help accepting it. If I could help it, your honors, I should. I beg your honors' pardon. I did not understand your question. You asked if I excepted?

Judge Aldrich.—Yes.

Mr. Streeter.—I do except, yes.

DR. ALLAN MCLANE HAMILTON FINDS MRS. EDDY COMPETENT.

During the progress of the case it had been thought advisable by Mr. Streeter, counsel for Mrs. Eddy, that an expert alienist, whose honesty, reputation, and competency could not be questioned, make a thorough study of the case and be prepared to pass judgment thereupon if it became necessary. It was thought advisable that this alienist should be the very best which this country affords, in order to make the testimony as strong as possible according to the justification which he might find, and to this end Dr. Allan McLane Hamilton was chosen. Dr. Hamilton had formerly testified against Christian Science in a New York case, but his sterling character and veracity is of such a nature that it was believed by Mr. Streeter and the Christian Scientists whom he consulted that the doctor's disbelief in some of the teachings of Christian Science would not in any way interfere with his making a just and fair estimate of Mrs. Eddy's condition. He visited Mrs. Eddy and has decided to submit his findings for publication.

Dr. Allan McLane Hamilton has had probably the largest experience of any alienist in this country in court, having commenced his career about thirty-five years ago. He has appeared in all the important cases in his own State of New York, both civil and criminal. He was selected by the United States as one of the special commissioner to determine the insanity of Snider in the District of Columbia; was one of the four chief experts in the Guiteau case, and was also consulted in the case of Czolgoltz, the assassin of President McKinley. He has the distinction of being the only expert in the Thaw case who expressed an absolute and unqualified opinion about Thaw's mental condition, which was subsequently adopted by both the defense and prosecution, but he was not allowed to testify by either, although he impressed the entire country by his independent stand. Dr. Hamilton is also known as an advocate for complete reform in the matter of expert testimony, and is generally regarded as one of the few impartial experts who can be relied upon to give honest testimony and who cannot be bought; for this reason he is respected by the courts, and by reputable lawyers generally.

Dr. Hamilton is fifty-eight years old, and is a grandson of Alexander Hamilton, and on his mother's side of Louis McLane, who was Minister to England and Secretary of the Treasury under Martin VanBuren and Andrew Jackson. Dr. Hamilton has written much and is prominently connected with many medical societies both here and abroad, and a few years ago received the great honor of being elected a Fellow of the Royal Society of Edinboro. He founded the Psychiatrical Society and is regarded as an advanced student of mental disease.

After the proceedings had been abandoned the following interesting statement was given out by Dr. Hamilton, who was interviewed by a number of the newspaper reporters in attendance at the trial:—

I have informed myself in regard to the mental condition of Mrs. Mary Baker G. Eddy, and for this purpose have examined a large number of documents and letters, perhaps one hundred in all, and have examined her at her home, Pleasant View, in this city. I have also read the original bill filed by her "next friends," George W. Glover, *et als.*, and the affidavits presented by them in support of their contention that she is an incompetent. It will appear from the complaint of these people that she is "incapable of so understanding her property rights as to be unable to exercise her free and unbiased will with respect to the same, or to manage her affairs and protect her property with prudence and discretion against the undue influence, control, and fraud of others, and to take charge of and manage the present legal proceedings."

The inspection and examination of autographic letters written by her show inherent evidences of mental vigor. Her mode of expression is logical and connected. Her construction is admirable, and these as well as the typewritten communications emanating from her are the products of an unusually intelligent mind. Not only are their contents responsive, but they show concentration and the exercise of a normal memory. In several of them there are interlineations, corrections, and additions, which convey more fully what she has already said. In her letters to her counsel, which I have read with some care, I find that she has returned to him certain ones with explanatory interlineations, and there has been a promptness and vigor in her replies to his own letters. The handwriting itself is remarkably firm for a person of her age, and there are no mistakes; neither are there omissions. Her words are well formed, and although there is a slight tremor, not uncommon in old people, and possibly because her mind travels faster than her pen, I do not regard this in any way as pathological.

From the large number of letters appended which I have read, there is no mental defect indicated. In those written to Mr. Farlow there is a keen anxiety regarding her copyright, a desire to avoid the violation of the copyright laws, an appreciation of what has been done for her by him, certain directions in regard to the preparation of the literature of the Church, and other matters connected with her daily life and her position as the head of the Church. I find in the letters addressed to Mr. McLellan the same kind of intellectual good order, and in fact there is nowhere the remotest suggestion of mental feebleness. My particular interest is with the papers written by her in the period beginning March, 1906, and extending down almost to the present time. These papers, which I understand have been prepared or drafted by her, indicate, either alone or together, a good deal of intellectual strength and consistency, and in this connection I will draw attention to the draft of a trust deed prepared in March, 1906, and another in February, 1907, one of which was the basis for the establishment of a trust for the benefit of George W. Glover and his family.

I have also read the instructions conveyed in the letter of Feb. 12, 1907, which were sent enclosed in a letter written by Mrs. Eddy to her personal counsel, Mr. Streeter, and which led to an extended correspondence. All these things prove that she possessed a continuity of intention and much deliberation, which is, of course, antagonistic to anything impulsive; that she had good and sufficient reasons in the preparation of this trust deed; that there was tenacious purpose in continuing to elaborate and carry out her original idea of providing for her next of kin and in advancing the interests of the Christian Science Church. She showed an ability to direct and criticise others, as to her affairs, and in everything a normal amount of will power, which was exercised in the proper direction. She had the capacity to appreciate details, to correct mistakes, and to see that others were put right; which implied a power

Digitized by Google

of attention that would not exist in an individual of weak mind. She possessed a perfect knowledge of her surroundings and the duties and obligations of those who were serving her.

My visit to her house was made on the afternoon of Aug. 12 at 2 o'clock. I found her to be an elderly woman of delicate frame, and evidently somewhat affected by the heat. There was, however, no visible indication of any motor symptoms of insanity or nervous disease. Her expression was intelligent and in consonance with what she said and did. She was dignified, though cordial, and possessed a certain sense of humor which led her to perpetrate a joke about the so-called "next friends," whom she referred to as "nexters." There was no tremor, no affection of speech; and besides a certain amount of slight deafness, I found nothing the matter with her. She fully understood the nature and object of my visit, and was willing, as long as she could, to answer my questions. In doing so she did not manifest any excess of feeling, but responded quickly and intelligently when she heard what was asked her.

The interview was opened by her disavowal of any prejudice against physicians. In fact she said that her cousin was a regular doctor who had become a homeopath, and that her father had believed he was getting crazy because he had adopted this method of practice; but that he, however, had taken care of Mrs. Eddy, who had gotten better, and then she herself commenced a series of experiments, gradually giving more and more feeble medicines, until she gave those with no potency whatever, but her patients got well just the same. She then referred to her exposures of spiritualism, which for a time she became interested in. She said that she had afterwards investigated various religions, at different times criticising the older ministers, and finally adopted the idea that infinite love and salvation were universal; in other words, that she adopted her present faith and that it was the evolution from her earlier experiences.

She referred to the fact that she had done and was performing an enormous amount of work, which I knew to be true. She said that she had no doubt she was going to win in this matter; that her followers have done much to help her, and that she would like to have me on her side. In answer to questions about her affairs, she said that she had put her property into the hands of three trustees, Henry M. Baker, Archibald McLellan, and Mr. Fernald of Concord; that she did this because it was in conformity with her faith, and that no man could serve two masters, God and mammon. She said that she would do this to see that her money would eventually go where she wanted it to go, that is, to the church she had established. She declared that the trustees of the deed were Mr. Baker, Mr. McLellan, and Mr. Fernald; that she had chosen Mr. Baker because he was a good and successful man and to be trusted, and that the others would dispose of her money conscientiously.

She stated that she had taken care of her son, built him a house and furnished it from top to bottom, and had done everything for him; that in February last she had put money in trust for him; that he had not paid his insurance nor his poll tax, nor his other taxes, and she felt he was running in debt, and that she had made a trust of one hundred and twenty-five thousand dollars and put it in the hands of "that honest man [pointing to Mr. Streeter] and two others." She referred to the fact that many years before, when her husband died, she asked her son to come home, saying, "You are all I have; come and stay with mother, and I will let you have all my property, all my real estate. Here is a home up here, and mother waiting for you, if you will come and live with me." But he refused. She referred to the condition in her trust deed that George Washington Glover and Andrew Jackson were to have different forms of education.

From my knowledge of the case and a careful study of all the letters and documents submitted to me, and from my examination of Mrs. Eddy, I am firmly of the opinion that she is competent to take care of herself and manage her affairs, and that she is not coerced in any way. In fact it would appear as if she takes the initiative upon all occasions. The allegations concerning Mrs. Eddy's belief in "malicious animal magnetism" are ridiculous. I am convinced that the words are only used synonymously with "malign influence," "malignant" or "mendacious animal magnetism" and is therefore a *facon parler*, as the French say. She certainly has been subject to sufficient annoyance to entertain the fear that she is to be subjected to further disturbance. False reports that she was dead are among these, and her home has been broken into and valuable documents have disappeared. That she has delusions regarding her son is an absurdity, for only a few days before he brought the suit to have her declared incompetent, she had without suggestion made the trust deed to have him and his family provided for. Mrs. Eddy has no insane delusions, and in print and elsewhere simply enunciates the conventional part of her creed which she and eight hundred thousand believe in. No matter how improbable or unacceptable it may prove to be to the community generally, it is no more remarkable than others that have been before or that exist to-day, and her alleged delusion regarding mesmerism, the non-existence of matter, and the power of healing, form an integral part of very many religious beliefs.

When asked, she said her property was mostly in bonds; she said that she could not be tempted to invest in stocks, not even in preferred stocks, and that upon one occasion she had taken the advice of one of her students and had lost ten thousand dollars, and that she has never bought stocks since. When asked if she had been interested in mining stocks, she said, "No, I despise mining stocks." When asked, "Has any one ever tried to make you buy mining stocks?" she replied, "Yes, indeed." When asked who, she replied, "My son." She said that when she bought stocks she always picked out just those she wanted, government or municipal bonds, and that when she selected any, she had a book which she consulted in regard to the population of the chief cities, and that she would find out what the population was before she would take any interest in them, because it was safe to know if the community was responsible. When asked if it made any difference about the size of the cities, she said, "Yes, I found it did," and that she always formed an estimate of their wealth.

Throughout the entire conversation she showed no evidence whatever of any mental disease. She did not manifest any delusions, which she probably would have done had she been a paranoiac, as it has been asserted she was, nor did she once refer to malicious animal magnetism, which I understand was alleged to be an evidence of her state of mind. In person she was neat and clean, and I am informed is most careful about the condition of her house, quickly noting any changes that may be made in the arrangement of furniture, books, or decoration; that she gives her own orders, manages her own servants, and suggests the selection of food. During my visit I heard the sound of electric bells repeated two or three times, signals evidently being made, and I was informed that this was in accordance with a code she had established for summoning to her the different members of her household. She pays her own bills, sometimes questions the use of provisions, comments upon the change in menu, takes an intelligent interest in the affairs of her native town and the events of the day.

Before leaving, she sent for a copy of her book, Science and Health, and inscribed her autograph, apologizing for her nervousness in signing her name.

WHAT THE EDITORS SAY.

[Editorial in the *Concord* (N. H.) *Daily Patriot.*]

MRS. EDDY AND "NEXT FRIENDS."

The legal proceedings instituted six months ago by so-called "next friends" to test the sanity of Rev. Mary Baker G. Eddy, as well as her responsibility and capability to manage her own affairs, is now a matter of history —it belongs to the past. In court, this morning, Mr. William Eaton Chandler, speaking for himself, his associates, and "secured" clients, withdrew from and dismissed the suit, thus openly confessing his and their inability to prove any of the charges alleged in the bill.

From its inception the *Patriot* has been firm in the conviction that the proceedings were without merit; that it was a trumped-up case, the purposes of which were:

1. To bolster up the false utterances of a set of reporters that the *New York World* sent to this city in the closing months of last year to exploit the affairs of, and shed discredit upon, New Hampshire's most honored citizen.

2. To heap contumely upon a number of men associated with Mrs. Eddy; men who have been loyal to her, loyal to Christian Science, loyal to right doing and right living, loyal to their sense of duty, loyal to themselves and their neighbors.

3. To give a black eye to Christian Science, which it was feared, seemingly, was gaining too strong a hold upon the affections and reverence of a people.

4. To secure a court decree, authorizing them to help spend the fortune they had no hand, act, or part in making; to secure a share in an estate gotten by means which they are striving to prove were wrongful methods —a fortune that was the logical result of the teachings which they claimed were delusions and which they condemned, and which they alleged constituted Mrs. Eddy's insanity, and which were the forerunners of the claimed irresponsibility and lack of capability in the management of her property.

In the instructions of Judge Chamberlin to the master and comasters, the commission was confined to the one issue of proving that Mrs. Eddy was not, on the first day of March, legally capable of managing her estate. In the progress of the trial, up to the time of its dismissal, there was not one word of testimony accepted or even offered that went to prove this.

A number of letters were read, dating as far back as 1890 and running up to within a short time of the commencement of the proceedings, letters written by Mrs. Eddy; but the letters only went to prove one thing, and that was Mrs. Eddy's absolute ability to manage her own affairs; her complete mastery of all things that touch her, and her superiority in all respects, in the management of her estate and of her religion, over others that shared with her in her labors. These letters went to prove her decisiveness, her keen knowledge of men and things, her integrity, her loyalty to her people and to her teachings; her disposition to deal fairly and honorably with her kindred, and at the same time, her refusal to let that kindred dictate to her.

Mrs. Eddy is a greater woman to-day than when that suit was commenced. Her high sense of equity and justice and her clear vision of duty are more firmly and thoroughly established. The Christian Science religion, instead of being checked by the proceedings, has been given a wonderful impetus because of the wide circulation given to the just and equitable and efficient manner in which Mrs. Eddy's private affairs, public affairs, and the affairs of her Church have been administered. Instead of proving, as alleged, that the men and women who surrounded Mrs. Eddy, and on whom, doubtless, in many details she relied, were culpable, dishonest, or lacking in loyalty or integrity, the proceedings have amply proven and wonderfully demonstrated the faithfulness and loyalty of these men, proven their integrity, their honesty, their worth.

Lastly, the "next friends," have by their course, if Mrs. Eddy is to be judged by human standards or human traits of character, judged by human weaknesses, have alienated her affections, have canceled their right to participate, at her demise, in the division of her estate, have sold their birthright for a mess of pottage. In charity, it should be urged that some of these "next friends" have been sadly imposed upon; that they had their highest interests betrayed by cunning and clever devices; that the almost inhuman thing which this son has done against a revered mother was done in ignorance, not in malice. It is charitable to believe that he was more weak than sinning, and that perhaps he was more sinned against by those who used him as a cat's-paw, than he sinned in yielding consent to a proceeding, the injustice in which he did not discern and the end of which he could not see.

Should Mrs. Eddy in the years to come overlook this breach on the part of one of her own blood, this ill-proceeding against her peace of mind and comfort of body in the years when she had reason to expect aid and solace and encouragement from one she nurtured in tender childhood, and should bequeath to him and to his a competency that would guard him against further sinning, she would but add another flower to the wreath she so proudly and so becomingly wears; she would but prove more clearly, not her claim, but her conceded place in the galaxy of greatness.

[Editorial in *The Boston Globe.*]

WITHDRAWAL OF THE EDDY SUIT.

The suit to determine the competency of Mrs. Eddy to manage her business affairs on March 1, 1907, was yesterday withdrawn by counsel for the "next friends" before the board of masters at Concord, N. H.. It was a dramatic conclusion of a case that has been replete with sensations.

The one thing more than any other that probably influenced the action of the counsel for the "next friends" in withdrawing the suit was the remarkable interview of the board of masters with Mrs. Eddy. The report of that interview justified the widespread astonishment at the mental vigor of a woman of Mrs. Eddy's venerable age. It was immediately apparent that a strong impression had been produced upon all who saw and heard her.

It was fortunate for the interests of Mrs. Eddy that a gentleman like Judge Aldrich was chosen judicial master in the case. A jurist of long and varied experience, a man of broad philosophy, he was entirely free from any of the passions which the controversy had excited; and he imparted to the proceedings a universal interest and significance by enunciating anew the great American principle, that the soundness or unsoundness of any religious belief shall not be the subject of legal decision.

[Editorial in *The Boston Journal.*]

CHRISTIAN SCIENCE WINS.

The abandonment of the suit of the self-constituted "next friends" of Mrs. Eddy against her advisers and official family does not come as a great surprise. For several days it has been evident that the plaintiffs' case has been laboring in heavy weather and that headway, if any was possible, was bound to be in the wrong direction. . . .

There is no doubt that as the result of this celebrated case is a legal victory for Mrs. Eddy and Christian Science, so it is a moral one. The cult has been strength-

Digitized by Google

ened, solidified, extended by it. Nothing has been brought out to weaken the faithful or to shock the public at large. The aged head of the movement went through her examination with what may fairly be called flying colors. If, as is stoutly maintained, the suit was really brought by a New York newspaper for the purpose of causing dissension and disaster to the Christian Science body, the outcome is certainly far from the original intent. . . .

It is difficult to see how any more actions of the sort can stand after yesterday's surrender.

[Editorial in the *New York American*.]

MRS. EDDY FULLY PROVES HER COMPETENCE.

The judicial investigation into Mrs. Mary Baker Eddy's mental condition has revealed that the head of the Christian Science faith is quite the mental equal of the examiners; that she knows as much about her financial affairs as is necessary for her to know, and that at eighty-seven she is considerably more vigorous in mind and body than a number of United States Senators who are in their seventies. The assertion that Mrs. Eddy, old and doddering, had fallen into the hands of designing men and women who sought to use her for their own purposes, is thus proved to be as baseless as the numerous reports of her death which have been made from time to time by enemies of her religion.

Of whatever faith one may be, the persecution of this aged woman must seem singularly cruel and un-American. Religious tolerance has been practised in this country from its foundation—it has been a principle which has hitherto been held sacred. That the first conspicuous violation of this principle should be an attempt to drive a woman from a position she holds by the cheerful consent of thousands of followers, is not very flattering to our supposed enlightenment.

Now that Mrs. Eddy has demonstrated that she not only is competent, but is in astonishing physical health for a woman nearly ninety years old, it would be more in keeping with American ideas to allow her remaining years to be spent in peace.

[From the *Havana* (Ill.) *Democrat*.]

MRS. EDDY AT EIGHTY-SIX.

During the past few years there has been much said in the newspapers relative to the physical and mental condition of Mrs. Mary Baker G. Eddy, Founder of Christian Science. The newspaper comment has arisen largely from the fact that she has for several years withdrawn from public life, confining herself almost exclusively to her home and seeing only immediate friends. Only twice in recent years has she submitted to interviews from newspaper men —one a fifty-five-second interview last October and a forty-minute interview given to the representative of the *Boston Globe* on June 15. The teachings of Mrs. Eddy relative to life, health, disease, and death have intensified public interest with reference to her own health. A sensational press has sought every opportunity to make reference to her mental and physical condition, more to satisfy the morbid curiosity of a gossiping public than from any desire to correct a false impression. The recent interview, however, established the fact, beyond the peradventure of a doubt, at least in the mind of the *Boston Globe*, that Mrs. Eddy is not only strong and vigorous physically for one of her age, but that she is alert, incisive, and vigorous in her thinking, shifting easily from one topic to another and talking fluently upon all topics.

To the casual reader occurs the question, Why should the Christian Scientists care whether the public have a correct or incorrect conception of Mrs. Eddy's condition? In talking with one of her followers recently, the editor suggested that it should not be a matter of so much moment whether she was strong or weak, that he would naturally expect one of her age to be in failing health, and would not be greatly surprised to learn of her demise. In the answer that came, and which we accepted as a mild rebuke for our view of life, we discovered the secret of the wonderful power of these wonderful people. The Scientist said: "Oh, I would so much prefer to think of her in health, and to expect life for her rather than death." In her answer we confess ourselves instructed and benefited. How the load of sorrow, sin, and death in this old world would be lightened if we could but expect health, goodness, and life for people rather than sickness, evil, and death.

[Editorial in the *St. Louis* (Mo.) *Post-Dispatch*.]

Most of the founders and protagonists of great religious or ethical movements have been charged with delusion if not insanity. Beginning with Paul, whose eloquent statement of the faith that was in him brought forth the remark of Festus, "Thou art beside thyself; much learning doth make thee mad," new beliefs and theories have been challenged at first only by the assertion that the persons holding them were infirm of mind.

The court proceedings against Mrs. Eddy have an uglier significance in the fact that they are based upon an attempt to gain control of her property, but if she were not a distinguished leader in the realm of faith it is probable that they would have made little progress. Law may be the perfection of human reasoning indeed, but human reasoning itself has never prevailed against the cherished beliefs of the soul. Though it may revile and persecute and imprison, it cannot destroy faith once established and devoutly adhered to.

In this view the recent conversation between the court masters and Mrs. Eddy was suggestive of the inquisition. Bringing matter-of-fact legal processes into play to measure the spiritual and metaphysical is like attempting to weigh a butterfly on a hay scale. If Mrs. Eddy had not been an innovator in religion and in healing she would not have beeen troubled with this clumsy attempt to discover the processes of her mind.

[Editorial in *The Detroit* (Mich.) *Free Press*.]

The astonishing growth of Christian Science in the United States lends an interest to the investigation of Mrs. Eddy's sanity, which is now being conducted, that would not obtain in the case of a lesser character. If it be true that Mrs. Eddy is insane, there are many thousands of other people who accept her philosophy of life who must be insane also. There is no escape from this conclusion. . . .

A very important principle is involved here. There are those who maintain that the first duty of an individual is towards his immediate family and near relatives. Probably a majority of people so believe. But is it not a fact, that in all ages the great thinkers, poets, artists, and philanthropists of the race have felt that humanity had claims upon them superior to those of the family, and that if they had not so believed the human race would have been destitute of thinkers, poets, artists, and philanthropists? These men have believed that they were not justified in giving up to one or a few what was meant, in their judgment, for mankind.

All great thinkers and all great poets have seemed insane to their contemporaries, and Professor Lombroso maintains that they were. But the crude common sense of one generation is always lost in the rapt admiration

Digitized by Google

of the generations that have succeeded. Stoned and crucified, or at least greeted with obloquy and scorn in their day, the great men have laid deep the foundations upon which the subsequent ages have built.

Crude common sense and crass materialism hailed Mrs. Eddy's book with derision and scorn when it first appeared and pronounced it the product of an insane pen. "To say that matter does not exist is sure proof of lunacy," men cried. But after all there is hardly a metaphysician in the world to-day who believes that matter has any existence apart from mind. The simple, empirical idealism of Bishop Berkeley has become the foundation of modern science. Everybody who has studied the matter knows that the form, position, color, odor, and hardness of objects are merely a congeries of attributes which have no meaning apart from the cognizing mind. To a man born without the five senses there would be no world.

The view-point of Mrs. Eddy is still more radical. It has not commended itself to many metaphysicians. It does not commend itself to us. But that does not prove that Mrs. Eddy is insane. There is room enough in the world for all varieties of belief. There is truth in them all. And from the clash of beliefs truth slowly emerges to be seen of men.

[Editorial in the *Helena* (Mont.) *Independent*.]

We have no intention or desire to say that Christian Science is the "true religion," or that it is better or worse than other religions, or that its philosophy is either adequate or final; but any religion is better than no religion, and Mrs. Eddy has accomplished much of good for hundreds of thousands of sincere followers. The Christian Science movement or propaganda has gathered into the limits of decency, of charity, and of right living thousands of men and women who would not or could not become sectarian in other churches. The Salvation Army has done a similar work in fields impossible for the religionists of known standing.

The concomitant scheme to discredit the Church of which Mrs. Eddy is the head is cowardly, unfair, and reasonless. The Christian Science Church, movement, school, or what it may be called, is all right. It may not suit you any better than the Salvation Army or any other sect, but it does bring men and women under the beneficent influence of Christ, and the desire of relatives to get hold of Mrs. Eddy's fortune cannot minimize the injustice of assailing her doctrines or her sustained faith in them.

[Editorial in *The Record*, Perry, N. Y.]

It has been the experience of nearly every religious sect to suffer persecution to a greater or less extent, and the leader of any radical movement has had to bear his or her brunt of it. This is true of Mrs. Eddy, head of the Christian Science movement, who has been the subject of considerable discussion of late, because of action on the part of "next friends," who are endeavoring to secure possession of her property on the contention that she is incapable of properly managing her affairs. Even among people who are not of the faith, there has been a suspicion in the mind that other motives than consideration for Mrs. Eddy's welfare are prompting the "next friends." Testimony from people of high character in Mrs. Eddy's home city of Concord, N. H., state that she is entirely competent to manage her affairs successfully. A reporter for the Boston *Globe* visited her at her home a few days ago and enjoyed an interview lasting nearly an hour with the noted woman. Although she is nearly eighty-six years of age, Mrs. Eddy is comparatively strong, her mind is keen, alert, and active, and she reads and writes without the aid of glasses. The only impairment of her faculties observable was that she was slightly hard of hearing. The purpose of the reporter's visit was to get a first-hand exact knowledge of facts, and he was given a satisfactory opportunity. He found that Mrs. Eddy directs the management of her household, notwithstanding that her time is largely occupied by her writings. The *Globe* contained a detailed report of the interview, occupying about three columns of space. Its plain statements carry conviction of their accuracy.

[Editorial in the *Hoboken* (N. J.) *Observer*.]

EDDY SUIT AN OUTRAGE.

It was hinted that Mrs. Eddy, Leader of the Christian Science Church, might have to secure a physician's statement asserting her inability to be present at the hearing in the suit instituted against her by her "next of kin," to escape the gruelling alleged to have been prepared for her. . . . To have subjected Mrs. Eddy to such an ordeal would have been little less than a moral crime. . . . That the masters appointed to examine into her capability to manage her own affairs spared her this ordeal, is to their credit.

But this is by no means the main issue brought out in this remarkable suit. The question of whether a person has the right to choose his own associates in any legitimate undertaking is paramount. There is no claim of immorality or anything illegal against Mrs. Eddy in this remarkable suit. No matter how eloquent lawyers may grow in their efforts to show that Mrs. Eddy would be better off in the hands of her "next of kin," there is none who dares sneer or point the finger of scorn at this venerable woman.

Mrs. Eddy, it is presumed, is under the same religious protection as every one else in the United States, which protection gives her the right to worship God according to the dictates of her own conscience. Not only has she done this, but the cult she has founded has grown to great proportions. Reports of the interview between herself and the masters show her mind to be remarkably bright. The fact that she believes some things which others do not, does not prove her incompetent or insane.

To the fair mind the proceedings against Mrs. Eddy constitute an outrage, which long ago should have been thrown out of the courts.

[From an editorial in the *Ann Arbor* (Mich.) *Times*.]

From whatever view-point Mrs. Eddy is regarded as to her teachings every reasonable person has long since come to regard her as not only a woman of surpassing intelligence, but one whose faith is founded on honest conviction, and whose every impulse is for the uplift and betterment of humanity.

SUBSCRIPTIONS FOR THE SENTINEL.

Will those who are about to renew their subscription to the *Sentinel* please refer to the publisher's announcement which appears at the head of the first column of page 982 of this issue and in a similar place in each issue. Since April of this year the subscription price of the *Sentinel* has been two dollars per year in the United States, Canada, Mexico, and Cuba, and two dollars and fifty cents in all other countries.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. *Beware of counterfeit letters.*

SUIT DISMISSED.

THE utter collapse this week of the suit involving charges against Mrs. Eddy and her trusted followers justifies the opinion heretofore expressed by Christian Scientists, viz., that this suit was simply another unwarranted attack upon the Discoverer and Founder of Christian Science, made by those who have heretofore maligned, misrepresented, and assailed her and her teachings; an opinion which is substantiated by the prepared statement given out by one of the counsel for the "next friends." This man, whose connection with the case was solely due to his bitter and long-continued antagonism to Mrs. Eddy and her religious teachings, is quoted in several Boston newspapers on Thursday morning, in part as follows:—

"Taking a larger view of the matter, and considering its bearing upon Mrs. Eddy's alleged religion, which I have long conceived to be utterly nonsensical, where it is not distinctly harmful, it is to be deeply regretted that circumstances did not permit of a full hearing and determination upon the merits. . . . Speaking for myself, I shall never cease to regret that so-called Christian Science could not, by judicial decree, have been shown to be the creation of a disordered mind."

The following evidently authoritative statement also appeared in the *Boston Post* of the same date:—

"Apparently beaten at every stage, forced to suspend their action to establish beyond doubt the mental status of Mrs. Mary Baker G. Eddy, withdrawing all litigation that would tend to open wide the doors of Pleasant View and set at rest all conjecture, counsel for the next friends, as a corollary to their withdrawal of the suit to-day, state that within three weeks they will institute new proceedings which they allege will rend asunder the entire structure of Christian Science, and cause the greatest sensations in this most sensational of legal actions."

It is hardly conceivable that men could lend themselves to such outrageous proceedings, but alas for the frailty of humanity, evil seems ever able to find those who are willing to wear its livery. The unnamed persons behind this suit have committed a crime against womanhood, against religious liberty, against the courts of our land, and against decency, to say nothing of the crime committed against those whom they induced to lend their names to the proceeding, and thereby put them in a position which, to put it mildly, calls for the broad mantle of Christian charity. As to the suit, it was commenced without the slightest evidence upon which to base such a complaint as was filed, and in the intervening six months the "next friends" have been unable to find any evidence to substantiate their charges, for the very good reason that it is impossible to find evidence of that which does not exist. The very unenviable position in which they stand before the world to-day is no doubt humiliating to them, but they have only themselves to blame.

Mrs. Eddy has borne herself throughout this most trying affair in a manner entirely consistent with the teachings of the Master, who when he was reviled, "reviled not again," and this has not only endeared her a thousand-fold to her followers in every quarter of the globe, but has also won the respect even of those who do not accept her teachings. She stands to-day unharmed and undisturbed in her position as the honored head of the most remarkable religious movement of modern times, and as the intellectual peer of the world's greatest leaders.

ARCHIBALD MCLELLAN.

THE MASTERS' INTERVIEW WITH MRS. EDDY.

On Wednesday, Aug. 14, Mrs. Eddy was visited at her home by the three masters, who took this step for the purpose of ascertaining for themselves Mrs. Eddy's physical and mental condition. They were accompanied by Mr. Streeter and Mr. Chandler of counsel, also by the official stenographer. The stenographer's report of the interview, which was widely published in the newspapers of the next morning, gave conclusive evidence of Mrs. Eddy's unabated mental vigor and of her ability to manage her affairs, business and otherwise. Of this visit of the masters the *Chicago Inter-Ocean* says editorially:—

"Whatever the motive behind the proceedings to establish the mental irresponsibility of Mrs. Mary Baker G. Eddy, Discoverer and Founder of Christian Science, it will occur to many people, regardless of their religious or medical leanings, as something contrary to the American idea of fair play, to say nothing of the American idea of gallantry, that a woman of her age should be subjected to the ordeal insisted upon by the legal representatives of the interests opposed to her. But since this ordeal was insisted upon, and since it is to be continued, it must be a source of satisfaction to find that an American woman, who has long since passed the Scriptural limit, proves herself upon examination to be the equal, if not the superior, of these legal representatives in intellectual capacity and strength. That Mrs. Eddy is, in the highest sense, a remarkable woman, was never more clearly established than in this inquiry.

"In reality, the question as to whether Mrs. Eddy was or was not mentally sound last Wednesday has nothing whatever to do with the case. The only question is, Was she mentally sound March 1 last, when she appointed trustees to take charge of her fortune? But conclusions will necessarily be drawn from the present state of her mind, and if her mind continues to be as clear at further examinations there will be nothing left for the masters to do but to conclude that this woman of nearly ninety was entirely competent to take care of her affairs last March and is entirely competent to take care of them now. True, much that she talked about during the interview of Wednesday touched upon what the leading attorney for her 'next friends' calls a 'delusion'—*i.e.*, the delusion that God can heal the sick. But it will be impossible for either the lawyers or the court to go very far into this phase of the matter without becoming inextricably involved in difficulty.

"The lawyers and the court will probably let this phase of the matter pass. They will not be too insistent upon it, at least. And if they will let this pass and take Mrs. Eddy's statements for what they are worth, and measure them by the proper standard, leaving prejudice and bitterness out of the question, they will probably all be in agreement, mentally at least, that Mrs. Mary Baker G. Eddy, old as she is, and burdened as she is with care, and bowed as she is with responsibility, is intellectually alert—far more so than many of her years."

OVERCOMING.

NOT long since some one gave his opinion of Christian Science as a philosophy which teaches people to "grin and bear" their troubles. The outsider's point of view is seldom a correct one, and this critic's opinion of Christian Science

Digitized by Google

could scarcely have been farther from the fact. The belief that one is doing nothing when he ceases to employ material remedies shows how very materialistic popular thought has become. The age boasts of its intelligence, and straightway rejects the teaching that Mind-power can maintain or restore harmony in the human body. In very few cases are people willing even to investigate the claims of Christian Science, until driven to do so by suffering which cannot be relieved through material means. When willing to make an unbiased investigation of the subject and to accept the truth which heals, a great surprise is the first experience of most people, and the entire reasonableness of Mrs. Eddy's teachings is what occasions this surprise. In many instances the quickness with which healing is realized is no less surprising.

The acceptance of Christian Science is followed by a wonderful change in one's outlook; it is no longer possible to think of yielding slavish obedience to the exactions of disease, or of so-called health laws which only bring bondage; freedom, mental and physical, is the goal of him who accepts Christian Science, and the overcoming of fear, pain, and sin is the way to reach it. Who, under material treatment, ever thought of addressing himself to the task of overcoming disease, so that he need never fear this enemy again? or, in like manner, of overcoming sin for himself or others, and thus realizing the freedom "wherewith Christ hath made us free"? And yet it is in working at this task—the overcoming of all that is unlike God—that health and entire freedom are gained. More than this, new and hitherto unknown possibilities are seen to be included in man's birthright as a child of the infinite Father, and their perception is another call to overcome the difficulties, often seemingly insuperable, which lie between this vision and its realization, but the truth bids us press on to the full joy of possession.

All this time, be it remembered, the relief from suffering is actual relief. Christian Science is no "grin and bear it" philosophy! When the truth of being enters the suffering human consciousness it comes as light, and actually dispels the darkness of fear, doubt, and pain. The light of Truth manifests itself to the sufferer as health, and as its spiritual nature is understood it is held as a priceless treasure, for health, from the Christian Science standpoint, is the evidence to each one of the divine presence, power, and government. It is, therefore, not subject to chance, change, or accident, and such being the case it is readily seen why Christian Scientists exhibit such fortitude in their efforts to overcome the sense of suffering. They are sure of the divine Principle that heals all disease, and they are also sure of the law through which the healing is realized, for they are proving it constantly in all the minutiæ of human affairs, in the overcoming of all the petty discords of materiality, which, if allowed sway, mar the sense of harmony and often result in prolonged ill-health on the part of those who do not know the divine remedy, the truth.

Without the knowledge of divine Principle as made known in "Science and Health with Key to the Scriptures," evil seems to material sense a greater power than good, and from this point of view it is not surprising that people fear disease and are often in abject submission to its supposed laws. When it is learned, however, that God never made a law of disease and death, a new-born courage and strength to resist all evil takes the place of doubt and fear with their attendant suffering. The freedom from pain and mental distress which is realized in Christian Science is the open secret of its rapid growth; it is the peace which the world of material belief can neither give nor take away. Christian Scientists never lose sight of the promise, "He that overcometh shall inherit all things; and I will be his God, and he shall be my son."

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

[Telegram.]

Wilmington, N. C., July 25, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—First Church of Christ, Scientist, of Wilmington, N. C., will open wide the portals of its new edifice on July 28, calling to all to enter and hear the voice of the ever-present Christ, saying, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." It is to you who have made this sacred hour possible that our hearts turn with unmeasured love and gratitude.

Loyally yours,

MARY BRIDGERS.

London, S. W., July 15, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—We desire to express, at this our semi-annual meeting, something of our increasing understanding of your life and work. As we begin to realize more and more the true relationship of the Discoverer and Founder of Christian Science to humanity, we grasp, however faintly, the necessity of keeping this before us as a church, conscious that in proportion as we do so, shall we be enabled, in some measure, to obey the commands of Jesus to "heal the sick" and "love thy neighbor as thyself." We are grateful that we recognize in the Manual the reflection of the wisdom which governs all things. We rejoice in the growth of the work in this field in spite of all attacks, and in the knowledge that these have only succeeded in making more and more manifest the love and loyalty of the Christian Scientists of this country to yourself.

Your grateful and loving followers,

The members of First Church of Christ, Scientist, London, England.

W. A. BOSWELL, *President.*

Glasgow, Scotland, July 17, 1907.

Dear Leader:—At our semi-annual meeting, held on the 13th inst., we, the members of this church, unanimously resolved to send you our loyal and loving greetings, assuring you of our heartfelt thankfulness to God for your unselfish labors on behalf of the race, in founding and leading the Cause of Christian Science. We are ever grateful to you for the light which is thrown on the Bible by the study of "Science and Health with Key to the Scriptures," and for the help and encouragement we derive from all your writings. We are deeply touched by the trial through which you are passing, but are certain that malice cannot harm one whose realization of omnipotent Love is so serene and pure as is yours.

You will be rejoiced to know that the knowledge of Christ, Truth, progresses steadily in Glasgow.

Lovingly yours in Christ,

The members of First Church of Christ, Scientist, Glasgow, Scotland.

JESSIE B. RICHMOND, *Clerk.*

Cowansville, Que., June 30, 1907.

My Dear Mrs. Eddy:—The words contained in your letter of April 22, 1907, to First Church of Christ, Scientist, New York City, as follows: "Many years have I prayed and labored for the consummation of 'on earth peace, good will toward men'" [*Sentinel*, May 4, 1907], find a ready response in the hearts of many; especially is this the case with the veterans of the late Civil War. It may be supposed by many that when we meet to-

Digitized by Google

gether at Post gatherings, or special memorial days, or yearly National Encampment, that the theme uppermost in our thoughts and conversation is the struggles and bloodshed of the past; but such is not the case. We would willingly shut out the past, with its horrors of war and suffering, if we could. What makes us "comrades" is not the fact that we were shoulder to shoulder in the great contest, but the fact that after years of reflection we can look back with sorrow and grief on the past's great death-roll and the present condition of many of our old boys. But Christian Science has done wonders for some of us, for which we owe you very much. Grander than the victories of the past is the victory day by day over the seeming armies of error, which depart like the dew before the rising sun when the sword of Truth is drawn and earnestly wielded. I meet grand men who have passed through the war,—made grand by trials and a strong desire to prove to the world a character that has been gained not by bloodshed, or the remembrances of such, but by the desire to implant in the minds of the young the teaching of "on earth peace, good will toward men." This is a theme worthy the most earnest Christian Scientist.

Yours in faith,
F. H. MACFARLANE.

Denver, Col., July 23, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

My loved Leader:—Through paths of sorrow I came to be one of your followers. Yet, in passing through these paths, as I looked for them I found many flowers of friendship and good cheer. Your teachings made many kind to me, and have helped me to be kind and to know of a certainty that through the pathway of kindness lies the plane of peace. The sorrows that beset the way may become lovely blossoms, breathing forth the fragrance of heavenly protection. I love to think of your gentleness and to ponder the psalm of David in 2nd Samuel, 22nd chapter. For the reflection of the verse, "Thy gentleness hath made me great" (multiplied me), I have most grateful reverence. This gentleness, or trust in God, we see more and more manifested in your dealings with mankind. "The Lord liveth; and blessed be my rock; and exalted be the God of the rock of my salvation. . . . thou hast delivered me from the violent man."

There are in the Sunday School of the Denver Church, about six hundred little followers of Science and Health, and every one of them is learning to love you more each Sunday, as we meet to study the Word of God, which has been so clearly explained in your teachings. We greatly appreciate the By-laws for the Sunday School and are watching for more light on this branch of the tree of your planting. I know that every superintendent feels with me, —that "the Sunday School is a fundamental trust." The importance of clear teaching for these little ones is impressed upon us as we see how the children are coming to our schools. Only the experience of the faithful can meet this need. May we be faithful, is my prayer!

With gratitude and love,
JEANNETTE A. BECKER.

Dayton, O., July 26, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—A few days ago I wrote the manager of the Dayton *Daily Herald*, asking him if I would be at liberty to state to the Christian Scientists in and about Dayton, O., that his paper would remain friendly to our Cause. His reply was as follows:

"Mr. Lloyd B. Coate, 25 Floral Ave., Dayton, O.

"*Dear Sir:*—You may say to all your people that the *Herald* will be friendly to the Christian Scientists of Dayton without any equivocation. We have the greatest respect for you and the church you represent. Our dealings have been of the most satisfactory character, and we appreciate the business spirit that enters into the transactions we have with you. We beg to reiterate that the kindliest feeling has always been held by us toward you, and you can rest assured of its continuance.

"Very truly yours,
"THE HERALD PUBLISHING COMPANY,
"Per C. J. Geyer."

Are not such signs clear evidence of the earth helping the woman?

Very sincerely yours,
LLOYD B. COATE.

Montgomery, Ala., July 31, 1907.

Beloved Leader:—The members of First Church of Christ, Scientist, Montgomery, Ala., desire to express to you their increased love, loyalty, and confidence, and in grateful recognition of you as God's chosen messenger, to reassure you of their purpose to be always obedient to your wise counsel. We realize, dear Leader, that only as we are faithful to the demands of Truth and Love, can we watch with you in the experiences of this hour, for "Truth is the strong deliverer," and "Love is the liberator" (Science and Health, p. 225). We are striving daily to assimilate more of the divine character, and our text-book, "Science and Health with Key to the Scriptures," is doing many mighty works in our midst. Through its teachings the sick are healed, the sinner is reformed, and many are endeavoring to perceive the Christ-mind expressed in your writings. We rejoice to read in the "signs of the times" only a fulfilment of the prophecy, and thus our hearts beat strong with hope and faith, and our thoughts go out to you love-filled, and winged with prayer and praise.

Loyally and affectionately,
MARY B. PEPPERMAN, W. GREENIE BURSON,
STEPHEN J. SYKES, CHARLES F. WILLIAMS,
GERTRUDE H. JOHNSTONE, ELIZABETH WINTER WATTS,
JOHN DAVIES, *Trustees.*

University of Michigan.

Dear Leader and Friend:—Availing ourselves of a sacred Christian privilege, we take this opportunity to express our gratitude for the blessings which have come to us as individuals and as an organization through your life and work. We, though young in the way, clearly recognize the great boon which has come to all men through the ministry of Christian Science. We are especially thankful for your far-seeing wisdom in providing the By-law relating to college organizations. The Christian Science Society of the University of Michigan, formed in accordance with this By-law, has during the college year just closed done much, we feel, for the furtherance of our common Cause. We have been enabled to give a lecture on the campus (the first case of a lecture presenting the doctrines of any religion, in the history of the university). All of your writings have been placed in the university library, as well as most of the pamphlets of The Christian Science Publishing Society. From time to time magazines containing replies to the recent unjust attacks upon Christian Science have been placed in the various campus libraries. On all sides we have met with kindly consideration and honest receptivity, and we have thought that to you, the one who "remains unseen patiently at her post," these proofs of progress might be comforting and cheering.

Yours most gratefully,
GRACE CALLAHAN,
CHARLES V. WINN,
Committee.

THE LECTURES.

SAN FRANCISCO, CAL.

Francis J. Fluno, M.D., lectured July 22 to a large audience in the Christian Science Hall. Dr. Fluno was introduced by George L. Putnam, Second Reader of the local church, who said,—

I feel that nothing could so thoroughly epitomize the spirit of our times or illustrate its breadth of mind better than this assemblage, for doubtless many of you know but little of Christian Science and are not favorably impressed with what you believe it to be; nevertheless you have come in a calm and judicial frame of mind to listen to a correct statement of this great Science that is now agitating the thinking world as it has not been agitated for nearly two thousand years.

The Jews of old gathered each week for centuries to read in the Scriptures of the healing and saving power of Jehovah, and how He had helped and healed His children through the consecrated ones of every age, but when Jesus the Christ walked in their midst proving the truth of these very Scriptures (not by argument nor by human reason, but by living witnesses), and proving it so conclusively that even the multitudes were compelled to see and believe that God was in fact the "Great Physician," the Father "who forgiveth all thine iniquities; who healeth all thy diseases" (mental, moral, physical), still the Pharisees of his time were not convinced, but met it all with the scoffing remark, "This fellow doth not cast out devils, but by Beelzebub the prince of the devils."

I thank God that the time is fast passing when we are willing to accept such a disposition of this great question of the practical healing power of God—a power manifest in some degree wherever this life-giving stream of divine Love could find a channel, from the earliest ages until the present day; it was manifest through Abraham, Moses, Elijah, and Elisha, and the prophets sang of its glory. This healing power revealed itself as the clear "river of the water of life" through our Saviour, healing and cleansing all who came in touch with it, and it flowed on through the early Christians for nearly three hundred years after the Master's ascension, until the love of gold and pomp and power choked the channel and the river ceased to flow, and the darkness which was to last over fifteen hundred years set in.

Some forty years ago a loving American woman rediscovered this healing truth and called it Christian Science, and that the race is eager to understand somewhat of the Principle underlying this healing power is manifest here to-night.—*Correspondence.*

CENTRAL CITY, NEB.

The Hon. J. W. Sparks in a letter to the *Christian Science Sentinel* says,—

On the evening of June 25th I had the pleasure of hearing Mr. Bicknell Young deliver a very scholarly address on the subject of Christian Science. I also had the honor of presiding and introducing the speaker. While I am not a member of the organization yet I must confess that the argument of Mr. Young was very convincing, and seemed to me faultless. It is now my conviction that a better understanding of the teachings and application of Christian Science on the part of the general public would evoke less criticism. Personally, I have felt greater interest in the subject since I read the life of Mrs. Eddy and the account it contains of her early sufferings and her most remarkable cure. The organization at this place while small is composed of a band of most faithful workers, among whom are some of our most worthy and influential citizens. But the audience who had the rare treat of listening to this lecture was quite large and very appreciative. I am very thankful to the organization of this place for their kind invitation to preside at the meeting; for indeed it was a lecture which it was worth one's while to hear.

AMONG THE CHURCHES.

ST JOSEPH, MO.

An audience of over one thousand persons attended the opening services of First Church of Christ, Scientist, Twelfth and Felix Streets, yesterday morning [July 21]. The building, which has been finished at a cost of over one hundred and thirty thousand dollars, was begun in 1904 and has a frontage of eighty-four feet and six inches on Felix Street. The auditorium has a seating capacity of eight hundred, the gallery one hundred, and the Sunday School room, which is in the basement, four hundred. The services of the evening consisted entirely of the lecture of Judge William G. Ewing of Chicago, who was introduced by Hugh C. Smith.—*St. Joseph Gazette.*

POUGHKEEPSIE, N. Y.

At the communion service of the Christian Science church on Sunday [July 14] eighteen new members were received. The attendance at the Sunday service was so large that every available seat was taken. A new departure was entered into which no doubt will prove a success and will probably be followed by churches of other denominations. The envelope pledge system, a system that is characteristic to every church of the city, was done away with and all contributions hereafter will be free-will offerings. This new plan has been introduced in other Christian Science churches and has proven a great success. That the new system will meet with favor and success in the local Christian Science church was demonstrated on Sunday, when the collection was a very large one. The increase in membership has made it necessary for the officials of the church to order more seats.

Poughkeepsie Daily Eagle.

CINCINNATI, O.

W. S. Holden, chairman of the board of trustees and the building committee of First Church of Christ, Scientist, of Avondale, yesterday [Aug. 8] announced the purchase of the beautiful Henry C. Urner homestead on Park Avenue, Walnut Hills, as the site of the new church of that congregation. The lot has a frontage of one hundred and twenty feet and is over two hundred feet deep. Last Monday the building committee had as its guest S. S. Beman, architect, of Chicago, who pronounced it to be the finest lot he had ever seen for a church site. While here Mr. Beman was shown other lots, but none were as highly praised as the Urner homestead. The building committee does not intend to commence operations on the new edifice until next April or May. In the mean time the Urner family will remain in possession of the property, which sold for eighteen thousand dollars.

It is likely that the plans for the church will be made by Mr. Beman. The style which prevails in Chicago churches will most likely be adopted by the congregation in this city. The scheme is one of immense stone columns, running from the platform, at the head of the stairs, to the roof. The whole is surmounted by a short dome. It is to have a seating capacity of fifteen hundred, and the Sunday School building to be located on the rear portion of the lot will have accommodations for five hundred children.

The Enquirer.

TESTIMONIES OF HEALING.

Two years ago at this very time, God sent to me the wondrous message of Christian Science. I was living in the land of Egypt (material sense bondage), a slave to rheumatic and bowel trouble, *et al.*, a veritable source of income to drugstores and doctors, while the taskmaster was always close on my heels in the shape of innumerable so-called rules and regulations for eating and not eating, hygiene, and much more. This is now all changed, and would be entirely forgotten were it not that peradventure my experience might help a brother or sister over the stile, as I have been helped.

A protracted spell of damp and foggy weather had given me an extra amount of night work. This did not tend to lessen my so-called burdens. Several doctors—who were personal friends—did their best to cure me, but did not even succeed in giving me any appreciable relief. I had, in a way, become reconciled to the inevitable, and reached the conclusion that what cannot be cured must be endured. I blamed God loudly and frequently for sending these ills upon me,—for the fog, and for having brought me into this world ostensibly for the purpose of plaguing me,—and in my impotence dared Him to do His worst. He did not, in His loving-kindness, answer my blasphemies; instead, He sent His angels to pilot me into the straight and narrow channel of Christian Science, where I found that, so far from causing the above conditions, God had no consciousness of their existence, which seemed so indisputable to me. To-day I am quite content that I was not instantaneously healed, for I began to study to get healed, and have continued studying, because I could not stop even if I wanted to do so. As one after another of the rocks is removed, the channel grows wider, less intricate of navigation, the progress consequently quicker, and one hastens towards the brightness of the perfect day.

I have found Christian Science not alone a cure for bodily ills, but applicable to all and to everything in the minutiæ of daily life, yes, even to the handling of a ship. The terrible typhoon of Sept. 18, 1906, is too well known to require any description on my part. Suffice it to say that I found myself in the very midst of it, with a valuable ship and about six hundred lives depending upon me to see them through. Like the Israelites of old, we were hemmed in by raging waters and mountainous seas, but I felt no fear, for I knew there is no death; I also knew that God was not in the wind and the raging waters, but in the still, small voice of Truth. Like Moses, I called upon omnipotence to help us out of this, to mortal sense, seemingly insurmountable difficulty. I had done all that thirty-six years' experience suggested; but it was unavailing. When to mortal sense the end had come, the answer came, "Fear ye not, stand still, and see the salvation of the Lord." "Be still, and know that I am God." Suffice it to say, that out of seventy large steamers and vessels endangered, mine was the only one that came out of it absolutely undamaged in the hull, though all deck fittings were gone. No lives were sacrificed, and all worked harmoniously without fear or panic. My wife, who from her windows saw the destruction of many lives and much property, felt no uneasiness or fear for my safety; she knew that I was right in the middle of it, but she also knew the omnipotence and omnipresence of the Father,—infinite Mind. In the old thought, she would have been prostrated with fear. It gives me great joy to bring to others the help of Christian Science. I have daily demonstrations of the power of the blessed truth to overcome discords of every description. If all these things come to pass through my feeble understanding of God, what indeed will the harvest be?

My gratitude to our beloved Leader grows stronger and stronger, as I grow in understanding of what Christian Science stands for. It has indeed girdled the earth with an endless chain, the links of which are the thousands upon thousands of freed and happy people, who with one voice call her blessed. I am also very thankful for all our publications, and for all the happiness and help derived therefrom. If I have any regret it is that they do not come oftener.

IAC. J. LOSSIUS, commanding S. S. *Kinshan*, Hong Kong.

After suffering fifteen years under medical treatment, I was healed in Christian Science. During the last five years the greater part of the time was spent in hospitals. I had undergone several operations without relief, three of them being abdominal incisions and performed within twenty-two months. After the last operation the surgeon told me I ought to have another, but on account of my condition he dared not undertake it. He said I had a dreaded disease of the kidneys; that there was not enough of them left to do the necessary work, and conditions certainly seemed to verify his statement. He said that all I could do was to be very careful as to what I ate, etc. I had never known much happiness, not having had a father's or mother's loving care, and subject to so much physical suffering that my physician's verdict, that it was only a matter of time with me, made me rather glad than otherwise. I had been an attendant at an orthodox church for years, and had prayed earnestly and honestly for help when sorrow and suffering came, but my prayers seemed to rise no higher than my head, and I came to the conclusion that if there was a God, He was unjust and unmerciful. I finally stopped trying to pray and became hard and embittered,—an unhappy, irritable, nervous wreck. It was here that Christian Science found me, "having no hope, and without God in the world."

I knew nothing of Christian Science except that I had heard it ridiculed, but I was advised to try it, and did so, not expecting any benefit. I had worn glasses several years, but I laid them aside after one treatment and have never needed them since. A friend loaned me a copy of Science and Health, and though I did not seem to understand it, I could not let it alone. After a few days the same friend handed me "Miscellaneous Writings," and I read that with the same eagerness until one day I came to the statement, "Man is the idea of infinite Mind" (p. 247). I read and reread that sentence until the whole room seemed illuminated and a sweet sense of peace and protection came to me. I had found my Father-Mother God. For several days I seemed to walk on air. I ran up and down stairs and through the house, singing and happy, whereas before that I had to walk very carefully and sometimes for days could not go upstairs at all. Although the physical healing was slow, I am thankful it was, for I was compelled to study and work out my own salvation. I was treated in Science nearly two years, during which time a curvature of the spine over the kidneys disappeared, though I never knew when it went into place and I had not even told the practitioner about it, as I thought I should always have this trouble. From the first treatment I ate anything I desired and without bad results. This was almost four years ago, and I am now well and happy. After seeing my healing, my husband, who was an osteopathic physician, began the study of Christian Science, and he is now doing its work and with "signs following."

I am very, very thankful for being helped so lovingly and patiently over the dark places and through my many stumblings, and need I add how grateful I am to her through whom the blessed light of Truth has come to this age.—MRS. MINNIE M. FOLEY, Los Angeles, Cal.

Digitized by Google

Having experienced a very satisfactory cure in Christian Science, I feel it a duty and a pleasure to offer my testimony. In April, 1906, I was trying to escape from a miserable condition which had followed years of sleeplessness and the habit of taking a vile compound of chloral, bromides, etc. I had been attended by doctors of various schools, who did their best; but the remedies they employed often acted diametrically to the intention of the physicians, resulting in almost continual pain with great loss of flesh. Brain trouble and defective sight were two of the worst symptoms after months of medical treatment. I had made up my mind that I could never work at my business again (that of sign writing, which requires very good sight). Frequent relapses with terrific pain was my experience, and existence seemed an absolute curse. I consulted the leading oculist, who decided that I had a serious eye trouble and advised me to have treatment by a specialist in a distant city. Being so weak, I was afraid to travel, and I delayed taking the trip.

About this time there came a promise of help in the encouragement of a Christian Scientist, who assured me I could have relief and cure right at home. I had practically no faith to speak of, and argued weakly against his kind proposition, saying that I could not see to read the book he mentioned, "Science and Health with Key to the Scriptures" by Mrs. Eddy; but he was patient and persevering, and I undertook the study of the "little book." In ten days there seemed to be some improvement, and it was only a short while until several persons noticed the gain in healthful color and weight. Very soon large numbers of people accosted me and told me I was getting better. The cure was steady and satisfactory, and now, though I had bidden good-by to my trade, I can point to a vast number of pieces of good work in our large office buildings here, and I give Christian Science full credit for restoring sight, nerve, and manual dexterity. I also had among my ailments very severe rheumatic trouble, which had resisted medicines, electricity, and massage, and this, too, was cured by Christian Science. I have had the pleasure of seeing cases of acute sickness quickly cured by Christian Science, when there was a regular "hurry call" at midnight, the patient being one who knew nothing of Christian Science.

I had during my youth attended an orthodox church and Sunday School, but was not impressed favorably and had gone to church once in six or eight years, just to note the change in the preaching. I have become a member of the local Scientist church, and find that the truth satisfies. I consider Christian Science a perfect "reformation," and am truly glad to be one of the "cloud of witnesses" to its great value and benefit to mankind.

JOHN H. QUESTAL, Portsmouth, O.

Mrs. Eddy says, "A just acknowledgment of Truth and of what it has done for us is an effectual help" (Science and Health, p. 372). The following statement is the sequence of the above quotation, as I do not feel my whole duty has been rendered in giving at our Wednesday evening meeting an acknowledgment of what Christian Science has done for me; but that I should also acknowledge it through the columns of the *Sentinel*, that it may encourage others who are seeking this healing truth. When I turned to Christian Science for help, nearly three years ago, it was when all hope was gone that *materia medica* could reach my case. I was almost a mental and physical wreck, being consumed as it were with all manner of diseases, one of which was making rapid progress. Two physicians advised an immediate operation, but having lost faith in material means on account of their failure to meet my other ailments, I applied to Christian Science for help, feeling it to be my only hope. How well I remember that when I first went to a practitioner I was in great fear, and told her only a part of my ailments, fearing that if I told her all she would decline to take the case and would tell me there was no hope, that there was nothing left to build upon. But I was told in kindness that with God all things are possible. It is with gratitude unspeakable that I can say my healing is perfect, no evidence in appearance or consciousness of my old diseases. Two habits, the use of tobacco and liquor, which I had many times tried to shake off, were destroyed immediately, and this without my telling the practitioner that I was addicted to them.

While I am indeed grateful for my physical healing, the great spiritual uplifting that accompanies this work of love is greater. I have new desires, purer thoughts supplanting old rebellious ones, more of a desire to do God's will, the idea of Life and Love is nearer and dearer, and my every need is being met through the understanding of God as the only source of supply. I have also a growing appreciation of what our beloved Leader, Mrs. Eddy, has done and is doing for the whole world.—J. W. MINNICH, Toledo, O.

From my earliest recollection I had never been free from pain for a single day. Many physicians had attended me, but all had failed to help me and they had given me up to die. In 1884 I was taken to a hospital, where I remained four months. I was then taken home, and as the result of the treatment I was nearly four years in bed, suffering almost every ill the flesh is heir to. Not being quite ready to give up all and accept God as my healer, I was sent to another hospital in 1898, when I was twice under the surgeon's knife, but all to no purpose. I still suffered on, not being benefited.

About four years ago I had treatment from a Christian Science practitioner, and began to gain in health. Through the study of the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, I am now comparatively a well woman, not having taken any medicine in that time. I am now able to do all my work and am gradually gaining in strength, for which I thank God, and also our Leader.

MRS. ANGELINE H. TOWLE, St. Johnsbury Center, Vt.

In 1896 my daughter was suddenly seized with severe pain in her foot, attended by swelling and inflammation. The affection was diagnosed by a kind and skilful physician, who spared no medical treatment for her relief, but the pain continued to be very acute. She could not bear her weight upon the foot, and used crutches for fifteen months. We tried many remedies, including massage, electrolysis, etc. Finally she went to a noted specialist, intending to remain in the hospital for treatment. This doctor, after examining the foot carefully, advised her to go back home, and our own doctor had minute instructions from this specialist for carrying out his directions. After this was tried she was no better, but had a severe attack of stomach trouble. From a material standpoint the disease seemed to be incurable. Her brother, in another place, having heard of some cases that had been cured through Christian Science, advised her to try it, saying she would not be hurt by it, if not cured. A friend had spoken to me of Science before, and I went to her for advice, with the result that my daughter wrote to a practitioner. The message of Truth and Love came bearing hope, though my daughter feared to follow the advice to get up and walk. It was almost two weeks ere she did this, and behold, she was well! The same day on which she walked she went off on a visit, stayed two days, and left her crutches at home. While on this trip she walked a great deal and found no more inconvenience than follows an unusual amount of exercise. She has not had the

Digitized by Google

least return of this disease since her sudden healing eight years ago.

We have had some other cases of healing in our family through Christian Science. Best of all, my own way has been made clear, and I rejoice in the light which has come to me through the healing of my daughter, which led me to recognize God's presence always and everywhere.—MRS. R. P. HOWELL, Goldsboro, N. C.

I had believed from childhood that I had inherited bunions, and as I grew older they troubled me very much, especially at night after having been on my feet a great deal. These attacks kept getting more frequent, and in July, 1893, I was obliged to leave my work at the Exposition grounds in Chicago and go home. Knowing no other remedy, we poulticed the foot. I then went to a hospital, where it was treated surgically, as the doctor said the bone was affected. After several weeks of this treatment I went to a chiropodist, who upon examining the foot, said that it was the worst case he had ever treated, and told me that there was nothing to do but to wear a large, thick-soled shoe and a pad over the joint, which I did, but it gave only temporary relief. I finally called a doctor where I am now living, and he told me that the only remedy was to remove the large toe, which he would do if it troubled me again.

At this time a kind friend called to see my wife, and recommended Christian Science to her for organic diseases which had been pronounced incurable. I commenced to read Science and Health, and with no other treatment than the reading of this book I was cured. I am on my feet all day, walking most of the time upon a cement floor. This healing occurred over eight years ago, and never for one moment have I felt pain in my foot. Before commencing to read the Christian Science text-book I had my eyes examined, and was told that I should wear glasses all the time. I was unable to read by artificial light, but after studying Science and Health a short time I was relieved of this trouble and I am now able to do the finest drawing by gaslight without glasses,—in fact my eyesight is better than it ever was.

H. A. BEECH, Owosso, Mich.

I first heard of Christian Science in 1887. My mother had been healed of organic diseases which drugs did not benefit, and her changed condition awakened in me a great desire for something better than medicine, which I had taken almost daily for years. I was held under the asserted law of heredity, manifested as lung trouble. At the age of nine I had a fall which resulted in a supposed injury to the spine, from which I suffered for nineteen years. In 1883 I had an illness which left my nerves so shattered that I could scarcely bear the weight of my clothing. My lungs were seldom free from pain, and for five years previous to hearing of Christian Science I had to use remedies which caused much suffering. In 1883 the attending physician told me that I might be prepared for and expect death at any hour, from lung and heart disease. I also had a severe internal trouble, which made it painful to be on my feet. In 1891 the attending physician advised that I be sent to my mother at Eureka Springs, Ark., to be made as comfortable as possible for the few weeks at most which he thought I could live. The diagnosis was a most serious condition of the lungs, a malignant growth in the abdomen, and a kidney disease, supposedly incurable. The remedy for one of these diseases aggravated the others. At that time I was also suffering from an injury received at the birth of my oldest child, the physician telling me I would never be able to go up or down stairs, do any work, or even lift my baby. Two other specialists gave the same diagnosis, and would not take my case. At that time I was terribly ill, in every way I was hopeless, and waiting for death as a release. My mental condition was, if possible, worse than the physical. I had been all my life unhappy, longing for human love and sympathy, and life seemed not worth the living. I had spent a great deal of money, and was under five different physicians during a period of fifteen years. I had as physicians good, honest, Christian men, who did for me all they could. My mother again urged me to try Science in real earnest, which I did and was healed.

When I turned unreservedly to God, through Christian Science, I found life and peace. My healing was slow, but sure. When I realized that life was not in or of matter, but that God is Life,—that "the flesh profiteth nothing," but that Spirit is all,—I for the first time felt I would be healed. In six weeks the growth was gone—removed without my knowledge of how or when; my lungs filled in, my chest measure increasing four inches; my muscles became firm and strong and my nerves steady. I was able not only to lift my baby, but to do heavy work and be on my feet constantly for sixteen hours a day, even running up and down stairs with ease. But that for which I am most thankful is the spiritual awakening, the understanding of God and man's relation to Him. To know God as a God of love, a present help in every time of need and in all ways or conditions; to know that man is free to enter into the "holy of holies" and commune with God; to know God as Father-Mother,—all this has brought to me a peace, a joy, a serenity I had never hoped to attain. It has made me a happy, peaceful, useful woman. I have also had the great blessing of being instrumental in helping others. Through the study and demonstration of Science, as taught in "Science and Health with Key to the Scriptures" by Mrs. Eddy, the Bible has become an illumined book—it is indeed a "lamp unto my feet."

For all this and much more my heart goes out in deep gratitude and love to the one appointed of God to bring this light to a suffering and sin-bound world, and my constant desire and effort is to prove my gratitude and love by my life.—MRS. NETTIE Y. COYLE, Stillwater, Okla.

Knowing as I do that I have so much to be thankful for, and that through Christian Science my life has been saved, I want to tell it to all I can reach. Last March I was terribly burned. I was taken to a hospital, the physician and nurses declaring that if I lived it would be two months before I would be out of the building. After this, for a time I was mentally unbalanced, and no one in the hospital thought I would regain my mind. One friend who came to see me said after leaving that my appearance was so dreadful she could never come again. She was informed by the matron that my living was a matter of only a few hours; but that should I by any chance survive, I would be a hopeless cripple and insane.

After remaining in this condition five weeks, a friend came to see me, and I was sane enough to know that she wanted me to try Christian Science. I had heard of Christian Science before I was burned, but put off looking into it until some more convenient time. This time I asked for treatment. During the five weeks previous to this friend's visit I could not lie down, but sat up in bed and leaned my head against the wall for rest. I was given morphia through the day to relieve my suffering, the nurse injecting some during this friend's visit. That night I received an absent treatment from the husband of my friend, who had not seen me, and the next morning I awakened with my mind as clear and bright as it ever was, and at nine o'clock I lay down on my back and went to sleep. I slept so

Digitized by Google

soundly that the nurse had to awaken me by shaking, to inform me that my friend had returned to see me. It was not necessary to give me any morphia after the first treatment, for when the physician dressed my back that day I did not know when he removed the dressings, and it was only necessary to dress it twice thereafter. My arm, which was drawn up and badly swollen, began to straighten out, and in less than two weeks I was out of the hospital and caring for myself.

To-day I feel better than I ever did in my life, no ache or pain, but happy and light-hearted all the time, trusting in our heavenly Father and knowing that He cares for me. I have received many other blessings from Christian Science, but I consider this experience the greatest blessing I ever had, for it taught me the way to Christian Science. I want to thank our dear Leader, Mrs. Eddy, with every breath, for giving us this understanding.

EUGENIE M. B. MANN, Orchard Park, N. Y.

Gratitude impels me to write a few lines in acknowledgment of some of the many benefits I have received from Christian Science. I was healed of acute rheumatic trouble in about two weeks' absent treatment. I had not been able to get a letter to my sister more than once or twice a week, the roads being so blocked with snow, so I did not send for treatment until I could not walk; and I had suffered so much by the time I received the first letter that I was helpless. It is a year and a half since I was healed, and I have been exposed to all kinds of weather, but I have never had a return of the illness. In May, 1906, a dear baby was born to us. The child was born at about three o'clock in the afternoon, and my sister, the same Scientist who had helped me before, was present. I dressed myself, and as my sister had to go home, I went about as usual, doing my regular work, and had tea ready when my husband came home at half past six, very much to his surprise. I was perfectly well and have done all my own work ever since.

Since I first started to look into Christian Science it has been our only help and has done much for all of us,—my three little ones, my husband, and myself. At the birth of my first child I had suffered greatly and my mother and friends thought I would die. I was then under medical treatment. The baby born under Christian Science treatment is now six months old, and I have never lost an hour's sleep with him. All who see him say they never saw a healthier looking baby. For these and many other blessings I am truly thankful to God, and to Mrs. Eddy. Science and Health with the Bible is my daily companion and comforter. I hope this will help some one as I have been helped by hearing and reading others' testimonies. I have mentioned these different experiences to show what Science has done and that it is the most reliable healer when given a fair trial. I hope to show my gratitude by living the truth as taught by our Leader in Science and Health and her other writings.

MRS. MARTHA ENNIS, Port Hope, Ont.

The old story of coming reluctantly to Christian Science must be repeated here, for like so many others, I suffered my way into this liberating truth. From infancy I had seemed most delicate, in fact I never knew what it was to feel real well or strong until I was healed by Christian Science. Five years ago, when I came to Chicago to study singing, I was in bondage to the fear of throat trouble and nervousness. One cold followed another, and I wondered why I was never free from this trouble, but Christian Science has since taught me that it was "fear made manifest on the body" (Science and Health, p. 493). Owing to these colds becoming more frequent my progress in music was necessarily retarded, and I became discouraged; but even when I seemed enveloped in a night of disappointment a star of hope twinkled above me. That star was to lead me to the "land of Christian Science, where fetters fall and the rights of man are fully known and acknowledged" (Science and Health, p. 226). With nothing but doubt in my heart, I followed a friend's suggestion. Most reluctantly I called on a Christian Science practitioner and received a treatment. The throat was healed right then and there, and the cold vanished into its native nothingness. Great was my amazement! Joyfully I put aside the medicine—all medicine—and turned to God, the Great Physician.

Immediately after beginning to read that wondrous book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, the healing of my nerves began. I had treatment for the nervousness, as well as for some other ailments, and was healed. The progress in my vocal work now became apparent. I had previously seemed unable to breathe deeply, and lacked confidence in my ability to sing; but Truth soon destroyed these errors, and before the term was over I could sustain my tones remarkably well, whereas before knowing anything about Christian Science my tones were very imperfect. After several Christian Science treatments I was enabled to appear at two public pupil recitals with the greatest possible calmness. What helped me most in my singing was the knowledge which Christian Science brought me, that I could do nothing of myself, but as the idea of God man is a perfect expression of Mind. I have had many beautiful and some remarkable healings by Christian Science, but the physical healing has become secondary to the spiritual uplift which has come to me. I have truly been transformed by the renewing of the mind.

My heart overflows with gratitude to God, and to Mrs. Eddy for this truth which has delivered me from so great a bondage of sickness and is freeing me daily from some false belief. May I follow the example of love, patience, unselfishness, and forgiveness that our beloved Leader has so nobly set us.

BLANCHE JOHNSON BUTZOW, Chicago, Ill.

[Written for the *Sentinel*.]

THAT WAR MAY CEASE.

HELEN S. EVANS.

O GOD of nations, speed the day
When men to men shall brothers be,
When right shall over all have sway,
And in Truth's freedom all be free.

Oh, speed the day when o'er the earth
The nations shall learn war no more,
Nor weak, defenseless ones shall fear
The bursting shell and cannon's roar;

When nations, powerful and strong,
Shall unto lowly peoples be
True, friendly, and protecting hands,
A pledge of larger liberty;

When widows' tears and orphans' cries
Shall be forgotten from the earth,
When joyful praise and melodies
Shall mingle with the children's mirth.

Then the glad song of Bethlehem
Shall ring on earth to heights above,
When men, redeemed from sin and pain,
Shall own the reign of peace and love!

FROM OUR EXCHANGES.

[*The British Congregationalist.*]

In his address from the chair of the Union, Mr. Compton Rickett certainly chose a live subject to deal with. If the New Theology controversy has done nothing else, it has at least aroused a keen interest and made people think on some of the deepest themes. Our chairman took a bold plunge when he reviewed the situation from the standpoint of the mere layman and the man in the street. We owe him our thanks for having done so, for if there is one thing that the pulpit needs just now, it is to know what the pew is thinking about. As Mr. Rickett says, though surely the picture is overdrawn: "The world listens at our church doors, and furtively peers through the windows, pursued by the idea that a rushing mighty wind may perchance be heard, or the glow of pentecostal fire be seen. When it discovers that the mystic *Hinterland* is as dark to the Church as to the world itself, the world will cease to trouble about the half-filled temples of the Faith. She has her own ethical systems, and prefers her own gatherings for mutual improvement. She cares little about a Church that shakes hands with her over a pleasant Sunday afternoon and has no story of spiritual mystery. We cannot affect surprise if into this theological vacuum wild theories and strange doctrines should rush. The Church of to-day has created the void which, sooner or later, must be filled."

["J. B." in *The Christian World*, London.]

Our own soul, in its solitary journey, if faithful to the highest in it, becomes ever more conscious of a Divine leading. Its transitions are progresses, successive disclosures of the revelation that goes on within. The outer universe, opening to us at every turn its new exhaustless energies, reveals itself as symbol and faint expression of a diviner universe behind. More sure do we become, as the years pass, that our intellect is fed from a higher intellect, that our heart draws its inspiration from a greater heart. As surely as our bodily eye opens to us a visible world of matter and force, so surely does the soul's eye reveal one whose powers are higher. As surely as holiness is greater than gravitation, so surely is the kingdom of holiness the real and enduring kingdom. Our greatest knowledge is our knowledge of values. The highest in us points to the highest without us. Science knows that God is Power; the soul knows that God is Love.

[*The Universalist Leader.*]

Perhaps the profoundest failure of Christianity as a world religion is its inability to curb racial passions and prejudices, and to prevent wars of conquest. The vision of international arbitration is a splendid one. The burden it would lift from the nations of the world, the end it would make of browbeating and intimidation on the part of the great Powers, are things that are worth trying for. The case against war to-day is vast in its indictment, unanswerable in its argument, prophetic in the spirit of its indignation. But in the mean while there is a kind of argument sometimes heard to-day from the minds of social reformers that is an unfair indictment of those who are not quite so radical in this matter as some impetuous people would wish.

[Rev. J. B. Silcox, D.D., in *The Advance.*]

What this old world needs is not so much the exposure of error as the positive presentation of truth. The best way to defend the gospel is to preach it. Many people are content with a negative sort of goodness. They are more anxious to avoid sin than to acquire holiness. They are more watchful against doing wrong than zealous in doing right. They are so afraid of making a mistake that they never make anything.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10 x 7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. 29 pages.

Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk-sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid . . . 4.75
Orders for Miscellaneous Writings, in lots of twelve or more to one address, may include any or all the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem.
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . 2.50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science, 35 pp. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press on that occasion: 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers, 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of Mary Baker G. Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-laws of The Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

ITEMS OF INTEREST.

National.

The Public Service Commission of New York State, a body created by the last Legislature in line with Governor Hughes' policy as expressed in his message to the Assembly, has adopted a series of rules intended to prevent hereafter the overcapitalization of corporations which come under the jurisdiction of the commission. It was announced by the commissioners also that it was designed to prevent not only stock-watering transactions, but merging of railroad companies, unless it could be shown to the commission that such amalgamations would tend to benefit the traveling public. Under these rules it would be impossible for such holding companies as the Interborough-Metropolitan and the Brooklyn Rapid Transit Company to be organized without the consent of the commission and without it being proven to them that there were reasons other than those of mere financiering to justify the merging of public service corporations.

As at present arranged Secretary of State Taft and his party, including himself, his wife and son, his private secretary, the chief of the Insular Bureau, and an attendant, leave Seattle for the Far East on Sept. 10, arriving at Yokohama, Japan, Sept. 25. At that port they will disembark and spend eight days, including visits to Tokio, Kobe, Nagasaki, and perhaps one or two other points. The party will sail from Nagasaki Oct. 4 for Shanghai and Hong Kong. At Hong Kong the party will board the army transport McClellan on Oct. 11, and arrive at Manila Oct. 14. They will leave Manila Nov. 4 on one of the naval cruisers for Vladivostock, leaving there Nov. 12, Irkutsk Nov. 16, Moscow Nov. 25, St. Petersburg Nov. 28, arriving at Berlin Nov. 29. At all these places stops of a few days will be made. They plan to reach New York about Dec. 10 or a few days later.

President Angell's report to the directors of the American Humane Education Society and the Massachusetts Society for the Prevention of Cruelty to Animals shows that the prosecuting agents of the Massachusetts Society, in the investigation of complaints during July, have examined 3,115 animals, taken 142 horses from work, and humanely killed 133 horses and other animals. Fifteen Bands of Mercy have been organized, making a total of 71,144.

The report that Baysan Island, which lies seven hundred miles northwest of the Hawaiian Islands, had sunk below the surface of the ocean, has been proven false. The survey charts indicate that the island is more or less grass-grown and that in various places the land reaches an altitude of fifty-five feet above sea level. It is inhabited and the charts show that there is a small landing dock there.

"Old Ironsides," officially known as the U. S. S. Constitution, now lying at the Charlestown Navy Yard, has been practically restored to her former condition. This week she will be floated into the old drydock at the navy yard and her hull below the waterline given a thorough overhauling.

The corner-stone of the Pilgrim Monument was laid at Provincetown, Mass., Aug. 20. A large gathering was present and President Roosevelt delivered the chief address. It was here that the band of Pilgrims, who later settled in Plymouth, made their first landing.

More than thirteen million dollars' worth of the four per cent thirty-year bonds which matured July 1, are still outstanding, despite the efforts of the Treasury to have them presented for redemption or exchange.

The International Zoological Congress met in Boston Aug. 24-27.

International.

In accordance with the resolution introduced by Premier Botha, the Transvaal Assembly has authorized the government to purchase the Cullinan diamond, the largest in the world, valued at $1,000.000, as a present to King Edward in token of the appreciation of the people of the Transvaal for the bestowal of a constitution on the colony. The Cullinan diamond was found in January, 1905, on the Premier Diamond Mining Company's property. In spite of the great size of the stone it is considered very perfect in purity and color. Its length is 4¼ inches, height 2½, and breadth 2½. Its weight is 3,025¾ carats. Under the diamond law, as the government owns three-fifths of it, the price to be paid to the company would be $400.000. It is said that the plan of Premier Botha to present the diamond to King Edward meets with much criticism, both in England and the Transvaal. The finances of the colony are in bad condition and many people think that the expense is unnecessary.

The Russian Minister of Railways has submitted to the Council of Ministers a scheme for improvements in the State railways which it is proposed to carry out during 1908-1912. The total estimated expense is $458,000,000, divided among five annual budgets. The principal items are, doubling tracks, $46.000,000; bridges and embankments, $30.000.000; stations, $30,500.000; workshops, $52,000.000; rerailing, $30.000,000; rolling stock, $151,000,000.

The first stage of the elections of members of the third Russian Douma has begun in the provinces. On June 16 last Emperor Nicholas signed the imperial ukase abolishing the second and ordering that the elections of members of the third, which is to meet on Nov. 14, be held under the new election law, which provides against the "submergence of the educated classes by the uneducated masses."

Dr. Jean Charcourt, who headed the French Antarctic expedition of 1903 on board the steamer Francais, announces that he is organizing another expedition and hopes to start in July, 1908, in an attempt to discover the South Pole.

Industrial and Commercial.

An article published in the Pekin and Tientsin *Times*, with reference to the establishment of cotton mills in the Chinese Province of Chihli, says: "The Industrial Institute has memorialized Viceroy Yuan that all the districts of Chihli be instructed to establish spinning and weaving factories. The petition points out that cotton cloth is an article of every-day necessity, and the amount imported into China annually aggregates many million dollars. This represents a terrible drainage of capital out of the country. The promoters of the institute have contemplated the possibility of replacing all kinds of foreign piece goods by home manufactures, but local enterprise in this direction is handicapped by the need of proper machinery. Now the Japanese have made suitable machinery and can supply any amount that may be required.

The memorialists urge, therefore, that the various trading districts be instructed to take the matter up and obtain the necessary plants, the officials establishing the factories as government concerns, or the merchants and people doing it independently. There are in Chihli one hundred and fifty districts in which factories could be established, and with an average of one hundred looms to each there would be fifteen thousand started at once. The Viceroy has approved the suggestion and steps will be taken to carry out the idea with Japanese to set up and superintend the looms.

Work on the Cape Cod Canal is now under way. Last week the first shovelful of dirt was thrown up by William Barclay Parsons of New York, chief engineer of the enterprise. The spot chosen for breaking ground is in Sagamore, about half way between Buzzard's Bay and Cape Cod.

Upwards of four hundred million feet of hardwood will be cut in Michigan this year. The amount of this class of timber cut has steadily grown larger since the gradual disappearance of the white pine, and the rate of increase is still being maintained.

General.

It was within half a century from the invention of printing, says the *Journal of American History*, that book-plates were introduced as identifying marks to indicate the ownership of the volume. Germany, the fatherland of printing from movable type and of wood cutting for making impressions in ink on paper, is likewise the homeland of the book-plate, the earliest dated woodcut of accepted authenticity being the well-known "St. Christopher of 1423." It was to insure the right of ownership in a book that the owner had it marked with the coat-of-arms of the family or some other heraldic device. The earliest English book-plate is found in a folio volume once the property of Cardinal Wolsey and afterward belonging to his royal master. The first known book-plate in America belonged to Governor Dudley. Paul Revere, the patriot, was one of the first American engravers of book-plates and a designer of great ability.

The State Highway Commission, the Metropolitan and Boston Park Commissions, the city and town highway departments in general, the association of "North Shore" (Mass.) residents, acting in co-operation with State and local authorities, are all busy in experimenting on various ways of lessening the wear and tear of roads, by automobiles especially. These experiments include new kinds of surfacing, and the treatment of macadamized surfaces with patent solutions that are supposed to penetrate and bind together the road material.

The briny waters of Great Salt Lake have been tried by the Oregon Short Line for a novel purpose and with remarkable success. Stored in tanks the fluid has been hauled over the line by water trains and sprinkled upon the right of way. Under this treatment the weeds are easily disposed of.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

INTEREST AROUSED IN CHRISTIAN SCIENCE.

WE are always glad to give prominence to an interesting letter such as the following from the pen of Mr. B. O. Flower, the able editor of the *Arena*. Mr. Flower can be depended upon at all times to take the side of justice and fair play, and to be outspoken and courageous in expressing his views on the side of civic, moral, and religious liberty.

Boston, Mass., Aug. 17, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

My Dear Mrs. Eddy:—I am sending you by this mail with my compliments and high respect, copies of the July and August *Arenas*. I wish to call your special attention to Mr. John B. Willis' admirable article entitled, "The Truths of Christian Science,"—a reply to Edward C. Farnsworth. This reply, it seems to me, both in substance and spirit is most excellent, and I have heard golden opinions expressed of it. One very thoughtful person who has not been interested in Christian Science told me that he had read it with great pleasure, surprise, and interest; that it had given him a new view and a much clearer idea of Christian Science. He said, "I am sure that this paper will be of a great deal of benefit to a number of persons who have heretofore been influenced by the arguments which it answers, and answers so ably." Many other persons have expressed similar views. Mr. Willis' article, you will find, begins on page 61 and goes to the end of page 70.

In the August *Arena*, you will find on page 175 of my editorials, my reference to the shameful action of the New York *World* and *Boston Herald*. It extends from page 175 almost to the bottom of 180. In the October number we shall publish a very fine article by Judge L. H. Jones, entitled "Idealism: A Sketch," in which he shows how Kant, Plato, and other great philosophers opposed the popular ideas in regard to the material universe, and how their views were in accord with your teachings on this point. In the same number, I shall have an extended review of Mark Twain's attack on Christian Science. My review is of between five and six thousand words, and in it, I have attempted to show how glaringly absurd and illogical are Mark Twain's reckless assertions.

I wish, at this time, to express to you my profound indignation that you should be made, at this late date, the victim of such shameful persecutions. It is an outrage that all lovers of fair play must feel most keenly. I could not have believed that such shameful action could be possible in the United States of America in the twentieth century. Of one thing, however, be assured: this persecution is wonderfully strengthening and promoting the Cause of Christian Science. It is arousing a feeling of deep resentment and holy indignation in the breasts of tens of thousands of people who love fair play and who, although they have never heretofore been interested in Christian Science, feel outraged at the hypocritical and unscrupulous attacks being made both on Christian Science and its honored Founder. Only last evening, I was talking with a gentleman whose profession and natural bent of mind led me to suppose that he would be hostile to Christian Science. In the course of the conversation, he said, "I have never known any outrage that will compare with the shameful persecution that Mrs. Eddy is undergoing."

Again, the very means employed by the enemies of Christian Science with the hope of bringing discredit on the movement and its Founder, have proved helpful to the movement, as they have aroused the interest of hundreds of thousands of people in Christian Science, who heretofore had not given it a moment's thought. The daily papers and the magazines that have published hostile matter have led to discussions and a desire on the part of the people to know the facts; and this is leading thousands to regard Christian Science with interest and sympathy, who, under other circumstances, would probably have never paid any attention to it. Again let me assure you of my deepest interest and profound sympathy.

With high regard, I am

Cordially yours,

B. O. FLOWER.

[W. T. MacIntyre in the *New York American*.]

"I HOLD NO ENMITY," SAYS MRS. EDDY.

Concord, N. H., Aug. 25.—"Persecution cannot last forever. There is always a reaction. But I hold no enmity. Those who have attempted to injure me have gained nothing."

Mrs. Mary Baker G. Eddy uttered this sentiment of Christian forbearance to me to-day in the first interview she has granted since the collapse of the suits brought by her "next friends."

No one who has talked with Mrs. Eddy can doubt her deep spiritual nature. No one who has met her can fail to be profoundly impressed by her nobility of character.

Mrs. Eddy is old, very old in years and wisdom—yet her heart is still young, for she herself so told me. Indeed she imparted that interesting information with so pretty a smile that youth itself seemed to shine forth from the snow-capped face with the clear blue eyes, and while youth and old age blend in a charming way in the Leader of Christian Science, it is also indisputably true that she is entirely mis-

Copyright, 1907, by Mary Baker G. Eddy.

Digitized by Google

tress of her mentalities and both physically and mentally a phenomenon. With the exception of a slight deafness she is a woman in full possession of her faculties.

My name as the representative of the *American* was presented to Mrs. Eddy by her cousin and one of her trustees, General Henry M. Baker, who was present during the audience. Some doubt was expressed by General Baker as to the advisability of Mrs. Eddy being interviewed because of her age and the strain which she had undergone. He said, however, that Mrs. Eddy personally desired to see the interviewer save for the thought that she might be considered as showing discrimination and that it was impossible for her to be often interviewed. The matter was finally settled by Mrs. Eddy herself, who informed one of the ladies of her household that she would see me.

I was ushered up the thickly-carpeted stairway of the celebrated "House of Mystery," which isn't a bit mysterious, but an unusually comfortable New England home, and taken into the apartments of Mrs. Eddy. As I entered the room I saw a white-haired lady of venerable appearance rise smiling from a rocking-chair near a French window, and come forward with outstretched hands, holding herself very straight, and with wonderful light in her eyes she greeted me as follows:—

"I am glad to have you call upon me. Now, won't you sit down here and talk to me." She seated herself beside her literary work table, covered with dozens of letters, a volume of Science and Health, and a book of hymns.

Tears filled her eyes when I told her that there were legions who were not Christian Scientists who rejoiced that the suits against her had collapsed and that her persecution was ended.

In a voice slightly quivering, but of indescribable softness, Mrs. Eddy leaned forward and said:—

"Truth and right will always prevail. Persecution cannot last forever. There is always a reaction. But I hold no enmity. Those who have attempted to injure me have gained nothing.

"But why would they persecute me? All that I ask in the remaining years of my life is peace and quietude. Are not gray hairs sacred? Have I ever injured any one? Am I not to be left alone to pursue that mission in which I am the appointed agent of the divine Being to spread truth and peace and happiness throughout the world?

"I have much work to do and I have consecrated my life to God. That is why I turned my property over to my three trusted trustees. I could not serve both God and mammon. I trust in God, and He will give me strength to accomplish those things which have been marked out for me to do.

"I know that my mission is for all the earth, not alone for my dear devoted followers in Christian Science. I can still do a vast amount of work. All my efforts, all my prayers and tears are for humanity, and the spread of peace and love among mankind.

"There is a tremendous amount of good in the world, and it will not harbor resentments against those who have inflicted ill upon you."

When Mrs. Eddy was told of an old lady of the writer's acquaintance whose reply to a question as to the secret of her youth in old age was that "her heart had never grown old," she smiled and said:—

"Yes, if the heart stays young, old age can never become anything but ennobled thereby. Years do not make one grow old if one grows in grace. Decay does not belong to matter so much as to mind. Now I believe that if we kept our mind fixed on God, Truth, Life, and Love, He will advance us in our years to a higher understanding and change our hope into faith and our faith into spiritual understanding, and our words into works, and our ultimate faith into the fruition of entering into the kingdom."

Reverting again to the actions brought by her "next friends," Mrs. Eddy failed to mention the name of her son, but she did say that she had received hundreds of letters from her followers denouncing the attack.

"Here is a letter that I have received that I wish you would publish in your great newspapers," Mrs. Eddy said, as she handed me the following from a woman in Chicago. "This letter from my dear friend shows how bitterly grieved are all Christian Scientists over the attack made upon me." The letter follows:—

Chicago, Ill., Aug. 20, 1907.

Mrs. Mary B. Eddy, Concord, N. H.

Deeply Revered Leader:—The unmerited persecutions which have been laid upon you during the past few months and your Christly attitude toward them have often called to mind a little incident connected with your presence in Chicago at the association meeting in 1888. A relative of ours, who was not a religious man, had his curiosity aroused by your presentation of the gospel, "with signs following."

He purchased Science and Health and read it with interest, but read it to criticise, and those of his friends who had accepted this new faith dreaded his caustic comments. He early expressed his determination to attend the public lecture which you gave in Central Music Hall, and as he said, to see and hear this "Great I" for himself. He attended and listened very intently. While leaving the hall after your lecture, he turned and said to me in response to a question:

"Do you know, when Mrs. Eddy came on the platform and stood silently before her audience I could not help thinking of that great painting of 'Christ before Pilate.'" Never afterward did he criticise you. He did not unreservedly embrace Christian Science during the few years that he remained on earth, but as far as he knew, always defended it and acknowledged its influence on his life. Again your Christlike bearing of wrongs will win souls. I, too, met you to take your hand, to hear your voice, to look upon your spiritual face.

Humbly and gratefully yours,

MRS. S. J. FOLLETT.

7437 Stewart Avenue.

In commenting upon newspaper attacks made upon her, Mrs. Eddy paid high tribute and thanks to what she characterized as "the eminent sense of fairness of the Hearst newspapers."

As Mrs. Eddy talked on with a singular sweetness of intonation—as her deep, clear eyes brightened with something at once luminous and spiritual—the impression grew of the absurdity of the attempt to discredit her as mentally incompetent.

"Do you not find this a delightful view?" she asked as she waved her hand in the direction of the wide stretch of greenery that rolled undulating to the foothills. "I love to sit here or on the verandas and watch this quiet stretch of countryside. And you know over there at the other end of the valley I was born.

"But you know," Mrs. Eddy continued with a touch of naivety that lends sprightliness to her conversation, "I cannot always sit and dream. I have much work to do—a great correspondence to answer and I am always busy. I rise very early and write many hours of the day. I enjoy driving for a half hour or one hour a day, and then I rest quietly until I begin my work anew."

WHAT THE EDITORS SAY.

[Editorial in the *Detroit* (Mich.) *Free Press*.]

The suit in equity brought by George W. Glover, son of Mrs. Eddy, and others as "next friends" against Calvin A. Frye and other prominent Christian Science leaders has been dropped. The suit was a sensational one from the beginning, and the end is also sensational. General Streeter, the able lawyer who represented Mrs. Eddy, declared that the suit was "primarily an assault by a great newspaper on a great religion," and that the "next friends" are dropping the suit so that they may contest Mrs. Eddy's will after her death, as it is the intention of the Founder of Christian Science to leave the bulk of her property to the church. Whether this is a true explanation of the dropping of the suit is not for us to say. But it appears evident that the charge that Mrs. Eddy is insane is one that cannot be substantiated. The stenographic report of the interview of the masters with Mrs. Eddy proved to the satisfaction of the reading public that the venerable woman was in full possession of her mental faculties, and that the reports of her mental breakdown, as published in two New York newspapers, were destitute of foundation. . . .

Very few persons live to be as old, and the fact that her mental faculties are still sound is proof enough, one would think, that she is not held a prisoner by the men and women of her faith whom she has gathered around her.

[Editorial in the *Quincy* (Ill.) *Optic*.]

So Mrs. Eddy's court case has ended. As to the merits of this suit, the general public has no definite opinion. It was a question of property rights, in which the public could only have that interest which desires to see justice done to all concerned. But there was more than the property question involved indirectly in these proceedings. It is safe to believe that there would have been no court case, had it not been for inspiration based on bitter opposition to the religious doctrine of which this remarkable woman is the Leader and Founder. It is a curious fact, one worthy of study by psychologists, that the Founder or Leader of such a peculiarly pacific faith as that of Mrs. Eddy should be subjected to such bitter, unrelenting hostility. Nor does the fact that the Leader is a refined and cultured woman of advanced age, make the slightest difference to her persecutors. This is surely not as it should be. It is certainly not a right thing in this country, in which religious freedom is one of our fundamental principles. In this republic, every instance in which a lawful religious faith is persecuted, is a distinct violation of the spirit of our institutions. This irrespective of the truth or error of the faith. As heretofore stated in these columns, we are not of Mrs. Eddy's faith. But we are distinctly a believer in fair play, in accordance with American institutions, and Mrs. Eddy has not been fairly treated. There is no question about that.

[Editorial in the *Indianapolis* (Ind.) *Star*.]

That was a wise judge who reminded the lawyers in the Eddy hearing that the tenets of religious belief are not proper objects of judicial inquiry. It would be quite as proper to subject the rhapsodies of the poet to the laws of the naturalist.

It is a curious and suggestive fact that the most devoted and able undertakings to reconcile science and religion or to interpret one in terms of the other have lamentably failed of their mark. One reason probably is that those minds are very rare in which keen interest is felt equally for mathematical and chemical laws and processes and for those emotions and experiences that fill up the realm of religious faith. Another reason doubtless is that the terminology and atmosphere of faith and of science have so little in common.

But the great fact is that the two words are distinct; and this is true even of scientists who are devout believers. With one side of their minds they explore the uniform processes of nature, with the other side they pray and praise. In most men, however, the two habits are mutually exclusive. The dominant passion of the life crowds out its less favored impulses. The classic illustration on this head is the self-confessed atrophy of Charles Darwin's spiritual nature. You cannot measure the poet's mind with that pitiful plummet of logic. You cannot weigh the prophet's utterances in the scales of historic accuracy.

Nowhere is this demarcation between science and faith more fully apprehended than in the Scriptures themselves. It was Jesus who gave thanks that the mysteries of faith had been denied to the wise and prudent and revealed unto babes. It was St. Paul who reflected that not many mighty or noble are called, but rather the weak and foolish ones, and who fully realized that the gospel was to the Jews a stumbling-block and to the Greeks foolishness.

Nothing in all of our fabric of constitutional government becomes us more than the written and unwritten code that the civil power shall stay its hands at the sanctuary of religious faith. Liberty itself has no prouder title to perpetuity among the brave and free than the wall that has been raised up about the individual conscience and the secret convictions of the human soul. Against that blessed barrier the armies of princes and the emissaries of ecclesiastical inquisitions may rage in vain.

[Editorial in *The Republican*, Springfield, Mass.]

Those who went to the trouble of reading the report of the interview between Mrs. Eddy and the masters last week must have felt that the venerable Founder of the Christian Science religion had emerged from that contest with her colors flying. Her "competency" to control and dispose of her property did not appear to have been successfully challenged. Few women of her age could have endured the ordeal so well and made so clever an exhibition of her mental faculties under such trying circumstances. . . .

Mr. Chandler's announcement that the end to this picturesque suit at law had come might not have been anticipated, yet now that the end has come with the retirement of the "next friends," the outcome does not seem so very surprising. The text of Mr. Chandler's formal statement to the masters is phrased most interestingly and, after noting the various points developed at the hearing, it is perhaps reasonable to conclude that the "next friends" will not be heard from again until the time comes for Mrs. Eddy's will to be probated. The world will rather confidently expect them to line up on that occasion, unless a complete and satisfactory settlement should be made in the mean time. The "next friends" are doubtless well advised by counsel. Mrs. Eddy may yet outlive them all, but it is better to wait. It is to be doubted that public sympathy is enlisted for a cause such as theirs, and it is certain that the great age of the defendant renders it peculiarly difficult to attack her "competency" in so public and slashing a style without raising up for the venerable woman and her religion more supporters than possibly could be alienated from her.

So far as Christian Science is affected by the case, it has received one more gratuitous advertisement of amplitudinous proportions, and it has been hurt as little as Mrs. Eddy herself. If the desire was to attack that faith

Digitized by Google

under cover of the legal proceedings to test Mrs. Eddy's mental condition, and thus open up in the courts a line of assault upon its history and its tenets, the scheme failed the moment that the masters wisely and properly refused to open up issues outside the simple property question involved. The one question was entirely separate from the others, and these others call for the judgment of something besides the purely legal mind.

[Editorial in the *New Haven* (Conn.) *Register*]

A suit at law by the heirs, or "next friends," of Mrs. Mary Baker G. Eddy, head of the Christian Science Church, has developed to a point where its decision may have an important bearing on the future of the belief which she has originated, or at least developed. What New Hampshire law terms a "board of masters," substantially a commission to decide whether she is sane and able intelligently to conduct her affairs, or whether she is insane and incompetent to handle and dispose of her vast property, is now in session at Concord, examining Mrs. Eddy and such other witnesses as may be required to answer the question.

But more than the decision who is to control Mrs. Eddy's estate may depend on the outcome. Senator Chandler, chief counsel for the plaintiffs, announces his intention to prove that Mrs. Eddy is suffering from certain "systematized delusions," of which the chief is that of the "non-existence and non-reality of the physical universe," upon which fundamental and permeating delusions she has built the whole system of belief which she teaches through her books. To this delusion in particular he ascribes the peculiar teaching of Mrs. Eddy, the most implicitly believed and faithfully followed of all her tenets, that disease is only a wrong mental condition, and can be cured solely by the application of mental processes.

Christian Science has no lack of open foes and of unbelievers ready to seize on any seeming weakness to attack it. If the outcome of the present investigation at Concord shall be the decision that this fundamental delusion of Mrs. Eddy exists, they will accept that decision as the overthrow of the whole Christian Science faith. The great majority of the believers in Christian Science, as must be admitted even by those who do not agree with them, are intelligent, earnest, and faithful people. Theirs is a belief which appeals to the reason, unreasonable as some of its teachings may seem. Believers such as this are not to be overthrown and turned to retreat by the decision of any court. Even after proving Mrs. Eddy insane, there must be something of truth in her teachings, to hold so securely these many thousands of thinking persons, in this and other countries, who have followed them for years. . . . Christian Science is not on trial, it is the duty of nobody to adjudge it true or false. This country rests, as one of its foundation stones, on the principle of freedom of religious belief. Those who believe in Christian Science have a right to that freedom. Again concerning them it is well to repeat those wise words, said of old of a religious belief which, though then despised and persecuted vastly more than Christian Science ever could be by its worst enemies, has spread its reign over all the earth: "Let them alone: for if this counsel or this work be of men, it will come to naught; but if it be of God, ye cannot overthrow it."

[Editorial in the *Denver* (Col.) *Republican*.]

A court commission is undertaking to determine in its limited way the mental and physical condition of the Founder of Christian Science. This is being done not in the interest of religion or science, but at the behest of a syndicate eager to lay hands on the large fortune which Mrs. Eddy is reputed to have made from her teachings. Her "next of kin," her "blood relations," are the parties named in the legal documents and behind them are lawyers and speculators. It was alleged in the original application for the appointment of a guardian for Mrs. Eddy that she was unable to manage her affairs, and was being held in duress. Since then there have been modifications. It is charged now that she is suffering from religious delusions. The modern alienist calls it "demifou"—half insane. Let not the supporters of the aged head of the new religion be alarmed. . . .

The gravamen is that Mrs. Eddy teaches that "all is mind." Well, that is not new. It is very old. This teaching from the cradle of civilization is being restored. In actual numbers many more believe in the doctrine that mind is all in all and that matter is but the phenomenon of mind, than that matter creates mind. As a religious belief the doctrine expressed by Mrs. Eddy for the understanding of the Western mind has vastly more adherents than has the religion to which the Eddy commission is supposed to give adherence. Since Mrs. Eddy advanced the old-new doctrine many materialists and scientists have come to a better understanding of what is meant in the Eddy metaphysics. The scoffer is not heard so often. Before the commission Mrs. Eddy has demonstrated that despite her advanced years she is alert to a degree. There is evidence in her own case that mind is triumphing over matter. Insane? When Paul was before the Romans on a like accusation he answered. "I am not mad, most noble Festus; but speak forth the words of truth and soberness." The words of the Christian Science Founder to the members of the Concord commission were eminently sober and Christian-like. As for the "next of kin" there is historic precedent in plenty for the position taken by Mrs. Eddy. The world's advance work has not been done by those whose views were bounded by blood relationship.

[Editorial in the *Glens Falls* (N. Y.) *Daily Times*.]

The legal proceeding which has for its object the declaration that an individual is incompetent to manage his affairs and the appointment of a committee to act in his stead, take possession of his property and have control of his personal affairs of all kinds, is of such a nature that it should be invoked only when absolutely necessary in the interest of the person alleged incompetent and the public. It is obvious that in this regard mistakes would be of far-reaching consequence and involve great loss and suffering. In the nature of things the person who starts such a proceeding should show himself free from ulterior motives and it should be established that it is for the good of the person alleged to be incompetent that the proceeding is instituted.

As regards the proceeding against Mrs. Mary Baker G. Eddy, now being prosecuted by three so-called "next friends," it is not necessary that the tenets of Christian Science need to be discussed, for if it be true that belief in Christian Science is tantamount to insanity then we are forced to the conclusion that our asylums will not be large enough to take care of the large number of "Scientists," and that we will be required to build new asylums just in the proportion that new Christian Science churches are being erected in the principal cities and towns of the country. This proposition is too absurd to be discussed.

The fair-minded citizen will ask for Mrs. Eddy "the square deal," nothing more. Threshing out the belief of the Christian Science cult in New Hampshire courts in an effort to prove that the "discoverer" of "Science" is not of sound mind, will not do. This savors too much of New England persecution and two centuries ago when witches were burned at the stake and rocks rolled onto

Digitized by Google

their ashes lest they should break from their graves and spread pestilence abroad.

Up to the present time it does not appear that the "next friends" prosecution is in the interest of any one but the heirs-at-law who have little claim upon the bounty of the aged woman and the lawyers who, if they are successful, we are persuaded, will be the principal beneficiaries. Certain it is that Mrs. Eddy's wealth is due to the alleged hallucinations on account of which the "next friends" ask that her property be placed beyond her control. It appears, then, that these "next friends" are not averse to handling the result of the woman's hallucination while to all intents and purposes holding the woman herself a prisoner.

The "next friends" do not appear in a favorable light.

[Editorial in the *Savannah* (Ga.) *News*.]

There are so many followers of Mrs. Mary Baker Eddy and so many who, though not followers, are interested in practically everything that pertains to her in her character of a teacher of a new religion or healing science, that the proceedings of the suit that has been instituted against her by her son, for the safeguarding of her property, are regarded with deep interest in all parts of the country. As is well known, a commission has been appointed to investigate her mental condition —to find out whether or not she is capable of managing her property. The commission, with the opposing attorneys have visited her at her home and asked many questions. Her answers did not disclose mental weakness so far as her material affairs were concerned. She talked as clearly about her bonds and other property as anybody possibly could. It seems from the account she managed her business affairs until recently when she turned them over to trustees, and she declared that the idea of a trusteeship originated with her. There was no suggestion from outside parties.

She may have delusions respecting the science which she teaches and other subjects. Assuming she has such delusions, and it has not yet been shown that she has, it is difficult to see what they have to do with her ability to manage her business affairs, unless it can be conclusively shown that they weaken her mind.

Her examination by the commission was full of interest. It indicated that she is a very remarkable woman for her age—she is close to ninety. . . . Unless the attorneys opposed to her make a better showing when the commission visits her this week it is impossible to see now how it can be held that she is not fit, mentally, to handle her own business affairs. It is a safe prediction that the investigation will show that she is able to manage them.

[Editorial in *The American*, Baltimore, Md.]

By the withdrawal of the suit in equity instituted by the "next friends" of Mrs. Eddy to secure responsible charge of her person and her interests, the celebrated case has been brought to a conclusion that will give satisfaction to the many followers of the Founder of the Christian Science faith. There is cause for gratification to all persons who have followed the case dispassionately, and who without regard to their opinions as to the merits of the claims of Mrs. Eddy, saw in the suit an attempt of relatives out of sympathy with the Christian Science leader to financially profit by her successful career.

Although the decision of the masters not to admit in evidence the mass of testimony secured to establish the mental responsibility of Mrs. Eddy precluded expert testimony, the fact is known that the stories of her mental and physical decrepitude belie the facts. The celebrated authority upon mental diseases, Dr. Allan McLane Hamilton, has stated that with the exception of a little deafness she is in a normal state of health for a woman of her years and shows no evidence of mental impairment.

The establishment of these facts removes once and for all the doubts created in the mind of the public as to Mrs. Eddy's condition. . . . The frustration of the plan to deprive her of the legitimate profits of her long activities upon grounds too specious to bear court examination is a triumph of justice and personal liberty.

[Editorial in the *Toledo* (O.) *Press*.]

That commission appointed by the court in the suit brought by Mary Baker G. Eddy's would-be guardians, to inquire into her mental condition, have had an interview with her and, so far as report goes, found her in pretty good mental condition.

Senator Chandler, attorney for the unbelievers, now takes the position that Mrs. Eddy's religion, rather than her incapability to transact business, evidences her mental defects.

It is passing strange that the only people interested in Mrs. Eddy's future material welfare are persons who disbelieve her creed. One is constrained to wonder if the same interest would be taken in Mrs. Eddy's affairs by these "next friends" were she a poor widow, struggling to raise a half dozen children, instead of a reputedly rich woman.

This suit against Mrs. Eddy is attracting very wide attention. How far the courts will go in what is generally regarded as a religious persecution is a question that is sure to attract interest, aside from its ludicrous phases.

[Editorial in the *Grand Rapids* (Mich.) *News*.]

The examination of Mrs. Eddy at her home in Concord as to the condition of her mental faculties caused the impression that she is a courteous and well-informed woman and remarkably well posted as to the value of her properties. This fact is in itself strongly in favor of her sanity and of her responsibility. . . .

Mrs. Eddy's analysis or defense or commendation of Christian Science will please the adherents of that system, or so-called system, and will displease its opponents. The pleasure of the one class and the displeasure of the other are inevitable, but, like the flowers which bloom in the spring, they have nothing to do with the case of Mrs. Eddy's mental responsibility or irresponsibility, which is alone involved. The legal commission, appointed to report upon that, comprises able and impartial men. The lawyers employed to attack Mrs. Eddy's responsibility and those employed to vindicate it are able and learned men. Both the commissioners and the lawyers, and especially the judge to whom the report will be made, will realize the irrelevancy of the truth or of the error of Christian Science, so called, to the issue which they are considering.

[Editorial in the *Galesburg* (Ill.) *Mail*.]

To those who read the answers made by Mrs. Eddy to the questions propounded to her during the quiz conducted on Wednesday as a part of the investigation into her mental condition, cannot but be impressed with the belief that the Founder of Christian Science is yet far from being of incompetent mind. Mrs. Eddy's statements were given promptly and without alteration, indicating as strong and active a mentality as could be expected of a woman of her age.

Digitized by Google

[Editorial in the *Quincy* (Ill.) *Herald*.]

Whatever the motive behind the proceedings to establish the mental irresponsibility of Mrs. Mary Baker G. Eddy, Discoverer and Founder of Christian Science, it will occur to many people, regardless of their religious or medical leanings, as something contrary to the American idea of fair play, to say nothing of the American idea of gallantry, that a woman of her age should be subjected to the ordeal insisted upon by the legal representatives of the interests opposed to her.

But since this ordeal was insisted upon and since it is to be continued, it must be a source of satisfaction to find that an American woman who has long since passed the Scriptural limit proves herself upon examination to be the equal, if not the superior, of these legal representatives in intellectual capacity and strength. That Mrs. Eddy is, in the highest sense, a remarkable woman was never more clearly established than in this inquiry, says the *Inter-Ocean*.

[Editorial in the *Dubuque* (Ia.) *Telegraph*.]

A commission appointed by the court to examine into and report on the sanity of Mrs. Mary Baker G. Eddy visited the Founder of the Christian Science cult in her home and from the conversation as reported in detail in the press despatches, it is to be inferred that Mrs. Eddy is not insane. She withstood the long interview without giving evidence of mental or physical breakdown.

One need not accept the tenets of Mrs. Eddy's creed to agree that she is a remarkable woman. They are not halt and blind who are following her leadership, but persons better circumstanced than the average,—persons who have had the advantage of education and culturing influences. They were attracted by the beauty in the creed and hundreds of thousands of them have been helped spiritually.

[Editorial in the *Hartford* (Conn.) *Times*.]

Mr. W. E. Chandler, who has borne the brunt of the contest brought on behalf of George W. Glover and others against his mother, Mrs. Mary Baker Eddy, with the object of breaking the arrangement made by her in February, placing her property in the hands of the trustees, seems to admit that his side "had no case." Mrs. Eddy's conversation with Judge Aldrich and the other masters appointed by Judge Chamberlin plainly indicated that she was in pretty good condition mentally for a woman nearly eighty-seven years old, and it appears that Dr. Allan McLane Hamilton, the eminent expert, has declared that she is entirely competent to manage her affairs.

[Editorial in the *Boston Traveler*.]

The withdrawal of the "next friends" suit against Mrs. Eddy concludes a case that was sordid and contemptible in all its characteristics. No high moral principle was apparent in the petition, and the question at issue was not to determine Mrs. Eddy's claim to be the founder and head of the great religion, but was simply a vulgar attempt to harrass Mrs. Eddy into giving up some of her fortune. The spectacle of a woman being hounded for money by expectant relatives was not a pleasing one, and none of the persons on that side of the case have any particular reason to be proud of themselves.

[Editorial in *The Detroit* (Mich.) *News*.]

The abandonment of the case brought by Mrs. Eddy's "next friends," seems to rest on such flimsy grounds that in justice to the aged lady the masters in chancery ought to report informally, if possible, on her competency. The case now has the aspect of stirring up mud to no purpose but the working of hardship on the person least concerned.

[Editorial in *The Kansas City* (Mo.) *Star*.]

The charge of insanity brought against Mrs. Mary Baker G. Eddy is based on the assertion that she has for a long time feared that mental influences would induce her son to contest her disposition of her property. As the present proceeding shows the complete realization of Mrs. Eddy's fears, it is difficult to see wherein those fears were an evidence of an unbalanced state of mind.

[Editorial in the *Bridgeport* (Conn.) *Standard*.]

Mrs. Eddy has been examined as to her mental soundness and her counsel expresses entire satisfaction with the result of the ordeal. Counsel for the other side expresses the same feeling. According to the newspaper reports, Mrs. Eddy made a remarkable showing for a woman of her advanced years. There were no evidences of mental decrepitude in her statements.

[Editorial in the *Banker and Tradesman*.]

The suit brought by the "next friends" in the case of Mrs. Eddy will rank for many years as one of the most despicable suits ever brought in a court of law. If ever an action was based solely and entirely on motives of the most sordid character, it is this one. And one need not be a Christian Scientist to see it in that light either.

[Editorial in the *Meriden* (Conn.) *Journal*.]

It is just as well that the case against Mrs. Eddy, the Christian Science leader, was withdrawn. Public sympathy was not largely with those who brought it, and now that it is apparently made clear that Mrs. Eddy is not insane, it is best to let her alone and drop the court proceedings as was done to-day.

[Editorial in the *Malden* (Mass.) *Mail*.]

Mrs. Eddy showed in her examination yesterday that she had a pretty level business head. She preferred government or municipal bonds as investments and bonds of eastern cities to western. In the first round between the aged lady and the gentlemen who are examining into her mental capacity, the lady scored.

[Editorial in the *Niagara Falls* (N. Y.) *Gazette*.]

The abrupt ending of the Eddy suit was a surprise to many, but nevertheless it will give general satisfaction. The spectacle of this aged woman being hounded was not pleasant, even to those who have no part in her beliefs and doctrines. Mrs. Eddy has given abundant proof of her ability to take care of her own affairs.

[Editorial in the *Troy* (N. Y.) *Times*.]

Mrs. Eddy triumphs over her pursuers in the courts. The suit against this aged and famous woman has been discontinued. Christian Science may now speak with experience of the law as well as of the gospel, and can discuss the difference between friends and next friends.

[Editorial in the *Buffalo* (N. Y.) *Enquirer*.]

The advisers of Mrs. Eddy must have been confident of her sanity. They submitted the question to Dr. Hamilton who does not always testify as he is retained.

AN INSIDIOUS TEACHING.

HON. CLARENCE A. BUSKIRK.

THE writer read Pope's "Essay on Man" when a boy, and many of its passages made a powerful impression on his mind. Among such passages is the following:—

All nature is but art unknown to thee;
All chance, direction, which thou canst not see;
All discord, harmony not understood;
All partial evil, universal good;
And spite of pride, in erring reason's spite,
One truth is clear, Whatever is, is right.

The "Essay on Man" is in the form of epistles to Bolingbroke. A tradition asserts that Bolingbroke first wrote it in prose, which Pope metamorphosed into his wonderful verse. In Bolingbroke's writings I have found the following passage, the germinal thought of which is that of Pope's lines:—

We see in so many instances a just proportion of things, according to their several relations to one another, that philosophy should lead us to conclude this proportion preserved, even when we do not discern it; instead of leading us to conclude that it is not preserved where we do not discern it, or where we think that we see the contrary. To conclude otherwise is shocking presumption. It is to presume that the system of the universe would have been more wisely contrived, if creatures of our low rank among intellectual natures had been called to the councils of the Most High; or that the creator ought to mend His work by the advice of the creature.

The churchmen of his day denounced Lord Bolingbroke as an infidel; but the words above surely evince a devout manner of thinking. Their thought is logical, and it is so happily expressed that its truth becomes almost self-evident.

Pope sought to summarize the thought in the phrase, "Whatever is, is right;" but when he proceeded to particulars, and applied the truism to "chance," "discord," and "partial evil," he introduced a plausible and subtle falsehood into his philosophy. This mischievous falsehood necessarily implies that God in His divine economy employs (which further implies that somehow He needs to employ) such alleged agencies as "chance," "discord," and "partial evil." While Pope evidently intended to praise God and to reconcile humanity to God's supposed ways, he really impugned God's divine character, and pictured a deific example of conduct which men cannot imitate without pernicious consequences.

If God employs "partial evil," "discord," or any questionable means or methods to attain results, why should not we feel free to do likewise, and furthermore, justify our action as imitative and praiseworthy? When the medieval churchman conceived that his doctrine was orthodox and the doctrine of the other fellow heterodox, and believed that in a literal sense God hates a sinner, was he not consistent when he tortured and roasted his heretical neighbor? Why should men now be scolded for using shady methods and means, claiming perhaps to their consciences, in some sophistical dilution or another, that the end justifies the means? Bad theology is responsible for a great deal of badness in this poor world, and Pope's unintended travesty on his splendid truism, "Whatever is, is right," is only one more instance of how a good poet can be led astray by entertaining false views on theology.

When Christian Science teaches us how to define and classify "chance," "discord," "partial evil," and how to put the right tags on the entire species to which they belong, we are delivered from the miserable mystification and sophistication about "evil." When we comprehend that "chance," "discord," "partial evil," and their like, are not a part of the truth or reality of God's universe at all, but belong to a different category, we are in no further danger of blaspheming God by talking about His use of evil to accomplish good.

An unmitigated, unmixed lie, whether in theology or elsewhere, is not so dangerous. Like vice in Pope's celebrated couplet, falsehood

is a monster of so frightful mien,
As to be hated needs but to be seen;

but when falsehood comes around us masquerading in some garment purloined from truth's shoulders and sophisticating in truth's phrases, when its repulsive wrinkles have been enameled and its snaky eyes turned away from us so that we cannot gaze squarely into them, then it is that falsehood has its chance to deceive and betray. The adage rightly warns us that no lie is so dangerous as the lie which holds a half truth. When rightly analyzed nearly all philosophical and theological deceits are found to be errors of that sort. Too often has the livery of truth been stolen to serve as a covering for falsehood. Too often have the serpents been able to wriggle to the very tops of the pyramids. Too often has the accumulating dust of casuistry become heaped about metaphysics, until its beautiful and stately proportions are made to seem an inscrutable sphinx.

Let the new wine be put into new bottles, which have no musty odors of antiquated falsehoods. Let the old bottles be broken and thrown into the rubbish-heaps, with their deceptive legends about "the inscrutable uses of evil," "the mysterious dispensations of divine Providence," and similar indefensible inconsistencies.

RIGHTEOUS JUDGMENT.

IDA L. BAKER.

JESUS said, "Judge not according to the appearance, but judge righteous judgment," and in Science and Health we read that "anatomy, when conceived of spiritually, is mental self-knowledge, and consists in the dissection of thoughts to discover their quality, quantity, and origin" (Science and Health, p. 462). When discordant conditions arise in my work as a teacher in the public schools, I have found these thoughts most helpful. They check the tendency to deal summarily with impulsive and wayward children. Error, with its sudden flurry and noise, would often deceive us and make us think that it alone governs certain children, when all the time good is the real, the only power.

How often, when we have waited for Truth to reveal to us the motive back of a doubtful act, we have learned with surprise that the act was produced by an entirely different motive from the one which the outward appearance indicated. One day at school, while I was collecting some written work from the language class, one of the pupils, instead of handing her paper to me with the others, hastily crumpled it in her hands and then tore it into pieces. Later, when I questioned her as to why she had done this, she explained that just as she was finishing her work she had dropped a big blot of ink upon the paper, and she added, in a hopeless and discouraged manner, that something always happened to prevent her work from being marked "good."

Before I began to talk with the child, her quick temper stood out most prominently in my thought, but when I became conscious of her earnest desire to do her work well, and of the painstaking effort she had put forth, my feelings changed from condemnation to sympathy and love. I showed her in a few words that her temper meant nothing, but that her desire to do her work well alone counted. When the child bade me good-by I felt that we understood each other, and I also realized that Truth had revealed to me as never before the depth of meaning in those wonderful words, "Comprehension is love." This little incident also taught me the great difference between working from the standpoint of the moral law, "Thou shalt not;" and from that of the spiritual law, "Blessed art thou."

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book does not consult nor read letters on disease. Writing to Mrs. Eddy *is not* prohibited. Take no notice of startling reports about Mrs. Eddy. Our Committee on Publication will be reliable on this subject. *Beware of counterfeit letters.*

A VIGOROUS OLD AGE.

Spokane, Wash., July 23, 1907.

My dear Mrs. Eddy:—At this time, when there is so much talk of limitation of one's years, I feel impelled to write you of an experience which I have just enjoyed, believing you will appreciate the motive and will forgive the intrusion. Last week I met and talked with a lady who is one hundred and twenty years old—Mrs. Mary Ramsey Lemons Wood, of Hillsboro, Oregon, who was born at Knoxville, Tenn., May 20, 1787. She crossed the plains on horseback when she was sixty-six. Her oldest child, if he had lived, would be ninety-nine. She lives with her baby daughter, who is seventy-seven. Her mother lived to the age of one hundred and ten, and walked five miles the day before she died, knitting all the way, as was her custom. Mrs. Wood has recently heard from a lady in Texas who is one hundred and twenty-six years old. Mrs. Wood joined the Methodist Church when she was twelve years old. On July 4, 1907, she was crowned "Queen of Oregon," a beautiful tribute to age. And strange to relate, as yet her "next friends" have not seen fit to examine into her sanity or have a guardian appointed.

Yours very truly,

JOHN R. NORRIS.

PUBLIC SENTIMENT.

IT will be seen, from the newspaper editorials which we reprint in this issue of the *Sentinel*, that the suit of the "next friends" was not one which met with public approval, and the only move in connection with it which has received endorsement was its withdrawal. These editorials, and hundreds more of the same tenor for which we have no room in our columns, indicate that the persecution of a religion and its founder does not meet with the approval of the people of this country, and this is not surprising when we look back upon the struggles for religious liberty which comprise so large a part of the early history of the American people. There is a widespread feeling of satisfaction following the collapse of the suit, and this feeling is closely interwoven with one of condemnation for the newspaper methods which were at the bottom of the entire proceeding.

It is to be hoped that public sentiment has been sufficiently aroused to render impossible any similar violation of private and religious rights, and that some steps will be taken to prevent the further perversion of a legal process which was originally devised for the most beneficent of purposes.

The growing tendency to invoke the law for private ends rather than for the advancement of justice, should be curbed, and as reforms usually have followed the most flagrant abuses, we believe that some reform in the practice governing "next friends" may be looked for.

ARCHIBALD MCLELLAN.

"ALL THINGS ARE SUBJECT UNTO HIM."

AN echo may be somewhat confused and indefinite because of the imperfections of reflecting surfaces, nevertheless it is quite sure to retain something of the distinctive characteristic of the parent voice and to enlarge its fame and range of influence. It therefore serves to illustrate the indirect gain which a truth may realize through the reverberations of an opposing thought. St. Paul's recognition of this vantage, secured to his cause through the excitation of human sense and feeling which his assertive preaching brought about, is made apparent in one of the introductory paragraphs of his letter to the Philippians. He says, "Some indeed actually preach Christ out of envy and contentiousness. . . . [They] proclaim him from motives of rivalry and insincerity, supposing that by this they are embittering my imprisonment. What does it matter however? In any case Christ is preached either perversely or in honest truth; and in that I rejoice, aye, and will rejoice" (Weymouth's translation).

We may be entirely sure that the apostle did not enjoy his own vilification or the misstatement of his message. He was not made glad over the imperfect concepts of Christian truth which were no doubt echoed back and forth by the frowning antagonisms which surrounded him, but he did rejoice that whatever of personal trial the malicious activity of his enemies might bring him, his mission and his message were nevertheless being noised abroad thereby, and through the divine overruling, enmity and prejudice were thus made to contribute to the larger and perchance more speedy triumph of that truth for the dissemination of which he was ever ready to suffer and to count all other things as nothing.

While many long past, and some recent events in the history of the Christian Science movement have tested the patient endurance of its loyal representatives, and especially of its beloved Leader, there can be no question that in the measure of the faith and fine living of those who stand for it before men, these things conduce to the furtherance of its ends. No fact of history has been more fully or more triumphantly demonstrated than the ability of the simple truth to take care of itself and get on, despite the world's outcry and resistance, and if its adherents are but true to the Principle and rule of Christian Science, if they but watchfully and prayerfully "stand by," in every storm, they can look upon the "seething seas" in perfect tranquillity.

The general advertisement of the movement and the focusing of public attention upon its exponents which inevitably attends these agitations must surely make every worthy Christian Scientist more thoughtful. They cannot fail to see that if men are discovering a notable advance in our supremacy not only over sickness and suffering, but over the selfishness, the materiality, the indifference to the general weal, the ill temper, the pride, the vanity, etc., which have so pitifully shorn Christian profession of its power and natural usefulness in all the years, then we may be sure that the trials of our faith will have "fallen out rather unto the furtherance of the gospel."

As never before Christian Scientists are awakening to their indebtedness to the Discoverer and Founder of Christian Science. As never before the consistency, the supreme value and the imperative need of its distinctive teachings are being perceived, and despite what men may say or do, the heart of the world is longing for that which Christian Science bestows. There is no more doubt in the heart of the skeptic than in the heart of the saint, that demonstrable truth alone can solve life's problem and satisfy human aspiration, and they are peaceful masters of the situation who in the turmoil of false mortal thought can say,

> True things e'er grow more true, and larger orbs
> The strong salvation that hath seized my soul.

JOHN B. WILLIS.

THE SPIRITUAL ROCK.

They drank of that spiritual Rock that followed them: and that Rock was Christ.—I CORINTHIANS, 10 : 4.

THROUGHOUT the Scriptures we find frequent reference to the "Rock," and it almost always stands for the spiritual idea. At the very close of his wonderful Sermon on the Mount, the great Teacher employs this figure to show the need of the one foundation on which to build our obedience to divine law; namely, the understanding of spiritual reality. The student of Christian Science who may meet with seemingly hard experiences, on his way out of the wilderness of material sense, should be strengthened by the assurance given by Christ Jesus, that the house built upon the true foundation will stand in spite of the rain, the wind, and the floods which may assail it.

For some time, Christian Scientists as a body have been undergoing an experience of the kind described in the great Sermon. Their Cause and its Leader have been assailed by a long-continued storm of mortal misrepresentation, the avowed purpose of which, as finally expressed, was the destruction of the whole superstructure of Christian Science. The point of attack was, however, the personality of the Leader of the movement, and the method seemed to be that to which Jesus referred when he quoted the old prophet's words, "Smite the shepherd, and the sheep of the flock shall be scattered abroad." It is not known by those who do not understand or practise Christian Science that the faith of Christian Scientists does not rest upon the personality of their honored Leader, but upon the divine Principle revealed to them through her teachings. In the understanding of God as thus made known, she and they alike find shelter from the storm and tempest of human ignorance, fear, and malice, and emerge from each experience with a surer sense of Truth's all-power and wisdom. They have therefore stood more firmly than ever before by the truth which has healed them of sin and sickness, and have been, if it were possible, more loving and loyal than ever to the one through whom the healing-truth was brought to them at such cost on her part.

We should not forget that, according to Jesus' teaching, the rain and the floods come alike to those who only hear, and to those who obey his words, but there is a tremendous difference in the final result,—the house which is "founded upon a rock" outlasts the storm because it has a sure foundation. Those who learn in Christian Science *how* Christ Jesus healed the sick are sure of the Bible statements, that he did heal "all manner of sickness and all manner of disease," for they prove daily the power of the divine Principle of his glorious work. Those who believed that they could lessen or destroy Jesus' influence by crucifying him only compelled him to give the highest proof of his divine mission, and thus, to use our Leader's words, "rise to the zenith of demonstration" (Science and Health, 565).

At this hour we have had a wonderful proof of our dear Leader's loyalty to the Truth she has made known to us, and it remains for all her followers to keep close to the spirit as well as the letter of her inspired teachings. We should never forget the emphasis which she places upon "meekness and spirituality" (Science and Health, p. 343), and that without these no real victories can be gained. True spirituality must characterize the words and the work of Christian Scientists, for thus alone can they give to the world convincing proof that Christ, Truth, rules them, and that for them "old things are passed away" and "all things are become new." Spirituality is the rock on which we must build if we would do the Father's will and await in serene confidence the end of error, all the while knowing that to Truth's kingdom and reign "there shall be no end."

ANNIE M. KNOTT.

TELEGRAMS RECEIVED BY MRS. EDDY.

Within the past few days Mrs. Eddy has received a great many telegrams which express the love and appreciation of the unnumbered thousands who are her followers and beneficiaries, and we are privileged to publish some of them here. It is obviously impossible to publish all of these telegrams in the limited space at our disposal, and we have taken these at haphazard and without discrimination. We know that our Leader has greatly appreciated the telegrams received by her, and that she would gladly let all of them be published if it were possible to do this. The cablegrams from the Earl of Dunmore and those from Australia and the Philippines are indicative of the world-wide interest felt in our beloved Leader's vindication, which is universally admitted to be a victory for right.

Frimley, Aug. 22, 1907.

Mrs. Eddy, Pleasant View, Concord, N. H.

Sincere congratulations.

DUNMORE.

Sydney, Australia, Aug. 26, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

First Church, Sydney, Australia, heartily rejoicing, sends love and gratitude.

Manila, Philippines, Aug. 25, 1907.

Mrs. Eddy, Concord, N. H.

Your loyal followers in Manila unite in expressing loving congratulation for the manifestations of divine Love to our Leader.

BOARD OF DIRECTORS.

New York, N. Y., Aug. 22, 1907.

Mrs. Mary Baker Eddy,
Pleasant View, Concord, N. H.

The members of First Church of Christ, Scientist, of New York City, send loving salutations to their beloved Leader on this bright morning hour,—the dawn of a day which the Lord hath made. "Now is come salvation and strength, and the kingdom of our God and the power of his Christ." "Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee." The 26th chapter of Isaiah is comforting your people.

JOHN D. HIGGINS, *Clerk.*

New York, N. Y., Aug. 21, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord N. H.

To-day we join with you, our Leader in Christ, praising God for the great victory wherein has been demonstrated the supremacy of Mind over matter. "The wicked flee when no man pursueth." "Shall not the judge of all the earth do right?" Lovingly your followers,

Second Church of Christ, Scientist,
M. E. WINSLOW, *Clerk.*

New York, N. Y., Aug. 21, 1907.

Mrs. Mary Baker Eddy.

Our Beloved Leader:—Third Church of Christ, Scientist, of New York City, has learned with joy the disposition of the suit of annoyance that has been hovering near you, and we rejoice "all the rugged way" that you have had manifestations of the divine Love. Truth is mighty and does prevail. Lovingly,

CARRIE HARVEY SNIDER, W. H. VOGEL,
F. C. HOUSE, *Committee.*

Cotuit, Mass., Aug. 22, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

First Church of Christ, Scientist, Cotuit, Mass., sends congratulations and love. BOARD OF DIRECTORS.

Richmond, Va., Aug. 22, 1907.

Mrs. Mary Baker Eddy, Concord, N. H.

Blessed Leader:—The victory was glorious! Truth prevails, and I rejoice in the wonderful demonstration of Immanuel. Through Christ you have conquered and my trust is strengthened. Devotedly,

NATHAN B. DAHL.

St. Louis, Mo., Aug. 21, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Congratulations. "Praise God, from whom all blessings flow." W. E. MORGAN.

Boston, Mass., Aug. 21, 1907.

Mrs. Mary Baker Eddy,
Pleasant View, Concord, N. H.

Love and congratulations for your great victory.

MR. and MRS. ALBERT F. CONANT.

Fort Smith, Ark., Aug. 25, 1907.

Mrs. Mary Baker G. Eddy, Concord, N. H.

First Church of Christ, Scientist, Fort Smith, in quarterly meeting assembled, send you loving congratulations upon the renewed evidence of the triumph of Truth under all circumstances when faithfully adhered to.

H. M. BECK, *President.*

New York, N. Y., Aug. 22, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Love is enthroned. Love has fulfilled her law. My heart's deepest love to you, my beloved Leader and Teacher.

AUGUSTA E. STETSON.

Montgomery, Ala., Aug. 21, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Love and congratulations from First Church of Christ, Scientist, Montgomery, Ala.

CHAS. F. WILLIAMS, *Clerk, pro tem.*

Sharon, Pa., Aug. 22, 1907.

Mrs. Mary Baker Eddy.

Beloved Leader:—With hearts full of love and gratitude for your life-work, and your present demonstration and proof of the power of Love to destroy hate, we extend our congratulations at this hour of victory for truth and the right.

FIRST CHURCH OF CHRIST, SCIENTIST.

Danbury, Conn., Aug. 22, 1907.

Mrs. Mary B. G. Eddy.

Beloved Leader:—Truth has overcome error. The recent demonstration is your own and we rejoice with you.

HOWARD S. HAWLEY,
LOUIS THEURER,
EDWARD HAYES,
Christian Science Society of Danbury.

Atlanta, Ga., Aug. 22, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

First Church of Christ, Scientist, sends love, devotion, and congratulations to our dear Leader.

R. H. LUKENBILL, GEORGE S. FARR,
EDWIN S. MYERS, WILLIAM KEELEY,
W. H. BEDARD, *Board of Trustees.*

Toledo, O., Aug. 25, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—We rejoice with you in the present great victory of truth over error. Divine justice cares for its own. "There is no wisdom nor understanding nor counsel against the Lord."

First Church of Christ, Scientist, Toledo, O.
C. E. COLLINS, *Clerk.*

Hartford, Conn., Aug. 25, 1907.

Mrs. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

Beloved Leader:—We thank God for His justice and mercy; for His Christ; for Divine Science, the holy Comforter; Christ, our Master and Wayshower; for you our acknowledged Leader and Teacher, and for your works. "God reigns, let the earth rejoice."

Your grateful and loving followers, members of First Church of Christ, Scientist, Hartford, Conn.

MYRON G. MARSH, *Clerk.*

New London, Conn., Aug. 21, 1907.

Mrs. Mary Baker G. Eddy.

Beloved and Revered Leader:—We, the members and assembled congregation of First Church of Christ, Scientist, of New London, Conn., convened to give testimony to the Christ deliverance through this higher understanding as revealed in Christian Science, of which you are the Discoverer and Founder, offer to God and to you our continued loyalty and deep gratitude that this new form of darkness has disappeared, and once more you have proved the strength of the words of the Prophet Isaiah, "No weapon that is forged against thee shall prosper and every tongue that shall rise against thee in judgment thou shalt condemn. This is the heritage of the servants of the Lord and their righteousness is of me saith the Lord." Your words have been fulfilled. We rejoice to know that the everlasting arms of Love are about you and this is enough.

LAURA C. TUCKER, ROSEMARY O. ANDERSON,
GRACE SHAW KENNEDY, JAMES E. COMSTOCK,
Committee.

[Written for the *Sentinel.*]

GOD WITH US EVER.

HARVEY HAZLETT.

I WAIT no more, with anxious care,
For stated place and times of prayer;
All hours are mine to worship Thee,
All places temples wide and free.

Nor need I search for secret place
To hear Thy voice and see Thy face;
I am as much alone with Thee
As if the world held none but me.

As roughness on the rocks we climb,
Gives safe ascent to heights sublime,
So cares that seem to keep from Thee,
Sure stepping-stones to heaven may be.

AMONG THE CHURCHES.

SEA CLIFF, N. Y.

Sea Cliff has a new form of Christian worship. In addition to the four churches established in the village Christian Science services are held on Sunday, and there is an attendance of between twenty and thirty of those who believe in Christian Science at the meetings. The services are held at the Chellborg cottage, which is rented this year to Mr. and Mrs. Lloyd of Manhattan.

MILWAUKEE, WIS.

The corner-stone of the new building of First Church of Christ, Scientist, Prospect Avenue and Keene Place, was laid at eight o'clock yesterday morning [Aug. 8]. The ceremonies were simple, and the attendance was limited to the trustees, directors, and members of the building committee.

Passages from the Bible and correlative passages from Mrs. Eddy's Science and Health were read, Second Reader Mrs. A. Knoell reading from the Bible and First Reader F. G. Underwood reading from Science and Health. The services were concluded by silent prayer and the repetition of the Lord's Prayer.

The new edifice when completed will cost about one hundred thousand dollars, exclusive of the lot. Work was begun in April of this year. The foundation has been completed, and it is expected that the superstructure will be finished and ready for dedication by Jan. 1, 1908. The construction is of Bedford stone.

ROCKLAND, ME.

Last Sunday morning [Aug. 18], the Christian Science society of this city occupied their new house of worship, the church on Cedar Street, the use of which has been given them by the owner, Mr. David C. Smith, and reconstructed and put in fine condition by them at an expense of about three thousand dollars. The services, which were somewhat in the nature of a dedication, were conducted by the Readers of the church. There was a large congregation, every pew being filled, and it included a considerable number of Scientists from other cities and States, who are either here as summer visitors or came specially to be present on the occasion. All admired the beautiful church building, which has been put in thorough repair and finished and decorated in admirable taste.

The members of the Society esteem themselves most fortunate in obtaining this fine church property, with an expenditure of money that they can easily make, and so opportunely, the attendance at the meetings having made it absolutely necessary to secure more room than was afforded by the hall where they have worshiped. To have erected a building like this one and similarly equipped, in an equally good location, would have cost not less than twenty thousand dollars. Mr. Smith gives them freely what is essentially a perpetual lease of the premises, the only condition being that they shall be diverted to no other use, and the only cost to them is the expense of reconstruction, which does not much exceed three thousand dollars. Mr. Smith has also offered to have the frescoing done at his own expense, and has arranged for a very fine piece of work. His generosity is greatly appreciated by the members of the congregation. His brothers, Messrs. George W. and Francis Smith, have also aided them opportunely, and the latter contributed three hundred dollars to the repair fund. The people of our city, and especially those of the neighborhood, are very glad to see the old church fitted up and made presentable and again used as a place of worship. It is an ornament, a credit, and a material benefit to the city. A formal dedication of the building will be made in the near future.—*The Rockland Opinion.*

THE LECTURES.

COLORADO SPRINGS, COL.

An audience which packed Perkins Hall to its capacity, listened with almost spellbound interest on the evening of Aug. 8, to the lecture on "Christian Science, the Religion of the Bible," given by Judge Septimus J. Hanna of Colorado Springs. He was introduced by J. W. Wright, who said in part,—

The value of anything is determined by its usefulness. The value of a person's religion depends entirely upon the applicability of that religion to the problems of daiiy life. We may define religion as a faith in and reliance upon a supreme power infinitely greater than that of man or the phenomena of nature. Obviously, a satisfying and adequate conception of that power must comprehend its readiness and ability to govern wisely and well every condition of existence. If one's religion is to be anything more than a mere form it must be able to meet and solve every human problem—not some of those problems, but all of them—not occasionally, but every day in the year. It must bring spiritual purification, bodily soundness, and material supply.

Some two thousand years ago the Man of Sorrows, Jesus of Nazareth, bestowed such a religion upon the world. At that time it was dimly understood. The Christ—the Divine idea manifested by and transmitted through the man Jesus—banished sin, destroyed all manner of disease, restored sight to the blind, hearing to the deaf, life to the dead, and established peace. That this religion was not a mere theory is amply evidenced by the fact that Jesus' healing work was successfully carried on by his disciples for some three hundred years after the crucifixion. By striving to "attain that mind which was also in Christ Jesus," and by faithfully following the teachings of the Master, Christian Scientists are to-day, here and now, destroying sin, healing sickness in every form, and demonstrating prosperity. This is a strong statement, but it is nevertheless indisputable; for there can be no appeal from the positive testimony of thousands of persons who have been spiritually, morally, and physically healed in Christian Science. This new-old religion, this actual daily living of the Christ-spirit, has been and is being maligned and persecuted by some who do not understand it, but it is a noteworthy fact that throughout the civilized world fair-minded people are demanding fair play and a "square deal," for they concede that whatever produces purer minds, stronger and healthier bodies, and better material conditions is entitled to respect and consideration.

TESTIMONIES OF HEALING.

Christian Science first attracted my attention some fifteen years ago, and at that time, in the words of Paul, "I verily thought with myself, that I ought to do many things contrary to the name of Jesus of Nazareth." I was then pastor of an orthodox church, and some of my most prominent members, through the healing of a friend of theirs, became interested in Christian Science and finally left the church. I was sincere in believing that Beelzebub was at work, and that it was my duty to destroy the illusion and "rescue the perishing," but I found to my surprise that I could not bring them to feel the need of rescue, and finally left them to their fate. After this I read some Science literature, but always with a prejudiced thought, and so derived very little benefit. I did, however, become very much dissatisfied with the old theology and the slight effect its teaching seemed to have upon the masses, or even upon professing Christians. This led me finally to resign my pastorate and retire from the ministry. I did not realize at that time just what the difficulty was and why the so-called gospel seemed to have so little effect, nor did I realize why my own life seemed so inharmonious.

In conversation with an avowed infidel, about this time, he said to me, "If you people will only go out and heal a few sick people as Jesus and his disciples professed to do, I will believe, both in their work and in yours, and will become a Christian." I felt then, and have many times since, that the infidel had reason on his side and that it ought to be just as possible to heal the sick now as in Jesus' time, but, strange to say, I was not willing to give Christian Science the credit for doing this very thing. However, after spending a great deal of money, and after my wife had suffered the pangs of several deaths, in fact, after we had exhausted the resources of *materia medica* without benefit, we very reluctantly and faithlessly turned to Christian Science.

It is needless to tell Christian Scientists what we found. They know, but for the benefit of any who may read this, who are still clinging to the old way, I desire to say that we found health where for years we had known only sickness; happiness where we had known only suffering; harmony where before all had been discord; hope, faith, and peace where before despair and discouragement had reigned supreme. Not one of our family of seven has taken any medicine since we have learned the better way,—the Truth-cure,—and every one enjoys health and happiness. But, marvelous as the physical healing has seemed, I am even more forcibly impressed with the spiritual uplift that has come to us as a result of the study of this wonderful subject. The Bible has become a new book to us, and God an ever-present, all-inclusive reality,—the reality of Life, Truth, and Love. Christ Jesus said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest;" and again, in the vision of Saul who afterward became Paul, "Why persecutest thou me? . . . it is hard for thee to kick against the pricks."

I would say to a world of suffering humanity that there is a "balm in Gilead," and you may find it if you will; therefore, "acquaint now thyself with him, and be at peace."

D. E. ARMITAGE, Sioux City, Ia.

I was healed by Christian Science in March, 1900. I had never been strong, and when only a child I had frequent sick spells, but I was brought up to make the best of things, and not complain. When I broke down entirely in the fall of 1898, it was a great disappointment to me, one that I never got over until I learned of Christian Science. I had set my heart upon having a good education, then giving my whole time to the study of music, but the doctor thought I would never be able to study again. I was under our family physician's care for quite a while, but did not improve as my parents thought I should. I then went to a neighboring town and employed one of the best physicians, but with the same results, so that I became discouraged with doctors and medicine. In a few weeks I was very much worse than ever before, the old trouble being worse and other conditions setting in, so that medicine given for one seemed to go against another. My head was troubling me a great deal, and I was unconscious much of the time, but suffered more than I can tell. At the beginning of October, 1899, I was in bed and nearly all the time helpless. Another physician was called, but did not help me any more than the first one had done. They claimed that mine was one of the worst forms of nervous trouble of which they had ever known. They said there was organic disease also, and decided that I should go to a hospital for an operation at once. Then the second doctor we had employed was called again. He said I was not in a condition to go through an operation, and asked permission to give me a new remedy. This was done, but the treatment failed, and I was worse than ever, growing weaker every day. I was in such a condition that they said if I lived I would be either crazy or foolish, and they could not do anything to help me. Every one was expecting to hear of my death at any hour.

All hope was about given up when a friend came to my mother and asked her why she did not try Christian Science treatment. My parents asked the doctor what he thought about it, and he replied that they should try Christian Science by all means if they thought it would do me good, as doctors had done all they could for me. My parents had no faith in Christian Science, and I was too helpless to know much that was going on, but my father went to Rockland, eight miles from our home, and brought a Christian Science practitioner home with him. She returned to Rockland that night, and the next morning I was healed. I had one week's treatment, although I was healed at the first, and I never can tell of the rest, peace, and health that it brought me any more than I can tell of the suffering which I endured before that. The family physician then said that my healing would not be permanent, but it occurred on the first of March, 1900, and I gain in strength and health every year, while Christian Science meets all my needs in every way, and I am indeed grateful for it. The expense for medical treatment was very great, one hundred dollars being paid for the four weeks' trial of the last remedy. We paid five dollars for the treatment in Christian Science, and four dollars for a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy.

I wish that I could tell all that Christian Science has done for my parents and for me since I was first healed, and there is much more I could tell about my own sickness and healing. I must add that people speak of my looking well, and I am well, the old troubles are all gone. I studied music all last summer without any ill effects, and worked very hard at millinery during the fall and spring season. I can walk easily, and stand all that I need to, which I enjoy, as it was always hard for me before. I am going to continue the music lessons, and am very grateful that I can study again. I cannot find words that will express my gratitude for Christian Science, but I shall try harder each day to express it in my daily life, for I appreciate more and more each day of my life the work that Mrs. Eddy has done for us all.—GERTRUDE E. NEWCOMB, Warren, Me.

When I was a comparatively young man, an injury was produced in my left side from overstraining, and ten years later an accident caused the same trouble on the other side. This was an affliction indeed, and from it I suffered

Digitized by Google

for twenty-five years. I had never heard of a case like mine being cured, and the only remedy the physicians offered was to fit me with a truss to support the injured parts. I never arose in the morning until this was in its place, and never removed it until I retired for the night. All these years life seemed a burden with no hope of relief.

Until 1899 I had never heard of Christian Science. It was in the spring of this year that my attention was first directed to it by the successful treatment of my wife. I became very much interested in its beautiful teachings, and by the word of Truth spoken to my consciousness I was healed. Seven years have passed since then, and I am still rejoicing in my freedom from suffering with never a hint of its return. I was also healed of throat trouble. At the time of my healing I was working as clerk in the city health office, and when I told the health officer of my relief, he and several physicians associated with him declared that it was most remarkable. These men were my friends, and knew my previous condition because they had made examinations of my trouble and would gladly have offered some remedy to help me had any been known to them.

Christian Science has been to me in all these years a "gem of purest ray serene," and daily my heart is filled with deepest gratitude for the many blessings I have received from its glorious light. I am proud to acknowledge that I am a Christian Scientist, and have identified myself with Second Church of Christ, Scientist, of Houston, Texas.

R. G. ASHE, Houston, Texas.

It is with a heart full of gratitude to God, and to our dear Leader, Mrs. Eddy, that I give my testimony to the manifold blessings I have received through Christian Science. In 1902 I was suffering from rheumatic, catarrhal, and stomach trouble. I went on crutches most of that year, and in November became so helpless that I could not use the crutches. I had the best doctors, who were very kind and did all in their power to help me. Finally morphine was the only remedy, and I was fast becoming addicted to its use. At this time my daughter, who had been healed in Christian Science, prevailed on me to try its treatment. I did so, but very reluctantly. I went to a practitioner in Omaha, took treatment, but was helpless all that winter. In the spring of 1903 we moved to Nebraska City, and I soon began to improve. In June, 1903, the demonstration was made. In August I attended Christian Science services in this city, walking up a long flight of stairs. Now I walk twelve blocks and climb the stairs. I am sixty-eight years of age, am busy all the time, and do light housework. I am a member of The First Church of Christ, Scientist, in Boston, also of the branch church in this city. I am glad I live in the age in which our dear Leader stands at the heavenly gate, showing us the way.

MRS. LOUISA GILLMORE, Nebraska City, Neb.

In 1888 I had my first attack of severe rheumatic trouble, and was confined to my bed for six months. Two doctors attended me then, and when I got out on crutches I tried all kinds of so-called cures, among them daily treatment by electricity for three months. In about six months I was able to get along without crutches, and for ten years I had no serious attack to speak of, although I was often reminded that the disease was in my system. I think it was in 1898 or in 1899 that I was sent to a hospital, and spent six months of terrible suffering there. I was attended by several prominent physicians, besides the house physicians, and again I got out on crutches and used them for a year. My next serious attack was in 1902, and then I was relieved in five weeks. During these years I visited all the springs I could get to, such as Hot Springs, Ark., and several others. Besides this I spent a great deal for medicines, but nothing gave me a permanent cure. I tried Christian Science in March, 1904, and in May I was entirely free from the trouble. Not one trace of it appears, and I was not able to make such a statement truthfully from 1888 to May, 1904.

A great many Chicago people remember my condition, and many of my friends ridiculed the idea when I took up Christian Science; but all acknowledged that I was a good subject to work on, and I certainly was. The expenditure of a small sum for Christian Science treatment and literature has given me light on what I consider the most wonderful discovery of this age. I am now able to attend to any little complaint which may appear, without resorting to medicine, and am really enjoying perfect health instead of suffering torture. I pray to God that the good work may go on and reach many another sufferer who needs the help of Christian Science.—R. H. BAUM, Baltimore, Md.

I take this means of expressing publicly my heartfelt gratitude to God for His many blessings to me and mine. Until last summer Christian Science was unknown to me, but I am glad I have a friend who knew about it and was kind enough to tell me, as it has been a source of blessing ever since. Christian Science restored my mother to health when, according to the two attending physicians, she was dying of an abnormal growth. They gave her but a few days to live! According to their diagnosis the conditions were very dreadful, but she is now attending to her household duties, and takes pleasure out of a drive, whereas before she dreaded the thought of it. Twice this winter she has driven a distance of sixteen miles, and back next day, without harm to herself. I am glad to know that the Bible means just what it says: that Jesus Christ is "the same yesterday, and to day, and for ever," and that God does heal the sick as well as the sinful. Through studying Science and Health I have been quite free from colds and headaches this winter, although they had previously been of frequent occurrence and very annoying. In January my second child was born, and I derived much help from Science at that time. A Christian Science practitioner was called upon for aid, and although a doctor came his services were not needed, much to his surprise.

My heart is full of praise to God, and of thankfulness to Mrs. Eddy, who has done so much for humanity through her inspired writings. That I may live my gratitude is my desire.—MRS. SAMUEL J. BAGNALL, Jacksonport, Wis.

I was of a weak constitution, and ailing ever since I can remember. Lung trouble was in our family, my mother dying with it when I was four years old. As I grew older several diseases fastened upon me, and after my marriage, ten years ago, I failed rapidly. I was under the care of doctors constantly, and we lived very plainly, as all of my husband's means were needed for medical treatment. We lived in Oklahoma, but I got so low there that the doctor said nothing would do me any good unless it was a change of climate; so we came to Dakota. We came overland, as the doctor said the fresh air and camping out would be good for me, but I was miserable all the way and had to stop at several towns to consult a doctor. After reaching Sturgis, S. D., where we settled, this climate had no effect on me whatever, indeed I seemed to grow weaker and my ailments were aggravated. The doctor at Sturgis said he could not do anything for me, that I had a disease which could never be cured but by an operation, and that the heart action was very weak and the nervous system wrecked. We then moved to Sioux Falls and I took several months' treatment of a specialist on lung diseases, but kept growing worse. The specialist then told my husband that I had come to him too late, that I was beyond all medical aid; that

Digitized by Google

I might live two or three months, but he did not think I could stand it thirty days longer.

It was then that one of the neighbors called my attention to Christian Science and gave me some literature to read. As soon as I began reading, it gave me hope; in a few days I bought a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and began its study. It strengthened and helped me and has been my salvation. I attended the Christian Science services, and got acquainted with the First Reader. On one occasion I had a bad attack, and my husband telephoned her. She came and gave me treatment, and I was able to get out of bed soon after she left. Thereafter I persistently studied Science and Health, putting its teaching into practice, and I grew in strength daily. I have now been in Science a little over seven years and we have not spent one penny for medicine in that time. Before coming into Christian Science I was not able to do my work and often detained my husband from his. Now, my health is good and every one remarks how well I look.

This account of my healing may be poorly written, but these are facts, and I can give more if desired. We came to De Queen, Ark., eighteen months ago, settling in one of the so-called malarial districts. The people here predicted that I would certainly suffer from the prevalent conditions, but they have never touched me, and I have been the means of healing numbers of others through this truth, and proving to them that in truth no locality is unhealthy.

MRS. ZILLAH COOPER, De Queen, Ark.

I take great pleasure in adding my testimony to those of others who have found great benefit through Christian Science. I began investigating it four years ago, when I had been a sufferer for many years from various kinds of ills, and had depended wholly on medicine. I then decided to call on a Christian Science practitioner, and immediately placed myself under treatment. Her kind words and gentle guidance were like a ray of hope to brighten my path. There seemed to be a little doubt as to the sufficiency of my own understanding, but through the reading of the literature the light of Truth soon dawned upon my consciousness, and I realized for the first time the spiritual uplifting for which I had been seeking for many years. I have had many proofs of Truth's power over all error, showing me that God is a very present help in time of trouble.

Words fail to express my gratitude to God, and to our beloved Leader, Mrs. Eddy, for this blessed truth, and my constant endeavor shall be to "rise in the strength of Spirit to resist all that is unlike God" (Science and Health, p. 393), so that I may be able to lift the burden of fear from those about me.—IDA L. KNACK, Milwaukee, Wis.

Some eight years ago I was graciously led to seek the truth, as a last resort, after all material means had failed. I had been an invalid for fifteen years, and was ready to try any and all seeming means of help, having had eight physicians who used all forms of medicated baths, electricity, etc. I finally submitted to an operation with but little if any relief. At no time did the different physicians assure me that I would ever be a strong woman. I suffered an attack of severe nervous illness after the said operation, and continued to grow weaker, until as a last resort I turned unsolicited to Christian Science. My suffering was supposedly from neglect at childbirth. I was perfectly healed in seventeen treatments by a Christian Science practitioner of Eureka Springs, Ark., my former home. This is but one of the many beautiful demonstrations I had. I thank dear Mrs. Eddy, and all those who have encouraged me to press on, for I have indeed found God.—LAURA J. RICHARDSON, Seattle, Wash.

A little over a year ago I moved from Ohio to Chicago, where I secured a very lucrative position with a large merchandise house. Almost immediately I was afflicted with an alarming form of paralytic trouble. I took treatment with one of the best physicians of this city until Nov. 1, 1906, when I was advised to resign my position and go home for an indefinite period, at least six months. I did so, my parents' home being in Hamilton, Ohio. There I took treatment until December with one of the most noted physicians of that city, the only noticeable result being that I grew steadily worse.

On Dec. 13 I was assisted to the office of a Christian Science practitioner and healed in one treatment. Directly I began to increase in weight, improve in health and disposition, and for the first time began to believe that life was worth living—a belief I had not held for the preceding six months. I returned to Chicago on March 1, and resumed my old position. I was informed by several members of the firm that they had never expected to see me again.

While my healing may seem to the outside world as nothing short of a miracle, Christian Science is making such demonstrations daily. I am deeply grateful to God, and to Mrs. Eddy for the beautiful truth she has revealed to us. It has enabled me to gain my health and an understanding of divine Truth, Life, and Love.

CLARK D. NELSON, Chicago, Ill.

It seems to me that I can never be grateful enough for what Christian Science has done for me. In June, 1905, I went to a hospital, where I lay sixteen weeks after undergoing an operation for bowel trouble. Three of our best physicians said there was no hope for my recovery, and told my family to make the funeral arrangements, which they did at once, some neighbors preparing my clothes for burial. To the surprise of all I rallied after forty-eight hours, and was taken home in a helpless and hopeless condition. One of my limbs was terribly distorted and the other one was also badly drawn. I was told that I would probably never walk again. I began to take massage and was told that there would be no change in my limbs in less than a year. At this time I could sit in a chair but had no use of my limbs. I continued the massage about six weeks, with no improvement. My condition was such that it seemed to be impossible to use crutches, although one physician said that if I could I might be able to walk in a year and a half; but he also said that the disease with which I suffered intensely would doubtless grow worse as I grew stronger.

Before I had gone to the hospital a friend spoke to me of Christian Science, and I thought of it at different times, but felt that my husband might not approve. I discontinued the massage treatment before Thanksgiving, and again began to think about Christian Science. The week before Christmas my husband sent for a practitioner, as I was almost in despair. Hope and courage revived during my first interview, and I was assured that I had a right to walk because that was what my limbs were for; but I was told not to force myself to do anything, but to wait until I knew I could walk and then I would be able to do so naturally. My limbs began to straighten out, and on the sixth of January, while lying on the couch reading Science and Health, something seemed to say to me that I could walk, so I got up and did walk the length of the couch and back. My little son, who was in the room, shouted to his father in the next room, "Oh, mamma can walk!" so he came in and wanted me to walk for him, which I did, and later that same day for a doubting neighbor.

In two weeks there was marked improvement in my walking, and in April I could take a car and go anywhere.

Digitized by Google

I never used crutches nor a cane, as friends advised, depending entirely upon God. The diseased condition which had caused so much suffering was healed before I was really conscious of it. Now both limbs are perfectly straight and I walk anywhere I wish to go, and I do all of my own housework. When I first went out people looked at me in amazement, and could hardly believe it possible that I was alive and well. My back became straight and I was well. My sickness before I began Christian Science treatment had cost us about fifteen hundred dollars, with no hope of ever being well, and in this short time, with an expense of twenty-five dollars, Christian Science healed me.

Although my gratitude is very great for my own healing it is much greater for the healing of my son. He had had a serious nervous trouble that caused us extreme fear and anxiety for four years. During this time he had been unable to attend school regularly. After beginning Christian Science treatment he had only one slight attack of this trouble and was healed in two weeks. During this school year he has not been absent on account of illness and has done better work than ever before, proving how practical Christian Science is for the schoolboy as well as for older people. He is now full of life and joy, having lost much of the old fear which bound him so long. On account of our dear Leader's recent experiences my thought has awakened to what blessings have come to me through her loving work, and I gladly send this testimony as a token of my gratitude.—MRS. MOLLIE HOUSE, Decatur, Ill.

Early in the spring of 1906 my little girl was taken very suddenly with severe nervous trouble. For about three weeks she was totally blind and did not try to open her eyes or even to raise the lids. For as many months her knee-joints were greatly enlarged and there was also serious kidney trouble. She had Christian Science treatment and suffered very little, being patient and sweet during it all, and was perfectly healed in seven months. Another case was that of a relative whose illness was caused by strong drink. The patient had eight weeks' treatment from one of the best doctors in the town, who then said there was nothing more that could be done, and that the patient could not live more than a few days. I asked the same practitioner to take the case, and she did, with the result that in three weeks' time every trace of the disease was removed. I thank God for Mrs. Eddy and for Christian Science.

MRS. J. B. MOSSMAN, Milwaukee, Wis.

A little more than a year ago, owing to a most severe mental struggle respecting business matters, I was actually obliged to come to Christian Science for help, from the fact that I had tried to find it elsewhere with no success, and under existing circumstances help at that time was absolutely necessary. During this trouble Christian Science had many times been mentioned as a panacea, but the very thought of help from such a source was inwardly scorned, until as a last resort I said I would try it and see what it could do. Having all my life been an earnest worker in my own church, and a member of it, I had always thought of Christian Science as a work not of God. As I approached it for the mental help alone, I secretly decided that I should be very cautious and not allow anybody to influence me into this seemingly strange religion; hence the spirit with which I came to Christian Science for help. Nearly all my life, and especially during the last year, I had many times wondered why I could not live sincerely, uprightly, and honestly; why there should, of seeming necessity, be so much sin, sickness, and sorrow, with no apparent relief; why we did not have in our midst the same blessed healing truth that Jesus taught when he was on earth. Had any one told me that Christian Science could answer each and every one of these questions, that there and there alone might be solved the problem of all this apparent discord, I should have again scorned the answer. But at last God alone led me to this blessed truth, and it is with the earnest desire that this testimony may help some dear one who is struggling with material beliefs, as I was, that I write these few sincere words of gratitude.

The many blessings my family and myself have received since coming into this great truth, words can never express, only the heart can feel! I can only say to those who are in need of help, either physical or mental, not to halt any longer between ignorant opinion and prejudice, but step out and forward; seek and learn, each one for himself, what this great truth is as it is taught to-day in Christian Science. God is leading and guiding each one who desires the truth, and He alone can heal and satisfy. Why are we so unwilling to turn from human opinions and place our trust wholly in God? It is because in our past teaching we have never been given the rule by which we might follow the first and greatest of all God's commands, "Thou shalt have no other gods before me." How many times during the past have these words sounded in our ears! The first and greatest commandment is this, "Thou shalt love [and trust] the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself." How can we possibly obey the second without first learning to live the first part of this commandment?

This great truth was first brought to us by the dear Christ Jesus, whom our Leader describes as "the most scientific man that ever trod the globe" (Science and Health, p. 313). To-day it is again in our midst, clearly given and explained in "Science and Health with Key to the Scriptures" by Mrs. Eddy. We cannot read this book without thinking of the life that Jesus lived in order that this healing truth might be given to all mankind. We all love and honor our Leader, and with one accord we lift up our hearts in loving gratitude for the great work she is doing in our midst. We are enabled, through her teachings, to know that she is being constantly protected and guarded by the one God and Father of us all.

My sincere gratitude for this truth can only be expressed by endeavoring day by day to live the life taught therein, thereby enabling myself and others to know what this life of Love is. It is in Christian Science, and here alone, that I am at last slowly but surely learning to know what is this love that passeth all human understanding.—ALICE F. WILLS, E. Orange, N. J.

[Written for the *Sentinel*.]

JUST WAIT.

HAROLD SUSMAN.

Do all your days seem dark and drear,
And do you shed the bitter tear?
Are you affrighted, full of fear?
Just wait!

Are you disheartened and dismayed,
Are you afflicted and afraid,
Are you berated and betrayed?
Just wait!

For far away will flee the foes,
And all the weary, wretched woes
Will be replaced by joys for those
Who wait!

FROM OUR EXCHANGES.

[*The Christian World*, London.]

The primitive believers, looked at from the standpoint of our hard-shell orthodoxies, were in a singularly destitute condition. They had no systematized theology. The great creeds were non-existent. A hundred things connected with them had not as yet been thought out. They were without the New Testament, in the sense in which we have it. It did not exist for them as a complete and separate volume, far less as an inspired volume. And the young community had against it, not only the governments, but the latest world-culture of the time. Yet against these odds, and all destitute, as it seemed, of the things the Church now regards as so essential, it won its fight, hands down. And it won upon the hard facts of its own case. It won, not by orthodoxy, but by love and enthusiasm genuine and irresistible because so entirely well-founded. The Master the disciples followed was their one sufficient reality, felt at every moment by the breathing of his spirit into them. Here, surely, is the open secret for our time. When criticism has done its utmost and its worst: when it has dissected the creeds, and exhibited the fallible humanness of the New Testament, what then? It leaves us precisely, in these respects, where the first Christians found themselves. The position only further requires that we possess their spirit, derived from their communion with the Master, and we have the materials which ensured their victory.

[*The Baltimore* (Md.) *Sun*.]

A good, vigorous, preacher who holds fast to the faith and who talks to the people as a man talks who believes what he is saying—a preacher of this kind need not bother himself about having his trousers properly creased. The preacher who believes what he preaches and is not afraid to preach what he believes, who looks after the lost sheep, who goes out into the mountain to seek those that are astray, who gives his attention to the men of his congregation who need it, and does not confine himself exclusively to saving the souls of the women, most of whom are better and purer and with a more substantial faith than the preacher himself—such a preacher is a power for good which is beyond estimate and is in demand by the church. The churches are looking for such men.

[*The Examiner*.]

Firm adherence to truth is not sectarianism. The essence of sectarianism is adhesion to error. The Pharisees were sectarians of the deepest dye because they taught for doctrines the traditions of men, and thereby nullified the commandments of God. Allied to them are all who cling to ancient traditions, not because they are true, but because they are old. But age does not make error truth, any more than a mossy covering makes a mossy stump a living tree.

[*The Christian Life*, London.]

The true function of the Church is that of a character builder. It exists to emphasize the significance of the individual, to develop the spiritual capacity of human units, to awaken in each soul a sense of its affinity with its Creator, and of the infinite and everlasting Love which ordains its destiny.

[*The Outlook*.]

To do the will of God on earth, to make it as much like heaven as possible, but always to have the larger, infinite life beyond and the joy "of going on and not to die" —not until this glory is set before human souls can they be in any degree satisfied with life and its possibilities for themselves and for others.

THE CHRISTIAN SCIENCE TEXT-BOOK

"SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," CONTAINING MANY IMPORTANT CHANGES AND ADDITIONS BY THE AUTHOR.

THE OLDER EDITIONS WILL NOT BE TAKEN IN EXCHANGE.

CONCORDANCE TO SCIENCE AND HEALTH.—This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Price, single copy, prepaid, $1.00; six copies to one address, $5.00; twelve copies to one address, $9.00.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CARDS IN THE GERMAN PERIODICAL.—Application blanks will be supplied by The Christian Science Publishing Society to practitioners who wish their names and addresses inserted in the advertising columns of *Der Herold der Christian Science*. These applications should be properly endorsed and forwarded to the Society. The rate for advertisement will be $2.00 for the first line, and $1.00 for each additional line. It is desirable that those who offer their names in this way should be able to communicate with patients and inquirers who speak the German language only.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum. One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12 1-2 cents, postage paid.

Der Herold der Christian Science

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading-matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada, and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Pamphlets

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D., 30 pages.
